Common Stock Dividend No. 83

Notice is hereby given that a Quarterly Dividend of two per cent. for the three months ending the thirty-first day of March, 1920, being at the rate of eight per cent. per annum, has been declared on the Common Stock of the Company.

Preference Stock Dividend No. 48

Notice is also given that a half-yearly Dividend of three and one-half per cent. for the six months ending the thirty-first day of March, 1920, being at the rate of seven per cent. per annum, has been declared on the Preference Stock of the Company.

Bonus

Notice is also given that a Bonus of two per cent. has been declared on the Common Stock of the Company.

The above Dividends and Bonus are payable on and after the first day of April, 1920, to Shareholders of record at the close of business on the thirteenth day of March, 1920.

By order of the Board.
W. H. NESBITT,
Secretary.
Toronto, February 28th, 1920. 97

CANADIAN GENERAL ELECTRIC COMPANY, LIMITED

ANNUAL GENERAL MEETING

Notice is hereby given that the Annual General Meeting of the Shareholders of the Canadian General Electric Company, Limited, will be held at the Head Office of the Company, corner King and Simcoe Streets, Toronto, on Monday, March 22nd, 1920, at 12.00 o'clock noon, for the purpose of receiving the Annual Report of the Directors, the election of Directors for the ensuing year, and for the transaction of any other business which may properly be brought before the meeting.

By order of the Board.
W. H. NESBITT,
Secretary.
Toronto, February 28th, 1920. 98

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of two per cent. (2%) on the Common Stock of the **Dominion Textile Company, Limited**, has been declared for the quarter ending 31st March, 1920, payable April 1st to shareholders of record March 15th, 1920.

By Order of the Board.
JAS. H. WEBB, Secretary-Treasurer.
Montreal, 23rd February, 1920. 89

CANADIAN CAR AND FOUNDRY COMPANY, LIMITED

Notice is hereby given that a dividend of one and three-quarters per cent. (1¾%) on the Paid-up Preference Stock of the Company, for the quarter ending March 31st, 1920, has been declared payable on the 10th day of April, 1920, to Shareholders of record at the close of business on the 26th day of March, 1920.

By order of the Board.
A. C. BOURNE,
Secretary.
Montreal, February 28th, 1920 96

INTERNATIONAL PETROLEUM COMPANY LIMITED

To the Shareholders of International Petroleum Company, Limited:

Notice is hereby given that the Board of Directors of the Company have resolved to issue 1,353,401 shares of £1 each (par value $5.00) of the Common Stock of the Company at the price of $5.00 (five dollars) per share, payable in New York funds at par.

The above issue of new stock will be made on the basis of share for share of the Preference and Common Capital Stock issued and fully paid up as at the close of business on the 5th day of March, 1920, and each Shareholder is entitled to subscribe and pay for one new Common Share in respect of each share held by him.

Holders of Bearer Share Warrants who present their Warrants at the office of the Company at 56 Church Street, Toronto, Canada, or at The Farmers' Loan and Trust Company, 16-22 William Street, New York City, U.S.A., on or before the 15th day of March, 1920, are entitled to subscribe and pay for new shares on the terms mentioned above.

All Bearer Share Warrants presented as aforesaid must be accompanied by certified cheque (that is, cheque duly certified or accepted by a bank) or bank draft made out to the order of The Farmers' Loan and Trust Company for account of International Petroleum Company, Limited, and payable at par at a bank in New York City, U.S.A., for the full amount due of $5.00 per share on each new share subscribed for. The Bearer Share Warrants presented as aforesaid will be stamped, "Ex Rights, 1920," and returned to the patries presenting them, together with share warrants for the new shares subscribed and paid for.

Failure to exercise the rights to subscribe for new shares within the time limit and in the manner aforesaid will subject these rights to forfeiture.

The Books of the Company will be closed from the 6th day of March, 1920, to the 20th day of March, 1920, inclusive, and no Bearer Share Warrants will be "split" during that period.

No warrants for "rights" will be issued, and shareholders who desire to spilt warrants in order to sell part of their holding to enable them to pay for the new shares must do so on or before the 5th March, 1920.

Holders of Bearer Share Warrants are recommended to send their warrants, together with their remittance, by Registered Mail, insured, as the Company is not responsible for Share Warrants lost in transit, and duplicate Share Warrants cannot be issued.

By Order of the Board.
J. R. CLARKE, Secretary.
56 Church Street, Toronto, Canada,
23rd February, 1920. 87

THE CANADA LANDED AND NATIONAL INVESTMENT COMPANY, LIMITED

DIVIDEND NO. 132

Notice is hereby given that a Dividend of Two and One-Half Per Cent. (being at the rate of ten per cent. per annum), on the amount paid up on the Capital Stock of this Company, has been declared for the quarter-year to the thirty-first day of March, 1920, and that the same will be payable at the office of the Company, 23 Toronto St., Toronto, on and after the first day of April, 1920, to Shareholders of record at the close of business on the seventeenth day of March, 1920.

By order of the Board.
EDWARD SAUNDERS,
Managing Director.
Toronto, 25th February, 1920. 94

RECENT FIRES

Admiral, Sask.—February 26—Demel's general store and Gravel's drug store were badly damaged. Estimated loss, $20,000, covered by a small insurance.

Alexandra Bay, Ont.—February 27—House-boat, owned by J. H. Brown, was destroyed. Cause, explosion of coal gas. Estimated loss, $5,000, partially covered by insurance.

Brandon, Man.—February 27—Langham Hotel and a garage were damaged. Estimated loss, $10,000.

Canning, N.S.—February 29—General store, owned by A. F. Bert, was destroyed. Contents were badly damaged. Estimated loss, $30,000.

Deseronto, Ont.—March 1—Town hall, including the town clerk's office, public library, reading-room, council room and the police headquarters were damaged.

Fort William, Ont.—February 26—The Kaministiquia Garage, owned by George Dolcettie, 154 North May Street, was damaged. Cause unknown. Estimated loss, $60,000.

Ottawa, Ont.—February 25—Government peat plant, Booth Street, together with the stock and machinery, was damaged. Cause unknown. Estimated loss, $7,000.

Peterboro', Ont.—March 3—Apartment house belonging to the J. R. Bell estate, situated on Hunter Street, was damaged. Estimated loss, $20,000.

St. Fereol, Que.—March 1—Home of Gaudiose Dupont, about thirty miles north-east of Quebec City, was destroyed. Six deaths.

Sydney, N.S.—February 26—Old Central School, corner of George and Dorchester Streets, was damaged. Estimated loss, $12,000.

February 27—Bank of Nova Scotia block, occupied by Oak Hall establishment, legal office of A. B. Gunn, K.C., Gillies and Hill and the home of the Sydney Council Knights of Columbus, was destroyed. Cause unknown. Estimated loss to the Bank of Nova Scotia, $50,000. Insurance carried, $30,000. The other losses were as follows: Oak Hall, $70,000, with $21,500 insurance; A. B. Gunn, $25,000, with $5,000 insurance; Gillies and Hill, $9,000, with $2,000 insurance; Knights of Columbus, $5,000, with $1,400 insurance.

Toronto, Ont.—February 26—The Purity Water Spring building, about a quarter of a mile east of the Old Mill bridge on the Humber, was destroyed,

February 28—Three-story brick building at 208 Spadina Avenue, occupied by the Hebrew Amalgamated Association, was damaged. Estimated loss, $1,500. House occupied by J. B. Hastings, 91 Wood Street, was damaged. Cause unknown. Estimated loss, $300. House occupied by E. Hambly, 229 Wellington Street West, was damaged. Cause, explosion of water heater in a stove. Estimated loss, $250. Coady Carriage Works, Queen and Sherbourne Streets, was damaged. Estimated loss, $10,000.

February 29—Factory belonging to George H. Hees and Son on Dovercourt Road was damaged. Estimated loss, $1,000. Structural steel plant of the Reid and Brown foundry, 63 Esplanade Street, was destroyed. Cause, hot cinders. Estimated loss, $50,000, covered by insurance.

ADDITIONAL INFORMATION CONCERNING FIRES

Edmonton, Alta.—February 8—Building and contents, occupied by the Hemphill Trade Schools, Ltd., and owned by the Great West Garment Co., Ltd., was destroyed. Cause, presumed to have been from short circuit of electric battery on automobile. Estimated loss, $13,000. Insurance carried in the following companies: Globe Indemnity Co., $1,500; Providence, of Washington, $1,200; Rochester Underwriters, $1,200; Nova Scotia, $1,500; Liverpool, London and Globe, $700; New Hampshire, $1,000; Westchester, $500; Niagara, $2,400; Niagara, $3,000. Total, $13,000.

Manitoba.—According to the fire chief's report, the fire loss of the province in January was $179,935, as compared with $80,193 for the corresponding month in 1919, an increase in the fire loss of $99,742. Winnipeg's fire loss for January was $60,681 in 92 fires, as compared with $23,352 in January, 1919, in 62 fires. The chief losses of the month in Winnipeg were sustained by Reimer, Ltd., wholesale grocery and produce merchants, 146 Princess Street, $12,000, and A. Provisor, furniture manufacturer, 605 Dufferin Avenue, $10,600. Other places and risks contributing to the aggregate loss were: Melita, where a general or spreading fire occurred, destroying three buildings with a loss of $38,023, cause, defective furnace; a fire in the Le Pas Lumber Co.'s frame boarding-house, Le Pas, with a loss of $10,300, cause, overheated stove; and the Darlinford elevator fire with a loss of $37,000, cause unknown. Stoves, furnaces and chimneys were responsible for 41 fires with a loss of $82,960, more than 50 per cent. of the total fire loss of the province. Eleven fires reported as of unknown origin caused a loss of $50,399. During the month four fatalities were reported.

Toronto, Ont.—February 10—Sash and door plant of the Hope Manufacturing Co., Ltd., was damaged. Cause unknown. Estimated loss, $37,000. Insurance carried in the following companies: London Mutual, $2,000; London and Lancashire, $10,000; two other companies, $3,000; Globe Indemnity Co., $900. Total, $15,900.

Vancouver, B.C.—In the report for January, the fire chief says: The total loss sustained by fire for the month was $5,400, of which amount $5,065 (insurance) was paid, leaving the property loss above insurance at $335. The total value of the property at risk was $515,050, with insurance to the amount of $370,200 carried on same. The following shows the cause of fires, alarms, etc.: Backfire (carburetter), 1; carelessness with matches, 1; children playing with matches, 1; chimney fires, 15; coal piled around hot furnace, 1; defective chimney, 1; defective sprinkler system, 1; defective stoves, 2; electrical origin (short-circuiting wiring-light poles, auto and elevator motors), 9; false alarms, 14; gasoline exploding, 2; hot ashes placed in wooden receptacles, 1; hot ashes placed among slack coal, 1; lighted lamp placed near gasoline, 1; match igniting in clothing in suit-case, 1; match igniting in paper on floor, 1; oil stove catching fire, 1; out of city limits, 1; overheated stove pipe, 1; rubbish fires, 1; smoke scares, 2; smoking in bed, 1; spontaneous combustion, 1; unprotected stove pipe, 1; unknown, 2.

Weston, Ont.—February 25—Building and stock belonging to Willys-Overland, Ltd., was badly damaged. Cause, supposed to have been from ignition of gases in electric oven. Estimated loss, $25,000. Insurance carried in twenty-two mill mutual companies, $3,000,000. Brokered through Arkwright Mutual Fire Insurance Co., Boston, Mass.

Windsor, Ont.—February 5—Main building of King's University was destroyed. Estimated loss, $93,000. Insurance carried, $47,500. Cost to replace it, $200,000.

NORTHWESTERN LIFE ASSURANCE COMPANY

The annual report of the Northwestern Life Assurance Co., Winnipeg, which appears in this issue, shows that the company has had another year of progress. The total assets are shown as $430,354, but if assets of all kinds were carried into the statement the company could take credit for $583,378, or $153,024 more than their balance sheet shows. Their surplus would on this basis be $119,833 instead of $91,633. Death claims have again been light, amounting to only $9,500. The company's report now shows resources of nearly a million and a half dollars to protect the liability of $339,000; while the revenue for the year was $137,000, and $78,000 of this was carried to reserves and surplus account.

The company has purchased a site for a home office building, the contract has been let and construction will proceed at once. During the year the former inspector of insurance for Manitoba, J. O. Turnbull joined the staff of the company.

It is understood that Royal Securities Corporation, Limited, has withdrawn from the Bond Dealers' Association of Canada.

Adjustment of Municipalities' Finances

Debt Limitations, Based on Assessment and on Tax Rate, Did Not Prevent Some Defaults—Population Basis Adopted in Manitoba—Provincial Control and Responsibility—Western Issues Now Looked Upon With Doubt

By E. G. LONG

THE municipal debenture has always been considered as the highest type of investment security next to the obligations of governments. A few recent instances of unfortunate municipal financing have resulted in somewhat widespread criticism of Canadian municipal debentures in general, and those of western towns and cities in particular. Is this criticism, in its general application, sound; or is it not rather the result of magnifying a few isolated cases; of losing the proper sense of proportion?

My endeavor will be to outline shortly the present municipal financial situation in the western provinces, having regard particularly to the affairs of municipalities in default. Throughout Ontario and the east there has been no suggestion of unsoundness in regard to municipal obligations. Prior to the war, there had been no default on Canadian municipal debentures, in the strict sense of the word. The cities of Hamilton and Brandon and the town of West Toronto had many years ago, by reason of special circumstances, received consideration from their creditors, but in each case a satisfactory extension arrangement was made and carried out, so that the bondholders suffered no loss ultimately of either principal or interest.

Debts Limited Through Assessment or Taxes

The fundamental basis of municipal credit, is the taxing power delegated to the municipality and exercised by the collection of rates from assessable property. In all Canadian provinces the limit of borrowing power has been fixed with reference to the assessable property on which such taxes could be imposed. This limitation has been dealt with in two ways: The one, by fixing the maximum annual tax rate which would be levied (this is the system in force in Ontario); the other, by fixing the total debt at a percentage of the amount of assessable property. In the western provinces this latter course was adopted.

Toward the end of 1913 and the beginning of 1914 the tide of real estate speculation commenced to ebb and the outbreak of the war emphasized this very heavy shrinkage in inflated values, especially in the west. The effect on many of the smaller and younger municipalities was very serious and was felt more or less severely even in the larger cities. In addition to the depreciation in property values, a general business depression followed. This tended to a reduction in population, which was intensified later by the drain to meet war requirements. The combined result was an impairment of the fundamental security underlying municipal debentures. An acute stage was reached about 1916 and 1917, when several western municipalities, from the small school district to a city the size of Prince Albert, experienced conditions rendering it impossible for them to meet the financial obligations which they had incurred. This was the situation which had to be dealt with and which is still a pressing and perplexing problem.

The older provinces of the east were not affected by adverse conditions, at least to an extent sufficient to produce marked surface indications. Conditions in Manitoba had become generally stabilized by 1914. There was at least one municipality in Manitoba which caused considerable uneasiness, but timely assistance from the government in an unostentatious way saved the situation, with the result that there has been no serious difficulty in that province.

Most Difficulty in Middle West

The provinces of Saskatchewan and Alberta suffered most severely from the real estate exploiter. Urban areas were extended by the addition of outlying sub-divisions to an extent that, at the present time, appears absolutely ludicrous. Apparently every village, town and city confidently expected to become a thriving metropolis in the course of a few years. Deluded with this idea, expenditures for public improvements were undertaken with a lavish hand and with no regard to the necessity therefor. Debts piled up in many places to an extent far beyond paying ability and taxes ran very heavily in arrear.

In the west, during the real estate boom, values were continually rising, giving a corresponding increase in municipal borrowing power. The average property owner made no objection to a high assessment, which gave him a basis for demanding a high price for his property. Enormous amounts of land, in most cases the majority of it, were held by non-residents and by speculators. Comparatively speaking, only a small proportion of the names on the assessment rolls represented individuals permanently located in the municipality. The general feeling was that a high assessment, with a lower tax rate, was much preferable to a lower assessment fixed at a point near real values, with a higher annual rate. There can be no doubt of this psychology regarding assessment and taxation. It has been manifested and recognized as an important factor in dealing with the re-adjustment of municipal affairs.

Single Tax Failed Under Strain

With a mistaken idea that building and construction would be stimulated, the single tax was generally adopted throughout the west. As long as there was real estate activity, the fallacy of the system did not become apparent. It was popular with the residents, as it relieved them from taxation on their buildings and permitted the shifting of a substantial burden to non-resident owners. The discrepancy has been strikingly demonstrated in practically all cases where a careful analysis of assessment and taxes have been made.

---

*An address before the Dominion Mortgage and Investments Association, Toronto, March 5th, 1920.

Provincial Control Established

The governments of Saskatchewan and Alberta were apparently impressed with the necessity of some supervision over municipal borrowings and the Local Government Board was created in Saskatchewan in the year 1913 with wide powers for such purposes. The approval of this board must now be obtained before a Saskatchewan municipality can borrow money. The Public Utility Commission of Alberta was created in 1915, with similar powers. In 1916 an amendment to the Manitoba Municipal Act required all money by-laws of urban municipalities to be submitted to the Municipal Commissioner before final passing. A bill is at present before the British Columbia legislature providing for the creation of a Local Government Board, vested with similar control over municipal financing. Had there been this supervision prior to 1913, it is probable that a great deal of the imprudent borrowing now proving so burdensome, would have been avoided. A contrary view has unfortunately recently shown itself, particularly in the west, where there is a growing feeling that local municipalities should have more complete autonomy and that the government should not interfere with their affairs, except where general provincial issues are involved.

Creditors Can Only Sue

In 1916 and 1917, some few municipalities in Alberta and Saskatchewan found themselves unable to meet their debentures obligations. It was apparent that no practical results could be attained by bondholders taking legal action in the courts to recover the amount of their over-due coupons. The question requires handling along broader lines. A municipality in financial difficulty is an extremely unsatisfactory proposition to deal with. Creditors cannot wind it up, dispose of its assets, pay themselves so many cents on the dollar and try and forget their loss. There is nothing to be wound up, and the rights of the inhabitants must be taken into consideration. As a result, a peculiar situation is found which is not present in the average problem of corporation finance. Local pride, local prejudice, local politics and the transitery existence of the personnel of the governing bodies and of local officials make the handling of much a situation one of extreme difficulty.

Having had some slight experience along these lines, I have felt very often, when criticism has been made by bondholders, that it would be an illuminating experience for such critics to meet personally these difficulties when negotiating with municipal representatives. You simply cannot act, for instance, as you would in handling a default under a corporation bond-mortgage. The only remedy by way of ordinary court procedure open to municipal bondholders in case of default was to one on their bonds or interest coupons. Judgment would follow in due course. If not paid, this judgment could be enforced by the sheriff taking the assessment roll and striking a rate on the assessable property shown therein sufficient to produce the amount of judgment, interest and costs. The rate would then be entered against each property shown on the roll and would be collected by the proper municipal officers with the next tax collection. In this manner, the creditor was enabled to exercise the taxing power for the purpose of collecting his debt.

Theoretically, this protection appeared ample; practically, it has proved to be of doubtful value. When a municipality is unable to pay its debentures, its affairs have reached a very serious condition. Experience has shown that in most instances where court action has been considered, the collection of a judgment debt would necessitate such a heavy rate as to be virtually impossible of realization. Where creditors have resorted to these extreme measures, it has been found that taxes cannot be realized from a substantial part of the assessable property. As a result, the rate imposed by virtue of the judgment would be paid by only a small proportion of property owners and, if placed at a figure high enough to produce the money from the sound-paying assessable property, it would amount virtually to confiscation. Ordinarily, the general rate in such cases is fairly high and the effect of increasing it is to augment the arrears of taxes and the amount of property which, through tax proceedings, is thrown back upon the municipality. Ultimately, only a small amount of actual cash can be collected.

Saskatchewan Local Government Board

The financial difficulties and actual defaults in certain municipalities in Saskatchewan and Alberta caused the government of these provinces to pass legislation, with a view to meeting the situation. In Saskatchewan, by statute of 1916, special powers were given to the Local Government Board to deal fully with any municipality which was in default or in a position which would likely result in it defaulting on its debenture indebtedness. Action can be taken by the board only upon a petition signed by sixty per cent. of the creditors. On receipt of a petition, the board is vested with very wide powers to deal with all parties and interests concerned. It can order the refunding of existing debentures, with an extension of time and alteration in the rate of interest and, generally, can affect the rights and obligations of the municipality and its creditors in any way which the board considers necessary under the circumstances.

The act has been criticised in this latter respect. Creditors are somewhat loth to apply to the board when they know that, by so doing, they place themselves unreservedly in the board's hands. The objection is largely a theoretical one, as practical experience with the operation of the statute has shown a very fair and reasonable attitude by the board, which has in all cases consulted and given effect to, the wishes of bondholders when reorganization of municipal securities was being carried out.

Alberta Amelioration Act

In Alberta, no definite action was taken until last year when the Amelioration Act was passed, under which a commission, composed of three eminent judges (including the chief justice of Alberta) and a fourth member of wide business and municipal experience was appointed, with authority to investigate the affairs of any municipality on the petition of either the corporation or of twenty-five per cent. of its bondholders. The commission is clothed with the widest powers to deal with any matter brought before it, and to propound a scheme to meet the financial difficulties in any municipality. There must be public hearings at which the corporation, creditors and all interested parties are entitled to be heard. The recommendation of the commission does not become effective until approved by the holders of sixty per cent. of the bonded indebtedness and confirmed by order of the lieutenant-governor-in-council. These conditions make the Act a distinct improvement on the Saskatchewan statute, preserving to the majority of the bondholders their right of control and protecting the general interests of the province.†

Borrowing Should be Supervised

The foregoing may give some idea of the typical developments and conditions in connection with municipalities which are or have been in financial trouble. The general situation seems to require treatment in several fundamental ways: First, there should be a more adequate check on municipal borrowing. This could be, and is being, accomplished through stringent supervision exercised by the Local Government Board in Saskatchewan and the Public Utilities Commission in Alberta; secondly, there should be a modification in the basis on which debt limitation is fixed. The system heretofore obtaining under which borrowings are limited with reference to assessment, has been proved unsatisfactory through the ease with which municipal boundaries can be extended and property values inflated; Thirdly, a tax on improvements should be made compulsory. The single tax has proved an absolute failure through inability to produce the required revenue; Fourthly, the provincial governments should recognize that they have a responsibility towards municipalities which are unable to pay debentures held by *bona fide* investors, and practical assistance within wise limits should be rendered so that these innocent investors will not suffer any loss.

---

†Mr. Long here described the settlements reached with Prince Albert, Sask., and Wetaskiwin, Alta., which have already been reported in *The Monetary Times*. He also described the difficulties of Athabasca, Alta., which have not yet been adjusted.

Debt Limit Based on Population

As the result of an exhaustive examination into municipal assessment and municipal debt throughout Canada and in many of the towns and cities in the States, a plan has been formulated by Mr. W. L. McKinnon, of Toronto, as a substitute for the present method of fixing the borrowing limit. The basis of this plan is a debt limitation based on population instead of on assessable values. It has been shown that municipalities having a population of not more than 2,000 can readily sustain a debt of $100 per capita; municipalities of between 2,000 and 10,000 population a debt of $150 per capita and municipalities of over 10,000 a debt of $200 per capita. Involved in this per capita debt limitation is the requirement of a standard assessment of five times the amount of the debt, for instance, in places of over 10,000 inhabitants, the standard assessment should be $1,000 per capita. The advocate of this plan considers that if restrictions on assessment and borrowing based on these standards were imposed, it would be practically impossible for a municipality to become financially involved. The various provinces have been approached with a request to adopt this basis in their municipal acts, but so far, the province of Manitoba is the only one which has accepted it. Since its adoption there have been practically no urban debenture issues in Manitoba and, consequently, it has been impossible to determine the practical value of the scheme.

Attitude of the Provinces

The most important question at the present time in regard to existing defaults in western municipalities, is the attitude of the provincial governments. Representations have been made to the Saskatchewan government as to the necessity of assisting in that province, but to date the government has not seen its way to render any financial aid, either by cash contribution, government guarantee or otherwise, in regard to general municipal debenture debts. It undoubtedly recognizes the serious condition of affairs and the hope is entertained that it will yet afford some assistance to embarrased municipalities in that province. In the province of Alberta the government has not, as yet, seen fit to render any assistance in like cases, but a situation such as that obtaining in Athabasca has brought the matter up so acutely that it is not unreasonable to expect a very careful consideration by the government of the whole question of municipal defaults in the province.

In Alberta the government appears to recognize the necessity for some definite action. Matters have reached such a stage that they can hardly be allowed to drift indefinitely and it is believed that the whole question is now under advisement and may be brought up at the present sittings of the provincial legislature. In this connection a very interesting press report comes from Calgary that Hon. Mr. Mackay, minister of municipal affairs for Alberta expressed himself quite positively as being in favor of the government attempting to aid municipalities which were in difficulties, as otherwise the effect on the credit of all municipalities would result in a greater loss than the amount of the assistance rendered.

The objection usually advanced is that if aid were given to one municipality a dangerous precedent would be established, and the government would be over-whelmed with demands from other places who felt that their loads also should be shouldered by the province. The application of the standard debt and assessment plan previously mentioned, might prove very useful in establishing a basis for the burden which the municipality itself should bear, government assistance to be given only in respect of obligations exceeding these standard limits. A careful examination of the situation of the various towns in Alberta, shows that the excess debt over the standard of $100 per capita is about $860,000. Included in this is the debt of some $100,000 of the town of Tofield, which has been provided through a reorganization under the Amelioration Act. This item will reduce the total excess to $900,000 in round figures. The annual charge necessary to provide for this amount, with interest at six per cent., spread over a period of thirty years, would be approximately $58,000. There is no serious indication of financial trouble in a number of these municipalities with a debt exceeding the standard, so that if the plan were adopted the payments involved would be considerably less than these figures which are estimated at the maximum requirements. The money involved is trifling compared with the benefit which would follow not only for the towns concerned, but for the province at large through the improvement of general credit.

General Credit is at Stake

Unless some action along these lines is taken to rehabilitate the standing of these municipalities, the general credit of western municipalities will surely suffer to a marked degree, and the loss sustained through the lowering of the prices obtainable for western municipal debentures will enormously exceed the comparatively trifling amount which would be required to make good the existing defaults.

Example of Kansas

An interesting parallel arose in the state of Kansas, whose resources are almost entirely agricultural and, in such respect, very similar to the provinces of Alberta and Saskatchewan. In the early nineties a number of municipalities in Kansas defaulted in payment of their bonded indebtedness. No relief was given by the state, possibly through lack of constitutional powers, and each municipality was left to work out its own salvation. As a result, the state of Kansas acquired a reputation throughout the investment world of defaulting on its municipal obligations and the credit of its municipalities was very seriously affected. Practically all investment houses and individual investors generally, declined to buy Kansas municipal bonds, and it was impossible to dispose of them, except at an abnormal yield rate. For many years Kansas municipal debentures, not only of the defaulting municipalities, but of all the municipalities in the state, were offered at prices to yield as high as eight per cent., and even then there was practically no market for them. At the same time, similar municipalities in states corresponding to Kansas, and in many cases states having poorer natural resources, found a ready market for their securities on a five per cent. basis and even lower. There was no other factor to explain this discrepancy, except the deterioration of credit by reason of defaults. The additional cost to municipalities during this period, would run to enormous figures. If money had been expended by the state in making good or in preventing these defaults, it would have been the most judicious kind of investment and would have saved many millions of dollars.

No Market for Western Municipals

There is no doubt that at the present time the securities of municipalities in the west are suffering from the impairment of credit occasioned by existing defaults. Many of the large investors in the east look askance at western municipal securities. There is really no market at the present time for debentures of the smaller places. The same condition is apparent in the American financial markets and, as time goes on, if defaults are allowed to continue the effect will become more marked. At present the enormous premium on American funds permits the sale of our securities in the United States at extremely attractive rates to the investor, but when this more or less temporary condition disappears, it is not likely that the American market will be almost entirely closed to western securities.

The municipal difficulties in the west are apt to receive undue prominence and the general financial situation is likely to be somewhat ignored. There is not the slightest doubt that municipalities generally throughout the whole of Canada are in an absolutely sound condition such defaults as have occurred are comparatively trifling. No type of investment can show a higher record than the Canadian municipal debenture. The Canadian west has passed through a very trying ordeal during the last few years. The most pessimistic cannot deny the wonderful future which lies ahead of it and already a marked and general improvement is taking place. It is only a matter of a short time before conditions will have righted themselves to an extent which will remove any danger of further trouble. A severe lesson has been taught and it is almost inconceivable that there should be a repetition of the unwise financing of the past.

In view of the fact that Canada must necessarily be a heavy borrower for many years to come, no opportunity should be neglected to correct unsound financial conditions and no effort spared to maintain that credit so essential to our national development and prosperity.

Government Estimates Coming Soon

Appropriations Expire on March 31st, and New Votes Must Be Made for Expenditures—New Methods of Handling Estimates Discussed—Sir Thomas White Possible Unionist Leader—Canadian War Finance and Currency Defended.

(Special to *The Monetary Times.*)

Ottawa, March 11, 1920.

WITH the debate on the address to the speech from the throne out of the way, parliament is now in a position to get down to business in earnest. Government measures, which have been in storage, or in course of preparation by the cabinet for the past few months, will come with a rush. The estimates will also be introduced immediately, probably by the time this is in print. The estimates will have to be placed before parliament without delay if the whole governmental machinery is not to shut down, as the fiscal year closes on March 31st. All votes run out on that date and unless parliament grants more money, not a solitary employee can be paid. It is obvious that all the supply cannot be passed by that date, and what will undoubtedly be done, will be for the opposition to agree to possibly an eighth of the estimates reserving the right still to protest against any of the votes.

Estimates May be Handled Differently

Talking about the estimates, there is a feeling that some new system, more scientific and more business like, should be devised for considering the estimates of the year. Nothing could be more unbusinesslike than the present plan. The estimates are considered in a committee of the whole house. As a rule there is no serious attempt to probe the whys and the wherefores of the votes. If for no other reason there is not time. Opposition members usually seize the estimates to air partisan grievances about the building of a wharf in Pugwash or the firing of an Indian agent on the Micmac Reserve. Hours are spent on some trivial estimate and millions are passed as rapidly as the chairman can read off the items. Towards the close of the session, when members are in a rush to wind up business, estimates have been known to pass at the rate of a million a minute.

Consideration by Small Committee

Hume Cronyn, of London, one of the best financiers and business men in the house, suggested in his speech during the debate that there should be improved methods "for the submission and control of the government estimates," adding that if this were done, "we would be taking a great step forward towards the intelligent control of the government's finances." Fred Davis, of Neepawa, also urged the same reform, suggesting that the estimates should be sent to a small committee of the house, where they could be given some businesslike consideration and where witnesses could be called before the estimates were submitted to the house as a whole.

Sir Thomas White's Speech

Perhaps the most interesting speech of the whole debate was that of Sir Thomas White. It was delivered in his best and most vigorous style. It was a speech which has started a lot of gossip afloat in the capital. Politicians are all Mrs. Grundys and Ottawa is always a hotbed of rumors, so that it is not to be surprised that the story immediately started that Sir Thomas was making a bid for the Unionist leadership succeeding Sir Robert Borden. It was probably farthest from his mind, but one thing is certain that when the time comes to selecting a leader, he will be a much more powerful candidate as a result of his speech. The reason is that he laid down the principles upon which he considered a Unionist party would have to be formed and upon which he expressed the belief it would sweep the country.

Canadian Currency Best in World

Sir Thomas made a vigorous defence of his financial administration during the war, which has recently been under considerable fire. He denied that our currency is inflated. "Canadian currency," he declared, "is less inflated than the currency of any country in the world; less inflated than that of the United States. Let my honorable friend (referring to Dr. Michael Clark) look at the federal gold reserve, at the gold reserve of the Federal Reserve Bank or of the Bank of England. We have got one of the best currency situations in the world and there is not a financial man in Canada, the United States or England who does not know it.

Defends Tax Free Issues

Sir Thomas also vigorously defended his policy of issuing tax free loans during the war. Sir Thomas took the ground that if the loans had all been put out as taxable the securities to-day would not be worth more than 90. Sir Thomas claimed that two things had to be considered in floating the loans at the time. The first consideration was the loan had to be a success and in the second place the market situation after the loan had to be considered. Sir Thomas added: "Supposing I had put the first loan out taxable at 5½ per cent., the trouble is it would not stay out, it would keep coming back, and if I desired to stabilize the market I should have had to pay out tens of millions of dollars to keep that loan up, so that when I went back to the public my loans would get the reception which our subsequent loans were accorded, because my loans were as a matter of fact stabilized. I say to my hon. friend from Red Deer, and there is not a financial man in this country of high standing who will contradict me, that if we had put out taxable loans during the war we would have finished the war on a 6½ instead of a 5½ per cent. basis. What would have been the result? My successor would have his interest charges increased in respect to the debt of from $10,000,000 to $15,000,000, and he would not have got one fraction of that amount back from the comparatively few people in the country who derive a substantial advantage from purchasing the tax-free bonds."

THE ONTARIO GOVERNMENT'S POLICY

ELECTED in protest against the former provincial government, the United Farmers of Ontario found themselves thrust into power without a fully developed program. For this reason, and because of the fact that an alliance with the small labor party was necessary to secure a working majority, many of the farmer members were not anxious to assume office. Once they did so, however, they found considerable support in the cities and towns, and even the other parties in the house showed a disposition to give the new administration every opportunity to make good.

With the opening of the legislature on Tuesday, the time has arrived when the farmer government will be put to its first real test. More than one member of the cabinet has already admitted that things look very much different from a position of authority, than from one of opposition. The leaning of the party towards economy in administration had been one of the main reasons for its success in the rural constituencies, and declarations that this would be one of the features of the administration helped win the approval of town and city residents, who had not considered the point as a leading issue.

Burdened with growing federal, provincial and municipal taxes, residents of town and country alike had looked for reductions, or at least no increase, in provincial taxation. Apparently, however, the government has found it advisable to undertake new expenditure which will make this impossible. A negative program is not a popular one, whereas the benefit to be derived from expenditure in any branch of administration is immediately apparent, although the consequent taxation, when it is finally distributed, may more than offset this benefit. The Ontario government has selected rural education and rural roads for large new expenditures, and succession duties and taxation of corporations for new revenues. Money raised in the towns and cities is to be spent largely in the country, and incidentally, the labor interests have not been directly taxed.

Some of the plans of the new government were outlined in the speech from the throne as follows:—

"The educational needs of the province arising from the conditions which prevailed prior to and during the war have received the thoughtful consideration of the government. Pending a thorough inquiry into the whole subject, you will be asked to provide for an increase in the grants to the rural schools, both in the counties and in the districts. Your approval will also be asked for making such provision for the publication of school textbooks as shall avoid increasing the cost of books to the pupils. Measures will be submitted to you providing for a revision of the public school law and for a revision of the Public Libraries Act, so as to afford encouragement to these institutions. Plans have been matured by the Department of Agriculture for affording a greater stimulus to agricultural production in this province, for improving the quality of livestock, and for fostering certain undertakings on behalf of the farmer which cannot be accomplished by individual effort. The department proposes to take steps to bring the advantages of agricultural education more directly home to the people. In order to safeguard the interests of milk and cream shippers, a bill will be introduced to regulate the purchases of milk and cream.

"There is reason to believe that the application of a progressive and well-balanced road policy will materially improve rural conditions throughout the province and will facilitate the marketing of crops with advantage alike to the producer and the consumer. A number of amendments to the present laws will be submitted to you with a view to rendering such a policy effective.

"In view of the depletion of our forests, and the growing of a permanent supply of timber for our industries, the government proposes to make better provision for reforestation, and to organize a more energetic and effective means of fire protection.

"It is proposed to recognize the importance of the mining industry by creating a Department of Mines, thus separating the administration of mining lands and affairs from that of Lands and Forests, and appointing a Minister of Mines. A bill effecting the separation and defining the duties of the respective departments will be submitted. Mining and agricultural development, happily, combine to forward the settlement of newer parts of Ontario, and the encouragement of the search for mineral deposits is an object of the first necessity for the welfare of the mining industry. A bill will be submitted amending the Mining Act by reducing the fees for recording mining claims and providing other assistance to prospectors.

"During the past year a national labor conference was held in the city of Ottawa, and also an international conference at Washington, in accordance with the terms of the peace treaty, at both of which gatherings this province was officially represented. As an outcome of the national conference the federal government has arranged for a meeting of representatives of the Dominion and the various provinces to consider the unification of the labor laws of Canada. My ministers realize the importance of this work, both from the standpoint of the workers and the employers. Various measures affecting labor and improving existing laws will be submitted to you, and also a bill providing for the payment of allowances in certain cases to the mothers of dependent children.

"Among other measures which will be brought to your attention will be bills to provide for the preparation of voters' lists, and to amend the election laws, to amend the Succession Duty Act, to amend the Corporations Tax Act, respecting the law of partnership and the sale of goods.

"Reports will be submitted to you as early as practicable regarding the work of the Hydro-Electric Power Commission, the Timiskaming and Northern Ontario Railway Commission, the Workmen's Compensation Commission, and other public undertakings carried on under the authority of this legislature. The public accounts will be laid before you at the earliest possible time, and also supplementary estimates for the current fiscal year, and estimates for the ensuing year."

SOME EFFECTS OF THE EXCHANGE RATES

IN describing the exchange situation with the United States before the Kiwanis Club of Winnipeg on March 1, V. C. Brown, western superintendent of the Canadian Bank of Commerce, analyzed its effects as follows: First, a discouragement of imports from that country and an encouragement of exports. Second, the building of United States manufacturing plants in Canada had been encouraged, and the amount expended as a result was very large. Third, Canadian bonds could be sold very advantageously in the United States, and the export of United States funds from Canada was discouraged. United States companies which had balances in this country when the exchange rate was at one per cent. premium left them here, hoping that exchange would become normal. When exchange rose to three per cent. they hoped that it might fall to one per cent. and when it rose to five per cent. they hoped it might fall to three. It had now risen so high that the funds could not be taken out of the country. One of the United States companies had been caught with an enormous amount in Canada, which had been trapped here. Another result of the high premium on New York funds was that pleasure-seeking people from Canada would not go to Florida or California.

Mr. Brown said that much attention had been paid to the premium on New York funds, but the discount on sterling was a much more serious matter. The British buyer was compelled to pay a very high premium to secure funds in Canada to pay for Canadian products. The result had been to check at once the shipment of Canadian meat to Europe. There had also occurred as a result of the discount on sterling the shipment to Canada of millions of dollars' worth of Canadian securities, held in Britain, for which there was a market in Canada, and there had been a liquidation of investments in Canada by European people.

Mr. Brown then dealt with the question, how long the present exchange conditions would continue? and indicated that they would probably continue for some time. Factors which would hasten a return to normal would be a recovery in Great Britain, the increase of production from this country and shipment of large quantities of lumber, pulp and other commodities to the United States, a good crop in 1920, and the general practice of thrift by the Canadian people. Mr. Brown said that he mentioned thrift last, since it was quite impossible to induce thrift by precept. The speaker also raised the question of the price which Europe could afford to pay for the Canadian crop of 1920, and referred to the difficulty which might arise in this connection. He said that United States did not want to lend money to Europe, but if it did not do so, Europe could not buy United States goods. The United States could not hope to ship goods freely to Europe under the present circumstances, and the premium on New York funds was a much more serious matter for the people of the United States than it was for the people of Britain. Similarly, the premium on New York funds might be a benefit to Canada, rather than the reverse. It hurt us when we bought, but benefited us when we sold.

Referring to agriculture, Mr. Brown said that nine-tenths of his time was taken up with arranging credits for farmers. The question had been raised whether the banks could lend one thousand dollars to each of a hundred farmers at the same rate at which $100,000 was loaned to a commercial institution. He stated that a commercial institution brought to the bank a perfectly prepared statement, while a farmer borrower as a rule had not a clear idea either of what he owed, or what he owned. The banker had to become an acountant for the average farmer borrower.

THE NATIONAL RAILWAY PLANS

PRIVATE ownership of railways is on its last trial in the United States, according to an official who was prominent in the government administration of the roads there. His statement was somewhat unwarranted, considering the fact that the one experiment in public operation in that country was a distinct failure, from the financial point of view. In any case, the railroads were handed back to their owners on March 1st.

In Canada the situation is different. If private operation is on last trial across the border, it could be still more truly said that government ownership is being put to a final test in Canada, and the methods of private ownership are being pursued in the hope of making it a success. If this is carried out there will be no difference, to the owners, the employees, or the shippers, between a public and a private road. D. B. Hanna, president of the Canadian National Railways, has promised that his system will soon be on a paying basis; wage schedules are fixed through the Canadian Railway Association; and the national system, like the other railways, is subject to the jurisdiction of the Board of Railway Commissioners for Canada, as regards rates, extensions, etc. What more could E. W. Beatty, president of the Canadian Pacific Railway, promise his shareholders, or what more liberty could he have in administration?

Speaking before the Canadian Club in Ottawa on March 6, Mr. Hanna pointed out that the United States took possession of the lines there as a war measure, whereas in Canada they were taken over for economic reasons. The measure was temporary in the United States; in Canada it was permanent, and competition has been maintained. The administration there was political, while here it is modelled after private administration. In fact, no fair comparison can be made, and no doubt Mr. Hanna is endeavoring, and has thus far succeeded, in keeping control in the management. "While so far there has been freedom from political interference," he said, "and it is understood we must from time to time lay our plans before the members, action must rest with the directors and managers to carry out the work, without either members of parliament or cabinet ministers attempting to participate in a managerial capacity."

Mr. Hanna also outlined their plans for an ocean service. At the present time they have 24 vessels, and with the opening of navigation this spring there is to be a regular service from Montreal to St. Johns, Nfld. On the Pacific coast a service is to be started to South Africa, returning by Singapore and Hong Kong, another to Manchester, and a third to the west coast of South America. The whole program provides for 65 ships, with a gross tonnage of 385,000. Agencies are being established to promote trade, and attention may later be given to a passenger service.

The West Indies and Mexico

Trade between Canada and the countries to the south of us is rapidly increasing.

With branches in the United States and Mexico and a close working arrangement with our Correspondents, who have branches throughout the West Indies, this Bank is able to place at the disposal of its customers a very complete service.

J. P. BELL - - General Manager

PERSONAL NOTES

Mr. A. E. Dyment has been appointed vice-president of the Dominion Sugar Company, Chatham, Ont. For several years he has been a director of the company.

Mr. E. W. Tobin, formerly of the Stratford Beacon Staff, has been appointed secretary of the Stratford Chamber of Commerce, succeeding L. J. Salter, who resigned.

Mr. J. H. Sampson has been appointed industrial and publicity commissioner of Gananoque, Ont., and an advisory board of representative business men has been named to assist him.

Mr. W. J. Gurney, treasurer of the city of Port Arthur, Ont., tendered his resignation to the city council last week. Mr. Gurney has been with the corporation for twenty years, occupying positions of chief clerk, associate clerk and treasurer.

Mr. J. H. Baird, manager of the Aetna Life Insurance Company, Winnipeg, Man., and president of the Life Underwriters' Association of that city, has been appointed manager of the company for the state of Washington, with his headquarters in Seattle.

Mr. Norman L. McGloan, formerly connected with Montreal bond circles for a number of years, has returned to Montreal as head of the firm of N. L. McGloan and Company, investment bankers. Mr .McGloan was for some years connected with the Toronto and Montreal offices of the Investment Trust Co., and afterwards with N. B. Stark and Company. He afterwards joined the Boston office of Hayden, Stone and Company. In 1918 he organized his present firm at St. John, N.B.

Mr. A. E. Holt, who has just been elected president of the Dominion Mortgage and Investments Association, is manager of the Royal Trust Company, Montreal, and also a director of C. Meredith. He was born in Quebec in 1868 and entered the service of the Bank of Montreal in 1884. He became secretary to the general manager in 1899, and was appointed secretary of the Canadian Bankers' Association in 1900. In the same year he became secretary of the Royal Trust Company, of which he was made assistant manager in 1903 and manager in 1912. Mr. Holt has also been prominent in city activities, being president of the Montreal Canadian Club in 1916, a member of the council of the Board of Trade and a member of the Red Cross Finance Committee. Last year he was vice-president of the Dominion Mortgage and Investments Association.

Mr. S. A. Morrison, who has been with the investment house of G. A. Stimson and Company, Toronto, for the past three years, has taken over the management of the company in the place of the late Col. G. A. Stimson. The company will continue under the old name, however. Mr. Morrison has had considerable experience in the investment field, having served previously with A. E. Ames and Company. He also practiced chartered accountancy in Toronto for a number of years.

Mr. D. M. Roberts, formerly with the United Financial Corporation, Toronto, has recently joined Mackay and Mackay, bond dealers, Toronto.

Mr. Norman G. Matheson and **Mr. James G. Feltus** have been appointed joint managers of the United States Fidelity and Guarantee Company's branch office, Winnipeg, Man. Mr. C. M. Leith, former manager, has been transferred as manager to the south-western department with headquarters at Kansas City. Both Mr. Matheson and Mr. Feltus are Canadians. Mr. Feltus was for two years deputy superintendent in the insurance department of the province of Saskatchewan, previous to his coming to Winnipeg as claim adjuster with the company.

Mr. George Wood has been appointed auditor of the Canadian Pacific Ocean Services, Limited. Mr. Wood commenced in the C.P.R. foreign freight department at Montreal, and after five years of routine office work he was promoted to export contracting agent, and in 1909 was made chief clerk in the foreign freight department. On July 1, 1912, Mr. Wood received the appointment of foreign freight accounting agent, and during the war was one of the C.P.R. experts loaned to the British Ministry of Shipping (Canada) and worked under Sir Arthur Harris, director general. At the close of the war, his services being no longer required, he was transferred back to the C.P.O.S.

Mr. W. R. Davidson, who since 1918 has been general superintendent of eastern lines, of the Grand Trunk Railway, with headquarters in Montreal, has been appointed general superintendent of western lines. Mr. Davidson has been for many years with the operating department, then as trainmaster, and in 1911 was promoted to superintendent at London, later being appointed superintendent of the Detroit division. From September, 1917, to May, 1918, he was general superintendent of western lines. After the American government took over the railways in the United States, Mr. Davidson was brought to Montreal as general superintendent of eastern lines. He will now return to his old position. He will be succeeded by Mr. R. H. Fish.

OBITUARY

Mr. William Nelson Carty, secretary of the Conservative party of British Columbia, for many years, died last week at his home, 1906 Blenheim Street, Vancouver, B.C. He was 44 years old, and had been for the past few years special agent for the New York Life Insurance Company.

ONTARIO MINING PRODUCTION DECREASED

A drop of $25,000,000 in Ontario's metallic mineral production during 1919 is the feature of a preliminary report for the year issued by the Bureau of Mines. The value of metals produced during the twelve months amounted to $41,510,000, compared with $66,178,059 for the preceding twelve months. A scrutiny of the details of the statement, however, shows that the reduction is accounted for almost entirely by the small production of silver, nickel and copper matte, and the reduction in the market value of the latter metals. The falling off in the output of silver was compensated for to some extent by the high prices, but, even at that, the value of the mines' output was, roughly, $4,500,000 below that of 1918.

Metallic nickel was produced to a much greater extent and provided an increase of nearly two million dollars in value. While silver production in Ontario continues to decrease, even with the treating of low-grade ores made possible by high prices, the gold mining industry continues to grow. The 1919 output of 505,963 ounces, worth $10,451,688, was the largest to date. Ontario is rapidly becoming a great gold producing province, the output last year being greater than that of any other province or any state of the American Union, with the exception of California.

RURAL CREDITS ARRANGEMENT TO CONTINUE

If Present Conditions Continue, However, Rate is to be Raised—Another Convention to be Held Next Year

(Special to *The Monetary Times*)

Winnipeg, March 10, 1920.

MANITOBA Rural Credit Societies for the present year at least, will continue to get 6 per cent. money. Hon. Edward Brown made the following announcement in the legislature on his return from interviewing bankers' associations in Toronto and Montreal:—

"When the Rural Credit Act was passed, the fiinancial conditions were such as to warrant the rate being fixed at 6 per cent. it was, however, anticipated that from time to time if financial conditions became abnormal that the rate might have to be changed to meet these conditions, but it was thought wiser to have the legislature as a body deal with the matter than to leave it either to the societies or the government for settlement, as continuity of policy and stability of policy are both to be desired.

Higher Rate Now Justified

"Since the convention was held last month there has been quite a change in financial conditions and conditions to-day can be truly spoken of as abnormal not only in Canada, but in the United States, and no doubt the banks in suggesting a rate of 6½ per cent. for the current season are justified in view of conditions. However, when it was clear that the banks would not carry on unless a rate of 6½ per cent. was agreed to it seemed to the government that to arbitrarily change the Act raising the rate in view of the circumstances of the convention without consulting the directors of the rural credits societies might be regarded by these societies as a breach of faith, and the position was rather awkward on that account.

"I found the disposition of the banks not irreconcilable. I am satisfied that they view with sympathy the formation of rural credit societies particularly in the more backward portions of the province where they are assisting needy settlers.

"After discussing the matter from every angle, and after informing the Bankers' Association of the government's viewpoint, it was agreed that the banks would continue to lend money to the rural credits societies during the current season at the old rate already established of 6 per cent. and under the relations, on the understanding that an announcement would be made that at the next session of the legislature, if present financial conditions obtain, that the Act would be amended increasing the rate.

"It is understood that before the legislature meets again there will be a convention of the rural credits societies when this matter will be fully discussed, and in view of the abnormal conditions, which it is expected will be more acute a year from now, it is anticipated that the common sense of the directors of these societies will suggest that the rate of interest should be increased."

LOANS TO SOLDIER SETTLERS

Loans approved by the Soldier Settlement Board now total nearly $57,000,000 and some 35,213 returned men have passed the necessary tests to qualify them as agricultural settlers. Up to February 14 the number of settlers' loans approved was 15,083, and over 12,000 were established on farms. Alberta leads in total loans approved, almost 4,000 settlers having been established. Saskatchewan is second, with approximately 3,000. British Columbia just beats Manitoba for third place. Ontario leads the eastern provinces, more than doubling her nearest rival, Quebec. Ontario has 1,129 settlers, with nearly $5,000,000 in approved loans; Quebec, 361 settlers and $1,600,000 loaned. New Brunswick leads the three sea-coast provinces, doubling Prince Edward Island, but only slightly ahead of Nova Scotia.

FIRE INSURANCE CO. OF CANADA

Gross premiums of $325,071 were written by the Fire Insurance Co. of Canada during the fourteen months ended December 31, 1919. This is a remarkable achievement, considering the fact that the company just secured a Dominion license in October, 1918, and this is, therefore, its first statement. Of the authorized capital of $500,000, $484,000 has been subscribed, and $191,520 has been paid up. Net losses amounted to 12.86 per cent. of the net premium income. A large proportion of the business written has been reinsured. but the president, R. Dandurand, stated that this condition would be gradually eliminated as the company's resources grow and the organization is enlarged.

The ratio of management expense was 35.16 per cent. The president remarked that this was lower than the average of 39.12 per cent. for the 28 companies reporting at Ottawa for 1918, which was a gratifying result considering the fact that this was the first year of operation.

BUILDING OWNERS' AND MANAGERS' ASSOCIATION

Owners of office buildings in Ontario formed an organization about two years ago to protect their common interests. At the second annual meeting, held in Toronto last week, the following officers were elected: C. P. Muckle, Exelsior Life Building, immediate past president; F. A. Kent, Kent Building, president; D. N. Soper, Trusts and Guarantee Company, first vice-president; W. R. Dunlop, Canada Life Building, second vice-president; W. C. Dawson, Royal Bank Building, treasurer, and G. A. Hodgson, secretary. Executive committee: C. M. Baldwin, of F. J. Smith & Company; A. H. Kirby, Methodist Book Room; Geo. Richards, Dominion Bank Building, and E. A. Fall, of John Stark & Company.

Speaking of present conditions, the past president said: "I am happy to be able to state that renting conditions are such that all buildings represented in the association are 100 per cent. occupied. Tenants who desire all conveniences and adequate service have been educated to the necessity of paying a proportionate rental in order that the buildings pay a proper return on an investment basis. This has not always been the case and in a measure accounts for the unwillingness of capitalists to erect office buildings."

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the month of February:—

Canadian Pacific Railway

	1920.	1919.	Inc. or dec.
February 7	$ 3,298,000	$ 2,579,000	+ $ 719,000
February 14	3,547,000	2,883,000	+ 664,000
February 21	2,901,000	2,729,000	+ 172,000
February 29	3,472,000	2,591,000	+ 881,000
	$13,218,000	$10,782,000	+ $2,436,000

Grand Trunk Railway

	1920.	1919.	Inc. or dec.
February 7	$ 1,178,184	$ 905,449	+ $ 272,735
February 14	1,220,509	947,889	+ 272,620
February 21	928,693	974,220	— 45,527
February 29	1,333,445	1,260,470	+ 72,975
	$ 4,660,831	$ 4,088,028	+ $ 572,803

Canadian National Railway

	1920.	1919.	Inc. or dec.
February 7	$ 1,545,473	$ 1,503,137	+ $ 42,336
February 14	1,673,047	1,611,722	+ 61,325
February 21	1,552,908	1,572,152	— 19,244
February 29	1,744,000	1,578,000	+ 166,000
	$ 6,515,428	$ 6,265,011	+ $ 250,417

Prince Albert ...	495,933	366,108	+	129,825
Totals	$334,986,951	$253,393,058	+	$81,593,893

BRITISH COLUMBIA WORKMEN'S COMPENSATION

During last year a total of 18,185 claims were made upon the British Columbia Workmen's Compensation Board for compensation, according to the annual report tabled in the legislature on March 2 by Premier Oliver. Of this number, 17,908 claims were for non-fatal accidents, and 277 were in consequence of fatalities, 83 of which referred to fatalities in 1918, the remainder, 184, being cases arising last year. This is the lowest number of fatal accidents since the board commenced its operations. In the three years during which the board has been operating a total of 53,634 non-fatal claims have been filed and 734 fatal claims. A total of 867 persons are now receiving monthly pensions.

During 1919 a total of $1,391,993 was paid out in compensation, pensions and reserves. The amount paid out for medical aid, hospital and nursing was $289,109. For the three years the aggregate amount paid out in compensation, pensions and reserves was $4,209,468, and for medical aid, hospital and nursing, $602,761, a grand total of $4,830,230.

Workmen to the number of slightly over 110,000 are now covered by the operations of the Workmen's Compensation Act, and the payrolls of the industries and businesses affected by the act is given as approximately $133,000,000. The charge to the employer was only 4.78 per cent. of the amount collected from them, a ratio of expense slightly less than in either of the two previous years. In consequence of the amendment to the act last year whereby pensions paid to dependents in foreign countries of men killed in the province were based upon the standard of living in those foreign countries, a sum of $65,870 was saved, to be added to the pensions being received by dependents residing in Canada, an increase to widows that bring her monthly pension to $35 and that of each child to $7.50.

Reference is made in the report to the fact, that at no time in the history of the country has the man-power been at a lower ebb, due to a variety of causes, but chiefly to a combination of nation-wide misfortunes for which the individual was not responsible, and which he could not escape through any effort of his own. The physical condition of the people, the report states, is now more than ever a matter for serious consideration by the state.

BANK BRANCH NOTES

Royal Bank Announces Opening of Nine New Branches—Bank of Hamilton to Extend Head Office Building

The following is a list of branches of Canadian banks recently opened:—

Norwood, Ont.	Sterling Bank of Canada
Golden Lake, Ont.	Sterling Bank of Canada
Cabaiguan, Cuba	Royal Bank of Canada
Santos, Brazil	Royal Bank of Canada
Sao Paulo, Brazil	Royal Bank of Canada
Plunkett, Sask.	Royal Bank of Canada
Trenton, Ont.	Royal Bank of Canada
Milltown, N.B.	Royal Bank of Canada
Point Edward, Ont.	Royal Bank of Canada
Swan River, Alta.	Royal Bank of Canada
Magnet, Man.	Royal Bank of Canada
Sprucedale, Ont.	Dominion Bank
Albert, N.B.	Bank of Nova Scotia

Announcement has been made that the Bank of Hamilton plans extension to head office building, Hamilton, Ont.

The Nova Scotia Construction Co. have been awarded the contract for the new Royal Bank branch building at the south-west corner of Spring Garden Rd. and Queen St., Halifax, N.S., and the branch staff there have removed temporarily into the store at the south-east corner of Spring Garden Rd. and Birmingham St. The new building is to be two stories in height.

Personal Appointments

J. H. Hartie has been appointed manager of the newly opened branch of the Sterling Bank of Canada at Norwood, Ont. R. C. Cameron is in charge of the other new branch at Golden Lake, Ont.

G. P. Worsley, formerly manager of the Bank of Montreal, Brandon, Man., has been appointed manager of the same bank at Moncton, N.B.

F. W. Murray, assistant agent of the New York Agency of the Bank of Nova Scotia, has been appointed second agent. Major C. E. Fairweather, D.S.O., has been appointed to succeed Mr. Murray.

H. A. Bailey, manager of the Bank of Montreal, Moncton, N.B., has been transferred to a more important branch in Ontario.

The Bank of Montreal has made the following appointments of managers; Carbonear, Nfld, J. E. Riggs; Domremy, Sask., F. Audap (acting); Gaultois, Nfld., C. Lonsdale; Greenspond, Nfld., R. C. Michell; Montreal, Que. (McGill Street), I. V. J. Cleary (acting); 150 Mile House, B.C., J. H. Gauld; St. John's Gate, Que., S. A. LeMesurier.

EXCHANGE QUOTATIONS

Messrs. Glazebrooke and Cronyn, exchange and bond brokers, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. funds	12 9-16 pm	12 11-16 pm	....
Mont. funds	Par.	Par.	⅛ to ¼
Sterling:—			
Demand	4.23	4.25	....
Cable transfers	4.24	4.26	....

The New York quotations of exchange on European countries, furnished by the National City Co., as at March 11th, are as follows: London, cable, 3.75, cheque, 3.74¼; Paris, cable, 13.20, cheque, 13.22; Italy, cable, 17.50, cheque, 17.52; Belgium, cheque, 12.77; Swiss, cheque, 5.97; Spain, cheque, 18.00; Holland, cheque, 35.58; Denmark, cheque, 17.80; Norway, cheque, 18.10; Sweden, cheque, 20.50; Berlin, cheque, 1.55; Poland, cheque, .85; Greece, cheque, 11.15; Finland, cheque, 5.15.

Dominion Mortgage and Investments Association

A. E. Holt is New President—Exchange Situation Due to Trade Condition and Currency Inflation — Saskatchewan Premier Commends Association — Good Security for Loan Company Deposits—Municipal Defaults Have Been Harmful

AT the close of the convention of the Dominion Mortgage and Investments Association, held in Toronto on March 4 and 5, the following officers were elected for 1920: president, A. E. Holt, Royal Trust Company, Montreal; first vice-president, W. E. Long, Credit Foncier Franco Canadien; second vice-president, J. B. McKechnie, Manufacturers Life Insurance Company. Executive committee: life insurance companies, C. S. MacDonald, J. F. Weston, Charles Ruby, F. G. Opps, G. B. Woods; loan companies, Joseph Campbell, M. Aylesworth, A. B. Fisher, Alfred Whitman, C. E. Weeks; trust companies, J. C. Breckenridge, J. K. Pickett, S. C. MacDonald, W. G. Watson, E. B. Stockdale.

E. D. Chassell, who was to have spoken on "Federal Loans to Farmers in the United States," was unable to be present, but F. H. Sissons, vice-president of the Guaranty Trust Company of New York, spoke briefly on the subject. He urged more liberality in making farm loans. "We feel in the United States," he said, "and I am sure you feel it here, that the farmers demand more control in the financial field. The farmers' problems have become more complex. The cost of agricultural production has risen immensely, in line with the increased prices of farm products. As a result of the feeling aroused in the United States over the lack of credit, the Federal Farm Lands Act was devised and made law, and has become efficient. The bonds have become a popular means of investment, largely because they are tax-exempt. They are based upon our fundamental securities. They have been soundly based and absorbed by the investing public very readily. They have rendered great service in helping to aid in the production of agricultural products, and I am quite sure that you in Canada face pretty much the same problem.

The Farmers' Movement

"I was interested to find Ontario has a farmers' government, and is one of the signs of the times. North Dakota has a farmers' government, and it secured office largely because the farmers desired two things: the elimination of the middleman and a larger amount of credit. I think fundamentally that is sound. The middleman takes too much from the farmers' revenue, and the farmer has not had adequate credit for the work he must carry on. So, if the farmers are to be supported in that contention, it is the part of the financial leaders, not only of the United States, but of Canada, to devise ways and means by which credit can be extended on a sound basis to aid in developing this great mine of gold which lies in our fallow and unfallow fields in both countries.

"I feel that if we do not do that the great danger in Canada, as in the United States, will be that the farmer, who is unskilled in finance, will attempt impractical and theoretical measures, which will have a far-reaching and disastrous effect on all financial interests. Already we see that in our own northwest. They want banks that will loan money freely, that will provide for their interests, without regard to securities. This is exceedingly unsound, and must not be allowed to happen. There is a danger that it may happen. Already one great bank in North Dakota has failed. I would emphasize the necessity for meeting the situation and co-operating with the farmers."

No Remedy for Exchange

One of the clearest and most interesting addresses was that given by A. J. Glazebrook, exchange broker, of Toronto, on "Difficulties Incident to Extreme Fluctuations in Rates of Exchange." Adverse rates, he said, are a symptom, not a disease. Exchange cannot be stabilized by finance alone, nor by a clever trick of any kind. The fixed rate for sterling in New York was maintained during the war at enormous expense, in comparison to which the benefits were not great. The discount on the Canadian dollar in New York is due partly to a trade condition and partly to currency, said Mr. Glazebrook. It was impossible to decide to what extent each was responsible, but it was at least evident that there was no inflation in bank notes and very little in Dominion notes, and what there was in the case of the latter could easily be removed. The real inflation, he considered, was in credit, and the exchange situation was due to trade conditions rather than to currency. Speaking of Canada, he said: "A good many think we have a surplus of exports, but we have not. Nominally our surplus is $300,000,000 for 1919, but from that we must deduct at least $200,000,000 for interest on foreign borrowings and $30,000,000 to $40,000,000 for services such as shipping and insurance, besides $60,000,000 to $70,000,000 for goods sold to Roumania, Belgium, etc., on credit. In that way the nominal surplus is lost." Then there was the repurchase of Canadian securities, which the speaker thought had been overstated. A large proportion of those securities had been purchased for resale to the United States, leaving net sales of perhaps $30,000,000 to $40,000,000, and making altogether a deficit in our export trade.

Trade Figures are Deceiving

"There is no use saying we have a surplus," said Mr. Glazebrook. "The operation of exchange is absolutely relentless and mathematical. If the sales were all made for cash there would not be a premium on New York funds. We have had some suggestions of cures. One is to get $200,000,000 of gold from Great Britain. There is one objection to that; we could not get it. Even if we got it, it would not be a primal cure. If we got it, we would be very pleased with ourselves, and would immediately proceed to be more extravagant, and we would have lost credit in England, and would have to start all over again."

Mr. Glazebrook remarked that it would be impossible to avoid international exchange through New York, at least, until we grew bigger than New York, for the recent restrictions on the import of securities probably something could be said, but it was cutting off from Great Britain one of her most legitimate forms of export, so far as Canada was concerned, and enabling us to go on and spend more money on luxuries. Many of the expenditures in this country were ridiculous. In almost every other country in the world people were making sacrifices, but Canadians were not making sacrifices, but were comfortable, and everybody felt he had lots of money. "We are simply living on a standard above what we can afford, and that is why our money is at a discount," said Mr. Glazebrook. An appeal should be made to the people of Canada to realize their position, and it had been shown in the past that Canadians never failed to respond to a proper appeal. There had been a number of expenditures which were absolutely inexcusable, and involved the raising of loans. Last year about $200,000,000 was spent on the necessities of returned soldiers—very proper expenditures and very necessary ones, but in the meantime an expenditure that provided them with more spending power."

Unfavourable to General Moratorium

One of the guests at the convention was W. M. Martin, premier of Saskatchewan. Speaking briefly, he mentioned how the association was useful in maintaining good relations with borrowers. "As a government," he said, "we are anxious to do nothing to hinder the flow of capital into western Canada. The financial institutions have played an important part in building up the west. It is well, however, for the companies to remember that the investment has been a profitable one." The speaker then went on to say that he

The National's Service AS EXECUTOR

As executor appointed by will, the Company assumes its duties immediately upon the death of the testator. These duties comprise skilled attention to the formalities connected with the issue of Letters Probate, and with the payment of Succession Duty; and, where necessary, the prompt realization of assets by an organization of long training in the managememt of property. Finally, the protection the Company gives as Executor consists in the distribution of the estate to the heirs impartially, in precise accord with the terms of the will

Our fees as Executor are never more than a private executor would receive for similar work.

Write for our booklets.

did not favour a general moratorium, as successive crop failures since 1916 had taken place in only a small section. He had found that complaints against the companies were usually groundless. A new policy in seed grain loans had been started last year, whereby the companies advanced the money and were empowered to add the amount to the debt. Ordinary relief was now being extended by the banks, on the guarantee of the municipality.

J. C. Breckenridge, assistant manager of the National Trust Company, gave an address on the functions of the public trustee. In the discussion which followed it was pointed out that such an officer could give no better service than was at present being given by institutions.

Municipal Defaults Harmful

E. G. Long's address on municipal finances is printed in part elsewhere in this issue. Supplementing Mr. Long's remarks, L. A. Winter, treasurer of the Manufacturers Life, stated that the credit of Canadian municipalities had already been injured in the United States because of these defaults. J. H. Gundy, of Wood, Gundy and Company, pointed out that the effect of such defaults was out of proportion to the amount of money involved. The actions of a few irresponsible and misguided individuals in the west had wrought much harm.

A short discussion took place on moratoria legislation in different provinces. John Paton, of Winnipeg, said he expected the Manitoba legislation would expire next January. H. W. Givins, of Saskatchewan, said there was no general moratorium in that province, and there was little objection to the protection afforded the families of enlisted men. H. S. Awrey, of British Columbia, said he expected both the moratorium and War Relief Acts would be suspended by the legislature of that province at the present session.

Report on Deposits

At its meeting on June 13, 1919, the executive committee referred to the loan company section the matter of borrowing by loan companies which engaged the attention of members present at the annual meeting held on March 28, 1919. In reporting, the chairman of the loan company section said:

"Your committee requested the secretary to prepare a statement indicating the character of the assets of Ontario loan companies and the liabilities respectively to the public and to shareholders. As the returns made to the Ontario government for the year 1918 were not available at the time this matter was under consideration, and up to the present time have not been published, as customary for many years, difficulty has been experienced in obtaining necessary data, of sufficiently recent date, and in consequence it has not been possible to complete a satisfactory statement.

"The secretary prepared a tabular statement, based upon the digest of state banking laws of the United States, published by the Monetary Commission of that country and obtained other information indicating the reserve requirements, and the character of investments of savings banks which are the institution of the republic corresponding in most respects to the savings and loan companies in Canada.

Margin of Safety is Ample

"From a perusal of the data studied, it is evident that generally speaking the liquid assets of loan companies in Canada are higher than statutory requirements for similar organizations in the United States. The margin of safety as between total assets and liabilities to the public is liberal.

"To the circulars sent out and already referred to, the responses were not numerous and the one objection raised was that in view of recent occurrences, it would not be tactful to ask for changes at the present time.

"Companies which do not borrow by taking deposits hold, as need hardly be pointed out, a critical view of the policy of those that do. 'The fact,' says one of them, 'that many companies have handled their deposit business . . . . successfully, and apparently with proper safeguards, makes us slow to express an opinion averse to this department of their business.' . . . .

"'Whether a particular company could properly be allowed an increase of its borrownig powers, would depend . . . . on the proportion of its deposits to its total borrowings.'

Failure Not Due to Deposits

"To both of these viewpoints, careful consideration has been given. Recent failures, upon examination, cannot be said to be due to taking deposits, but to methods of investment which should not be permitted. That any legislative changes favoured should have due regard to the proportion of deposits to total borrowings, and to the proportion of either class of borrowing to liquid and total assets is essential. In extending the existing limit to borrowing by taking deposits so as that limit will be the aggregate of capital, reserve, cash, Dominion and provincial government securities would not in any sense impair the existing safeguards for depositors or debentureholders and for that reason it was recommended to the executive that the attorney-general be approached with a view to amending the Loan and Trust Corporations Act accordingly. The executive approved the recommendation and authorized the appointment by the president of a deputation to wait upon the attorney-general, who received it and promised to favourably consider the proposal.

"As the department of the registrar of loan corporations had recently been reorganized, the government did not feel, however, disposed to make any changes in the Loan and Trust Corporations Act, until the officers of the reorganized department had had an opportunity of making a full report upon a matter which he deemed of importance, and which may involve changes in the act in question. Having regard to the fact that the present government has but quite recently assumed office, the deputation appreciated the reasonableness of the attitude taken by the attorney-general, who desired the co-operation and advice of the committee which approached him."

Report on Interest Act

In a report on the Interest Act, reference was made to some changes suggested by F. C. L. Jones at the convention last year. The special committee appointed for this purpose communicated with members of the association to obtain their views. One company said that they always had the words "rate of interest chargeable thereon calculated, not in advance, is . . . per centum per annum," and that in cases of foreclosure, when making up statements, interest was calculated by the month, quarter, half year, or year, according to the term of repayments stated in the mortgage. The same company also pointed out that many interest tables used in Canada are calculated on a basis of 360 days to the year, and the calculation of interest on this basis is illegal in Canada. The company also found a slight difference between their own calculation and that of Watson's tables.

Another company manager said that after considering Mr. Jones' address carefully, he agreed with the chairman that "it gives a view of what a fearful and wonderful thing our law is." He recommended the following changes: (1) That clauses six and seven of the Act, calling for interest calculations to be yearly or half-yearly, not in advance, should be deleted *in toto;* (2) that the Act specify the maximum rate of interest per annum which shall be chargeable; (3) that whether payments are made monthly, quarerly, half-yearly, or yearly, this rate shall not be exceeded; (4) a suitable penalty should be enacted for non-compliance with the Act.

The special committee pointed out that the question is important, but advised that action be deferred until political conditions are more settled. They approved of the above recommendations, however, saying: "They would preserve flexibility in dealing with a class of borrowers who prefer to make payments on blended interest and principal, monthly. When more normal conditions prevail, the special committee advises that steps be taken to secure a change in the Interest Act and to overcome the difficulties which have been pointed out, and that the co-operation of as many companies affected, as possible be obtained."

IRRIGATION FARMING AROUND LETHBRIDGE

First Conceived as Government Project—Some Instances of Private Enterprise—Dominion and Provincial Assistance Required

By G. R. Marnoch

President, Lethbridge Board of Trade

"HUMAN natur' is a rum un, she is," was the remark of the immortal Squeers on more than one occasion. And the same comment comes readily to one on picking up a little booklet published away back in 1893—just twenty-seven years ago—bearing the title *Irrigation in the Territories; Should Parliament Provide for Irrigation Works in Southern Alberta and Western Assiniboia?*

A Bit of Ancient History

"There's nothing new under the sun." The wise seers who published this interesting pamphlet thought, no doubt, in their wisdom and in their innocence, that so clear a case had but to be stated and action would certainly follow. But vision was not enough. Hard experience had to bring us to school, and slow demonstration had to bring out the facts; and now we are wise after many events. Yet we are no wiser than they were when they said more than a quarter of a century ago that "whenever there has been a 'wet' season with an abundant rainfall—as may happen once in three or four years—wheat, oats, barley, the native grasses, roots and vegetables of every description reach perfection and compare favorably with those of any country in the world both as regards quality and quantity per acre." The crops of the year 1915 around Lethbridge showed us just that; the rainfall was abundant, and the "fall irrigation" that all the grain farms received from the soft, wet snowfall in October, 1914, combined to produce the wheat crop of over sixty bushels average—in some cases going beyond seventy-five bushels per acre—that has been described as "that phenomenal crop" by the world's experts. And we have not failed to learn something, too, from the spells of dry years; for in spite of the laxness of governments and their inaction and lethargy, private enterprise has since 1900 gradually developed a practical demonstration of irrigation farming around Lethbridge; and the 80,000 acres now watered there produced, on a most conservative estimate, an average yield of $55 an acre in 1919.

Government Ownership Was Invoked

In the present great and spacious days of calling for government ownership of everything under the sun, recollect now, if you please, that all the great irrigation development that is now about to take place around Lethbridge was asked for, pleaded for, twenty-seven years ago, to be taken up under government ownership! And let us take a look along the long and tedious trail that has been blazed by private ownership. First in the line of history comes The North-Western Coal and Navigation Company, Limited, a company formed by the Galt family away back in 1883. The old country capital that was persuaded into that enterprise by Sir Alexander Galt was used to put down the first mine into that rich seam of excellent household coal at Lethbridge; which it was intended should find its way to the markets by water transport down the Old Man and the South Saskatchewan Rivers to the main line of the Canadian Pacific Railway. But the demand for the coal was so great that it was soon found necessary to build a railroad to give winter and summer carriage; so the old narrow gauge "turkey trail" was built from Lethbridge to the east at Dunmore Junction; and another turkey trail was laid southwards to Coutts at the international boundary. More capital was brought in, and the name of the company was changed to The Alberta Railway and Coal Company.

Private Enterprise Had to do It

Then Elliott T. Galt, who had taken over the management from his father, found his company in the undisputed ownership of some one and one-quarter million acres of railway grant lands, handed to them by the government of the day. What was he to do with them? Nearly everybody said they were worthless for anything but cattle and horse ranching; had not the government utterly declined to hear the pleadings of the seers that the lands should be irrigated? He believed they could; so did C. A. Magrath, who joined him in the management of the company. But the shareholders had waited long for a return on their money; and they felt little like continuing their disbursements, although by this time the coal mining part of the business looked promising. The company was hard put to it to find money enough even to survey the land and the mountain streams from which the waters might be brought.

One man only in the government of the day had some vision; Mr. (now Sir) Clifford Sifton was Minister of the Interior; he gave the incentive to what we now call "the traditional policy" of carrying out the preliminary surveys. The company carried these farther in detail in regard to lands around the now thriving towns of Raymond, Magrath and Coaldale, and the city of Lethbridge. But there was no money to install the works. So they went to the south, and made an arrangement with a community of practised irrigation farmers in the state of Utah; they came up, and built the headgates and canals for about 100,000 acres, and took their pay part in grubstake and part in land at a nominal price per acre. The works were built. But now these farmers in turn found themselves hampered by lack of capital resources. So they perforce had to confine their efforts largely to grain farming operations on the usual extensive lines. Seasons of fair rainfall enabled them to make some headway in growing wheat; and the establishment of alfalfa and hay fields had to wait over. Development under irrigation was slow. But as this one and that one among those whom they thought were the over-cautious began to forge ahead by the industrious use of irrigation, passing in the race those seemingly livelier ones who took a wheat gamble and got intermittent crops, there gradually came a recognition that the slower method was the surer, and much the more profitable in the long run.

Company Had Economic Struggle

In the meantime the company, now called The Alberta Railway and Irrigation Company, using its coal profits for improving the coal mines, installing modern machinery and bringing the mines at Lethbridge gradually up to their present output of 2,000 tons a day, got rather discouraged about their land holdings. So when anyone came along with an offer of $1, or $2, or $3 an acre for the unwatered lands, the sales were duly made. Bye and bye, the grain-growing possibilities looked better and better. Those who had bought at low prices sold out at $10, $15 and $20 an acre, mostly to other people who bought simply for a turnover on their money. Those again went south and found farmers who were willing to come in and start grain growing. Hudson's Bay lands, school lands and homestead lands were also filled up.

Farmers Had Economic Struggle Too

Then another struggle began. Our new farmers sometimes got good crops; sometimes poor. They saw the irrigation farmers struggling; in good grain years with fair rainfall they jeered; in years of short rainfall they envied. The grain farmers' soils began to drift. The tale of years told the real facts about the precipitation records. And by 1918 the countryside was convinced that the seers had been right, and that irrigation should be brought without delay to all the lands that could get water.

There is a temptation here to digress into a dissertation on government ownership. Our pamphleteers of 1893 pleaded for government development of lands that were then in government ownership; their pleas were in vain. They were right in theory; the theory is right. But we are a practical people in a practical world, and development is by practice, not by theory. In short, we come round to practical development. The Dominion government has recognized at least its duty to assist and advise; the surveys continue to be made. The Alberta government is about to make recognition of its duty to help its people by extending the law under which communities of farmers may establish irrigation districts; and it seems likely that the Alberta legislature may, insofar

as is in its power, give assistance in financing and controlling the works. The Dominion government has already indicated willingness also to assist in financing. So that we come back to what is practical—that private enterprise must pioneer, and that governments should assist, advise, and, at least insofar as they aid in financing, they should exercise a measure of control.

How Are the Finances to be Found?

The first enterprise that calls for assistance is the Lethbridge Northern Irrigation District. The farmers there who want irrigation on about 100,000 acres, or, if the district is extended, to some 135,000 acres, have satisfied themselves that their proposal is eminently practicable and that it will be profitable. The Dominion government made the detailed surveys; at the instance of the Alberta government these have been fully confirmed by an eminent consulting irrigation engineer. The cost will be about $50 per acre to be irrigated; the farmers feel assured of making a profit on this investment. They ask the governments to continue to cooperate to help them to attain their wishes; and it cannot be doubted that both the Dominion of Canada and the province of Alberta will meet their desires to improve first, their own and then the country's economic status by making not two, but many, many fold, blades of grass and grain to grow where but one grew before.

BANK GUARANTEE OF PAYMENT OF DEBT

No Authority in Bank Act, Says Manitoba Court, Even if Guarantee Had Been Ratified by Head Office

IN Merchants Bank of Canada vs. Stevens, a case which came before the Manitoba Court of Appeal on December 1, 1919, it was held: (1) That a letter written on the bank's stationery and signed by the bank manager to guarantee the payment of a debt due a third party was not binding upon the bank, and (2) that the bank manager had no authority to give such a guarantee and in doing so was not acting within the scope of his employment.

The facts of the case, as reported in the Dominion Law Reports, are as follows: The Winnipeg Motor Exchange Co., which was an unincorporated company and which was owned by a Mrs. Robinson and conducted by her husband, had been in operation in Winnipeg. In the course of its business the company became largely indebted to the Merchants Bank, the account being kept at the main branch, which was under the managership of one Paterson. In August, 1917, the company's indebtedness to the bank amounted to about $40,000, which amount Paterson was ordered by the general manager to reduce but to which order Paterson paid no attention. In August, 1917, Paterson was instrumental in obtaining a sale of the business to Baxter and Martin, the bank advancing $5,000, and the name of the company being changed to the Winnipeg Motor Company. As far as the bank was concerned no improvement resulted and Paterson continued initialing post dated cheques to aid the company in securing further loans. On October 8, 1917, the company negotiated a loan with Stevens (the respondent) for $10,000 and bonus of $1,000, the conditions and agreeemnts in connection therewith being:

Conditions of the Loan

The money was to be repaid as follows: $2,000 on the 15th day of November, 1917, December, 1917, January, 1918, and $4,000 on February 15, 1918. As security for the repayment of the loan, the Winnipeg Motor Company gave to Stevens four post dated cheques on the defendant bank bearing the dates of the above instalments and for corresponding amounts. Paterson placed his initials on the lower left hand corner of each cheque. He also signed and gave to Stevens the following letter:

"In connection with the loan of $10,000 which we understand you are granting to the Winnipeg Motor Company, to be repaid at the rate of $2,000 per month, and the balance at the end of four months, we beg to notify you that this bank is prepared to grant the company a credit sufficiently large to enable them to take up these instalments as they mature, and hereby guarantees payment of the said loan."

The Winnipeg Motor Company also gave to Stevens a cheque on the bank for $1,000 post dated February 15, 1918, as remuneration for the loan. This cheque was also initialed by Paterson in the same manner as the others. The money received from Stevens was deposited to the credit of the company in its ordinary chequing account in the bank. Paterson reported to the head office the receipt of the $10,000 as "new capital invested." His connection with the bank was severed on November 1, 1917. The bank refused payment of the cheques and denied liability on the alleged guarantee. The company was practically without assets.

Claim of the Plaintiff

Stevens then brought action to enforce payment on the guarantee and cheques. "The statement of claim alleges that Stevens at the request of the bank and of the bank's manager at Winnipeg, agreed to make a loan to the Winnipeg Motor Company of $10,000 to be repaid by certain instalments, and the bank or its manager in consideration of Stevens endorsing the cheques he was issuing for the said $10,000 promised and agreed with him to honour and pay certain cheques to be drawn by the Winnipeg Motor Company. The bank's manager, in order to induce Stevens to make the loan, placed his initials on the corner of the cheques of the Winnipeg Motor Company so represented that the cheques of the Winnipeg Motor Company would be accepted and paid by the bank."

Bank Repudiated Liability

The bank repudiated all liability and specially alleged that it was beyond the power of the bank or its manager to give any guarantee or make any such contract as that sued upon.

The court unanimously allowed the appeal and in the decisions it was said:

"Apart from the question of ratification the real point involved in this appeal is the power of the bank to give the guarantee. The powers which a bank may exercise are set out in section 176 and following sections of The Bank Act, chapter 9, of 3 and 4 George V., 1913. No power to give guarantees is specifically given by The Bank Act. Any such power must be derived by necessary implication from the words of the Act. The only words in the Act which can possibly be appealed to are the words in section 76, subsection 1 (d): 'Engage in and carry on such business generally as appertains to the business of banking.' The question then is whether these words by necessary implication give the bank power to guarantee the repayment of a loan by a third party to a customer of the bank.

Beyond Powers of a Bank

"When it is remembered that the bank itself is given specific power to loan money and that the loaning of money to its customers is in fact its chief business, it is difficult to discover any ground for implying a power to guarantee the repayment of loans made by others. It was argued that representations made by the agent, even if fraudulent, bind the principal, and, as a rule, this is the law. But it is impossible in my opinion to rely upon the verbal promises of the manager when the contract has been reduced to writing in the form of the letter. Even if they could be relied upon, the plaintiff once again returns to the position of seeking to enforce a guarantee, verbal this time, made by the manager as agent for the bank which had no power to enter into it. From this standpoint there can be no ratification of the manager's action for there can be no ratification of an *ultra vires* contract.

"In my view, the giving of the guarantee or undertaking in this case was unauthorized by The Bank Act, and that disposes of the whole case. There could be no ratification of such a void contract by the agent or by the bank itself."

7 Bank Officials 3 Bank Managers and 51 Bank Clerks become Pelmanists

—*One Month's Statistics*

IF the enrolments for the last 12 months were taken—instead of merely the figures of a single month—the numbers of Pelmanists engaged in Banking and Finance would no doubt prove startling to you.

This is significant. The Pelman Course has proven its value to people who are in a position to weigh its intrinsic and lasting merits.

Despite the fact that the evidence on behalf of Pelmanism has been enthusiastically subscribed to by the most eminent authorities and the great mass of the general public, the Directors of the Pelman Institute feel that each individual is entitled to his or her own private judgment. That is why the case for Pelmanism, as contained in "Mind and Memory" and the literature which accompanies it, is opened freely to your individual consideration.

Manager of Toronto Concern Gives Pelman Course to Five Employees

This Company does an International Business, maintaining Branches and Offices in New York, Chicago, London, Manchester, Paris, Brussels, Zurich, Sydney and Johannesburg.

This is a distinct and direct tribute paid to Pelmanism from a keen Canadian who appreciates the value of insuring his employees' efficiency. One firm has enrolled 165 members of its staff for the Pelman Course.

Your judgment is final—you are never pressed to enrol. Your enrolment for the Course is the expression of your own free will.

One man confessed that he hesitated long before "risking" his enrolment. Three months later he wrote: "I am more than delighted with the result. **I would never have thought it possible."**

His case is typical of many. Many students place upon record their regret for delaying enrolment, **but never a one regrets the step after it is taken.** The results are so definite, so far-reaching and so certain—whatever sphere of life the student may be in—that the sequel is always the same—a glowingly-written letter of thanks to the Pelman Institute.

It will cost *you* only the price of a postage stamp to satisfy yourself as to whether there "is anything in Pelmanism," and you will be agreeably surprised at the modesty of the fee for enrolment (it can be paid in installments if you wish). Write a post-card or fill in and post the coupon to-day. If you are near the Pelman Institute call for a private interview. Your only regret will be that you did not do so sooner.

Use this Coupon—Now

To THE PELMAN INSTITUTE.

UNDERWRITERS' PRESIDENT VISITS EAST

Thinks Insurance Will Benefit from Increased Respect for Investment—Ontario Superintendent States Law Will be Enforced

"IN future we will look back upon 1919 as the year in which life insurance came into its own," said E. S. Miller, president of the Life Underwriters Association of Canada, in addressing the Toronto association on March 5. Following the usual custom of having the president tour the Dominion early each year, Mr. Miller has been visiting cities in the east, and has already addressed several local associations. Enquiring as to the reasons for the increasing appreciation of life insurance, Mr. Miller considered that the educational value of the three Victory loans had been underestimated, and that there was now more regard for investment, and less for speculation, than before. He believed this to be a permanent change.

There was still a great field for development, however. Mr. Miller pointed out that life insurance men are more closely in touch with the people than are any other class of men. Life insurance is, in fact, a co-operative enterprise. "Let us," he said, "spread the mantle of protection over every home, and we will heal the wounds of the nation and confer a lasting benefit on the whole country. Every time you sell a policy of life insurance you make the purchaser a better citizen, a better father, a better husband. It is our business to teach the public that anything hostile to insurance is hostile to their own interests."

Commending the work of the Life Underwriters Association, Mr. Miller mentioned how it had done much to eliminate rebating and other evils. "When you know a man you do not go out to work against him," he said. The association has also enabled the agents to take united action on such questions as taxation. "We must be alive," he said, "to the increasing tendency of provincial governments to look upon life insurance companies as legitimate prey for taxation. We must also emphasize the fact that the fee for agents must not be a means of raising revenue, but rather a means of regulation."

Ontario Department's Policy

Speaking at the same meeting, V. Evan Gray, recently appointed superintendent of insurance for the province, said that as the insurance business develops, so must the work of his department, and the insurance legislation on the statute books. He considered that his adviser on insurance matters, Dr. Sanderson, was the best actuary in Canada not connected with any company, both in technical ability and in broad business training.

"It is impossible," said Mr. Gray, "for me to give you any general outline of the policy of the department at present. I recognize, however, that each of you have a vested interest in the department. The department intends to give you value and service in return for the fee you pay, by fair and honest administration of the law as it now stands, and by such amendments to that law as circumstances may require. A license will be something worth having. and offenders will be disposed of in accordance with the intention of the act."

REAL ESTATE LOAN CO. OF CANADA

Income of the Real Estate Loan Co. of Canada for the year 1919 was $84,151, which was just about the same as the income for 1918. Interest required $31,345, and expenses $11,431, both being slightly increased. After making provision for taxes, and setting aside $5,000 "for future realization of real estate," $35,000 was paid in dividends and a balance of $1,451 carried forward in profit and loss, compared with $5,234 brought forward from 1918. Assets now total $1,419,423, an increase of $18,000. Mortgage holdings have decreased, while more bonds have been bought; real estate foreclosed is $105,213, as compared with $123,788 at the end of 1918. Both sterling and currency debentures outstanding have increased.

BRITISH COLUMBIA PERMANENT LOAN COMPANY

Income of the British Columbia Permanent Loan Company for the year ended December 31, 1919, totalled $224,729, compared with $208,560 for 1918. Interest received from mortgage loans was $171,178, about $10,000 less than last year, but miscellaneous income was increased by property sales, $11,543; bond sales, $4,075, and sterling exchange, $9,091. Administrative and general expenses increased from $52,002 to $65,454, but interest charges were only $67,485, as compared with $80,268 in 1918. These together totalled $132,939, leaving $91,789 of net profits, an increase of $15,500. The sum of $28,156 was transferred to reserve fund, and $5,000 to contingent fund, the remainder being left in profit and loss.

The balance sheet shows that some of the sterling debentures have been redeemed, but that new debentures have been sold in Canada and the United States. Assets total $2,908,445, against $3,069,205 at the end of 1918. Mortgage loans have decreased, but more war loan bonds are now held. The valuation of the Vancouver property has been reduced from $278,156 to $250,000 by the above mentioned appropriation to reserve. Outside of the paid-up stock of $923,290, there is now a reserve of $600,000, the same as last year, unappropriated profits, $160,106; accrued interest receivable, $48,319, and contingent fund, $22,714. Liabilities to the public are $1,149,672, a decrease of about $180,000.

WESTERN ASSURANCE CO.

As previously pointed out in these columns, the Western Assurance Co. experienced a good increase in fire insurance business during 1919, but greatly reduced its marine business. The 69th annual meeting of the company was held in Toronto on February 26th. The president pointed out that the credit balance from the fire department was $531,686 and from the marine department $3,538. These, together with interest and rents, made a total of $758,831. Dividends on preferential stock up to the end of the year required $105,000. $25,000 was laid to reserve for taxes, contingencies, etc., and in addition $125,000 was set aside against possible unreported losses. The company has now replaced out of profits the value of the common stock, and the reserve for premiums, and the directors accordingly announced a dividend of 3 per cent. on the common, payable March 15th. It is the intention to declare a second dividend which will make a total of 6 per cent. for the year.

Referring to the marine business he said casualties during the closing months of the year wiped out all prospects of a satisfactory profit. "The movements of cargoes," he said, "was affected by inferior railroad management in the United States, by delays at the docks and by the labor unrest in all countries. Then, after shipment, the delay in unloading at ports of discharge and in despatching goods to their final destination extended the period of cover twice and thrice the time that like shipments would have taken a few years ago. The discontinuance of metal and the linings for packing cases was one of the causes that led to considerable pilferage, and also to the cargoes being more susceptible to damage by sea-water and in handling en route. When government control of railroads has been eliminated and labor is again willing to resume its past efforts in the speedy handling and loading of goods on railways, on docks and on board, and when the packing of cargoes is again carried out in the way it was done in pre-war times, we may look forward to better results. If not, then the shippers must face increased rates of insurance."

COBALT ORE SHIPMENTS

The following were the shipments of ore in pounds, from Cobalt Station for the week ended March 5th:—

Northern Customs Con., 86,274; Dominion Reduction, 62,000; total, 148,274. The total since January 1st is 2,770,649 pounds, or 1,385.32 tons.

AUDITORS' CERTIFICATE

Vancouver, B.C., January 15, 1920.

We have audited the accounts of The British Columbia Permanent Loan Company for the year ended 31st December, 1919, and beg to report that the transactions during the period have been accurately recorded in the books, the receipts as shown therein have been properly accounted for, vouchers produced for all payments, and all investments have been duly authorized. We have examined the mortgage loan accounts and have verified the cash at banks by certificates, the cash on hand by actual count, negotiable securities by inspection or certificates from the depositaries, and certificates of title have been inspected for all real estate.

The accrued interest receivable at 31st December, 1919, amounting to $48,319.73, has not been included in the Profit and Loss Account for the period.

The Balance Sheet appended hereto is, in our opinion, properly drawn up so as to exhibit a true and correct view of the affairs of the Company as at 31st December, 1919, according to the information and explanations given to us, and as shown by the books of the company.

BUTTAR & CHIENE, C.A. (Edin.)
PRICE, WATERHOUSE & CO., C.A. (Eng.)

DIVIDEND: A dividend at the rate of six per cent. for 1919 was declared and paid in January.

SUN LIFE HAS GOOD REPORT

Applications for new insurance in the Sun Life Insurance Co. in 1919, totalled $100,336,848. New policies issued and paid for in cash were 38,774, for $86,548,849, an increase of $34,957,457 as compared with 1918. The annual meeting was held in Montreal on March 2, presided over by the president, T. B. Macaulay. Business in force now stands at 223,622 policies for $416,358,462, a gain of $75,548,805, or twenty-two per cent. These figures reflect the prosperity prevailing throughout the country, and are evidence also of the high quality of the company's business. This is further emphasized by the fact that there has been a considerable reduction in the number and amount of policies kept in force under the company's automatic nonforfeiture provision, and a decrease also in the amount due on such policies.

During the year an arrangement was completed for the reassurance of the Provincial Life Assurance Co., with outstanding policies amounting to $3,989,423. This business was secured on a basis which will benefit the policyholders both of the Sun Life and of the Provincial Company.

The income from premiums, interest, rents and other sources amounted to $25,704,201, an increase of $4,053,101 over the total income for the preceding year. The reduction in the volume of annuity transactions which was so noticeable during the period of the war has now been overcome, and the receipts for last year ($2,103,318) show an advance over the previous year. The total payments to policyholders or beneficiaries for claims by death, maturity of endowments, surrenders, profits, etc., amounted to $12,364,651. The claims by death which fell in during the year, though still abnormal, were less in amount than in the previous year, although assurances in force were larger.

E. L. MORTON. Manager.

We have audited the Books and Accounts of the Real Estate Loan Company of Canada, Limited, for the year ending 31st December, 1919, and have verified the Cash, Bank Balances and Securities of the Company. After due consideration we have formed an independent opinion as to the position of the Company. In our opinion, so formed, and according to the best of our information and the explanations given to us, we certify that the above statements set forth fairly and truly the state of the affairs of the Company and are in accordance with its books. All transactions of the Company that have come within our notice have been within the powers of the company.

Toronto, 2nd February, 1920.

S. W. BLACK,
H. D. LOCKHART-GORDON, F.C.A., Can. } Auditors.

The Fire Insurance Company of Canada

BUSINESS STATEMENT FOR THE FOURTEEN MONTHS ENDING 31st DECEMBER, 1919

The Directors of The Fire Insurance Company of Canada have pleasure in submitting their first report, showing the results of the Company's operations for a period of fourteen months, accompanied by their balance sheet to the 31st of December, 1919, and the report of the Auditors.

Our operations have been eminently satisfying. Of the authorized Capital of $500,000, $484,000 was subscribed, and the amount called, $191,620 was paid in—the balance being reserved for our clients who desire to become financially interested in the Company. The gross premiums written amount to $325,071.50, and the net losses incurred by the Company amount to 12.86% of the net premium income, as appears in the accompanying financial statement.

R. DANDURAND, President.

FEBRUARY BOND SALES REFLECT QUIET MONTH

Municipal Issues Scarce—No Corporation Bonds Underwritten—Bank Loans to Municipalities Increase Greatly

CANADIAN bond sales in February, 1920, according to the record of *The Monetary Times*, totalled $8,551,405, compared with $20,504,077 in January, and $17,696,569 in February a year ago. The following is the summary:—

Provincial	$2,998,000
Municipal	5,393,405
Corporation	160,000
	$8,551,405

Municipal issues were scarce, the total of $5,393,405 being comprised chiefly of three large issues, viz., Edmonton $3,000,000; Greater Winnipeg Water District, $750,000; Outremont, $400,000. The following is the summary of municipal issues by provinces:—

Ontario	$ 454,332
Manitoba	886,873
Quebec	615,000
Saskatchewan	257,200
Alberta	3,030,000
British Columbia	150,000
Total	$5,393,405

With the exception of one small western issue of $160,000, no corporation bonds were sold.

Bank Loans to Municipalities

Bank credits to Canadian municipalities now stand at approximately $15,000,000 higher than at the same time last year, or an increase of nearly 45 per cent. With the market in an unsettled state and prices at low levels, municipalities deemed it advisable to refrain from making debenture issues, and turned to the next best resort, namely, bank loans. The following table, compiled by *The Monetary Times*, gives an interesting comparison of bank credits to municipalities:—

	1917.	1918.	1919.	1920.
January	$24,487,272	$40,015,466	$32,640,198	$46,147,388
February	26,121,324	43,535,628	36,830,183	....
March	29,877,911	50,652,061	41,993,305	....
April	35,931,996	55,685,350	47,911,199	....
May	39,700,191	57,728,226	50,356,227	....
June	42,757,673	58,000,424	52,349,353	....
July	43,989,207	56,589,173	54,455,738	....
August	43,940,176	56,662,931	57,536,867	....
September	42,721,563	47,977,472	57,033,309	....
October	41,204,781	46,275,106	56,116,897	....
November	36,459,598	40,865,358	52,703,363	....
December	36,353,039	30,684,052	42,635,290	....

Messrs. C. H. Burgess and Co., bond brokers, Toronto, have moved their offices from the Bank of Hamilton Building, to the new Canada Trust Building.

The Huron and Erie Mortgage Corporation has declared a bonus of 1 per cent. for the quarter ending March 31st, in addition to the regular dividend at 6 per cent. per annum.

FIRE LOSSES MORE THAN LAST YEAR

Reduction Compared With January, However—Total for Two Months Exceeds Last Year—Fatalities Numerous

The Monetary Times' estimate of Canada's fire losses during February, 1920, was $1,895,575, compared with $1,091,834 in February, 1919, and $2,637,850 in January, 1920. The following is the estimate of February losses:—

Fires exceeding $10,000	$1,333,575
Small fires reported	62,000
Estimate of unreported fires	500,000
Total	$1,895,575

The Monetary Times' record of the past four years shows the following monthly losses:—

Month.	1917.	1918.	1919.	1920.
January	$ 1,918,660	$ 2,688,556	$ 3,915,290	$ 2,637,850
February	2,009,953	2,243,762	1,091,834	1,895,575
March	2,050,650	1,682,286	2,154,095	....
April	1,317,714	3,240,187	1,080,070	....
May	1,163,110	3,570,014	1,785,030	....
June	1,184,627	3,080,982	3,337,530	....
July	1,101,734	3,369,684	1,118,377	....
August	1,230,183	3,110,445	1,374,495	....
September	1,301,700	917,286	1,940,272	....
October	704,605	5,119,145	1,023,288	....
November	959,049	1,059,580	2,339,870	....
December	5,144,100	1,733,917	2,047,496	....
Totals	$20,086,085	$31,815,844	$23,207,647	$ 4,533,425

The following is a list of fires at which the loss amounted to $10,000 and over:—

Halifax, N.S., Feb. 1, Oxford Street Methodist church, $55,000.

Sydney, N.S., Feb. 1, the Sydney and Louisburg roundhouse, $10,000.

Walkerville, Ont., Feb. 2, garage of Walkerville Brewing Co., $13,575.

Montreal, Que., Feb. 3, plant of St. Lawrence Welding Co., Ltd., $20,000.

Halifax, N.S., Feb. 8, building occupied by Halifax Herald Co., Evening Mail Co., Sunday Atlantic Leader Co., and the Royal Printo and Litho, Ltd., $100,000.

Aurora, Ont., Feb. 5, Baldwin flour mills, $40,000.

Windsor, Ont., Feb. 5, University of King's College, $93,000.

London, Ont., Feb. 7, Egerton Street Baptist church, $30,000.

Montreal, Que., Feb. 8, Havelock building, $25,000.

Moose Jaw, Sask., Feb. 9, Moose Jaw hardware building, $50,000.

Galt, Ont., Feb. 10, the Henry block, $12,000.

New Lovell, Ont., Feb. 10, Grain elevator belonging to John A. Bell and Son, $23,000.

Port Arthur, Ont., Feb. 10, Walsh block, $80,000.

Toronto, Ont., Feb. 10, building belonging to Hope Sash Manufacturing Co., $45,000.

Bassano, Alta., Feb. 10, plant of the United Electric and Engine Co., Ltd., $25,000.

Port Colborne, Ont., Feb. 12, Corona Theatre, $10,000.

Rigaud, Que., Feb. 12, Burnett and Crampton foundries, $25,000.

Woodstock, N.B., Feb. 13, Hayden-Gibson theatre block, $100,000.

Toronto, Ont., Feb. 14, building situated at 10 Front St. East, $75,000.

Stave Falls, B.C., Feb. 15, warehouse of the Western Canada Power Co., $10,000.

Guelph, Ont., Feb. 20, Taylor-Forbes Co., $25,000.

St. John, N.B., Feb. 20, residence of W. Woods, Edith Ave., $10,000.

Moncton, N.B., Feb. 21, machine shop occupied by John Abrams and Sons, $20,000.

Weston, Ont., Feb. 25, Willys-Overland Motor Car Co., $25,000.

Admiral, Sask., Feb. 26, Demel's store and Gravel's drug store, $20,000.

Fort William, Ont., Feb. 26, garage owned by Geo. Dolcetti, $60,000.

Sydney, N.S., Feb. 26, school, $12,000.

Brandon, Man., Feb. 27, Langham Hotel, $10,000.

Sydney, N.S., Feb. 27, Bank of Nova Scotia block, $160,000.

Toronto, Ont., Feb. 28, Coady Carriage Works, $10,000.

Canning, N.S., Feb. 29, store of A. F. Bert, $30,000.

Toronto, Ont., Feb. 29, plant of Reid and Brown foundry, $50,000.

Capreol, Ont., Feb. 29, Y.M.C.A. building under construction for the Canadian National Railways, $60,000.

The following structures were destroyed or damaged last month: Residences, 22; stores, 5; churches, 4; factories, 3; railway stations, 2; business building, 17; business blocks, 4; roundhouse, 1; farmhouse, 1; barns, 4; grain elevator, 1; hotel, 1; garage, 1; college, 1; theatres, 2; flour mill, 1; presbyteries, 3.

Among the causes reported were: Defective chimneys, 2; gasoline explosions, 5; thawing pump, 1; overheated furnace, 1; coal oil explosion, 1; defective furnace, 1; defective wiring, 1; overheated stovepipes, 1.

The following is a list of fires at which fatalities occurred last month:—

Whitewood, Sask., Feb. 3, trapped in burning house	1
Montreal, Que., Feb. 4, trapped in burning shop	3
Halifax, N.S., Feb. 5, fire from using oil in stove	1
Toronto, Ont., Feb. 5, fire from playing with matches	1
Lachine, Que., Feb. 5, trapped in burning house	2
Port Lambton, Ont., Feb. 12, trapped in burning house	1
Elrose, Sask., Feb. 12, coal oil lamp explosion	3
Coteau, Sask., Feb. 14, trapped in burning house	3
Gooderham, Ont., Feb. 19, trapped in burning house	3
Hamilton, Ont., Feb. 21, trapped in burning house	3
Greenfield Park, East Que., Feb. 25, trapped in burning house	5
Cartwright, Man., Feb. 27, coal oil explosion	4
Total	30

The following table, compiled by *The Monetary Times*, shows deaths caused by fire during the past seven years and this year to date:—

Month.	1913.	1914.	1915.	1916.	1917.	1918.	1919.	1920.
January	14	26	3	10	21	28	13	22

TRUSTEE COMPANY OF WINNIPEG

The Trustee Company of Winnipeg and the affiliated companies, the Continental Fire Insurance Company and La Compagnie Fonciere de Manitoba, Limited, have moved into their own building at 322 Main Street, which has been fitted to suit their requirements. Mr. de la Giclais, who during the whole period of the war was a French artillery officer, has taken up the active management of these companies, and has laid plans for increased business. W. B. Sterling, who represents large Holland interests, and who is a director of the Trustee Company, is also in the office.

News of Industrial Development in Canada

Exchange Situation Causing Manufacturers Who Buy in United States to Turn to Britain for Supply—This Year May See Establishment of Two Pulp Mills on Great Lakes—No Prospect of Mill for Port Arthur—Nothing Definite Regarding Nova Scotia and Dominion Steel Amalgamation

"THE inquiries received by the three British trade commissioners in Canada for goods made in the United Kingdom, continue to multiply," said F. W. Field, British Trade Commissioner in Ontario, in an interview with *The Monetary Times*. "The exchange situation is causing a number of buyers, who have hitherto made their purchases in the United States, to turn towards sources of supply in the United Kingdom and in the British Empire generally. During the past few months, my office has received an unusually large number of such inquiries for an extensive list of merchandise, machinery, etc., and for the names of British manufacturers of various products. A number of new trade connections thus will be made and many will continue even after the exchange situation becomes more normal.

"Signs of trade recovery in the United Kingdom are to be seen in a greatly increased demand, which is especially noticeable in the iron and steel trades. At present the United Kingdom appears to be in a more favorable position than any other for meeting the demands, the United States having heavy arrears of work to make up, and being unable to offer deliveries except at very long dates. The exchange rates are also obstacles to the United States entering the United Kingdom with manufactured goods.

"There is now a substantial investment in Canada in the shape of branch works, warehouses, etc., of United Kingdom manufacturers, considerably larger and more extensive than is generally believed. Additional branch factories and warehouse are likely to be established here this year and the representatives of several English firms will visit the Dominion during the next few months to look over the ground with that object in view."

Pulp and Paper Trade

Developments indicate that at least two large pulp and paper concerns will locate at the head of the Great Lakes, and there is a further possibility of a third company manufacturing beaver board establishing in that district. The power problem is still causing trouble, but settlement in this direction is expected within a month. At least one deal for a timber limit has been practically settled, which assures the building of one mill, and announcement of a definite nature, with regard to this one in particular, may be expected shortly.

A letter has been received from A. L. Alsted, head of the Great Lakes Paper Co., in which he said the delay in the construction of a mill at the head of the Great Lakes was due to the inability of the promoters of the company to secure a suitable power contract with the Hydro-Electric Commission which would enable them to compete with other concerns. He also stated that the options on equipment had expired in December, and to purchase equipment now would mean a net loss of a quarter of a million dollars on account of the advance in price. It is not probable that the mill will be located at Port Arthur or Fort William now.

A large timber deal has just been completed in the purchase by Messrs. Bloedel, Welch and Stewart, of a considerable tract on Vancouver Island, B.C., just north of the Union Bay. The tract consists of 6.000 acres and the fir and cedar timber available is reported to average 40,000 feet per acre. The establishment of camps will necessitate the construction of three miles of railway line to transport the logs to tidewater. The price paid for the tract is said to be $500,000.

The International Paper Co. interests have taken over the pulp and paper plant of the Aroostook Pulp and Paper Co. at Keegan, on the St. John River, a short distance above Grand Falls, N.B., from the company headed by A. R. Gould, of Presque Isle, Me., former president of the St. John Valley Railway. The transfer, which has just been made to the American Realty Co., a subsidiary of the International Paper Co., includes, in addition to the pulp and paper mill, the holding grounds and shore rights of the company along the St. John River on which the mill is located at Keegan, just west of the sorting booms at VanBuren, where there are large lumber mills also on the American side of the river. It is anticipated that large additions will be made to the present plant, and it is reported that these will include a mill for the manufacture of Kraft paper.

It is announced by R. W. Mayhew, that the Sidney Rubber Roofing Co., will erect a plant at Victoria, B.C., at the cost of $200,000. The new plant will manufacture roofing felt, building paper and heavy wrapping paper, and will employ between sixty and seventy men. The old plant at Sydney will remain where it is for a year or two and will then be moved to Victoria. The roofing felt and the building paper will be saturated at the Sidney plant. Oil refining for roofing and for other purposes will continue to be done at Sydney. The roofing felt and building paper will be made from rags, waste paper and screenings from the paper mills. Mr. Mayhew states that the company expects to get fifty per cent. of the necessary material in British Columbia. The daily output is estimated at twenty tons.

Iron and Steel

A new step in the advancement of the Canadian iron and steel industry, is foreshadowed by the plans of the Dominion and Nova Scotia Steel Corporations for amalgamation. No announcement has yet been made, but it is practically certain that the two companies are carrying on negotiations quietly with this view in end. At the close of a meeting of the directors of the Dominion Steel Corp., on March 6, nothing definite was learned, contrary to general expectations. It is stated that such an undertaking has the full support of the British government, and the presence of Sir Newton Moore and Col. Grant Morden in Ottawa last week, suggests that encouragement is being sought from the Dominion authorities.

An expenditure of half a million dollars for a scrap mill and open hearth furnace is a projected plan of the department of industries, Victoria, B.C., on which a special committee of the industrial advisory board, including Major Martyn, Mr. Nichol Thompson and Mr. J. H. McVety of Vancouver, B.C., is now at work. It is planned to establish the proposed plant at Vancouver, but it is hoped that existing plants will meet the advisory committee to the extent that one central plant shall replace the numerous industries now operating but which have no facilities for electric smelting and have no open hearth furnace. It is understood that a company is prepared to establish a scrap mill of the above nature at once, but the industrial department is not willing to sanction such a move unless existing interests are first satisfied. Some of the plants which may be affected are Port Moody steel works, Opsal steel works, the Aetna steel works, all of Vancouver, and the Vancouver rolling mills at Eburne.

The business of the Campbell-Howard Machine Co., Sherbrooke, Que., has been sold to Messrs. Geo. L. Dourne and F. A. Schaff, of New York, who will continue to operate under the name of the Sherbrooke Iron Works. It is understood that special machinery will be installed for the manufacture of locomotives, marine and stationary super-heating apparatus, together with other steam specialties. This will bring a new industry to Sherbrooke and, in addition to the manufacture of this special equipment, the new company

will continue to carry on a general foundry and machine business.

The Canadian Pacific Railway has given out equipment orders totalling approximately $15,000,000. These orders call for 2,500 sixty-ton box cars, 500 refrigerators, 500 automobile cars and 67 ore cars. The company will be able to execute a considerable portion of the orders, while the Canadian Car and Foundry Co., Ltd., will get a large part of the total.

London, Ont., is assured a new plant in the establishment of a metal specialties industry which now manufactures on a large scale in the United States. The company which operates at the present time some branches in Canada, plans to concentrate its Canadian output in London.

Miscellaneous Notes of Industry

The Robin Hood Mills Co. will build a concrete elevator at Moose Jaw, Sask., this year at the cost of $150,000, and with a capacity of 425 bushels.

The Eastern Coast Fisheries Co., with headquarters at Rockland, Me., is being held up in its effort to establish a branch at St. Peters, C.B. The Canadian fishing regulations say that American boats cannot bring fish ashore to be cured and shipped over the border. This is what the new fishing company is up against and at present operations are at a standstill. The matter is before the Ottawa government. It was the intention of the company to spend $1,500,000 at St. Peters. Several steam trawlers were to be put into commission and an extensive shore plant was to have been constructed.

The North Star Oil Refining Co. will locate a refinery at Saskatoon, Sask.

The Border Cities Chamber of Commerce has secured another new industry for Windsor, Ont. Through the efforts of the chamber, the Modern Pattern and Machine Co. will open a plant at that city.

The Elgin Milk Products Co., Ltd., manufacturers of "Mealsmilk," a powdered whole milk product, will commence the erection of a new plant in St. Thomas, Ont. shortly. Mr. U. L. Appleford, president of the company, has just returned from England, where he has secured capital for the erection of a chain of factories.

The Western Implement Co., at present occupying temporary premises in Regina, Sask., have decided to build a warehouse in the city at the cost of about $30,000.

Charlottetown, P.E.I., will probably get a new industry, providing the proposals of W. P. Hartman, representative of the Falk American Potato Flour Corp., of Pittsburg, Pa., to open a branch factory in the province, are accepted. Mr. Hartman stated to the Charlottetown Board of Trade, that it was proposed to start the factory with one unit which would absorb about a carload of potatoes a day, or 250 carloads a season, with a view of adding units as the business would develop. The company have five mills operating in Michigan, Wisconsin, Minnesota, Idaho, Colorado and Maine, and are planning for the erection of additional plants in the United States and Canada.

The De Long Hook and Eye Co., of Philadelphia, Pa., who operate a plant at St. Marys, Ont., contemplate manufacturing all their Canadian goods on this side, and will, consequently, need to make large extensions.

At Leamington, Ont., the Dominion Canners Co. is planning a new canning factory at the cost of approximately $100,000. The present plant will be disposed of.

The plant of the Canadian Car and Foundry Co., at Welland, Ont., will shortly be re-opened, as the company has received a large order from Belgium for railway equipment.

A new company, organized in Brantford, Ont., to be known as the Ontario Cement Co., has purchased the plant of the Ontario Portland Cement Co. at Blue Lake, near St. George, Ont., and will remove the plant to Beachville where the company has secured 170 acres of land, which will supply for many years to come the material to manufacture.

The Automobile Service Syndicate plans the erection of a 10-story automobile parking station at Richmond and Sheppard Streets, Toronto, at a cost of $1,000,000.

NEW INCORPORATIONS

The Mutual's Wonderful Year

"Nineteen-nineteen" will stand out for all time as a conspicuous landmark in the forward march of the Mutual of Canada. In amounts paid to policyholders, in assets, in new assurances written. in assurances in force—splendid increases were recorded Nineteen-twenty bids fair to eclipse last year for the demand for Mutual policies is insistent. "The reason why" is no mystery. Fifty years of just and generous dealing lie behind the immense demand for Mutual protection. The Mutual has disbursed $29,981,000 to beneficiaries and holds to guarantee future payments $37,689,000—in all $67,668,000—either paid to or held for beneficiaries. All assets including surplus being exclusively the property of our policyholders.

SUCCESS IN LIFE INSURANCE

Salesmanship depends so much upon the service rendered that we have adopted as our slogan: **"Greater Service to Policyholders."** We have a few desirable positions for good salesmen who will study their clients' best interests, and co-operate with the Company. Every assistance, financial and otherwise, given earnest, hard workers, to make good. Apply with references, stating experience, etc., to **S. S. WEAVER, Eastern Superintendent, at Head Office**.

THE CONTINENTAL LIFE INSURANCE CO.

Head Office - - TORONTO, ONTARIO

One Reason

men sometimes give for failing to take out Life Insurance is that they are buying a home and want all their money.

Buy the home, by all means. But remember that a home without an income might be little better than a burden to your wife if you were suddenly removed.

Provide the necessary income by means of Life Insurance. Give your wife a MONTHLY income, as she has been accustomed, by means of the Monthly Income Policy issued by The Great-West Life. Thus the home may be preserved, and the funds left for the support of dependent ones be beyond the possibility of unwise investment or loss.

NEWS OF MUNICIPAL FINANCE

Brantford, Sarnia and Moose Jaw Tax Rates Up—Esquimalt One Mill Lower—Winnipeg Tax Collections Increase Over $1,000,000

Brantford, Ont.—The city council has finally struck the tax rate at 40 mills, made up as follows: Schools, 13.65; city's share of local improvements, 1.85; general, 24.5.

Sarnia, Ont.—The financial budget for the year shows an estimated taxe rate of 40 mills, an increase of 9 mills over last year and 8 mills over the year previous to 1919.

Montreal, Que.—The Administrative Commission is studying a plan for the expenditure of $2,000,000 for public works, which includes street paving, sidewalks and sewers.

Esquimalt, B.C.—The tax rate for the municipality has been set at 17 mills, or one mill lower than in 1919. The estimate of expenditure for the year totals approximately $78,500.

Moncton, N.B.—The city will make application to the legislature for a new assessment act. Application will also be made to amend the act of incorporation to provide that the amount of the temporary loan of the city remaining unpaid at any time may amount to any sum not exceeding $250,000.

Moose Jaw, Sask.—The tax rate for public school supporters will be 42.95 mills as compared with 34.70 for last year, and the rate for separate school supporters will be 49.95 mills, as against 47.45 for 1919. The public school rate is based on a levy of $945,000, and the separate school rate on a levy of $726,000.

Victoria, B.C.—It is understood that the city will probably ask for a private charter similar to that held by Vancouver. Vancouver is the only city in the province carrying on under a private charter. All the other cities and municipalities are grouped together under the Municipal Act, being affected by similar conditions, and therefore adapted to the same code of regulations and restrictions, subject to amendments from time to time by the submission of private bills for special action at the hands of the legislature.

Verdun, Que.—By a majority of two, the suggested imposition of a special tax proposed recently with a view to wiping out the discrepancy between the established revenues of the city and the expenditures authorized by the budget for the current year, was defeated by the council at its last meeting. The tax would call for an extra 70 cents per hundred dollars of valuation, which, in addition to the tax of $1.29½ already imposed, would make a total of $1.99½ per $100. The aldermen who defeated the tax submitted several sources from which the necessary amount to cover the deficit might come.

Chatham, Ont.—The city council, on March 9th, adopted the report of the City Government Committee, suggesting that the general manager form of the city government be adopted by the city. Under the form suggested, a council of seven and a mayor would be elected for a term of two years. The council would appoint a general manager, who would have full control of all the departments now controlled by the city council at a substantial salary. The report recommended that the city solicitor be instructed to draft a bill to be presened to the legislature at the present session to enable the city to adopt the new system of government.

Edmonton, Alta.—The city is applying to the legislature for certain amendments to its charter. Some of the more important improvements requested are: After minister of municipal affairs has approved a by-law, debentures become incontestable; debentures incontestable if one year's interest paid; repeal of sections exempting banks, etc., from city income tax, and making those institutions subject to tax. The schedule of the civic income tax is as follows: On first $1,000 of taxable income, 1 per cent., on the next, 1½ per cent., and on the next, 2 per cent. On the next $2,000, 3 per cent., on the next $5,000, 5 per cent., and on all taxable income in excess of $10,000, 8 per cent.

Winnipeg, Man.—Tax collections from May 1, 1919, to the end of February last amounted to $7,154,607, of which $372,764 was business tax, $517,268 water district levy and the balance realty tax collections. Total collections shows an increase of $1,074,000, as compared with the same period last year.

At a meeting of some of the leading business men of the city on March 5, a resolution was passed asking that action on the part of the city in demanding from the provincial government, the right to place a tax on incomes. A resolution was also passed asking for the appointment of a tax commission to deal with the equalizing of assessment.

Saskatoon, Sask.—The tax rate for 1920 will be 20.20 mills. Estimated expenditure for the year is $825,085, as compared with $734,484 for 1919. Total net assessment for 1920 is $29,700,000. Net profits on the city's public utilities for 1919 amounted to $12,802, made from the water system, electric light and power plant, and water delivery, according to a report submitted to Commissioner Yorath. Loss for the year on the street railway amounted to $10,819. The profit on the light and power plant was $4,826, on the water system $17,880, and on the water delivery $915. The revenues and expenditures account shows a deficit of $4,658. However, had the surplus earnings of the sinking fund been taken into the current revenue of last year, there would be a surplus in current accounts of approximately $29,000.

Alberta.—A question of importance which will shortly come before the legislature, is the assumption by the province of some of the bad debts owing by a number of Alberta towns. Hon. A. G. MacKay, minister of municipal affairs, is understood to be in favor of the province taking over a portion of the debenture indebtedness of towns which are themselves unable to carry their burdens, and will probably make a recommendation to that effect. There are several towns in the province that are in a more or less precarious financial condition. Athabaska heads the list, with Wetaskiwin, Redcliffe and Macleod following. The finance commission appointed by the government has dealt with some of these cases, but in regard to Athabasca, in particular, it was unable to reach any satisfactory settlement. A total of $200,000 from the province would be sufficient, the minister thinks, and a vote for that amount may be asked for.

South Vancouver, B.C.—The auditor's statement of the municipality's finances for 1919, shows a general improvement as compared with previous years. Arrears of taxes amount to $26,511, while the tax sale corporation purchases amounted to $154,155 during the year. The water rates arrears have been reduced to the minimum it was stated in the report. There has been $92,495 deposited to the sinking fund account during the year, which is an improvement over 1918 of $10,180. The loans of the municipality have been increased $148,999. The statement of assets is as follows: Highways, $2,999,958; local improvements, $400,354; sidewalks, $243,267; sewers, $264,335; water service, $954,387; parks, $7,720; schools, $1,206,527; taxes arrears, $331,026; sites and buildings, $68,528; furniture and equipment, $68,809; and cash on hand, $428,727. Income of the municipality during 1919 was $1,297,264, while in 1916 it was $770,894. The expenditure for the year was $1,394,418.

Regina, Sask.—The question of paying interest on the city's sterling bonds, is now receiving serious consideration by the city council. Those citizens outside of the city council who have expressed their opinion on the matter, seem in favor in payment at par of exchange, with one or two exceptions. F. J. James, of Nay and James, investment brokers, said: "I have only one opinion on the subject, and that is that Regina should continue to pay at par of exchange. This is the course that the city should pursue in its own general interest. My impression is that the city received payment for these bonds on a basis of $4.86⅔ to the pound, and that they have, from year to year, struck a rate on that basis. I feel, also, that if, at the time they made the issue, they had been requested by the purchasers to add the provision to the wording of the bonds that they would be redeemed at the rate of $4.86⅔ to the pound, they would have complied without hesitation."

BRITISH COLUMBIA MANUFACTURERS' ANNUAL

The annual meeting of the British Columbia Manufacturers' Association was held in Vancouver, February 24, and the following officers were elected: President, J. H. Falkner; vice-president, A. B. Weeks; honorary treasurer, E. G. Baynes; vice-president for Vancouver, F. T. King; vice-president for Victoria, N. A. Yarrow; vice-president for New Westminster, N. Nelson. Chairmen of the different sections are as follows: Food and kindred industries, A. E. Mason; lumber, etc., A. M. Dollar; printing, etc., J. H. Hamilton; smelting, etc., I. Hopkins; fisheries, etc., J. W. Watson; oil refining, etc., Henry Darling; general contracting, etc., George Murray; dry goods, etc., J. W. Curran.

Alderman J. Ramsay, the retiring president, in his address spoke of the necessity of bringing back the Canadian dollar to its true value, and urged the purchasing of British-made goods and the support of a greater production. He said the loss of production through strikes had been enormous, and dwelt on the insidious danger of "socialism in its extremist form." In dealing with the lumber trade, Ald. Ramsay stated that the total log scale for British Columbia in 1919 was 1,758,330,000 feet. The total cut of the British Columbia mills was a record one, the value of the production being $70,000,000. Total exports were 105,111,000 feet. Mr. Ramsay dealt with all the sections of the association in a detailed manner, his report being adopted by acclamation. A. W. Weeks urged that a better attendance at the meetings would be advantageous to the association. F. A. Brodie, who spoke on "Civic Taxation," said that the finances of the city were in bad shape, and that the council had put off the evil day as long as possible.

CANADIAN NATIONAL EXHIBITION

The fortieth annual meeting of the Canadian National Exhibition was held in Toronto on February 25th. The treasurer's report and financial statement for 1919 showed a revenue of $774,500, with cash balance of $203,821. The city was paid $175,007; $15,000 was reserved as per lease, $23,483 was withheld on account of works authorized but unfinished, and $330 was withheld on account of license deposits. Among the big items of expenditure were: Management, $27,049; prize account, $68,536; wages, $19,378; advertising, $23,762; percentages paid Midway shows, $113,117.

Various suggestions for the improvement of the grounds and buildings were adopted. The following directors were elected: Agricultural (all re-elected)—W. W. Ballantyne, Stratford; J. J. Dixon, Toronto; Wm. Dryden, Brooklin; H. R. Frankland, Toronto; Robert Fleming, Toronto; John Gardhouse, Weston; R. Miller, Stouffville; Joseph Russell, Toronto. Directors in the Manufactures', Liberal Arts and Miscellaneous Section—T. Bartram, C. A. B. Brown, John Firstbrook, Sam. Harris, Geo. T. Irving, Sam. McBride, Alfred Rogers, T. A. Russell. C. A. B. Brown has been elected president, succeeding T. A. Russell.

SURPLUS IN POST-OFFICE DEPARTMENT

The report of the postmaster-general, which was tabled in the Commons on March 2, shows a net revenue for the fiscal year, 1918-19, of $21,602,712, an increase of $257,318, as against an expenditure of $19,273,583, an increase of $1,227,026. The surplus of revenue for the fiscal year over expenditures was $2,329,128. There were on March 31, 1919, 12,290 post-offices in operation in the Dominion. New offices opened during the year numbered 130, while 462 were closed, chiefly because of the extension of rural mail delivery routes. Of these, 31 new ones were inaugurated during the year, making a total of 3,705 in operation.

The amount of money withdrawn and savings accounts closed during the year at the postoffice savings banks were both greater than in the preceding twelve months. Fewer new accounts were opened. The balance at the credit of depositors on March 31, 1919, was $41,654,960.

Government and Municipal Bond Market

Outlook Seems More Cheerful—Some Large Municipal Issues Coming—Plan to Issue $5,000,000 Bonds for British Columbia Roads Favored — Regina to Sell Securities Locally at, Par

THE outlook for the Canadian market for government and municipal bonds seems a little more cheerful than it did a week ago. With the final payment of the last Victory loan completed, and Victory bonds being bought up rapidly, the depression appears to have lessened to a certain extent.

Judging from the list below, the next few weeks may see a large number of municipal bonds placed on the market. Moncton requires about $500,000; Chatham, Ont., $317,000; Saskatoon, $1,000.000, Many other municipalities are also seeking for loans. The city of Quebec, which tried to float a loan of $2,500,000 in New York, rejected all tenders, and will now make the loan in the Dominion, which is a promising sign.

The $5,000,000 Province of Ontario 5-year 5½ per cent. bonds, purchased by A. Jarvis and Co., in syndicate with American brokers last week, at a price of 100.65, Canadian funds, which were offered to American investors at 93.76 and interest, at which price the yield is about 7 per cent., have all been sold, according to the syndicate managers.

Coming Offerings

The following is a list of offerings, of which mention has been made in this or previous issues:—

Alberta School Districts	$ 47,600	6½	Various	Mar. 15
Hamilton, Ont.	385,000	5	Various	Mar. 24
Nokomis, Sask.	20,000	7	15-years	Apr. 1
Strasbourg, Sask.	6,000	6½	15-instal.	
Fort Frances, Ont......	23,847	6	15 & 20 inst.	Mar. 15
Hamilton, Ont.	596,768	5	10 & 20 inst.	Mar. 24

Fort Frances, Ont.—Tenders will be received until March 15th, 1920, for the purchase of $23,847 6 per cent. debentures in blocks of two maturities, namely, 15 and 20 instalments.

Hamilton, Ont.—Tenders will be received until March 24th, 1920, for the purchase of two blocks of bonds as follows: $346,768 5 per cent., 10-instalments, and $250,000 5 per cent., 20-instalments. W. R. Leckie, city treasurer.

Debenture Notes

Gilbert Plains, Man.—The municipality is applying to the legislature for permission to borrow $22,000 for electric light purposes.

Toronto, Ont.—The Board of Education will ask legislation to raise its own money by debentures, and to eliminate the city council control.

Grand-Mere, Que.—The ratepayers have approved of the floating of a loan of $65,000 to cover the reimbursement of a loan falling due on May 1st next for the same amount.

Chatham, Ont.—The council will submit to the ratepayers at the earliest opportunity a by-law authorizing the raising of $371,000 by 30-year debentures for the purpose of erecting a filtration plant.

Moncton, N.B.—The city is seeking authority from the legislature to issue debentures to the amount of $307,500 for the purpose of various local improvements. The school board is also desirous of securing $200,000 in the same manner.

Saskatoon, Sask.—Owing to the depressed condition of the security market, the city council has decided to leave the matter of issuing debentures to the amount of $993,000 until March 15th, when it is considered that more definite indications of the stability of the market will be forthcoming.

Scarboro' Township, Ont.—The council has passed a by-law for the issuing of debentures to the amount of $130.000 for the construction of the proposed waterworks in the south-western township. The by-law is subject to veto by the Ontario Municipal Board, which will consider the matter on March 22nd.

British Columbia.—At a conference between the cabinet and the Good Roads League last week, the suggestion of Hon. J. H. King for the issue of $5,000,000 bonds for the development of good roads in the province was favored by those present. The advisability of levying a tax on autos and trucks, according to the weight of the vehicle, was approved of.

Regina, Sask.—By-laws for debentures totalling $61,000 have been passed. The Local Government Board has also authorized the issuance of such bonds by local sale, and every effort will be made by the city to popularize the issue, which will be disposed of to citizens in blocks as small as $100 and $50. The period of maturity in some cases will be fifteen years, though bonds of a longer term will be included in the offerings. While the bonds are being floated for specific improvements, they have behind them the backing of the entire city's assets, and the interest rate will be 6 per cent. It is the intention of the city to issue printed prospectuses, with application blanks.

This move by the city is an entirely new one in the west, where it is considered that there is practically no market, and the sale should prove a very interesting one.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from February 16th to February 28th, 1920:—

Schools.—Yorkton, $15,000 20-years 6 per cent. annuity; *Milton, $1,000 10-years 8 per cent. instalment; Govan, $2,500 10-years 8 per cent. annuity; *Elfros, $1,800 10-years 7 per cent. annuity; *Bunkerhill, $900 10-years 8 per cent. instalment; Bogend, $900 5-years 7 per cent. annuity; *Teepee, $4,500 10-years 8 per cent. annuity.

Villages.—Edenwold, $500 10-years 8 per cent. instalment, improvements and drainage; Atwater, $700 7 years 8 per cent. instalment, drilling well.

Towns.—Strassburg, $6,000 15-years 6½ per cent. annuity, sidewalks; Duck Lake, $1,500 15-years 7 per cent. annuity, sidewalks; Kamsack, $20,000 15-years 7 per cent. annuity, electric light.

---

*Being included in the next sale by the board.

Bond Sales

Sarnia, Ont.—Messrs. Wood, Gundy and Co. have been awarded debentures totalling $101,040 as follows: $35,000 5½ per cent. 10-years, 96.16; $50,000 5½ per cent. 20-years, 94.50; $6,460 6 per cent. 20-years, $4,265.68 6 per cent., 3-years, and $5,313.87 6 per cent. 5-years, 98.52. The average price on the five blocks is 95.71. Three small blocks, viz., $1,580 6 per cent. 10-years, $1,155 6½ per cent. 9-years, and $864 6 per cent. 10-years were not awarded, and it is understood that the bonds will be offered at 94.525 for the total and Co. were next highest bidders at 94fl.525 for the total block of $104,639, and C. H. Burgess and Co. next at $98,352 for the whole block.

Saskatchewan.—The following is a list of sales reported by the Local Government Board from February 16th to February 28th, 1920:—

School Districts.—Two Rivers, $5,000; Saskatchewan General Investment and Agency Co. Saline Creek, $1,200; Regina Public School Sinking Fund, Regina. Greenvale, $2,700, Mundie, $3,500; Waterman-Waterbury Manufacturing Co., Regina.

Rural Telephone Companies.—Smiley S.E., $230; Tom Vallance. Narrow Lake, $8,800, Lenora Lake, $4,200, Brampton, $1,050; W. L. McKinnon and Co. Thorndyke, $1,200.

Manitoba School Districts.—Messrs. H. J. Birkett and Co. have purchased $3,000 7 per cent. 20-instalment Plainview School District debentures, and $3,000 6 per cent. 20-instalment St. Louis School District debentures.

MUNICIPALITIES MAY BORROW TO AID FARMERS

A bill has been introduced into the Manitoba legislature, giving rural municipalities power to borrow up to the amount of $30,000 for the purpose of aiding farmers in the district who have suffered by unfavorable climatic conditions or otherwise.

HARRIS, FORBES AND COMPANY IN NEW FIELD

Harris, Forbes and Co. in the United States and Harris, Forbes and Co. in Canada, one of the oldest and largest retail bond organizations, are preparing to enter the industrial financing field. Heretofore this organization has confined itself strictly to government, municipal, railroad and public utility bonds. However, they participated in the recent General Electric note financing, and have now announced that they will be interested hereafter in the handling of bonds and notes of high-grade industrial corporations.

DOMINION BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co. during the week ended March 5, 1920, in provinces, as compared with those of previous weeks, and corresponding week of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P.E.I.	Total.	1919.
Mar. 5th ..	1	7	3	1	1	0	3	0	0	16	11
Feb. 27th ..	3	1	0	0	2	1	5	0	0	12	11
Feb. 20th ..	4	7	2	0	2	0	1	0	0	16	16
Feb. 13th ..	2	2	2	0	1	0	1	0	0	8	21

Bradstreet's figure for the week ended March 4, 1920, was 14, compared with 14 for the preceding week, 13 for the same week in 1919, 24 in 1918, 34 in 1917, and 51 in 1916.

GOVERNMENT BOND QUOTATIONS

The following quotations of active bonds are supplied by the National City Co., Ltd., and are in New York funds:—

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920)	97⅝	97⅞
United Kingdom 5½% (Nov. 1, 1921) ..	95⅝	96
United Kingdom 5½% (Nov. 1, 1922) ..	92	92½
United Kingdom 5½% (Aug. 1, 1929) ..	90½	91
United Kingdom 5½% (Feb. 1, 1937) ..	86½	87
City of Paris 6% (Oct. 15, 1921)	90½	91

Dominion of Canada 5½% (Aug. 1, 1929)	93½	94
Imperial Japanese 4% (Feb. 15, 1931) ..	60	61½
Imperial Japanese first 4½% (Feb. 15, 1925)	74½	75
Imperial Japanese second 4½% (July 15, 1925)	75	75½
Swedish Govt. 6% (June 15, 1939)	91¼	92

CASUALTY COMPANY OF CANADA

Plate glass insurance business has not been profitable during the past few years, because of the greatly increased cost of replacing glass. Most casualty companies carry this business along by profits received from other lines, but the Casualty Company of Canada, which thus far has written practically no other business, has not been able to do so, It has been decided, however, to extend the scope of the business to all lines except fire.

The premium income for 1919 was $8,156, and total income $15,377, including calls on and premiums on capital stock. Disbursements were $9,855, assets total $33,328 and liabilities (except capital stock) $9,739, leaving an excess of $23,589. The paid-up capital is $25,215.

EDMONTON, DUNVEGAN AND B. C. FINANCES

In the Alberta legislature on February 27, A. F. Ewing opposition member for West Edmonton, reviewed the bond sales transactions on the E.D. and B.C. system, with special reference to the Grand Prairie section of the railway, charging that these bonds had not been disposed of to advantage and that there was a discrepancy to the extent of $233,000 between what the securities were said to have sold for and what they should have brought at par. He also scored the E.D. and B.C. system severely, and finally stated that he was prepared to support a vote of from $500,000 to $1,000,000 from the province to help place the road in shape.

Premier Stewart reaffirmed the government's intention to appropriate funds for the improvement of the E.D. and B.C. in the event of the Dominion government not taking the system over, of which definite assurance had already been given by the federal authorities. The premier said he was amazed at Mr. Ewing bringing up the question in such a manner, charging that the facts had been hidden from the public, whenever opportunity had been offered, and certainly taken advantage of, to investigate all such records through the public accounts committee of different sessions of the legislature.

MANITOBA BLUE SKY LEGISLATION

Among the bills now before the Manitoba legislature is one to amend the Sale of Shares Act, but just what change will be made is not yet certain. Giving evidence before the law amendments committee on March 2, C. A. Millican, who is secretary of the Gabrielle mine, Pine Lake, said that he was in favor of elimination of wild-catting by promoters, with promoters' stock. Mr. Millican stated that the mine he represented had controlled the promoters' stock by pooling it and declining to register a transfer or sale of stock from one stockholder to another.

The proposition, as Mr. Millican explained it, was that a few individuals purchased a mining site for $500. They forthwith organized a company with a capital of $2,000,000, of which they appropriated $1,000,000 to themselves as promoters or vendors' stock. This stock cost them on the basis of the $500; they had expended a very low sum. The company then proceeded to put the other half of the stock or development stock on the market and the proceeds of this sale was applied to the development of the mine. At the same time, however, the promoters unloaded their private stock, at probably a much lower figure, which would, however, give them an exceedingly large profit. The idea of the amendments, said Mr. Millican, must be to prevent this sale of the promoters' or vendors' stock until it was justified by the development of the mine.

Another recommendation put forward by Mr. Millican is that the public utility commission would be utilized by the government as a central office to which all mining companies would be required to send a monthly report, these reports to be open for public inspection, and if advisable, published in the daily press.

AMERICAN SALES BOOK COMPANY
LIMITED

Report of the Directors to the Shareholders for the Year Ended December 31, 1919

The Directors present herewith their Report showing the results of the Company's operations for the year ended December 31st, 1919, with the accompanying Statement of Assets and Liabilities, as follows;—

Balance brought forward from 1918	$269,897.07	
Profits for the year	427,237.81	
		$ 697,134.88

Reserve for Depreciation on Buildings, Plant and Machinery			$ 579,073.05	
Profit and Loss Account Balance (Subject to U.S.A. Federal Taxes on 1919 Profits)			270,851.83	
				849,924.88
				$5,369,800.24

AUDITORS' CERTIFICATE

We have audited the accounts of American Sales Book Company, Limited, for the year ending 31st December, 1919, and we certify that in our opinion the above Balance Sheet is properly drawn up so as to exhibit a true and correct view of the Company's affairs according to the best of our information and the explanations given us and as shown by the books of the Company.

We have received all the information and the explanations we have required.

CLARKSON, GORDON & DILWORTH,
Chartered Accountants.

At the Seventh Annual General Meeting of the Company, held in Toronto on March 10th, 1920, the following Board of Directors and Officers were elected for the ensuing year: S. J. Moore, President; W. D. Van Horn, Vice-President; A. M. Bovier, Treasurer and General Manager; A. E. Ames, Charles G. Brand, Charles W. Colby, Ph.D., Frank A. Deans, Hon. Holland S. Duell, Hon. W. Caryl Ely, Wm. O'Connor, George Weston and C. W. Crofoot was appointed Secretary.

CORPORATION SECURITIES MARKET

Two New Theatre Issues in the West—Stock of Alberta Flour Mills Offered—North Star Oil and Refining Company's Securities on Canadian Market

THE past week witnessed considerable trading on the Montreal and Toronto stock exchanges in outstanding bond issues, the most active being Quebec Railway, Montreal Power, Penmans and Canadian Consolidated Rubber. No new issues are in sight, however, with the exception of Alberta Flour Mills, Ltd., which company is desirous of placing its securities on the Canadian market to the extent of $2,500,000.

The lack of industrial bonds, however, is amply made up for by the plentiful supply of preferred and common stock securities, which are from time to time being offered to the Canadian public at attractive rates.

Included in this week's offerings are two more theatre issues. The Security Trust Co., of Calgary, is offering $260,000 7 per cent. cumulative preferred stock of Allen's Calgary Theatre, Ltd., at $100 (par value), with a bonus of 25 per cent., stock. This should prove an attractive investment, in view of the fact that the Allen chain is the strongest in Canada.

The Royal Financial Corp., and the British-American Bond Corp., of Vancouver, are also underwriting 8 per cent. Allen preferred cumulative stock, for the purpose of providing a $300,000 theatre for that city.

Flour Mills Offering

The Manitoba Finance Corp., Ltd., is offering the unsold balance of allotment of 5,000 shares of Alberta Flour Mills, Ltd., common stock at par (par value $100). The milling company is capitalized at $5,000,000, consisting of $2,500,000 common stock, and $2,500,000 bonds, to be issued.

The company is incorporated under Dominion charter to conduct a milling business, with head office and mills at Calgary, Alberta. The mill at Calgary, now nearing completion, will be one of the largest and most modernly equipped flour mills in the British Empire, and will have a capacity or 6,000 barrels of flour per day. Of the total authorized stock issue, $1,300,000 has been subscribed and largely paid-up in full by citizens of the province of Alberta. The total stock subscription to date amounts to over $1,700,000.

This re-opening for subscription of the unsold balance of stock issue is made pursuant to new arrangements by the company for favorable disposal of their bond issue, a former arrangement for disposal of the bonds in London having been rendered imprudent on account of the disparity in sterling exchange.

North Star Oil Stock Offering

An issue of $1,000,000 7 per cent. cumulative preferred stock of the North Star Oil and Refining Co., Ltd., is being offered by Messrs. Osler and Hammond in the east, and Messrs. Osler, Hammond and Nanton in the west, at par (par value $5), with a bonus of 40 per cent., of common stock. The company has purchased the interests of the Continental Oil Company, which has been carrying on a fairly extensive business in the western provinces in the past fifteen years, and proposes to supplement the existing business by the construction of three refineries, one at Winnipeg and the others at Saskatoon and Calgary. These refineries will be operated initially on imported crude under contracts which have been made with American producers, but the company apparently hopes that the Canadian production of petroleum will be available at some time future.

The directors are mostly Winnipeg men, headed by Mr. Samuel Messer, of Oil City, Pa., who has been in the oil producing and refining business for the past twenty-five years, and is operating refineries in the Pennsylvania field. The earnings are expected to fluctuate according to the varying trade conditions, but the payment of the 7 per cent., on the preferred stock is assured, and in the course of time payments on the common. Dividends, which are quarterly, will be payable through the Dominion Bank.

STOCKS RECOVER ON LOCAL EXCHANGES

Foreign Exchange a Factor—National Breweries, Atlantic Sugar, Laurentide and Spanish River Lead in Montreal—Trading Dull in Toronto With Few Advances

FOREIGN exchange was the chief factor on the New York exchange this week, bringing about a sharp rally in stocks. The confirmation by the Supreme Court of the return of railroads to private ownership, also led to higher prices. On March 8th, a set-back was encountered, due partly to the erroneous reports of the stock dividend decision. A further rally in sterling, however, coupled with the issuance of favorable statements by leading industrial companies, brought about a recovery, and with the close on March 10th, the trend of the market still appeared to be upward. Call money which was at the rate of 9 per cent., last week, dropped to 6 per cent., but later returned to 7 per cent. Time money conditions are expected to be easier after the income tax payments are arranged on March 15th.

Activity on the Canadian exchanges centred chiefly around National Breweries, Atlantic Sugar, Laurentide and Spanish River, although trading on the Toronto exchange was dull. National Breweries lead in Montreal, and with total sales for the week ending March 10th, of 12,629, and an advance of between ¾ and 1 point in price, as compared with the previous week. Atlantic Sugar did not dominate the market as in the previous week, although sales were heavy at 12,349, with a drop in price of a fraction over 3 points. Spanish River advanced 3½ points to 88, with total sales of 6,096, while Laurentide advanced 7¼ points, with sales of 5,905.

On the Toronto exchange, Brazilian led the listed stocks with a turnover of 3,323 shares, the price rising from 43⅛ to 48 during the week. Banks were firm, Dominion at 205½ bid as compared with 204 last week, Commerce at 196 as compared with 191½ previously, and Royal an advance of 1 point, with very little turnover. In loan and trust, Canada Permanent advanced 2 points, National Trust, 2 points, and Toronto Mortgage, 1 point. Toronto General Trusts registered no change at 208½.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

New Brunswick Power Company's Valuation Lower—Good Year for Intercolonial Coal — American Book Sales Profits Increased — Dominion Canners Sales Up $2,000,000—Offer for Controlling Interest in Black Lake Asbestos

New Brunswick Power Co.—The Supreme Court of Appeal, in a judgment handed down recently at Fredericton, N.B., reduced the property valuation of January 1st, 1919, from $2,800,000 to $2,577,665. The reduced amount does not take into account any allowance for depreciation, nor does it include any amount representing the proposed water-power development on the Lepreau and Magaguadavic Rivers, or any amount representing working capital, including materials and supplies. In commenting on the working capital, the judgment remarks that the amount to be allowed or included should not be in excess of the financial needs of the company in carrying on the railway and gas services, and that the amount thus ascertained should be included only to the extent that it had been furnished by the company.

British Columbia Packers' Association.—The balance sheet of the company as at December 31st, 1919, shows a surplus of $1,465,802. Reserves were $751,614, and contingent liabilities $226,074. Total assets amounted to $4,548,025, included in which are: Real estate and buildings, less depreciation, $2,462,648; inventories, $628,330; accounts and bills receivable, $189,961; cash on hand and in banks, $223,962.

The British Columbia Fishing and Packing Co., whose assets consist of 21,411 shares of the association, valued at $4,282,200, will hold its annual meeting on March 30th, 1920. During the year the company operated successfully in British Columbia twenty-four salmon canneries, a cold storage plant, a mild-curing establishment and a sawmill. Dividends have been paid to the amount of $234,881, the rate having been raised from 5 to 6 per cent. last August.

Dominion Steel Foundries and Steel Co.—The annual meeting of shareholders was held in Hamilton, Ont., on March 10th. The annual report submitted, showed that the earnings for the year were $654,000, as compared with $1,228,614 reported a year ago, and the prospects were very bright. The company has many orders on hand, and is making large additions to its plant. The company has $712,000 in cash, a plant valued at $2,000,000, and $651,000 in its investment fund. There is no bonded indebtedness. After deducting $57,600, equal to 8 per cent., on the outstanding preferred stock, a balance of $596,400 remained, equal to approximately 24 per cent. on the common stock. During the past year dividends totalling 15 per cent. were paid on the common stock. A large new plate mill is being constructed at Hamilton, which should be in operation before the end of the current year.

Intercolonial Coal Mining Co., Ltd.—According to the annual report, submitted at the meeting of shareholders in Montreal last week, profits for the year 1919 amounted to $152,499, an increase of $2,000, compared with the previous year, but a decrease of $30,000 as compared with the 1917 figure. After all deductions, which included increased allowances for depreciation, provision for income tax and preferred dividends, involving some $25,000 more than in 1918, the balance for application to the common stock amounted to $58,464, against $77,280 last year. This showing represented earnings on the common at the rate of 11.7 per cent., compared with 15.45 per cent. a year ago, and, approximately, 20 per cent. in 1917, the lower ratio being due almost directly to the greater disbursements among common and preferred shareholders and the necessity for greater income tax allowance.

When all deductions were made there remained a surplus from the year's operations to carry into the current year's account an amount of $10,644, bringing the total standing to the credit of profit and loss account up to $254,831.

Dominion Canners, Ltd.—Profits of the company for 1919, before deducting bond interest, but after paying for the business profits war tax, were $819,823, as compared with $745,324 in 1918. Sales were approximately $2,000,000 greater than in the previous year. After paying bond interest of $99,797 and dividends of 7 per cent. on the preferred stock, amounting to $160,342, the company was enabled to add to the profit and loss account the sum of $559,683, as compared with $481,883, making the undivided balance now $2,031,905. In addition, there is a reserve for insurance of $150,000.

The directors decided against paying a dividend on the common stock, although after bond interest, dividends on the preferred, etc., had been paid there was left $559,000, or enough to pay about 18 or 19 per cent. on the common stock. The reason for this decision was that, with the cost of everything about doubled, the directors felt that they needed this money for the company's operations.

The following directors were elected at the annual meeting in Hamilton last week: President, J. J. Nairn; vice-president and general manager, R. L. Innes; W. R. Drynan, secretary-treasurer; F. R. Lalor and S. Nesbitt.

American Sales Book Co., Ltd.—The annual meeting of the company was held in Toronto on March 10. President S. J. Moore announced that in future the dividends would all be paid in American funds, which will give shareholders in Canada a premium on their share of the distribution. The number of shares held in Canada and the United States are about equally divided, while a small quantity is also held in Great Britain. There are 12¼ per cent. of arrears on preferred, and it is expected that the payment of these will be commenced in the near future, dependent on the general financial situation.

The annual report presented, showed profits of $427,237, an increase of $110,921 over the previous year. Dividends on preference stock at 7 per cent., per annum, amounted to $215,131. The profit and loss account balance carried forward was $270,851.

The balance sheet showed total assets of $5,369,800, the principal items being: Plant, machinery and equipment, $1,220,837; investment in other companies, $158,503; patents and goodwill, $2,524,563; accounts receivable, $515,942; cash on hand and in bank, $58,929. Under liabilities, reserves amount to $579,073, and accounts payable, $286,405.

Hollinger Consolidated Gold Mines, Ltd.—Net profits of the company for the year ended December 31st, 1919, amounted to $2,321,290, as compared with $2,588,863 for the previous year. The tonnage milled yielded $6,722,266, which, with other income, made a total of $7,063,099. Working expenses, taxes, depreciation and donations took $4,741,809, leaving the net profit as above, out of which was paid $1,722,000 in dividends and $599,863 added to surplus account.

"The demand for gold, to provide an adequate backing for the highly inflated issue of paper money now outstanding, already great, becomes daily more insistent," says Mr. N. A. Timmins, the president, in his report. "We are ready to supply this demand and to add to the gold reserves of Canada to the fullest extent of our ability and the capacity of the mine, but, before we can do so, the disadvantages from which the gold mining industry has suffered since the commencement of the war must be improved or entirely removed. There must also be a more abundant supply of

DIVIDENDS AND NOTICES

THE MONTREAL CITY AND DISTRICT SAVINGS BANK

Notice is hereby given that a dividend of two dollars and fifty cents per share has been declared on the Capital Stock, called and paid up, of this Bank, and will be payable at its Head Office, in this City, on and after Thursday, April first next, to shareholders of record, Monday, fifteenth March next, at three o'clock p.m.

By Order of the Board.
A. P. LESPERANCE, General Manager.
Montreal, February 23rd, 1920. 99

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of two per cent. (2%) on the Common Stock of the **Dominion Textile Company, Limited,** has been declared for the quarter ending **31st March, 1920,** payable **April 1st** to shareholders of record **March 15th, 1920.**

By Order of the Board.
JAS. H. WEBB, Secretary-Treasurer.
Montreal, 23rd February, 1920. 89

THE CANADIAN CROCKER-WHEELER CO., LIMITED

DIVIDEND NOTICE

The Directors of The Canadian Crocker-Wheeler Company, Limited, have declared a One and Three-quarter per cent. (1¾%) dividend on the preferred stock of the Company for the three months ending March 31st, 1920, to shareholders of record March 21st, 1920. Also a dividend of One and Three-quarter per cent. (1¾%) on the common stock of the Company for the three months ending March 31st, 1920, to shareholders of record March 21st, 1920.

The stock books will be closed from the 21st to the 31st of March, both days inclusive.

Cheques will be mailed to shareholders on March 31st, 1920.

By Order of the Board.
H. A. BURSON,
Secretary.
St. Catharines, March 8th, 1920. 100

THE RIORDON PULP AND PAPER COMPANY, LIMITED

PREFERRED STOCK DIVIDEND No. 31

Notice is hereby given that a dividend of 1¾% (being at the rate of 7% per annum) on the Preferred Stock of this Company has been declared, payable March 31st, 1920, to shareholders of record at the close of business, March 22nd, 1920.

By Order of the Board.
F. B. WHITTET, Secretary-Treasurer.
Montreal, March 3rd, 1920. 101

McINTYRE PORCUPINE MINES, LIMITED
(No Personal Liability)

DIVIDEND No. 10

Notice is hereby given that a Dividend of 5 per cent. (5%) on the issued capital stock of the Company will be paid on the 1st day of May, 1920, to Shareholders of record at the close of business on April 1st, 1920.

By Order of the Board.
M. P. VAN DER VOORT,
Secretary-Treasurer.
Dated at Toronto, March 5th, 1920. 102

DEBENTURES FOR SALE

STRASBOURG, SASK.

The Town of Strasbourg, Sask., offers $6,000.00 6½% concrete sidewalk debentures, repayable in fifteen equal annual instalments of principal and interest combined, bearing an annual repayment coupon of $638.12.

SYDNEY L. A. SMYTH,
95 Town Clerk.

ST. BONIFACE BOARD OF TRADE OFFICERS

At the annual meeting of the St. Boniface, Man., Board of Trade on March 3, 1920, the following officers were elected for the year 1920-21: President, Joseph Bourgeault; vice-president, W. J. Wilson; treasurer, W. H. Leck; secretary, Claude Buffet; council, R. R. Knox, J. A. Marion, S. J. Dussault, F. Dowse, M. Muscovitch, C. E. Gaudette, H. S. Paterson, W. M. Allen.

efficient labor, and an appreciable reduction in the cost of all materials and supplies used by us, otherwise it will not be possible to greatly increase our optput along sound economic lines, which is the only policy we would feel justified in attempting to carry out."

Mr. Timmins points out that the labor situation has not improved to the extent anticipated at the beginning of the year. Pre-war efficiency has by no means been attained, and there is still a serious shortage of both skilled and unskilled labor. The average number of men employed was 1,207, a gain of 146.

Black Lake Asbestos and Chrome Co.—At the annual meeting of shareholders last week, the financial statement showed profits from operations at $155,129, compared with $152,512 a year ago. Total revenue was $174,859, compared with $167,228. Disbursements differed from the previous year mainly in the payment of bond interest for the last half of the year, amounting to $35,745, while for the previous year the full payment of $71,490 was made. Payment was not made for the first half of last year, because, technically speaking, it was not earned in that period. An allowance of $29,079 for depreciation on chrome properties was made. Current assets are now $377,345, and current liabilities $115,876, compared with $278,977 and $47,837, respectively, a year ago. Total assets showed little change at $5,324,877, compared with $5,239,377.

The meeting was featured by an offer from J. A. Jacobs, of Montreal, who has been connected with the Eastern Townships Asbestos industry for a number of years, for the controlling interest of the company, with the object of making extensive improvements.

The offer, which was favored by those present, was for the purchase of a block of $200,000 of bonds at 50, three thousand shares of preferred stock at 25, and seven thousand shares of common at 12, all of which are slightly above the present market prices. Mr. Jacobs is prepared to back up his offer with a $50,000 deposit with a trust company as a guarantee of good faith and is willing to allow any shareholders who desire to dispose of their securities to sell at those prices. In return, Mr. Jacobs desires control of the board, with the privilege of moving the head office from Toronto to Montreal.

ADDITIONAL INFORMATION CONCERNING FIRES

Moncton, N.B.—February 21—Machine shop, occupied by John Abrams and Sons, was damaged. Cause unknown. Estimated loss, $15,500.

Portreve, Sask.—February 12—Lumber yard of Beaver Lumber Co., Ltd., was destroyed. Cause, high winds fanning burning debris from a hotel on to the property. Estimated loss, $37,000. Insurance carried in the Mutual Fire Insurance Co. and Retail Lumberman's Co.

Vanguard, Sask.—February 11—Building and stock belonging to Peter Keefner was damaged. Cause unknown. Estimated loss, $10,000. Insurance carried in C. M. Brewster Co., $3,700.

Moose Jaw, Sask.—Building at 131 High Street, owned by Richard Bogue, which was damaged on February 11th to the extent of $5,000, was insured to the amount of $6,000 in the Western Assurance Co. The contents, chiefly owned by the Canadian Specialty Co., were damaged to the extent of $11,400, and insured for $12,000.

Building at 216 Main Street, which was damaged on February 9th to the extent of $3,560, and which was owned by W. B. Hawke, in trust, was insured to the amount of $20,000 in the Commerical Union, Century and Pacific Coast fire insurance companies. Insurance on the contents was carried to the amount of $120,150, the damage amounting to $46,000. The adjoining building, owned by Wm. Grayson, which was damaged very slightly, was covered to the extent of $22,500 in the Commercial Union and Union insurance companies.

RECENT FIRES

Many Large Fires this Week—Conflagrations Cause Damage of Over $500,000

Bracebridge, Ont.—March 7—Stable belonging to Wm. Ennis, with contents and three horses, was destroyed.

Capreol, Ont.—February 29—Y.M.C.A. building under construction for the Canadian National Railways at the divisional centre was destroyed. Estimated loss, $60,000, covered by insurance.

Edmonton, Alta.—March 1—F. W. Woolworth's Co.'s store in the Tegler Block at 10185 101st Street, was damaged. Cause, presumed to have been from a carelessly thrown cigar stub. Estimated loss, $6,000.

Eriksdale, Man.—March 1—Farm home of Mr. Globinsky was destroyed. Loss fully covered by insurance.

London, Ont.—March 5—Plant of the Columbia Handle and Lumber Co. was damaged. Estimated loss, $25,000, partially covered by insurance.

London, Ont.—March 6—Freight sheds and offices belonging to the Grand Trunk Railway Co., situated on York Street, were damaged. Cause unknown. Estimated loss, $125,000.

Maccan, N.S.—February 20—Five freight cars were destroyed. Cause, collision in front of the station. Estimated loss, $30,000.

Montreal, Que.—March 6—Russell Hotel, St. James Street, was badly lamaged. Cause, presumed to have been from a cigar or cigarette thrown on the floor.

Newington, Ont.—March 1—House of C. Dixon was destroyed. One death.

Okanagan Lake, B.C.—March 3—Wharf sheds and stables of G. E. Galletely and Sons, one of the largest firms of fruit ranchers, were destroyed. Estimated loss, $30,000.

Port Dover, Ont.—March 5—Business block, including grocery store, post-office, drug store, local exchange of the Norfolk County Telephone Co. and the G.N.W. telegraph office, was damaged. Cause unknown. Estimated loss, $40,000.

Ste. Sabine, Que.—Barn of A. Davignon was destroyed with all its contents, including hay, implements, horse and cattle. Estimated loss, $4,000, with only $666 insurance.

Sydney, N.S.—March 8—Electrical warehouse belonging to the Dominion Steel Corporation was destroyed. Cause, supposed to have originated from crossed electric wires. Estimated loss, $100,000.

Tilbury, Ont.—March 4—Tilbury Brick and Tile Co. plant was destroyed. Cause, presumed to have been spontaneous combustion. Estimated loss, $30,000. Insurance carried, $15,000.

Toronto, Ont.—March 4—McKinnon Building, situated on Melinda Street, was badly damaged, the two top stories by fire, and the lower ones, including tenants' office equipment, by water. Cause unknown. Estimated loss, $100,000. Factory building at 136 John Street was damaged. Principal losers were Tripure Water Co. and the Canadian Whitewear Co. Cause unknown.

March 6—Icehouses belonging to the G.T.R., situated between Osborne Street and Kimberley Avenue, were damaged. Cause, presumed to have been from a bonfire. Estimated loss, $1,000. Garage and motor cars belonging to J. D. McGill, undertaker, Bloor Street West, were damaged. Cause, defective stovepipes. Estimated loss, $7,700. Slight damage was done to the Robert Simpson store. Estimated loss, $1,300.

March 9—Plumbing shop and dwelling of Wm. Armour, Market St., were damaged. Cause, overheated furnace. Estimated loss, $1,500.

Verigin, Sask.—March 3—Grain elevator of the Verigin Grain Co., with 40,000 bushels of wheat, was destroyed. Cause unknown.

Wardsville, Ont.—March 4—Dwelling-house of Hugh Taylor, on the Longwoods Road, was damaged. Cause, defective chimney. Estimated loss, $4,000.

Conflagrations Are a Constant Hazard

Methods of Building Construction Give Little Protection Against Disaster—Records Show That Such Disasters Occur With Considerable Regularity—Some of the Chief Causes — Suggested Methods for Prevention, Mainly by Building Restrictions.

"NO city, town or village, as now built and now protected, is free from the danger of a conflagration," said John B. Laidlaw, manager of the Norwich Union Fire Insurance Co., in addressing the Insurance Institute of Toronto, March 11th. Mr. Laidlaw's subject was "Conflagrations," and he described briefly the important disasters of this kind, commencing with the great fire of London in 1666. He also quoted Walford's records of conflagrations from 1751 to 1876 by decades as follows:—

1751–1760	53	1821–1830	35
1761–1770	70	1831–1840	39
1771–1780	53	1841–1850	59
1781–1790	53	1851–1860	79
1791–1800	34	1861–1870	73
1801–1810	32	1871–1876	50
1811–1820	47		

Mr. Laidlaw also quoted the summary of the National Board of Fire Underwriters by five-year periods from 1866 to 1885:—

1866–1870	8	1876–1880	6
1871–1875	14	1881–1885	3

And by three-year periods from 1885 to 1903:—

1886	8	1895	7
1887	6	1896	7
1888	9	1897	12
	23		26
1889	13	1898	12
1890	2	1899	16
1891	12	1900	16
	27		44
1892	10	1901	8
1893	10	1902	7
1894	8	1903	15
	28		30

Modern Tendency Towards Prevention

Mr. Laidlaw reviewed the progress which has been made since 1905 when he had occasion to make a thorough investigation into the subject of conflagrations. "Since that date," he said, "there has been an appreciable change in the point of view of the public upon this matter, and several organizations of which you are aware, both private and governmental, are exerting a steady influence to remove hazardous conditions, while the operation of the system of specific rating for fire insurance is to bring about a steady improvement of individual existing properties, and insuring that most of the new ones erected are built of substantial materials, and so constructed as to retard fires or prevent them spreading, rather than to facilitate rapid combustion. Then there is in addition the ever increasing use of the automatic sprinkler, which continues to prove its great value as a fire preventative device, and which often converts a conflagration breeder into a conflagration stopper.

"Notwithstanding all these improvements in conditions, and not overlooking the increased efficiency of municipal fire extinguishing apparatus, and in many cases of waterworks systems, the improvements made are still very slight, compared with the great mass of property to be protected and improved, if the improvement were expressed as a percentage of the whole.

Any Fire May Get Beyond Control

"The records show that the conflagrations occurred at all seasons and at all hours, on Sundays and holidays as well as week days. A great deal of time is sometimes given to trying to ascertain the exact cause of the origin of a fire which developed into a conflagration, and probably, hundreds of articles have been written to prove or disprove that Mrs. Murphy's cow did or did not upset the historic lantern on a Sunday afternoon of October 9th, 1871, in Chicago; but I consider it much more important to try and ascertain what were the causes of a small fire becoming a very great one.

Ratio of Fires to Population

"The number of fires occurring in a year in any city, province, or country varies but slightly from year to year, and I am inclined to think that if we had the figures for the whole world, we would find that the number of fires that occur bear an almost constant ratio to the population. To confirm this, I would draw your attention to the report of the fire marshal of Ontario, giving particulars of the fires in this province by month for 1917, 1918 and 1919. The number of fires that occurred in these years was as follows: 1917, 9,681; 1918, 9,740; 1919, 9,301. The amount of property burned, however, varied greatly, being in, 1917, $10,365,539; in 1918, $15,673,240; and in 1919, $9,490,478.

"Nearly every fire in a city, town or village may, under favorable conditions develop into a conflagration, and the experience of the past shows that there is a fairly constant percentage of them which do so develop.

"If we wish to prevent and check the conflagrations, we should, I think, devote ourselves to a study of their causes, and energetically apply ourselves to remove those factors which have contributed to their development, in so far as lies within our power.

Causes of Conflagrations

"The causes of conflagrations, so far as I have been able to ascertain, fall into five groups as follows:—

(Continued on page 16)

Parliamentary Session May Not Be Critical

Union Government Still Firm, Though Premier's Return is Awaited With Interest—Increased Price of Silver Makes Smaller Content Necessary—Revival of Annuity Branch

(Special to *The Monetary Times.*)

Ottawa, March 18, 1920.

EARLY predictions of the political prophets that the present session of parliament would consist largely of a series of crises winding up in general disintegration of Union government and an appeal to the country, are already proving false. The session is not two weeks old yet, but it is already apparent that the administration will have no trouble in holding its majority and carrying on. A large government caucus, which was attended by the various elements which comprise Union, unanimously decided to continue support of the government and favored in addition in principle, the proposal to form a permanent party. A proposed platform, which had been drafted by the cabinet, was presented to the caucus, and although there was no resolution on the subject, it apparently met with general support. It was intimated that Sir Robert Borden would be back in his seat before the end of the session and it was agreed to leave over the question of any further action on the formation of a permanent organization until his return.

The Franchise Act

With the government now reasonably certain of its majority, the outlook is that the session, contrary to early predictions, will be neither lengthy nor controversial.

The franchise bill was the measure over which it was promised that the battle of the session would be waged. This expectation was based on the anticipation that the bill would continue many of the features of the War Times Election Act and would provide for federal lists. The bill has been introduced, and so far as one can judge, no bill could be fairer. Some of the details will be criticized, but the broad principles of the measure cannot be made a political battlefield. The bill extends the franchise to all men and women over twenty-one and British subjects and accepts wherever feasible the provincial lists.

Tariff Not Crucial Issue

Outside of the Franchise Act the only other fighting ground for the session will be the tariff. The government has already intimated that there will be few changes this session and that any general revision will be held over. Both the Liberals and the farmers will doubtless challenge the position of the government, but the tariff is unlikely to provide a parliamentary crisis.

There was a possibility of a fine old battle over the naval question as a result of the report of Lord Jellicoe. However, the decision of the government caucus to leave the naval question alone for this session, removes from the scene another controversial question.

Altogether, it promises to be a comparatively dull and uninteresting session, with an occasional flare-up such as the Murphy-Rowell vendetta to add spice to life.

Silver Content Reduced

Sir Henry Drayton has introduced two measures of considerable interest to the financial and business world. One bill provides for a change in Canadian silver coinage. As the Act now stands our coinage has a fineness of 925 points, that is out of the thousand points, 925 are silver and 75 alloy. When Canada first started her coinage operations there was profit to the Mint, but under the great increase in the price of silver, the profit has not only disappeared but there is even a loss. The bill provides for a new standard of 800 fine silver and 200 of alloy.

Sir Henry pointed out that in so far as the content of the silver coin was concerned, it was an entirely arbitrary matter. It is a question which turns not upon the value of the coin as such, but rather whether it will make a good coin. The standard of Great Britain and the United States is 900 points and of the Scandinavian countries which the government now proposed to adopt of 800. Sir Henry said that there was legislation before the British House to reduce the fineness of the British silver coin to 500.

Use of Nickel Urged

Hon. W. S. Fielding, ex-minister of finance, heartily approved of the proposal. He renewed the old suggestion that Canada adopt a nickel coinage. Sir Henry said that he had already considered the suggestion. He had brought up with a company, which proposed to refine in Canada, the question of a supply of proper nickel blanks of Canadian nickel for the purpose of a new coinage. The question was not far enough advanced to say exactly when they would be in a position to submit a proposal to the House. Sir Henry also announced that he expected the dies for the new small copper coinage very shortly, when refinement would start at the Mint.

Interest on Annuities Increased

An effort is being made by Sir Henry Drayton to give a fresh start to the annuity branch. A bill has been introduced with a view of encouraging the sale of government annuities. The bill provides for the increase of the total amount payable yearly by way of annuity from $1,000 to $5,000. There has been a change also in the matter of age. Under the present law no one can obtain payments under an annuity until he has become fifty-five. The insurance companies impose no such restrictions and the law removes this barrier. There is another change which provides for an increase in the rate of interest from three to four per cent. payable on moneys repaid when the annuitant dies before the annuity becomes payable. Apparently the annuity branch proposes to start a campaign throughout the country. The only protester was Dr. Michael Clark, who vigorously objected to such paternalism and the entrance of the government into active competition with the insurance companies.

COMMERCE BOARD BEFORE SUPREME COURT

The validity of certain clauses of the Combines and Fair Prices Act is being tested before the Supreme Court, and upon the decision depends much of the power thus far claimed by the Board of Commerce operating under this Act. The questions submitted to the court are:—

1. Is section 17 of the Combines and Fair Prices Act *intra vires* in forbidding the accumulation or withdrawing from trade of the necessaries of life?
2. Had parliament power to establish the Board of Commerce?
3. Had it power to impose penalties for offences against the Act, and require provincial courts to enforce them?
4. Has the Board of Commerce power to decide as to unfair profits in purely provincial transactions?
5. Had it such power in respect to interprovincial transactions?
6. Could it prohibit export of necessaries of life?

The third International Fur Fair in Lucerne (Switzerland) will be held from the 23rd to the 27th of March, 1920, in the Market Building on the Bahnhofplatz, Lucerne. Owing to the general circumstances the Lucerne fur auction sales will not be held before next autumn.

ALBERTA LEGISLATURE DISCUSSING IRRIGATION

No Direct Financial Aid from Dominion—Federal Government May Buy Bonds at Par—Priority of Bonds Over Mortgages a Vital Factor

THE progress of the new Irrigation Districts Act in the Alberta legislature is very slow. Since the bill was introduced many problems have been encountered which have caused considerable trouble. General Stewart, in a statement on March 9, said that it will be impossible for the province of Alberta as a government, to approach the Dominion government for any direct financial assistance to irrigation projects, because of a written promise given by the premier. There have been intimations, however, from both federal and provincial authorities, that if a measurably satisfactory guarantee or arrangement to protect irrigation bonds, is arranged by the province, that the federal government may proceed to give aid to the extent of purchasing the irrigation bonds issued at par. It is probable that whatever federal assistance is extended will be worked out along these lines. At least, that seems to be the line the provincial government is now proceeding on in having prepared some careful engineering reports on irrigation projects, revising and amending the irrigation Acts, so that the formation of irrigation districts and the construction of projects will give the utmost assurance to investors in irrigation bonds that the projects will be a success, and last, devising some means of financial guarantee to a limited extent, until the projects are set on their feet as going concerns.

Priority of Bonds Over Mortgages

On March 11 a debate took place over the question whether irrigation bonds should have priority as liens on land in an irrigation district over mortgages held before the district was formed. Section 38 of the new bill provides for this, but it appears to have been put in without government consent as Premier Stewart, backed by his ministers, strongly objected to it. On the other hand, Col. Nelson Spencer (opposition), Medicine Hat, as strongly supported the contention, declaring that without giving the bonds such priority, they would be unsaleable.

The basis of Col. Spencer's argument was that mortgages are allowed to have priority of lien in a district over the irrigation bonds. This meant that in case of possible failure of a scheme, the bondholders would come in for recourse on the property of men which was unmortgaged, while they could not touch the property of those which was mortgaged. This was unfair to those in a district who had unmortgaged property and who might constitute a minority that had been forced into a scheme by the votes of others.

After two hours of serious debate on the subject, it became clear that this section involves the most vital principle of the bill—namely, just how much support the government shall give to irrigation projects. George Hoadley (opposition), Okotoks, and Gen. J. S. Stewart, Lethbridge, while opposing the principle of the section which would, they held, affect the validity of covenants already given, argued at the same time that the only other way out would be for the government to either buy all the mortgages in a district, and thus assume the obligation for an equitable distribution of financial responsibility, or guarantee the irrigation bonds itself.

On March 12, what amounted to practically a compromise settlement of the controversy, was virtually arrived at. The basis of the compromise is that the bonds will form a first lien on lands in the districts provided a majority of the mortgage holders in such a district do not object.

To arrive at this understanding, Attorney-General J. R. Boyle suggested that either upon the formation of a district or the proposed sale of bonds that mortgage holders in such a district be notified of the proposal by registered mail; that if 51 per cent. of them, a majority, did not object, then the bonds would be issued as a first lien. This was an elaboration of the suggestion that was first made by Premier Charles Stewart. Col. Spencer said that although the compromise was not exactly what he desired, it was satisfactory. He thought that the compromise would probably work all right, as he doubted whether any of the mortgagees would object to an irrigation project which increased their security on the land.

The Debenture By-Law

The debenture by-law under the new act, which will be submitted to the ratepayers of the district, will set forth: The amount and terms of repayment of the loan; the total acreage to be irrigated; the sum necessary in each year to repay the loan, and the interest thereon; the estimated annual cost of the maintenance and operation of the district and the irrigation works.

A two-thirds vote is required to carry such a by-law for the debentures and if it carries, and the minister of public works gives his assent, it shall be conclusive evidence that all necessary formalities have been complied with, "and the legality of the loan and all debentures issued therefor shall be thereby conclusively established and shall not be questioned in any court."

The board of trustees then proceed to raise the loan on the credit of the district. The debentures issued to secure the loan are to provide for the payment of the whole principal money within 30 years from the time of approval of the estimates by the minister, "and shall be repayable by annual instalments extending over the whole of such period or the last 20 years thereof.

Such debentures will constitute a lien upon all the land, including the buildings and improvements thereon, appearing on the assessment roll in the district other than land exempt from taxation by the province, and upon all the property of the district and all rates levied under the provisions of the act within the district.

The form of the debentures and the rate of interest payable upon them are to be paid by the provincial treasurer who is to make arrangements for the sale of the debenture issue as may seem to him meet and proper, and will retain the proceeds until application shall have been made for them by the trustees of the district with the approval of the irrigation council. The provincial treasurer may, at any time, invest the surplus funds of the province in irrigation in district debentures, and any trustee may at any time invest trust funds in the debentures of an irrigation district.

The act contains very detailed provisions for the levying of sums in the irrigation district by the board of trustees to meet instalments of principal and interest payable upon the debentures including salaries and lawful expenses incurred in this work. A sub-section provides that "any irrigation rate imposed shall be sufficient to bring in the amount of such estimate after making all due and reasonable allowances for the cost of collection and abatement for losses which may occur in the collection of the irrigation rate."

WAWANESA MUTUAL INSURANCE CO.

In its statement for 1919, the above company, of Wawanesa, Man., reports premiums of $69,297, assessments of $220,629, and interest, $11,136, a total of $301,062. Losses were $139,820, salaries $29,609, and commissions $33,249. The sum of $81,350 was invested in Victory Loan bonds, and $92,607 in cash carried forward after meeting all expenses, compared with $110,211 brought forward from 1918. Assets now total $1,437,252, and liabilities $94,542.

SELKIRK LOAN AND DEBENTURE CORPORATION

Application is being made to the Manitoba legislature for the incorporation of a company to carry on a mortgage, debenture and agency business under the name of the "Selkirk Loan and Debenture Corporation," with head office at Selkirk, Man., and a capital stock of $500,000, which may be increased to not more than $1,000,000. The names of those interested are: P. J. Smith, D. G. Ross, F. W. Hooker, W. L. Atkinson, R. C. Moody, F. A. Gemmel, G. D. Simpson, H. M. Hanneson, all of Selkirk.

PERSONAL NOTES

Mr. O. Le Blanc has been appointed general agent for Montreal, of the Royal Scottish Insurance Company, Limited.

Mr. W. T. Gwyn, formerly of the Dominion Bank, has entered into partnership with Osler, Hammond and Nanton, Winnipeg, Man.

Mr. J. Vernon Mackenzie has been appointed Canadian Trade Commissioner for Glasgow, Scotland. It is expected he will sail for Scotland on April 10th.

Mr. George F. Baldwin formerly city comptroller, of Vancouver, B.C., has been appointed comptroller of records and archives. He will be succeeded as city comptroller by Mr. A. J. Pilkington.

Mr. J. R. Mitchell is the manager of the bond department of the Canada Trust Company's new branch at 14 King Street East, Toronto. Mr. Mitchell was born and educated in Toronto, and after serving six years with the National Trust Company, joined the Dominion Securities Corporation and was with them for five years until taking up his new duties a few weeks ago. The Toronto branches of the Huron and Erie Mortgage Corporation and of the Canada Trust Company, both of London, Ont., are located in remodelled and up-to-date premises at 14 King Street East, Mr. J. M. McWhinney being manager of both.

Mr. G. E. Buchanan and **Mr. R. Paterson** have been appointed assistant secretaries of the Union Trust Company, Limited, at Toronto.

Mr. Stephen Lusted, who has been city clerk of Windsor, Ont., for 41 years, has resigned his office. Mr. Lusted is 81 years old and for several years has been partially incapacitated.

Mr. C. J. Mills, of Toronto, connected with the American Bank Note Company, also in charge of western branches, was a caller at *The Monetary Times*' Winnipeg office, this week.

Mr. Harry F. Noble, manager for Saskatchewan of the Merchants Casualty Company, has been appointed provincial manager of that firm in British Columbia. Mr. Noble has been a resident of Regina for many years.

Mr. J. W. Freeborn, of Owen Sound, who has practised law in Ontario during the past five years, with the exception of two years overseas service, has been appointed inspector in the claims department of the Canadian Surety Company.

Mr. G. G. French has been appointed general agent for Montreal and district of the Canada Security Assurance Company. This institution has lately been acquired by the Norwich Union Fire Insurance Society, Limited. Mr. French has opened offices in 415 Lake of the Woods Building, Montreal.

Mr. P. W. Cashman, of the firm of Messrs. J. P. Bickell and Co., Toronto, has resigned his position as president of the Standard Mining Exchange, preparatory to returning to his old home in the United States. Mr. J. P. Cannon, of J. P. Cannon and Co., Toronto, the first vice-president of the exchange, has been promoted to the presidency.

BELL TELEPHONE CO. OF CANADA

The annual comparative report of the Bell Telephone Co. of Canada, already reviewed in this issue, indicates rapid progress in the business of the company since 1890. Total assets, excluding cash and receivables in 1890, amounted to $2,822,581. Ten years later they were more than tripled, and in 1910 they had reached the sum of $22,541,382. The figure is now $55,252,935. Exchange and long distance revenue show substantial increases, the combined total being $14,149,120, as compared with $4,253,371 in 1910 and $571,836 in 1890.

Significant in the report, and what was responsible for the slight drop in net earnings for the last year, is the enormous growth of the operating expenses, and particularly since 1915. In 1910, expenses amounted to $3,781,109, increasing to $7,412,689 in 1915, and reaching the sum of $12,213,905 last year. Apart from the slight set-back in 1919, net earnings have shown substantial growth in the past twenty years, in conjunction with the other advances.

INCOME AND BUSINESS PROFITS TAXES

The Dominion income and business profits taxes were explained to the Kiwanis Club of Regina, Sask., on March 9, by T. B. Patton. Reviewing the business profits tax, he said that it had come into being in May, 1916, and at first was lacking in detail as to how it should be applied. Most of the detail was left to the finance minister. It was a war measure, but even to this date it was practically unknown to the rank and file of the citizens of the province. Originally, it was intended to collect taxes from a corporation whose capital exceeded $50,000, excepting those engaged in agricultural enterprises, and men dealing with the government selling munitions, etc. This act remained in effect without change during 1916, but in 1917, it was so amended to allow joint stock companies, etc., to enjoy a profit of 15 per cent. on their investment. A profit of between 15 per cent. and 20 per cent. was subject to a tax of 50 per cent., and profits above that figure were taxed 75 per cent. The speaker illustrated his point by showing that a firm which had capital of $50,000 and profits of $15,000 would be obliged to pay $6,000 after the amendment had passed. Last year the act was further amended to include corporations with capital between $25,000 and $50,000. These firms were taxed 25 per cent. in excess of profits above 10 per cent. This was made retroactive to include the year 1918.

The income war tax became effective in September, 1917, and was passed for the general collection of taxes from firms, corporations, individuals, etc. Originally, an individual married was allowed exemption up to $3,000 and a single person $1,500, but these were later reduced to $2,000 and $1,000. Then there is a graded tax on all incomes over $6,000.

The speaker made it clear that no person or firm was taxed under both acts, but the tax most productive to the government was the one applied to anyone. Mr. Patton compared the workings of the two acts by stating that a firm with a capital of $50,000 with $15,000 profits would pay only $400 under the income tax, while under the business profits tax, $6,000 would be collected. Not more than 10 per cent. depreciation was allowed annually and bad debts accrued prior to January 1, 1917, were not permitted to be written off.

Mr. Patton stated that in the four years in which these acts were in operation a total of $83,768,110 was collected. Of this amount those engaged in non-agricultural pursuits paid $83,379,088, while those following agricultural pursuits paid $389,011.

THE EMBARGO AND THE SECURITY MARKET

GREATER production and more thrift has for many months past been urged upon the Canadian people by the government and by heads of financial institutions. But the financial arrangement just entered into, to restrict the repurchase of Canadian securities held abroad, has exactly the opposite effect, for it artificially supports security prices here, thereby encouraging further borrowing, and by checking the recovery of sterling exchange it also increases our purchases of commodities abroad.

The view emphasized in these columns three weeks ago is held by financial men in all parts of Canada, and is further supported by criticisms of the embargo plan by two prominent Montreal investment firms. In their March circular, Greenshields and Company says:—

"We believe that it is part and parcel of the tendency indulged in by our government and many others, to frustrate the natural working of business laws by setting up arbitrary means of regulating finance and commerce to bring about political ends. This tendency was born of a great war, which alone can give justification for governmental interference with the natural laws of supply and demand. The war is over, but many governments are continuing to exercise this unsurped prerogative. . . . .

"Every Canadian dollar which has been invested in Canadian securities held in England, has made possible the sale of the dollar's worth of goods to Great Britain. The money involved in buying these securities has not 'gone out of Canada' at all. The proceeds have been spent in Canada to pay for Canadian goods made by Canadian workmen in Canadian plants. We are told that Canadian purchases of our securities in Great Britain have totalled enormous figures in the last ten months—possibly $100,000,000. If so, it has made possible $100,000,000 worth of Canadian business for export to Britain, and has been one of the fundamental factors in our current prosperity. If this movement of securities is to be stopped, one of two things must happen. We must either cut down our exports to Great Britain by an amount equal to the securities we buy from her or we must finance exports to that amount by the flotation of loans of some kind. As between the flotation of loans, and the importation of our own securities, the latter method of financing is unquestionably superior.

"As to the actual working out of this plan, it is difficult to forecast what may happen, because there is, first, the possibility that the plan will not prove effective. Certainly, the members of the Bond Dealers' Association, since they have agreed to try the plan out, will not lend themselves to any transactions in violation of their agreement. But there are other means by which securities can be brought into this country, and while the movement may be artificially checked, it may not be completely stopped. If the plan proves in the main effective, there will be two results. First, due to the withdrawal of Canadian buying in the London market, Canadian securities will slump in price in that market, and will probably slump very considerably. Second, due to the withdrawal of the supply of new offerings from England in this market, bond prices may strengthen here. They will not strengthen very much, because we are in an era of high interest rates for investment money. It is reasonable to look for the spectacle of bonds advancing somewhat in this market, while the same bonds decline in price in the London market. Such a highly unnatural situation can exist for a limited time, but sooner or later must break. In the meantime, we in Canada will be somewhat in the position of an ostrich, blinding our view to a flood of securities, while we attempt to make a market which may be engulfed at any time should the flimsy dam break."

Royal Securities Corporation are even stronger in their criticism. In "Investment Items" of March 12, they attribute the embargo to the "short-sighted and panicky views which have apparently prevailed among a number of Canadians during the past month, and which caused the adoption of one of the most extraordinary and inexcusable policies ever sought to be put into effect in this country." The embargo, says the article, could more properly be termed a boycott. Continuing, it says:—

"The one thing that this embargo could not do, as even its authors must have seen had they taken time to consider instead of rushing blindly into a precipitate course of action, was to effect its object, the prevention of Canadian purchases of British owned securities. There was no means of enforcing it, and the extreme diversity of interests involved made unanimous action impossible. Even had it been possible to prevent absolutely the purchase by Canadians of sterling exchange for the purpose of paying for such securities, nothing could have been done to prevent Canadians who had already acquired sterling or New York funds in the ordinary way of business (for instance, by the export of commodities) from using that money in any way that they might desire; and the more the ordinary purchaser was debarred from such transactions, the lower would the price of the securities go and the greater would be the profit to those who could purchase Canadain securities in England and resell them in this market."

On the other hand, it is pointed out that the one thing which the embargo will do is impair the confidence of outsiders, both British and American, in Canadian credit and the reliability of Canadian securities. "What is the use," it is asked, "of Canada trying to discount the pound sterling, and at the same time refuse to absorb her own securities from Great Britain? . . . . We are no longer at war. It is no longer possible for governments to force their securities upon the market by creating artificial conditions. . . . If any readjustment requires to be made between the present market price of Canadian government securities and the general level of the money market, there is nothing to be gained by postponing the day of reckoning."

INTEREST PAYMENTS IN NEW YORK

UNITED STATES firms and individuals who have had payments falling due in Canada have, since the Canadian dollar went to such a substantial discount, left the funds in Canada where possible in the hope that exchange would partially recover at an early date. This was done to a considerable extent when the discount was about five per cent., still more when it went down to about 10 per cent., and to an even greater extent after the substantial drop of several weeks ago. An outstanding case is that of the American firm with a branch plant in Canada, used to supply the Canadian market and possibly for export trade as well, which leaves the profits from the branch on deposit in a Canadian bank. The same has also been done by institutions and individuals who have large investments here. This has meant increased deposits for Canadian banks, and the funds are thus available for industrial purposes in this country. While it tends to prevent New York exchange from going to a still greater premium, at the same time it this potential demand for New York funds will for a long time to come be an influence against the recovery of the Canadian dollar.

Accounts have, on the other hand, been opened by Canadians with American banks, or with American branches or agencies of Canadian banks, so that interest payable in New York as well as in Canada may be collected there and the advantage of the premium on New York funds secured. Ordinarily a coupon payable in New York as well as in Canada could be cashed in New York funds at a Canadian bank. But this was being done so much with government war bonds that the minister of finance requested the banks to discourage the presentation in New York of coupons on bonds held by Canadians. While the banks are carrying out this request as far as they can, the holder can, nevertheless, obtain the premium if he chooses to adopt a more round-about method. For instance, he can forward the coupons to some friend in an American city, with the request that they be cashed and the proceeds returned to Canada. Similarly, he can do business by mail with a bank in the United States, forwarding his coupons for collection, and drawing on his account from time to time.

The purposes of the two classes of accounts are, of course, entirely different. The American opens an account in Canada for the purpose of leaving his money here until such time as he can transfer it at more nearly its par value. The Canadian opens his account in the United States merely for the purpose of presenting his claims there, and bringing the proceeds to Canada as soon as possible. The former wishes to wait until the exchange situation is relieved; the latter takes advantage of it at present.

TO ENCOURAGE FIREPROOF CONSTRUCTION

FIRE resisting buildings are, under the present method of municipal taxation, discouraged, because, being more costly they are subject to a higher assessment. This is pointed out by R. O. Wynne-Roberts, of Toronto, in a letter to the "Globe" a few days ago. He says: "I would like to make one suggestion in this connection, namely, that the owners of buildings be assessed for fire protection in proportion to the risks involved. This proposal, so far as I am aware, has not been advanced by the authorities, but I think it is a just one.

"At present the assessor valuates a property according to its market value, consequently, a fire-resisting building will be assessed at a higher figure than, say, a timber-framed structure of similar dimensions and location. And, inasmuch, as the general rates include the cost of the fire brigade and in some instances the rent of hydrants, the owner of the fire-resisting building has, therefore, to pay more than the owner of the timber frame structure, although the fire risks incurred are in the inverse order. In other words, the present method of assessing the cost of fire brigades is in effect a premium on haxardous risks. Carry the principle a step further and we will find that over one-half of capital and operating costs of water works is for fire extinction purposes. The method of assessing the water works expenditure in Toronto and in most other cities is on the flat rate, that is, on the size of buildings and the fittings they contain. This may be just for purely domestic supply, but in equity the cost of the fire protection element of water works should be assessed according to the fire risks of buildings. This, however, is not the case, the cheaper and risky buildings are not charged according to this rule.

"The scale of insurance according to risks is in operation by the fire insurance companies, and it does not seem a serious matter to adopt a similar basis of taxation for civic fire services. Even if this method of assessing would not immediately result in reducing the fire losses, new buildings would doubtless be erected with the view of minimizing the above mentioned annual charge, which, in effect, would be equivalent to making these buildings more attractive to prospective buyers.

"Apart from the question of what the results might be, it is manifestly a fair proposition that the burden of the cost of fire services in all respects should be borne by owners of buildings in proportion to the fire hazards involved."

MORTGAGE LOANS AND PROPERTY VALUES

UNUSUAL increases in the market values of city property have made it necessary for institutions to practice unusual caution in making loans. This is particularly necessary because of the fact that present values are due not only to increases in real costs of building, but also to inflated currency. Discussing this point, A. C. Froom, loan manager of the Imperial Life in Regina, said, a few days ago:—

"The loan companies, are disposed to assist in the speeding up of production, as it is generally felt that everything that can be done to encourage an increase in production will materially assist towards a return to more normal conditions; and for this reason the companies are now practically limiting the funds at their disposal in the direction of improved facilities in the rural districts. At the present building costs, the companies are inclined to be very conservative when it comes to advancing money for building projects in the larger centres. Very few loans are being made on city property and advances which are being made in this field are being picked out with considerable care."

Clerks of the Canadian Bank of Commerce have organized a staff association, which indicates that so long as the path of promotion is not barred, the bond with the institution will be stronger than that with the trade.

Governor Harding

Federal Reserve Board

TO the Canadian Club said:—"'Work and Save' is the great remedy for the High Cost of Living."

The advantages of a Savings Account are apparent to most persons, but have you experienced the convenience of a Joint Account? Any of our 390 Branch Managers will give you the particulars.

EXCHANGE QUOTATIONS

Messrs. Glazebrooke and Cronyn, exchange and bond brokers, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. funds	12 7-16 pm	12 9-16 pm	....
Mont. funds	Par.	Par.	⅛ to ¼
Sterling—			
Demand	$4.1850	$4.1950	....
Cable transfers	4.1950	4.2050	....

The New York quotations of exchange on European countries as furnished by the National City Co., as at March 18, 1920, are as follows: London, cable, 3.73¾, cheque, 3.73; Paris, cable, 13.53, cheque, 13.55; Italy, cable, 18.47, cheque, 18.49; Belgium, cheque, 13.00; Swiss, cheque, 5.84; Spain, cheque, 17.70; Holland, cheque, .36⅝; Denmark, cheque, 17.45; Norway, cheque, 18.10; Sweden, cheque, 20.25; Berlin, cheque, 1.35; Greece, cheque, 11.50; Finland, cheque, 6.25; Roumania, cheque, 175.

BANK BRANCH NOTES

The following is a list of branches of Canadian banks which have been recently opened:—

High Bluff, Man.	Bank of Nova Scotia
Havana, Cuba, (31 Cuba St.)	Canadian Bank of Commerce
Vittoria, Ont. (Sub-agency to Simcoe branch)	Canadian Bank of Commerce
Melville, Sask.	Royal Bank of Canada
Carbon, Alta.	Bank of Toronto
Benito, Man.	Union Bank of Canada
Bestville, Sask.	Union Bank of Canada
Gilroy, Sask.	Union Bank of Canada
Mossbank, Sask.	Union Bank of Canada
Pinkham, Sask.	Union Bank of Canada

Mr. W. P. Kirkpatrick has been appointed manager of the branch of the Canadian Bank of Commerce, Havana, Cuba.

Mr. J. L. Thompson, formerly of the Vancouver branch of the Bank of Toronto, has been appointed manager of the branch of the same bank at Carbon, Alta.

Prospective Branches

It has been announced that the Bank of Commerce will spend $100,000 for construction work at New Glasgow, N.S.

The Bank of Toronto is remodelling the building at 938 College Street, Toronto, Ont., for the purpose of opening a new branch.

A permit has been granted to the Molson's Bank to erect a brick building at the corner of Main and Bridge Sts., Bedford, Que.

The Canadian Bank of Commerce will open a branch, shortly, at Kingston, Jamaica.

The Canadian Bank of Commerce has under consideration, the erection of a new branch office this spring at Sydney, N.S. The plan is to have the present structure torn down and a larger and more modern one erected on the same site, so as to meet the demands of the district, which are growing larger every day.

The Canadian Bank of Commerce recently acquired a site in St. James', on Portage Ave., near King Edward Place, Winnipeg, Man., and will open a branch there, at an early date.

In both Edmonton and Calgary, Alta., the Union Bank of Canada has established branches in connection with the stock yards.

A scheme of mutual livestock insurance was discussed at a meeting of the B.C. Dairymen's Association and the B.C. Stock Breeders' Association, with Hon. E. D. Barrow, provincial minister of agriculture, on March 1. This would supersede the present provincial grant of half the value, to the owner of an animal killed to prevent the spread of tuberculosis.

DOMINION BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co., for the week ended March 9, in provinces, as compared with those of previous weeks, and corresponding week of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P.E.I.	Total.	1919.
Mar. 9th ..	3	5	0	0	5	1	2	0	0	16	19
Mar. 5th ..	1	7	3	1	1	0	3	0	0	16	11
Feb. 27th ..	3	1	0	0	2	1	5	0	0	12	11
Feb. 20th ..	4	7	2	0	2	0	1	0	0	16	16

Bradstreet's figure for the week ended March 11 was 6, as compared with 14 for the previous week, 10 for the same week in 1919, 28 for 1918, 27 for 1917 and 45 for 1916.

GOVERNMENT BOND QUOTATIONS

The following quotations of active bonds are supplied by the National City Co., Ltd., and are in New York funds:—

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920)	97⅜	97⅝
United Kingdom 5½% (Nov. 1, 1921) ..	95¾	96¼
United Kingdom 5½% (Nov. 1, 1922) ..	92	92½
United Kingdom 5½% (Aug. 1, 1929) ..	90½	91
United Kingdom 5½% (Feb. 1, 1937) ..	87¾	88
City Paris 6% (Oct. 15, 1921)	90	90½
French Cities 6% (Nov. 15, 1934)	90	90¼
Dominion Canada 5½% (Aug. 1, 1921)	97⅝	98¼
Dominion Canada 5½% (Aug. 1, 1929)	93¾	94⅛
Japanese Govt. 4% (Feb. 15, 1931)	60½	61½
Japanese Govt. 1st 4½% (Feb. 15, 1925)	75½	76¼
Japanese Govt. 2nd 4½% (July 15, 1925)	74½	75
Swedish Govt. 6% (June 15, 1939)	91	91¾

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended March 18th, compared with the corresponding week last year:—

	Week ending Mar. 18, '20.	Week ending Mar. 20, '19.		Changes.
Montreal	$125,013,609	$ 95,089,275	+	$29,924,334
Toronto	99,769,545	66,039,707	+	33,729,838
Winnipeg	40,632,613	29,108,951	+	11,523,662
Vancouver	15,620,871	10,632,602	+	4,988,269
Ottawa	8,423,789	6,196,126	+	2,227,663
Calgary	8,111,861	5,009,582	+	3,102,279
Hamilton	7,279,902	4,735,503	+	2,544,399

NOVA SCOTIA MUNICIPALITIES' UNION

At a meeting of the executive council of the Union of Nova Scotia Municipalities, held in Halifax on March 9th, it was decided to hold this year's convention in Windsor in August. The council had under consideration various matters referred to it at the last conference of the union, including suggested reform in the Assessment Act, amendments to the Victoria General Hospital Act, the Theatre and Cinematograph Act, and the establishment of a Central Prison Farm for Nova Scotia. The Union recommended as their nominees for two members of a committee to be appointed under the Fire Prevention Act C. E. Doane, ex-president of the council, and James Seeley, merchant, of Kentville.

Other matters which were considered that may be brought up at the next conference of the union were the poll tax on women, now entitled to vote, a suggested reform in the taxation for schools and the assessment of vessels not owned in Nova Scotia, and a simplified and more uniform system of municipal bookkeeping.

PERMISSION TO MAKE STOCK ISSUES

In connection with the proposed amendments to the Manitoba Sale of Shares Act, P. A. Macdonald, public utilities commissioner, and R. C. Wallace, commissioner for northern Manitoba, have recommended that before promotion stock can be sold, permission must be given by the public utilities commissioner. All advertising must comply with this prospectus, and state that the prospectus is on file at the office of the utilities commissioner. Before vendors stock can be sold, it is suggested that the company must obtain a special certificate from the utilities commissioner, and file proof with him that the development work referred to in this section and so far carried out has demonstrated that there is a reasonable prospect of a return to the purchaser of such securities. On the suggestion of members of the law amendments committee, the amendments were altered so that in case of a difference of opinion between a mining company and the public utilities commissioner an appeal could be made to a board to consist of the commissioner and two other persons to be appointed by the Lieutenant-Governor-in-Council.

MANITOBA WORKMEN'S COMPENSATION INCREASED

Payment of $402,236 was made under the Manitoba Workmen's Compensation Act during the fiscal year of 1919, according to the annual report tabled before the legislature. During the year 2,829 accidents were reported as against 2,695 in the preceding year, an increase of about 5 per cent., notwithstanding the general strike, which paralyzed industry for six weeks in the busy season of the year. There were 1,684 claims filed; in 1918 there were 1,781. Thirty-three fatal accidents were reported in 1919, as against 42 in 1918; 70 permanent disability cases as against 102 in 1918 and 1,581 temporary disability cases, this being 6 less than in 1918. In 14 fatal accidents no claim has been made with the board at the time the report was made. In five fatal accident cases there were no dependents, and in one case the dependents were resident in an enemy country and, consquently, not entitled to compensation.

Total pensions in fatal and permanent disability cases amounting to $402,236 were ordered by the board during the year. This amount is more than $6,700 less than in 1918. Actual cash payments to workmen or dependents ordered during the year amounted to $197,357. The volume of business being handled by the board is reported to be constantly increasing. It is pointed out that in 1919 there was an increase of 27 per cent. in the number of cheques issued in payment of compensation. The total premium income (estimated) for 1919, the report gives as $722,972. Earned premiums in 1918 amounted to $690,178. Administration expenses for 1919 were $45,547.

THIRTEEN MILLIONS IN ALBERTA TELEPHONES

The replacement value of the government telephone system in Alberta is $13,320,312, according to a report of J. B. Wray, consulting engineer, presented to the legislature on March 8th. The books of the telephone department show that there has been expended to date on the lines the sum of $9,400,000. Mr. Wray, however, in making his report, allows 15 per cent. off the $13,320,312 for depreciation through use and age, so that the total net reproduction cost of the entire system is given at $11,280,881. According to the report, the appraisals have been made on the most conservative basis and nothing allowed for "going business" value.

Mr. Wray was former chief engineer for the Bell Telephone system at Chicago, and is a consulting engineer of the United States Bureau of Standards. He has been engaged on this work for nearly two years, and includes three huge volumes laid on the table of the House recently and a fourth one yet to come. The fourth volume will contain a summary of the report and recommendations for the future of the system, and, as such, will be the most important to the legislature.

Besides the figures of appraisal and reproduction costs, the first volume of the report contains some interesting statistics, showing that there are standing over the entire system 453,787 telephone poles on January 1st, 1919, all the figures in the report being based on the period up to that date. There were also at that time 13,409 miles of pole lines, 53,463 miles of overhead open wire, 28,995 miles of overhead cables and 24,071 miles of underground cables, a total of 106,529 miles of telephone lines. The reproduction cost of the system was based on a close inventory, the reproduction cost then being obtained by applying unit cost to plant statistics, and to these direct construction costs were added the overhead costs.

UNIFORMITY IN HEALTH INSURANCE

Companies writing health insurance in Canada have agreed on three standard forms of health insurance as follows:—

Form 1—Confinement to house policy.—Premium rates: Ages 18 to 50, premium $8 for each $5 weekly indemnity; ages 51 and up, premium $11 for each $5 weekly indemnity.

Form 2—Non-confinement policy—Premium rates: Ages 18 to 50, premium $9 for each $5 weekly indemnity; ages 51 and up, premium $12 for each $5 weekly indemnity.

Form 3—Life indemnity policy, non-confinement policy. —Premium rates: Ages 18 to 50, premium $9.50 for each $5 weekly indemnity; ages 51 and up, premium $12.50 for each $5 weekly indemnity.

The wording of the insuring clauses covering temporary disability, permanent disability, surgical indemnity, hospital indemnity and indemnity if quarantined are all covered by the agreement.

The following companies, comprising almost the entire membership of the Casualty Insurance Managers' Association, have agreed to write on the above terms: Canada Accident and Fire, Car and General, Dominion of Canada Guarantee and Accident, Employers' Liability, General Accident, Globe Indemnity of Canada, Guardian of Canada, Imperial Guarantee and Accident, Law Union and Rock, London Guarantee and Accident, London and Lancashire Guarantee and Accident, Maryland Assurance, North American Accident, Norwich Union Fire, Ocean Accident and Guarantee, Preferred Accident, Provident, Railway Passengers, Royal Exchange, Travelers' Indemnity and Yorkshire.

"Combining for Foreign Trade" is the title of a booklet just issued by the Guaranty Trust Co., New York. It describes experience in aiding the formation of combinations under the Webb-Pomerene Law.

CONFLAGRATIONS ARE A CONSTANT HAZARD

(Continued from page 5)

"(1) Absence of fire protection, or where good protection was provided, it was not available, because of a breakdown of pumps or mains, or interruption of power, or disorganization of brigade.

"(2) Climatic conditions, usually dry weather and high winds.

"(3) Fire starting in a high or large building, or one with very inflammable contents, and so getting beyond the control of the fire brigade.

"(4) Prevalence of wooden buildings, and more especially of wooden shingle roofs.

"(5) Narrow streets or lanes with opposing buildings have unprotected window openings."

After illustrating his arguments by a review of the chief conflagrations of modern times, Mr. Laidlaw concluded as follows:—

Disastrous to Local Companies

"In concluding these comments on a few of the conflagrations which have occurred, may I again repeat my opinion, which is that no city, town or village, as now built and now protected, is free from the danger of a conflagration. The law of average is ever at work, and while there are great local variations for a time, the expected will happen later if not sooner. Because of such variations, it frequently happens that certain cities or districts escape serious fires for a time, and local insurance companies or mutuals do well, but when the disaster comes, even if delayed, it is a disaster to those companies whose business is local, while it is only an incident to the business of a company whose operations are over a much wider field.

"The day may come when fire insurance companies will be required to declare their liability in the larger towns and cities. Is it right and proper for an insurance company with assets of $250,000, to be carrying a liability of over $10,000,000 in one city? Yet that and worse in comparison is being done in our midst. In Toronto an annual premium income of $10,000, from dwellings, entails a permanent liability upon the insurance company receiving it, of $5,000,000.

"Fire insurance is based on the principle of distribution of liability, and every prudent company should voluntarily limit their acptances in any place in keeping with their whole business, and if they will not they should be required to do so. Look at the experience in Chicago, Boston, St. John, Baltimore, Chelsea, and numerous other conflagrations where millions of insurance could not be collected because it had been carried by local companies with limited assets, with consequent bankruptcy of many who the day before were well to do.

Fire Insurance a Basic Factor

"Fire insurance is the very base of credit, through which our wonderful commercial system has been developed, but if the base be not solid, the edifice will tumble when shaken, and bring down many innocent in its ruins.

"Any municipal insurance scheme will always ultimately break on this rock of conflagrations. A municipality's assets consist of the property of its citizens, and it can no more safely insure itself than can the individual citizen. If the city attempts it, when a conflagration occurs the citizen taxpayers have little left to tax, or to pledge as security for a new loan. They are then exactly in the position of an individual property owner who has lost a building without insurance. He has to mortgage other properties in order to borrow enough to rebuild. In Toronto the total liabilities carried by the licensed fire insurance companies probably amount to $750,000,000, although there are no accurate figures available.

Some Suggested Remedies

"Now, if my conclusions are correct, and that we are in danger of a conflagration, what are we going to do about it? It seems to me there are a few things we can do, and I would suggest the following:—

"Insist that there be separation between the floors of buildings over three stories high. We pay much attention to walls separating adjoining buildings and should apply our party wall regulations to separate the floors.

"When buildings oppose one another across lanes or courtyards, the windows should be protected by use of wired glass, or a water curtain to supply a stream of water to the outside of each window when the adjoining building is on fire.

"There should be an organized reserve for each fire brigade. This could be volunteer, with a small annual allowance, but there must be a regular drill and full recognition that they form part of the brigade. They should parade whenever the permanent fully paid men parade; take part in their games; and have the benefit of pension funds if disabled. They should be called out only in event of a general alarm, and special alarm signals for use in such an emergency would require to be placed in their homes.

"Many conflagrations have been due to the brigade having been exhausted by a previous fire, or some of the men sick or away on holidays, and a reserve force should always be ready to step in when required.

"It should be prohibited by law that extensive repairs to the waterworks, pumps, reservoirs, or mains be undertaken without having previously obtained permission from the fire marshal of the province, who should be instructed to see that proper emergency measures were provided, and also that it be not done during a hot and dry season when everything is most inflammable.

"The burning of rubbish in towns should be strictly controlled, and not permitted except on permit from the chief of the fire brigade, who could station men to watch and extinguish the embers.

"All large and high buildings, unless of fireproof construction, with efficient cut-offs between floors, should be equipped with automatic sprinklers.

"Wooden shingles used on roofs have proved themselves to be one of the most dangerous of building materials, and every one should join in a campaign to stop their future use.

"They should be prohibited by law from being used on any building anywhere which is not isolated over 50 feet from any other building. If the man who lives by himself desires to burn himself out, we may let him, but he has no right to burn out his neighbor also.

"Wooden shingles can be used on the sides of buildings with safety. Government should co-operate to encourage the development of a cheap, substantial and permanent roof covering of good appearance, and easily put on.

"Fire is a good servant, but a bad master. Will not every one join in the effort to keep it in its place, and as a first step, may I invite you to join the National Fire Protection Association?"

OPINION ON PART TIME AGENTS DIVIDED

Life insurance agents of Winnipeg discussed the part timer at their association's meeting on March 13. The following resolution was introduced by R. J. Davis, of the Mutual Life, and seconded by W. T. Hart, of the Policy Holders Mutual: "We, the undersigned, agree not to pay or allow, or offer to pay or allow, any commission or compensation of any kind, in connection with the placing of any life insurance policy, either directly or indirectly, to any person in the city of Winnipeg except to a regular full time agent, devoting all of his (or her) time to soliciting life insurance for one company; or where a company issues both life and accident insurance to such agent as shall devote his (or her) entire time to soliciting life and accident insurance for one company. This agreement shall take effect as of July 1, 1920, except as to part time agents now under contract, whose contracts shall be terminated prior to January 1, 1921."

No decision was reached, as the discussion is to be taken up again.

Canada's Financial Balances Abroad

Heavy Favourable Trade Balances do not Tell Whole Story—Dominion Still a Debtor Country—Repurchase of Securities Held in Britain—United States Market has been Resorted to for Public and Private Loans

By "INVESTICUS"

IS Canada really a creditor nation? Having raised among her own people large sums of money through war loans; having granted large credits to Great Britain and other allied governments, besides having piled up heavy favorable trade balances—the impression has gained ground that Canada has been converted from a debtor into a creditor nation. No true Canadian would think of minimizing his country's splendid financial achievements during the war; but dwelling on these, to the exclusion of other phases of the national financial situation, is producing harm. It is time that the public were given a true perspective of the finances of the nation; that, to use a common expression, it were brought to realize just where it is at. It is only by such means that genuine progress will be made in solving either the exchange, or other problems of a financial nature. This is a time for deflation, for the deflation of some of our big ideas, as well as for deflation of the currency and of values generally.

It will readily be admitted that the Dominion, which, prior to the outbreak of war always went abroad for the money it needed, has given a surprising demonstration of financial strength in subscribing over $2,000,000,000 to the various domestic war loans. But this did not convert her from a borrowing into a lending nation. In raising the money what Canada really did was this—she secured at home 85 per cent. of the money she borrowed for national purposes during the war. Americans took $315,000,000 of the various issues.

"But," says someone, "did the government not make advances to Great Britain and other allies to an amount exceeding $1,000,000,000; and does not the British government still owe our government $180,000,000, in addition to owing Canadian banks a similar amount?" This is very true; but even these transactions have not made Canada a lending nation, in the true sense of the term.

Canada Acted as Banker

What occurred was this: Our government borrowed heavily from its own people, and, with a portion of the money, it bought from its own people certain products which, in turn, it sold to the British and other governments on easier terms than had been customary. The banks, of course, used their own funds. But while this was being done Canada still remained a debtor nation by reason of her heavy borrowing abroad. Her case was identical with that of the man who, doing business on borrowed capital, is able to sell on time. No one would think of putting in the money-lending class a person doing business under these conditions. If he were in a position to lend he would hardly be doing business on borrowed money. In making these advances Canada merely applied some of her savings for the purpose of temporarily helping out some good customers. But granting a little banking accommodation is quite different from placing herself in the creditor class.

It may, however, be said, "do not our public men and also some of our financial leaders, speak of Canada as having been converted from a debtor into a creditor nation?" This is true, but general statements usually require qualification. Put the question straight to these men—is Canada really a creditor nation? And they will begin to explain what they mean. Now, at best, the remarks of such persons can relate to nothing more than the changing of the huge adverse trade balances, which were a feature of pre-war years, into favorable balances, which, happily, has continued since 1915. A creditor nation, in reality, is not necessarily one that has a huge excess of exports over imports. On the contrary, the greatest creditor nations invariably have what is termed an adverse trade balance. Strictly speaking a creditor nation is one that has pretty well bought up its outstanding securities abroad, or that is in a position to do so; which supplies its own domestic demands for capital, and which invests in other countries. Obviously Canada is not in this class. Nor is it any disparagement to her that she is not.

Trade balances can not be accepted at their face value. They do not tell the whole story. During the last five years Canada has piled up large favorable balances, but it would be a mistake for one to run away with the idea that the accounting is so much in her favor as these figures would indicate. The favorable balances are as follows:—

1915	$ 5,996,864
1916	271,483,226
1917	333,940,881
1918	623,916,327
1919	343,491,853
Total	$1,578,829,151

Visible Balances Only

The trouble with these figures is that they do not represent the actual situation, for they make no allowance for invisible payments. Before one can say that in a given year the trade balance is a certain sum in favor of the country, one must deduct from it an amount representing the annual interest payment on foreign borrowings, also further amounts due to other countries for shipping and other services. At the outbreak of war Canada was sending abroad $135,000,000 a year in the form of interest and dividends on investments. At the present time this payment it between $190,000,000 and $200,000,000. It would be a fair assumption that the average annual payment on this account during the last five years has been $160,000,000, or a total of $800,000,000. For shipping charges and money spent by Canadians abroad let another $40,000,0$0 a year be added. This would bring the total payments under these headings during the last five years up to $1,000,000,000. Deduct this from the aggregate trade balance and the latter is reduced to $578,829,571.

Put this against the money that has been received through the sale of bonds in other countries:—

Bonds sold in U.S., 1915-1919	$793,014,913
Bonds sold in Great Britain, 1915-1919	70,880,133
	$863,895,046

Those at all acquainted with the situation know that this sum does not represent the total investments of outside capital in Canada during the last five years. One billion dollars would be well within the mark. This means that during the last five years Canada has been drawing money from abroad at the rate of $200,000,000 a year.

Much Borrowing in United States

In their thoughts on this subject many people are led astray through failure to take into account all the factors that promote borrowing abroad. Knowing that Canada has been touching almost the $700,000,000 mark in her Victory loan campaigns, they seem to conclude that all the money the country needs is being raised at home. They

overlook American subscriptions to these loans and the fact that Dominion and provincial governments have had to resort to the United States, to say nothing of those who desired to sell municipal, railway and general corporation securities. Subscribing so heavily to Victory loans as she has done, Canada could not do more than absorb a limited amount of other securities; and so access has had to be made to the United States.

We Owe Four Billion

Sir George Paish, in 1913, estimated that Great Britain's investments in Canada amounted to nearly $2,500,000,000. As, since 1914, the British investor has been unloading his Canadian investments, let it be assumed that these to the extent of $200,000,000 have been disposed of, which would make the aggregate to-day $2,300,000,000. The investments of American capital in this country in 1913 have been placed at $600,000,000; to-day the best estimates put them at approximately $1,600,000,000. Add to these the investments of other countries and one can readily see that the investment of foreign capital in Canada to-day, is if anything, in excess of $4,000,000,000. This is proof that to place the annual interest and dividends payments to foreign investors at $200,000,000 is not excessive. Before it could with any degree of reason be claimed that Canada is a creditor nation, she would have to be in a position to absorb the greater part of these securities, in addition to being able to export a certain amount of capital every year.

These figures effectually dispose of the notion that Canada has become a creditor nation. To-day she is borrowing at a very rapid rate for industrial purposes; this is wise, for she must do so, if she is to experience within the near future the development that lies within her grasp.

Debt is Subject for Concern

Has Canada over-borrowed? For private enterprises, no; but it may well be questioned whether, from the national standpoint, she has not gone the limit, or even a little beyond it. Borrowing is always a subject for serious consideration; but when undertaken by private enterprises it is surrounded by a number of safeguards that are not always present when governments borrow. Besides, if private enterprise is unsuccessful, comparatively few are affected, except those directly involved. But heavy public borrowing is usually accompanied by inflation, which seriously handicaps industry and injuriously affects the whole country. in this respect Canada is not nearly as badly off as are a number of the nations of Europe; but she is very seriously handicapped as compared with her great competitor, the United states. To-day a depreciated currency is more the cause of high prices than is the scarcity of commodities. It is the root cause of the problem of exchange. Our national financial structure rests on such a narrow gold basis that it can be compared only to an inverted cone. Still it will probably not be easy to stop the borrowing tendency; for with governments it is the easiest way out of difficulties, and when once a loan campaign is launched it is accompanied by such strong patriotic appeals that not to subscribe is to render one liable to the charge of doubtful loyalty.

Canada has had her due period of jubilating over her achievements in the raising of money. From now on we should content ourselves with a consciousness of duty done, and devote ourselves seriously to considering how the piper is to be paid; for paid he must be. A nation which must pay in interest on the national debt approximately fifty per cent. of its total revenue—which is the position of Canada this year—has something seriously to think about. In matters of national finance Canada may well look to the United States, which has gone a long way towards putting her house in order. If she does not do so Canada will pay dearly for it; she is doing so even now. This is no time for pessimism, much less for foolish optimism; it is a time to look facts in the face. Canada is a heavy debtor nation and we had better realize this and shape our affairs accordingly.

MARYLAND CASUALTY COMPANY

The Maryland Casualty Co. has submitted to its shareholders its annual statement for the year ending December last, showing a creditable increase over 1918. The action of the shareholders when consummated in March will bring the capital stock up to $3,500,000, the surplus to policyholders $7,454,000, and the company's total resources from $21,083,333 to over twenty-four millions. The company has invested in Canadian war loan bonds to the extent of $576,000 and holds other Canadian securities to the value of $281,000, making a total of Canadian securities held amounting to $857,000.

BRITISH AMERICA ASSURANCE CO.

As previously pointed out in these columns the financial position of the British America Assurance Co. was improved as a result of the 1919 business. The results from the fire department were especially profitable. A total credit of $465,955 being available from this source. There was also a satisfactory credit balance from the automobile department, the business of which showed a large increase. As had been anticipated last year, however, the results in the marine department were not profitable, the debit balance being $188,163. The president, W. B. Meikle, attributed this to post-war conditions, such as labor unrest, hasty and inadequate safeguards, and breakage and depreciation in sea-worthiness of hulls due to the wear and tear and strain upon the ships.

At the annual meeting held in Toronto on February 26th, the following directors were elected for the ensuing year:—Sir John Aird, Robert Bickerdike (Montreal), Lt.-Col. Henry Brock, Alfred Cooper (London, Eng.), H. C. Cox, John H. Fulton (New York), D. B. Hanna, E. Hay, John Hoskin K.C., LL.D., Miller Lash, W. B. Meikle, George A. Morrow Lt.-Col. the Hon. Frederic Nicholls, Brig.-Gen. Sir Henry Pellatt, C.V.O., and E. R. Wook. At a meeting of the board of directors held subsequently, W. B. Meikle was elected president.

OCCIDENTAL FIRE INSURANCE COMPANY

In its report for the financial year ending the 31st of December, 1919, the Occidental Fire Insurance Company shows premiums less rebates and cancellations amounting to $387,537 as compared with $349,146 in 1918, an increase of $38,391. The amount paid for reinsurance was $156,450 as against $139,496 in 1918, so that the net premium increase was $21,438. This increase in business requires under Dominion government regulation the reserving of an additional sum of $17,813, making the reserve for unearned premiums $148,095, which was 64 per cent. of net revenue for the year. Losses paid and unadjusted less reinsurance recoverable amounted to $100,441, being 43.4 per cent. of net premiums, or 47 per cent. after providing for necessary increase in reserve. Expenses showed an increase, chiefly on account of taxation, and totalled $86,098, which was 37.2 per cent. of net premiums received, or 40.3 per cent. after providing for reserve. The net underwriting profit was, therefore, $26,734, which, with returns from investments totalling $32,829, enables the company to transfer $59,563 to the credit of profit and loss account.

The management states that interest and principal repayments have been well met on mortgage loans, there being only $268 arrears of interest on an investment of $87,560 in these securities. All debentures have been taken into the accounts at actual market value. It is also deemed advisable to continue the policy of building up a reserve, and in consequence no dividend is being paid. The entire profits of the year, $59,563 have been transferred from revenue account to the credit of profit and loss account. The net surplus to shareholders now amounts to $249,040.

At a special general meeting in October last the shareholders approved the company underwriting automobile insurance. The necessary action has now been taken and licenses secured.

CANADIAN MINING INSTITUTE ANNUAL

Use of Nickel Coins Urged—O. E. S. Whiteside is President for 1920—Natural Resources Being Depleted

THE 22nd annual meeting of the Canadian Mining Institute was held in Toronto, March 8 to 10. D. H. McDougall, president, occupied the chair at the opening, but following the election of officers the new president, O. E. S. Whiteside, of Coleman, Alta., took charge.

In his presidential address Mr. McDougall pointed out Canada's situation with regard to the three basic material requirements of a nation—coal, iron and wood. Our coal deposits, he said, did not include anthracite, except in small quantities; our iron ores were of very low iron content and development depended upon the advance of science to a large extent; our timber resources were rapidly vanishing, and Canada's position in this regard was indeed alarming. As an offset to this he emphasized Canada's "strategic" superiority mineralogically in her possession of the world's supply of nickel, cobalt and asbestos.

Addresses on Mining Subjects

Thomas W. Gibson presented a paper on Ontario mineral production, which, in 1919, exceeded that of 1913 by $4,349,802. R. E. Hore, consulting geologist, urged greater government publicity as to the exact conditions and prospects in mining in Ontario. W. H. Collins delivered an address on "Iron Ranges of Michipicoten District, Ontario," and Major Percy Barbour spoke on mining engineering in the United States. The members were shown slides illustrating the entire workings of the plant of the International Nickel Company at Sudbury, Ont., and moving pictures of underground operations at the Cobalt silver fields and also of the operations at the Alfred peat bog. J. C. Miller, general superintendent of the International concern at Sudbury, explained his slides to the audience, while the movies exhibited were Ontario government films.

D. B. Dowling, government geologist, emphasized the fact that Canada's future as an oil producer rests with the northwest. The geological conditions found in the Peace River district, he pointed out were different from those in Manitoba. M. Y. Williams of the geologcial survey described gas and oil prospects in Ontario. The effect which a deepening of the St. Lawrence would have in making transportation of fuel from the maritime provinces to central Canada was also discussed.

Advantages of Nickel Coins

C. E. Macdonald, of the International Nickel Company, urged the use of nickel for coins. Bronze coins, he said, are easily counterfeited, which rendered them unsuitable for coins of high value. Aluminum coins had also been tried in various parts of the British empire, but had been found wanting, and had had to be replaced in two years. German silver, cobalt and nickel alloy had all been tried, with little success. The silver coins at present in use had many defects, the speaker stated. Over a period of forty-five years, Mr. Macdonald said, the United Kingdom had withdrawn 30 per cent. of the total issue of coins for that period. Though of good appearance, silver coins had several drawbacks, not the least of these being their affinity to sulphur, which causes them to turn black. The ideal metal for the coinage in the opinion of the speaker, was nickel, as it met all the necessary requirements, and made very remote the danger of counterfeiting. Apart from the sentimental reasons attached to the use of a metal typically Canadian, many other advantages would accrue from its use.

At the close of Mr. Macdonald's address, a resolution was passed "that the Canadian Mining Institute go on record as recommending to the government that the metal employed in the manufacture of the coinage of Canada be changed to nickel at an early date."

Other addresses were "Lost Placers of Ontario," by Professor A. P. Coleman; "Recent Developments in Northern Ontario," by J. G. McMillan; "Our Mining Industry," by Hon. Henry Mills, minister of mines for Ontario. Mr. Mills said that there are four lines along which he would like to see the industry advance, and these were more exploration, greater assistance to scientific research, more assistance to capital, and more co-operation between labor and capital. That they had made comparatively little progress in mining science during the last few years was the opinion of the speaker, as the efforts of science had been for the most part turned on destructive lines. The harmonious working of labor and capital was also urged by the minister, if the best results of the mining industry were to be obtained, as the one could not get along without the other. Thousands of miles of mine land are yet to be explored, he stated, and $10,000 has been set aside in the government estimates this year to assist in the prospecting of this new land.

The following officers for the coming year were elected: President, O. E. S. Whiteside; vice-presidents, British Columbia, E. E. Campbell; Manitoba, W. J. Dick; Quebec, H. Y. Russel; Nova Scotia, G. D. McDougall.

WESTERN BOARDS OF TRADE CONVENTION

At the preliminary meeting of board of trade representatives held in Brandon on February 27 and 28, Calgary was selected as the city for a convention to be held about May 15. The following subjects were chosen for the consideration of the convention:

1. Railway policies. (a) Railway boards with western representation. (b) Equalization of freight rates. (c) Railway service. (d) Development policy. 2. Development of foreign trade via the Pacific routes. 3. General development of the natural resources of western Canada. (a) Coal trade. (b) Minerals and iron. (c) Lumbering and pulp industries. (d) Oil. 4. Trade conditions with British West Indies. 5. Colonization of western Canada. 6. Housing and building problems. 7. Development of inter-provincial trade in western Canada. 8. The Canadian Deep Waterways and Power Association. 9. Oriental ownership of lands in western Canada. 10. Uniform provincial business legislation. 11. Subject of Canadian merchant marine and Armstrong bill.

HAIL AND PLATE GLASS INSURANCE

Several amendments to the Manitoba Mutual Hail and Plate Glass Insurance Act are contained in a bill introduced at the present session of the legislature. One requires that directors be residents of the province and members of the company for the time they hold office. Each member of the company is to be entitled to one vote, so long as his payments are not in arrears. Where a policy is issued for more than one year, the premiums may be accepted in advance.

Reserve funds are to be invested "either in debentures or other securities of the Dominion of Canada or of this province, or in municipal debentures, or in other securities in which trustees may invest trust money, or may remain in a chartered bank on deposit at interest, and that twenty-five thousand dollars of such reserve fund or such securities to the extent of that sum shall be deposited, or any part thereof shall be returned to the company to whose credit it stands, by the provincial treasurer only on the production of a certificate from the superintendent of insurance that in his opinion such return is necessary for the purpose of enabling the company to meet its losses in any year in which the revenues of the company are not sufficient to meet its liabilities. The company having such deposit to its credit as aforesaid, shall be entitled to be credited with interest earned thereon or on any of such securities deposited with the provincial treasurer and except in cases with respect to which it may be otherwise provided by the lieutenant-governor-in-council, so long as any company's deposit is unimpaired and no notice of any final judgment or order to the contrary is served upon the treasurer, the interest upon securities forming the deposit shall be handed over to the company when received by him."

JUDICIAL DECISION IN BANK OF NOVA SCOTIA CASE

Application of Section 90 of Bank Act—Acceptor of Draft Held Responsible, Though Company He Claimed to Represent Did Not Exist

A CASE involving points of interest in banking practice, that of Bank of Nova Scotia vs. Heber H. Hatfield, was decided by Mr. Justice Chandler in the King's Bench Division of the Supreme Court of Nova Scotia on January 21, 1920. The case arose out of the acceptance by Hatfield and the discounting by the bank of a certain draft; and an action commenced in 1918 in regard to the matter had been dismissed with costs but "without prejudice, however, to any action which might be taken by the plaintiff against any person or persons whatever, on or in respect of the bill of exchange sued on." This action was then brought by the bank against Heber H. Hatfield as acceptor.

Facts of the Case

The facts of the case as set out in the judgment briefly are as follows: The firm of Hatfield and Scott, carrying on business in New Brunswick and in Montreal, had made arrangements to buy car loads of apples from Edward Harrison, of Kentville, N.S., to be paid by drafts drawn by Harrison and to which the bills of lading were to be attached. On or about December 8th, 1917, the defendant and Edward Harrison called upon the agent of the Bank of Nova Scotia at Kentville, Nova Scotia, and one of them stated to the agent of the bank that Edward Harrison wanted some money. Roy, the agent of the Bank at Kentville, says that he filled in the date—namely, December 8th, 1917, in a form of draft and also the words "at sight." Whether Edward Harrison signed the draft as drawer then or at a later date does not appear, but at all events the defendant accepted the draft as it then was, by writing at the foot of the draft the following: "O.K. Hatfield and Scott Co., Ltd., per H. H. Hatfield," and the draft was afterwards filled in for the sum of $927.50, the draft being drawn on Hatfield and Scott, Ltd., Montreal, P.Q. The draft was discounted by the Bank of Nova Scotia and the proceeds of the draft placed to the credit of Edward Harrison on December 10th, 1917.

The evidence further showed that Hatfield and Scott had applied for incorporation under the Dominion Companies Act in August, 1917, but had not received their letters of incorporation until January 9, 1918—but, nevertheless, believed that during that interval they were an incorporated company. Further, the evidence showed that Hatfield had not been legally authorized by the company (which in reality did not at the time exist) to act as its agent, but that he did so.

Acceptor Held Responsible

In deciding the case Mr. Justice Chandler says:—

"Considering that Hatfield knew when he accepted the draft sued on that it was to be used immediately in order to put Edward Harrison in funds and that it was absolutely useless and futile for Hatfield to accept the draft if the draft was not to be valid or used until a bill of lading for a carload of apples was attached to it and that this particular draft was discounted by the bank and the proceeds placed to the credit of Edward Harrison's account on December 10th, 1917, I have come to the conclusion that the draft was not accepted by Hatfield conditionally, as contended by him. If the draft was not to be used, that is, discounted by the bank until a bill of lading for apples was attached to it, what was the use of Hatfield's acceptance? In the course of business between Edward Harrison and Hatfield and Scott prior to this date, and in accordance with what is stated in the letter from the Bank of Montreal to the Bank of Nova Scotia mentioned above, any drafts drawn by Harrison on Hatfield and Scott Co., Ltd., to which bills of lading were attached were paid by Hatfield and Scott at Montreal on presentation, and if this particular draft was to be held until a bill of lading was attached to it in order to secure payment, all that took place between Hatfield and Roy at Kentville when this draft was in part prepared and accepted by Hatfield, amounts to nothing whatever, and has no effect.

"If, as stated by Hatfield, Roy had waited until Harrison had brought in a bill of lading to be attached to the draft accepted by Hatfield before sending it forward for payment, the bank would have lost the benefit of the bill of lading as security for the payment of the draft. Section 90 of the Bank Act provides that the bank shall not acquire or hold any warehouse receipt or bill of lading or any such security as aforesaid to secure the payment of any bill, note, debt or liability unless such bill, note, debt or liability is negotiated or contracted at the time of the acquisition thereof by the bank. If Roy, the manager of the bank, had acted as Hatfield claims he agreed to do, the bank would have lost the security of the bill of lading as the draft accepted by Hatfield was negoiated or discounted on December 10th, at which time admittedly there was no bill of lading available to be attached to the draft and to secure its payment. It is unlikely that Roy had altogether overlooked the provisions of section 90 of the Bank Act in connection with this transaction.

Thought Company Incorporated

"The plaintiff contends that Hatfield by his acceptance of this draft in the name of a non-existing corporation warranted and represented that there was such a corporation in existence and that he, Hatfield, had authority to accept the draft for that company. The plaintiff further contends that Hatfield, not having any such authority as he represented and warranted, is personally liable under the circumstances of this case for the amount of the draft and for the costs and expenses incurred by the plaintiff in endeavoring to collect the draft from Hatfield and Scott Co., Ltd.

"It seems to me that the contention of the plaintiff as to the liability of the defendant in this matter is correct. I think that the defendant Hatfield is liable by reason of his representation that he had authority to accept the draft sued upon as agent for Hatfield and Scott Co., Ltd., and that by his conduct he warranted that he had such authority. Though Hatfield does not seem to have been aware of the fact at the time, there was no such corporation as Hatfield and Scott Co., Ltd., in existence on the date when the draft sued upon was accepted, but the ignorance of Hatfield on this point does not affect his liability."

CLAIMS COMPENSATION BOARD AUTOCRATIC

The Ontario Workmen's Compensation Board came in for severe criticism at the fourteenth annual meeting of the Ontario Bar Association on March 3 and 4, especially because of its disregard for the services of lawyers in connection with claims under the act. The committee on law reform also mentioned the board's investments as an example of this autocratic power. The 1919 report shows investments made in the bonds and debentures of loan companies and of towns and cities throughout Ontario of between $5,000,000 and $6,000,000. These carried interest at between 5½ and 6 per cent., while the province was borrowing at higher rates. The committee thinks the money might be handed right to the province, which should become indebted to the board for advances with a reasonable rate of interest.

The committee suggests several amendments to the Workmen's Compensation Act, among them one to provide that the workingman be given right to appeal to a judge with the privilege of calling evidence where he is not satisfied with the board's decision, as in the United States and England. It is also asked that lawyers be allowed to present claims to the board, as many claimants are not able to present their cause in an intelligent manner.

A million-dollar power action of the Toronto Power Co. against the Dominion government has been settled out of court. The claim was reduced from $1,200,000 to $800,000, and of this amount the Ontario Power Co. is to pay $510,000.

EXTENSION OF CANADIAN BANKS

Earlier Policy Was to Connect With Foreign Institutions—Royal Has Taken Lead, But Several are Now Active

Of several new developments in Canadian banking during the past year, one of the most important is the extension abroad. The extension is summarized in "Agricultural and Industrial Progress in Canada," issued by the Department of Colonization and Development of the Canadian Pacific Railway. The article says:—

Canadian banks made notable progress internationally during the year 1919, and, anticipating foreign trade in hitherto unpastured fields, banking connections were established which will have great future importance. It is vital to the development of Canadian trade in foreign fields that it have the active co-operation of Canadian banks, and this has been admirably given in the past year. Canada's banks and their branches are now to be found in the far east, in South America, in Spain and France, where, as previous to the war, they were represented outside of the Dominion, only in England, the United States, Newfoundland, Central America, Cuba and in the West Indies.

Prior to the war, it was not the policy of Canadian banking institutions to extend their enterprise to points far afield as it was felt that in making foreign extensions the tendency would be to take abroad Canadian capital actually required for home uses. It was thought preferable to strengthen and extend relations with foreign banking houses and retain their goodwill, thereby conserving our resources for the assistance and encouragement of domestic development.

Far East, U.S. and South America

With the new era of reconstruction, however, Canadian bankers have been confronted with the problem of international development for Canadian industries, and for Canadian producers in general. Canada attained during the war a position of international importance undreamed of previous to the outbreak of hostilities, and in her new status, the vital duty of the Dominion bankers is to aid in the maintaining of this elevated prominence.

In the past year, the Union Bank as part of the organization known as the Park-Union Foreign Banking Corporation has opened branches for business in Yokohama and Tokio, Japan; Shanghai, China; San Francisco, Seattle, U.S.A., and Paris, France. The formation of this subsidiary corporation, designed primarily to develop trade with the far east is actually the first working alliance consummated between an American and a Canadian bank—cannot but bring about satisfactory results in the stimulation of Canadian commerce with oriental countries.

In the development of Franco-Canadian relations significant banking moves were made in 1919. The Park-Union's branch in Paris was opened November 10th and gave the Union Bank a direct banking connection in that country. The Bank of Montreal and the Royal Bank of Canada each opened branches in Paris. The Royal Bank, like the the Bank of Nova Scotia, was represented in the West Indies and in Central America prior to the war but since has continued its penetration into the Latin-American states.

Venezuela, West Indies and Spain

During 1917, four branches of the Royal Bank were opened in Venezuela, five in the Dominican Republic, and seven in the British West Indies, including Haiti, Martinque, and Guadeloupe. Further branching out in 1919, branches of the Royal Bank began operations in Rio de Janeiro, Buenos Aires, and Monte Video. In the early part of 1918, a branch was opened at Barcelona, marking the first entrance of a Canadian banking institution into Spain. A branch established late in 1918 at Vladivostok, was for the accommodation of Canadian troops in Siberia, because in the disrupted state of Russian trade, business had been practically impossible.

The Canadian Bank of Commerce established interesting Italian connections early in the war, and acquired a substantial interest in the British Italian Corporation, the function of the Canadian institution being to represent it in the Dominion. The president of the Bank of Commerce went to Japan in the summer, not to open branches, but to get a clearer insight into trans-pacific business. The Bank of Montreal and the Canadian Bank of Commerce some years ago, entered Mexico and established branches there, and expect yet to carry on business there profitably. The Canadian Bank of Commerce also has a branch at St. Pierre, Mignelon.

West and South Africa

By purchasing a substantial interest in the Colonial Bank, the Bank of Montreal has established a unique banking association, owing to the fact that Barclay's Bank and the National Bank of South Africa already have a substantial interest in the Colonial Bank. Canada is thus connected through this acquisition with the West Indies, West Africa, and South Africa, through the wide ramifications of the powerful group of which Barclay's Bank, London, is the head. The Colonial Bank was founded in 1836, with an English charter having wide powers. Not long ago, control of the Colonial Bank was purchased by Barclay's Bank, London, in pursuance of an active expansion policy.

The Bank of Montreal has five branches in the United States, two in the United Kingdom, one in Continental Europe, and one in Mexico City.

The Bank of Nova Scotia has an extended business in Cuba and the West Indies, operated through fourteen branches, also three branches in the United States.

Both the Dominion and the Merchants Bank have branches in the United States, the former also in the United Kingdom.

The Banque Nationale was the first Canadian Bank to open a branch in Paris, France.

HOUSING ASSOCIATION FORMED

The Western Ontario Housing Commission's Association was formed in London, Ont., on March 8th, at a meeting of representatives from ten cities. It was decided to send a delegation to ask the Ontario government not to abandon the scheme. The functions of the new association include the investigation of the trend of construction prices, means of meeting difficulties which have arisen as a result of recent sharp increases in costs, and measures to provide temporary accommodation in emergencies.

ALBERTA SEED GRAIN LOANS

Alberta's obligations for seed grain loans within and without organized municipalities will aggregate in the neighborhood of $4,000,000 by the time seeding is completed this year, according to a statement of Hon. Duncan Marshall, minister of agriculture, in the legislature on March 5th. At the present time there are outstanding loans for seed grain outside the municipalities, of some $464,000, and to settlers within the municipalities of some $1,230,000—a total of $1,694,000 over the whole province. At the same time, there are outstanding over the province about $850,000 in loans advanced for seed grain by the Dominion government, but this represents a reduction from a total of $3,400,000 advanced by the Dominion government since 1915, which Provincial Treasurer C. R. Mitchell thought constituted an excellent record.

The Ottawa fire department's training school may be made a national institution. Such a proposal is to be discussed at the next fire chiefs' convention. The suggestion emanates from the department of insurance, Ottawa.

Toronto University is instituting a new course leading to the degree of Bachelor of Commerce. The instruction will be given by the present staff, and the course will be started this fall.

Manitoba Will Spend Over Ten Million

Provincial Treasurer Estimates Large Increase in Expenditure—Small Deficit May be Incurred, but Sucession Duties, Taxes on Corporations and Supplementary Revenue Taxes Will be Increased

EXPENDITURE of $10,012,103, and revenue of $9,935,204 are estimated in the budget speech of Hon. Edward Brown, provincial treasurer of Manitoba, delivered on March 10. This is for the fiscal year ending November 30, 1920. The financial results for the year ended November 30, 1919, have already been reported in these columns. The estimates of expenditure, compared with the expenditure for 1919, are as follows:—

	Estimated 1920.	Incurred 1919.		Inc. or dec.
Legislation	$ 140,060	$ 159,111	—	$ 19,051
Ex. council	244,300	32,061	+	212,238
Treasury	2,591,455	2,235,490	+	355,965
Provincial secretary ..	40,660	30,586	+	10,073
Education	1,550,048	1,319,125	+	230,922
Agricultural and immigration	782,000	688,779	+	93,220
Attorney-general ...	822,950	710,018	+	112,931
Provincial lands	15,200	12,763	+	2,436
Railway commissioner	22,900	20,729	+	2,170
Telephones & telegraphs	1,880,000	1,753,414	+	126,585
Public works	1,833,440	1,534,124	+	299,315
Municipal commissioner	89,090	48,585	+	40,504
	$10,012,103	$8,544,790	+	$1,486,364
		Less	—	19,051
Net increase				$1,467,313

Reasons for Increase

After giving details of the estimated revenue as well, Hon. Mr. Brown said:—

"The actual net increase of the estimated expenditure for the current year over the actual expenditure for last year is $1,407,313, Of this amount at least $600,000 is accounted for by two circumstances. In the first place, on account of this being an election year, the expense of revising the lists and conducting the elections has been set up at $152,000. It might be well to bear in mind, however, that for the last five years we have not incurred the cost of an annual revision of the lists, so that a large expense has been saved. The cost of preparing lists this year has been considerably increased by the fact that for the first time we have to add the names of women voters. In this estimate of $152,000, the wage schedule for registration clerks has only been fixed at $5 a day. Probably in some places this will have to be increased. Another important item is the interest on the new parliament buildings, together with the upkeep of same, which will be paid this year out of consolidated revenue, and amounts approximately to $450,000. Of the balance representing $867,313, this is slightly in excess of the increase of the estimates of 1919 over the actual expenditures of 1918 and represents an increase of only 10 per cent. In view of the fact that the business of the province is growing and the number of services demanded by the people are increasing, while the cost of the necessaries of life continue to advance, this should not be a matter of surprise.

"In the treasury department the amount of the net increase is $355,965, and this is due to the fact that there is $100,000 additional for mothers' allowances, $25,000 additional for patriotic fund and the additional interest charges on last year's borrowings. The increase in the provincial secretary's department of $10,000 is attributable to the increase in salaries, which amounts to $4,000, to the increased cost of printing the "Gazette," and the natural increase of all expenses, while there is an entirely new service—the municipal hospital, for which $2,500 is provided.

"In the department of education the largest increase is in the educational grants, which is over half the total increase. It amounts to $131,643, and includes $40,000 for the university, of which $15,000 is for secondary schools. The Manitoba school for the deaf shows an increase of nearly $7,000, inspection of schools $18,000, free text-books over $10,000 of an increase, salaries $5,500, training schools $8,000, and a general increase due to higher cost of living and higher salaries in all departments.

"The large increase in the attorney-general's department is accounted for in three items. Law enforcement shows an increase of $72,073, which is due to the change in the policing of the province and the establishment of provincial constables, who will enforce the Temperance Act and other laws. Nearly $20,000 extra is required for the Northern Manitoba commission, and $25,000 for the County Court Temporary Aid Act. There is a large decrease for the public utilities commission, which is offset by small increases in other departments. The increases for the provincial lands and railway commissioner are merely normal, but there is the usual large increase of $126,586 in the telephones department, which is, of course, offset by increased revenue.

"The public works estimates show an increase of a total of $299,315. This is accounted for by three new services which have been established. The psychopathic ward will cost $48,700, the power commission $20,000, and the well drills $65,480. This last item was formerly paid for out of aids to municipalities, but owing to the increasing demands of the farmers for this service and the growth of this department, it has been thought advisable to ask for a separation of the appropriations. The amount for aid to municipalities has not been reduced, because this service is also increasing each year, but the $65,480 for well drills is requested as an additional and new appropriation.

Increase in Taxation

"With respect to the revenue which it is necessary to provide for to cover the large increase in the estimated expenditures, it is not the intention of the government to resort to new forms of taxation, but rather to rely upon the sources of revenue already in existence and which have shown encouraging results during the past year, in the hope that there will be further buoyancy by way of increase of the various classes of revenue during the present fiscal year.

"The following amendments are, however, proposed for increasing the revenue. 1—In accordance with the recommendation of the assessment commission, an amendment will be brought into the Succession Duties Act, bringing the rates in this province more in line with the other provinces of Canada, and providing for further increases with respect to large estates.

"There will be an amendment to the Corporation Taxation Act, providing for a tax of $100 per year upon brokers, custom house brokers, shipping brokers and pawnbrokers. This class have hitherto not made any contribution to our provincial revenue. It is expected that the result of the above mentioned amendment will increase the revenue of the province during the present fiscal year by $150,000.

"There will be an amendment to the Supplementary Revenue Act, providing for a levy of 2 mills instead of 1½ mills as at present, and there will be a further amendment to the patriotic levy providing for the payment of the balance of the moneys required to complete this work of the patriotic fund out of consolidated revenue. This will prevent the necessity of making another levy for patriotic purposes of ½ a mill, and the two levies made during the past year of 1½ and ½ a mill each will be consolidated into one levy of 2 mills, which will mean that there will be no increase of the

amount asked for from the property owners through the municipalities.

"By means of a bill introduced by the minister of agriculture, there is provided a royalty on furs produced within the province, and in the estimates there appears an item of revenue which may be derived from this source of $250,000. This item is purely conjectural, as we have no idea of the actual amount that may be produced, and the amount of revenue received from this royalty may fall short of the estimated amount.

"With respect to the actual results, however, of the estimates, the treasury department has considerable faith in the items of revenue that have been set up, and it is hoped that the actual expenditure will fall short of the estimated expenditure, and that while a small deficit is foreshadowed, which may be increased by a few items in the supplementary estimates, the government is still hopeful that the actual revenue for the current year will be equal to the actual expenditure. The House can rely upon this fact, that every effort will be put forth without impairing the efficiency of the administration, to avoid unnecessary expense, and to meet all expenditures out of revenue. In any event, we start the year with a surplus from the last fiscal year which should be sufficient to meet any expected deficit.

Will Restrict Capital Expenditures

"It is not proposed by the present administration, in view of the fact that there is to be an appeal to the electors, and the further fact that the attention of the ministers will be largely taken up by the election, to embark upon large capital expenditures, as these require careful supervision. It will, however, be necessary for the telephone commission to spend a large sum on the extension of the telephone system, approximately $2,000,000. The administration has statutory authority for this. It will also be necessary to spend more or less money in the further development of good roads. For this also the government has statutory powers. In all probability there will be further expenditure in the development of the hydro-electric system, for which the minister of public works has already taken authority this session.

"Later on in the session when the supplementaries are brought down, a few small items of capital expenditure will be included, but these will not amount to a large sum in the aggregate. Market conditions are not favorable at the present time for borrowing money at advantageous rates, and in view of the special circumstances already referred to, the judgment of the government is that so far as this year is concerned there will be more or less restraint in the expenditure of capital moneys.

"While the total expenditures foreshadowed this year are large, and an increase over those of the last year, the necessity for these additional expenditures can be very readily understood. I submit the estimates to the House believing that they will receive not only the full approval of the legislature, but of the people of the province."

QUEBEC BOARD OF TRADE ANNUAL

The annual meeting of the Quebec Board of Trade was held on March 12th, 1920. J. T. Ross was re-elected president; J. H. Fortier was elected 1st vice-president; J. E. Welch, 2nd vice-president, and W. J. Banks treasurer.

In his annual address the president quoted figures showing the bank clearings for the year 1919 which totalled $291,000,000, as compared with the corresponding twelve months of 1918 of $239,000,000. Building permits totalled, in 1919, $2,134,219 as compared with the total of $904,375 for the year 1918. Mr. Ross stated that a municipal census was taken a few months ago which disclosed the fact that a very material increase in the population of the city of Quebec had been made since 1911. In that year the population was 81,000 and according to the last census was about 108,000, or an increase of over 30 per cent. in the last eight years.

FARMERS' WEALTH HAS INCREASED

Average Land Valuation Increased in 1919—Livestock Values Have Fallen in Comparison With 1919

AVERAGE values for the year 1919 of estimates of (1) the values of farm lands; (2) the wages for farm help; and (3) the value of farm livestock and of wool, are given by the Dominion Bureau of Statistics in a report just published. These estimates have been compiled from the returns of correspondents throughout every province of the Dominion. The average value of farm land for the Dominion, including improved and unimproved land, together with the value of dwellings and other farm buildings, is placed at $52 per acre, as compared with $46 last year, $44 in 1917, $41 in 1916, $40 in 1915, $38 in 1914 and in 1910. This shows an enhancement in value of farm lands of $14, or 36.8 per cent. in five years.

Values by Provinces

By provinces, the value is highest in British Columbia, being $174, as compared with an estimate unit value of $149 per acre in 1917 and 1918. Ontario, with an estimated average value of $66 per acre, and Quebec, with $72 per acre, are above the average for the Dominion. Last year both Ontario and Quebec gave each the average value of farm lands at $57 per acre. In Prince Edward Island the average value of farm lands has risen from $44 per acre, the highest previous value, to $51. Nova Scotia also shows an increase from $36 per acre in 1918 to $41 in 1919. New Brunswick valued its farm land at $19 per acre in 1910, $29 in 1916 and 1917, $35 in 1918, and $32 in 1919. The value of farm lands in Manitoba, while fluctuating between $29 in 1910 and $32 in 1918, rose to $35 per acre in 1919. In Saskatchewan farm lands were valued at $32, as compared with $29 per acre in 1918 and $24 in 1914, and Alberta lands increased in value from $21 per acre in 1914 to $27 in 1917 and $29 in 1919.

The average wages paid for farm help in 1919 show considerable increase as compared with the previous year. For Canada as a whole, the wages per month during summer, for males, inclusive of board, is $78, and for females $43 per month. The value of board, $24 per month for males and $19 for females, is included in the above estimate.

Some Stock Values Lower

The downward trend of the value of horses from the high mark of 1917 is again in evidence in the figures of 1919; the value of milch cows continues to advance, while the value of other horned cattle, sheep and swine is either stationary or slightly lower. The continued upward trend of the value of milk products is reflected in the average price of milch cows, which is placed at $92 per head in 1919, as compared with $87 in 1918, $62 in 1915 and $42 in 1910. The average value of other cattle under one year was $25, as compared with a similar figure in 1918, while those of three years old and over, dropped in value from $88 per head in 1918 to $83 per head in 1919. Sheep averaged $15, as against $16 in 1918. Swine are valued at $26, as against $25 in 1918. Wool shows a drop of from 62 to 55 cents per pound unwashed, and from 80 to 70 cents for washed.

Correspondents were required to report from the best possible information available the average value per head of each kind of farm animal in their district, and the averages thus obtained have been compiled and employed in the calculations of total values according to the number of farm animals as returned in June, 1919.

The total value of farm livestock in Canada is therefore estimated at $1,296,602,000, as against $1,326,766,000 in 1918, and $1,102,261,000 in 1917. The total number of animals reported on farms in June last was: Horses, 3,667,369; milch cows, 3,548,437; other cattle, 6,536,574; sheep, 3,421,958; and swine, 4,040,070.

The Sterling Bank has announced a profit-sharing plan for all bonded employees, by which regular dividends based on the employees' earnings will be given.

ASSESSMENT INSURANCE ADOPTED IN MANITOBA

Government Decides to Take Business Out of Hands of Companies—Taxation Will be Increased—Number of Incorporations Large

(Special to *The Monetary Times.*)

Winnipeg, March 17, 1920.

ASSESSMENT insurance, instead of insurance through companies, is established by the bill amending the Workmen's Compensation Act given second reading in the legislature of Manitoba this week. The amount is increased from 55 to 66⅔ per cent. of the wages paid in case of the person injured; the compensation of the widow is increased from $20 to $30 per month and for each child of from $5 to $7.50 per month. The Act, which will go into effect on January, 1921, also provides that the compensation will run from three days after disability and not six as under the present law.

Taxes Will be Heavier

Hon. Edward Brown, provincial treasurer, announced to the law amendments committee of the legislature this week that amendments would be introduced to the Manitoba Patriotic Levy Act and Supplementary Revenue Act. The one-half mill formerly raised for patriotic purposes will not be levied this year but amendments to the Supplementary Revenue Act will increase the levy under this measure from one and one-half mills to two mills, thereby raising the same sum of money. Patriotic, charitable and educational institutions will still remain exempt from taxation, said Mr. Brown.

The amendments to the Housing Act, which are to be introduced at the present session will provide for an expenditure of $1,000,000. It is expected that this amount will be largely expended in the suburban areas of Winnipeg and will tend to relieve the present housing situation in the city. Mr. Brown stated that the government did not expect that the city would do much more under the housing scheme than was done last year.

New Companies in British Columbia

A most optimistic feeling prevails at present in British Columbia. From reliable information *The Monetary Times* learns that, during the month of January of the present year, eighty-eight new concerns were incorporated for business in that province, that number constituted a record for the whole period since the office of registrar of joint stock companies was established. Last month, however, ninety-seven new ventures obtained certificates of incorporation. Thus a fresh record has been established. These are encouraging signs of the times and should demonstrate to the rest of the country and countries further afield, that there is a brand of optimism in British Columbia that is willing to take time by the forelock and assist this section of the Dominion along the road to greater commercial importance. Coupled with the type of progressive legislation already on the statute books of the province, this tangible evidence of belief in British Columbia's future should convince the outside investor, whose money is needed for the development of untapped and untold natural resources, that where there is domestic confidence there his own should be also.

The Glens Falls Insurance Company, of which Messrs. Hearne and Van Norman are general agents for Toronto, is now issuing what are known as truck, transit or cargo insurance policies. The policy is issued on a floater form and covers trucks wherever they may be located in Canada or the United States against damage by fire, no matter from what cause it may arise; against collision, overturning of vehicle and also while on ferries; against risk of fire standing, sinking or collision with another vessel. Many cartage companies have found it a decided help in securing business to carry policies of this kind as clients appreciate the importance of this measure of protection.

PURCHASING AGENTS' ASSOCIATION ANNUAL

The annual meeting of the Canadian Purchasing Agents' Association was held in Ottawa, March 16th, with about seventy present. Sir Henry Drayton, who pointed out that the difficulties of exchange could be solved by buying goods made in Canada, was the chief speaker, and addresses were also given by D. B. Dowling, of the Geological Survey, on "Coal," and by Gordon C. Edwards, of the W. C. Edwards Co., Ottawa, on "Lumber."

TO RESTORE MORTGAGEE'S SECURITY

An amendment to the Alberta statutes has been prepared to restore, to some extent, the protection afforded a mortgagee by the personal covenant. This amendment reads as follows:—

"(a) Unless otherwise ordered by the court or a judge, the judgment or order of the court in any action brought upon a mortgage of land shall provide that the amount adjudged or ordered paid by the defendant shall be realized in the first instance *pro tanto* by a sale of the land mortgaged, provided that the court or judge may for good cause shown, notwithstanding such judgment or order, permit the plaintiff, by order to realize the amount of his claim out of any other property of the defendant, and the court may in any event make an order of injunction or order for the appointment of a receiver in the action for the purpose of preventing the disposal by the defendant, or by any person to whom the defendant has transferred his property under circumstances that he has done so with intent to defeat, hinder, delay, prejudice or defraud his creditors or any of them of any or all of his property pending the result of realization of the property mortgaged, and may vary, amend or concel such order or orders from time to time as may seem just, or may order foreclosure instead of sale in proper case.

"(b) The plaintiff in any action heretofore taken on a mortgage of land may apply to the court or a judge for any order that might be obtained by a plaintiff in any way such action hereafter taken.

"(c) The plaintiff in any action heretofore or hereafter taken on a mortgage of land may obtain and register in a land titles office a certificate of the judgment in the action and the registration thereof shall have the same force and effect as to binding the lands of the defendant as the receipt by registrar of a copy of a writ of execution issued on such judgment:

"Provided, however, that the defendant may apply to the court or judge for an order releasing the said lands or any portion thereof, other than the mortgaged lands, from the effect of the said certificate and the court or judge may make such order upon such terms as shall be just."

FARMERS' FIRE AND HAIL INSURANCE

According to the financial report of the Farmers' Fire and Hail Insurance Co., submitted to the shareholders at the annual meeting in Calgary on March 4th, the premium income of the company for the year 1919 increased 60 per cent over that of 1918. The assets of the company showed a marked increase. It was decided to increase the number of the directors from five to seven. C. E. Prosser and M. P Johnston, the retiring directors, were re-elected, and John C Bass, of Lethbridge, and Edward H. Tracht, of Innisfail were the additions to the directorate. The officers elected for the year are as follows: A. J. H. Donahoe, president; M. L. Mundy, vice-president; A. N. Kessler, secretary; A. R. Allan, treasurer; M. P. Johnston, managing director; C. E. Prosser, field superintendent.

New business of the Sun Life Assurance Company up to March 15th shows an increase of over seven million dollars, compared with the same period in 1919.

REPORT OF THE 27th ANNUAL MEETING

OF THE

Winnipeg Electric Railway Company

Held March 10th, 1920

The twenty-seventh annual meeting of the Winnipeg Electric Railway Company was held on March 10th. 1920, at the hour of three o'clock in the afternoon, in the office of the Company, in the City of Winnipeg.

Among the shareholders present were Messrs. William Whyte, William Harvey, vice-president and managing director of the Standard Trusts Company, representing the estate of the late Sir William Whyte; H. Howat, G. V. Hastings, Hugh Osler, F. Morton Morse, and A. W. McLimont.

In the absence of the President, Sir Augustus Nanton, the Vice-President, A. W. McLimont, presided, and F. Morton Morse acted as secretary.

The report of the President and Directors and the financial statements for the year ending December 31st, 1919, were presented to the meeting and adopted.

The following Directors were re-elected for the ensuing year and until their successors are appointed: Sir Augustus Nanton, A. W. McLimont, F. Morton Morse, G. V. Hastings, Hugh Sutherland, J. D. McArthur, G. W. Allan, W. J. Bulman and W. R. Bawlf.

Messrs. Marwick, Mitchell and Co. were again appointed Auditors.

After the President's report and the financial statements were considered and adopted, Mr. William Harvey took occasion to compliment the management and the Directors upon the satisfactory showing made during the past year, when the obstacles and difficulties which the Company had to encounter were considered.

Mr. William Whyte corroborated what Mr. Harvey said, and pointed out that the management had the confidence and support of the shareholders, and that under the circumstances the showing made by the Company was gratifying.

The following are the officers of the Company for the ensuing year: Sir Augustus Nanton, President; A. W. McLimont, Vice-President and General Manager; F. Morton Morse, Secretary; J. S. Mackenzie, Treasurer, and L. Palk, Assistant Secretary.

Report of the President and Directors

For the Year Ended December 31st, 1919.

To the Shareholders:

Your Directors beg to submit a statement of the operations for the year ended the 31st December, 1919, as follows:

Gross Earnings from Operations	$4,284,479.11
Operating Expenses, before charging Depreciation	3,019,495.11
Net Operating Revenue	$1,264,984.00
Miscellaneous Income	58,639.40
Income available to meet fixed charges, etc.	$1,323,623.40

From which the following deductions are made:—

Interest Charges on Debenture Stock, Bonds, Gold, Notes, etc.	$696,489.94	
Extinguishment of Discount on Securities	37,672.04	
City Percentage and Car License Taxes	146,395.16	
Taxes	126,760.89	
Miscellaneous Non-Operating Expenses	2,018.05	
Other Income Deductions	16,432.21	
		1,025,768.29
Net Income as shown on Accounts submitted herewith, excluding depreciation		297,855.11

The Gross Earnings for the Year 1919 show an increase of $695,756.02 over the previous year. Notwithstanding the heavy increase in wages and other operating expenses, the net revenue shows an increase for the year of $8,071.03

During the year 1919 many of the difficulties still prevailed that were encountered in 1918. The effect upon travel of the influenza epidemic continued well into the first months of 1919, but the most serious effect upon its revenue which your Company had to contend with was the strike of its employees, who went out in sympathy with other Trade Unions in the general suspension of all industries that took place in Winnipeg for forty-two days during May and June, during which time your railway department was unable to operate, and the Gas and Electric Light and Power Departments were also severely affected. Your Motormen and Conductors, Shopmen, Trackmen, Electricians and allied crafts were granted a Board of Conciliation, which awarded to them very large increases in wage, dating in some instances from May 1st, and in other instances from June 26th. Increased wages thus awarded, together with higher wages paid in all departments and increased cost of material made a very large addition to operating costs.

On the other hand, your Directors are glad to be able to report that, effective October 9th, 1919, an interim order was secured from the Public Utilities Commission, permitting the Company to charge an increased fare, which resulted in sufficent additional revenue being obtained to largely compensate for the heavy uncontrollable increase in operation.

An appraisal of the physical properties of your Company is now under way in connection with the Company's application for increased fares now pending before the Commission, and when completed the appraisal will be made the basis for fixing a rate which will provide a reasonable return upon capital invested, over and above operating costs and fixed charges.

With the return of Peace, business is rapidly assuming its normal activity, and provision is being made by the Management to take advantages of the increased business which is looked forward to.

Respectfully submitted.
(Sgd.) A. M. Nanton,
President.

LAND MORTGAGE COMPANIES OF ONTARIO

Assets of Twenty-three Companies Have Increased Eight Millions—C. W. Cartwright President for 1920

THE annual meeting of the Land Mortgage Companies' Association of Ontario was held in Toronto on March 11th, and was attended by representatives from the leading loan companies of the province. The report of the executive committee showed a substantial increase in the aggregate assets of the twenty-three companies composing this association to $131,678,484. In view of the fact that the loan companies have been under many disadvantages during the period of the war, this increase of about $8,000,000 in the assets for the first year of peace augurs very well for their continued prosperity.

Loan Companies' Record Good

The committee also reported on its work during the year in connection with loan company legislation. Edward Saunders, the vice-president, referred to the substantial position which the mortgage companies occupy in the financial world, and the incalculable advantage to both the investing and borrowing public in having these companies, with their business and management conducted so soundly that no other class of institution could boast of such a large percentage of solvency as Canadian loan corporations.

Officers and Executive

Mr. Saunders, who has ably filled the position of vice-president of the association, asked to be allowed to retire, but at the request of the members he consented to remain on the executive committee. The officers and executive elected were: R. S. Hudson, Toronto, honorary president; C W. Cartwright, Hamilton, president; George H. Smith, Toronto, first vice-president; Walter Gillespie, Toronto, second vice-president; T. D'Arcy Leonard, Toronto, secretary-treasurer. Messrs. V. B. Wadsworth, A. B. Fisher and Edward Saunders, Toronto; H. W. Stewart, St. Thomas; A. M. Smart and Hume Cronyn, London; E. F. Dwyer, St. Catharines; J. E. McElderry, Guelph, and J. H. Kittermaster, Sarnia.

INSURANCE CONVENTION IN BRITISH COLUMBIA

Plans are being made for an insurance convention in British Columbia early in the summer, under the direction of the Insurance Federation of British Columbia. The committee in charge includes the following Vancouver men: J. J. Banfield, general agent Norwich Union Assurance; H. B Leuty, insurance manager Richards, Akroyd and Gall; A. W. Ross, manager Commercial Union Assurance; W. W. Johnston, general agent Union Assurance, and W. A. Wand, general agent Great American Fire.

NORTH AMERICAN ACCIDENT INSURANCE

Gross premium income of $523,626 was reported by the North American Accident Insurance Company, in its statement presented at the annual meeting held in Montreal on February 27. Cancellations, $73,997, and re-insurance premiums, $11,709, reduced this to $437,918, and when $17,327 of interest and dividends was added a total net income of $455,245 was reached. After meeting claims paid and outstanding, $276,264; commissions, $93,181, and expenses, $59,145, the sum of $12,236 was added to reserve for unearned premiums, and the balance, $14,416, transferred to profit and loss. This makes a total of $93,680 in the latter account.

Assets total $446,906, of which investments comprise $303,210. Capital stock is $91,133, reserve $22,783, and balance in profit and loss $93,680. The reserve for unearned premiums is $100,363, and reserve for unearned and unreported and outstanding claims $130.996.

UPWARD MOVEMENT OF WHOLESALE PRICES CONTINUES

Principal Increases for January Were in Grains and Fodders, Textiles, Metals, Building Materials and Miscellaneous Foods—Dairy Products Showed Declines

ACCORDING to the figures of the Department of Labour for January, 1920, the movement continued upward in the wholesale prices of many commodities. The index number rose to 338.4 as compared with 322.7 for December, 1919, 286.5 for January, 1919, and 136.5 for January, 1914. The chief increases appeared in grains and fodders, animals and meats, fruits and vegetables, miscellaneous foods, textiles, metals, building materials and raw furs. In dairy products, eggs, butter and cheese declined slightly. The following statement gives the index number of wholesale prices by groups of commodities for January, 1920, with comparisons:

(DEPARTMENT OF LABOUR FIGURES)	No. of Commodities	Index Numbers		
		Jan.† 1920	Dec.† 1919	Jan.† 1919
I. Grains and Fodders:				
Grains, Ontario	6	382.8	354 6	292 4
" Western	4	421.1	383.9	273 1
Fodder	5	308.8	300.5	247 6
All	15	368.4	344.4	272 3
II. Animals and Meats:				
Cattle and beef	6	366.6	337.9	357 0
Hogs and hog products	6	339.2	333.9	355 2
Sheep and mutton	3	277.0	226.6	270.8
Poultry	2	442.2	419.2	378.5
All	17	350 0	326.4	343.7

DOMINION DEBT INCREASES NEARLY $16,000,000

THE total net debt of the Dominion as at February 28, 1920, was $1,915,995,923, as compared with $1,900,146,168 at the end of the previous month, an increase of $15,849,755. At the end of February, 1919, the total net debt was $1,389,759,300.

For the eleven months of the present fiscal year, ordinary revenue amounted to $327,732,303, as compared with $272,756,985 for previous period. Ordinary expenditure totalled $309,661,571, compared with $180,043,856 in 1919.

War expenditure during the eleven months totalled $307,179,000, in comparison with $276,296,000 in 1919. During February, however, war expenditure was scarcely one-fourth of what is was in February, 1919. This apparent movement, it is explained, is due to the presentation of overseas accounts.

The following is the statement of the public debt and the revenue and expenditure of the Dominion up to February 28, 1920, as furnished to *The Monetary Times* by the Department of Finance:—

PUBLIC DEBT	1920		1920
Liabilities	$ cts.		$ cts
Funded Debt—		Assets	
Payable in Canada	2045,715,441 91	Investments—

NEWS OF INDUSTRIAL DEVELOPMENT

New Brunswick Timber Deal Expected Soon—Nova Scotia Steel Secures Option on Newfoundland Ore Deposits—Eaton Co. to Build $1,000,000 Warehouse at Winnipeg

WITH high cost of labor and the continued advance in the prices of materials, uncertainty prevails in building circles, and only work of the most urgent nature is being carried on. Canadian manufacturers are contemplating large construction programs, but unless the situation becomes easier, they will be compelled to postpone their plans.

The Canadian Fairbanks-Morse Co., of Montreal, plans the erection of a branch factory at Windsor, Ont., while the Canada Metal Co., contemplates extensive additions to its plant at Toronto, Ont. Messrs. K. Edelmann and Co., of Chicago, Ill., manufacturers of automobile accesories, are locating in Walkerville, Ont., and it is their intention to investigate Canadian trade conditions, with the object of building a branch factory at a later date.

In the west, the T. Eaton Co. will erect a large new warehouse at a cost of over $1,000,000, at Winnipeg, Man., with a floor space of about 400,000 feet. The Saskatchewan Co-operative Elevator Co., intends building six new elevators in Saskatchewan this year at the cost of $100,000. This will bring the total number of elevators operated by the company to 322, and a total storage capacity in the province of about 9,500,000 bushels of grain.

Extensive improvements are planned to the Hudson's Bay Co.'s stores, and the construction policy of the company is expected to be announced shortly. It is said to involve the new store on Portage avenue, Winnipeg, improvements at Vancouver, Edmonton, Calgary, and possibly as to new stores at Regina and Saskatoon.

New Brunswick Timber Deal Expected

Some action in regard to the development of the Grand Falls on the St. John River in New Brunswick, the biggest water power in eastern Canada, is expected to take place shortly, and is likely to embrace a proposition to include the taking over of the extensive timber lands of the New Brunswick Railway Land Co., Ltd., in which connection it is said that some $5,000,000 will be paid for rights in connection with the timber limits of the company's holdings, which in all amount to 1,647,772 acres, and which are largely in the district of Grand Falls.

The Grand Falls are at present under lease to a syndicate which has been controlled by the International Paper Co. interests and the estate of the late Sir William Van Horne, who have posted $60,000, which must be forfeited unless development to the extent of not less than $100,000 has been carried on in a *bona fide* manner within one year of the return of peace following the war. This period will elapse on January 10th, 1921. It is said that the International Co. is not prepared to go on with the development, and are likely to dispose of their interests

Iron and Steel

The Nova Scotia Steel and Coal Co. has been negotiating for the purchase of property at St. George's Bay, Nfld., which is said to contain valuable ore deposits, and it is understood that an option has been secured. Those mentioned in connection with the deal are Sir Michael Cashin, H. G. Reid, and H. B. Gillis of the Dominion Steel Corporation. The Scotia company will spend $150,000 in proving the property, after which the purchase price will be discussed.

A powerful British company will locate in British Columbia and establish a plant for the turning out of all the products of the iron and steel industry, according to the reports from Vancouver. The company is to be capitalized at five million pounds sterling, and will work in affiliation with an established coal company which has rail and water connections. The native ores of British Columbia will be utilized and the whole industry will be established along broad lines guided by British experience and operated by practical and highly-experienced officials.

CANADIAN PACIFIC OFFICERS MEET

President Reviews Railway Developments of the Year—Variety of Services Rendered by the Company and Its Allied Interests

OVER five hundred employees of the Canadian Pacific Railway assembled in Toronto on March 13th for their fourth annual banquet, some of them coming from as far as Vancouver and California. This was the first time that this function was held outside of Montreal, and the event was featured by the presence of several guests, including the Lieutenant-Governor of Ontario, Hon. Henry Mills, Minister of Mines for Ontario, and Mayor Church, of Toronto. In the absence of Lord Shaughnessy, chairman of the board, the European general manager, Sir George McLaren Brown, presided.

E. W. Beatty, the president, referred to the importance of Toronto as the commercial centre of Ontario, and as an enormous shipper and receiver of goods. Discussing the railway situation, he said:—

Railway's Credit Now Good

"On the occasion of our last banquet the railway situation was somewhat different than it is to-day. It has now advanced another step in what some regard as being the logical consequence of the first step, and we are met with the rather unique situation of the existence of two strong railway systems in Canada, both backed by adequate credit, and both desirous of fulfilling to the best of their ability their share in supplying the transportation requirements of the country.

"Some people have regarded the railway situation as highly controversial, and it was to the extent that the adherents of the two systems of administration, privately owned and publicly owned, have been insistent on the correctness of their respective views, and expressly apprehensive of the results of any other system than that which they advocated. To my mind, to regard it as controversial is now unnecessary and unwise, and the chief consideration of all of us is as to what will be the result to the country as a whole in the matter of railway service, and to ourselves in particular as one of those engaged in supplying a large part of that service.

Usefulness Greater Than Ever Before

"The Canadian Pacific has been built up over a long period of years into an organization of which we may all be conceivably and properly proud, and an organization the usefulness of which in public service is probably now more important than at any other period of its history. It is a company which can only continue to succeed by being administered with strict integrity and in accordance with the highest business ethics. Upon its success in service depends its rewards.

"There has always been competition, and there always will be competition, and the character of business competition does not alter in any of its essential details as the years pass on. Our competitor is, and will be, a very extensive system, which will probably increase in magnitude. We all hope it will be a success, and we do not need to be altruists in order to harbor that hope. I think I can say to you with perfect candor that no man in Canada has more reason to hope for its success than I have, for two reasons: First, because its success as a railway undertaking means a gradual release of the burden on the tax-payer, and the Canadian Pacific is a fairly heavy tax-payer; and secondly, because the factors which contribute to its success will ensure the further and continued success of the Canadian Pacific. If the traffic development of the country is such as to support the national system, it will undoubtedly be sufficient to add to the support of the Canadian Pacific. You will, therefore, appreciate that, on national and selfish grounds, the success of the National Railways is something that every Canadian Pacific official should desire.

Competition Still Exists

"It involves competition, of course—keen competition. Competition which is both keen and honest cannot help but redound to the advantage of the competitors, to the improvement in the character of the service they render, and to the resultant advantage of the people and communities served. Personally, I would have no fear of the competition adversely affecting this company or its interests, and the reason why I think I have a right to that confidence is to be found in the organization itself and the character of the officers and men who comprise it—officers and men who, I think, can be relied on to play the game of transportation competition as it was meant to be played: adroitly, persistently, aggressively and fairly.

"In years gone by it was considered an act of proper aggressiveness for one competitor to decry the methods and wares of his rival. This is not the case to-day. It is foolish to depreciate your competitors, outwardly or otherwise—foolish for two reasons: First, because they probably do not deserve your depreciation of them; and secondly, because it is bad business."

Vast Extent of Company

Mr. Beatty also pointed out that in this competition the Canadian Pacific had the advantage of the company's traditions and of the standards of the men who formerly guided it. Over $830,000,000 in cash has been invested in the railway alone, he said, and many more millions in subsidiary enterprises, making it the largest privately owned and operated transportation agency in the world. The support extended by the government when the road was begun had been just sufficient to keep it going at that time, but some considered that this treatment had been over-generous. So far as he was concerned, he was prepared to leave this question to the judgment of the people.

W. G. Ghester, chairman of the employees' co-operative board, referred to the good feeling which existed between the company and the employees. Col. J. S. Dennis, chief commissioner of colonization and development, described the allied interests of the company, including ocean and inland water transportation, telegraphs, the Dominion Express Co., hotels, mines, lands and colonization.

1870 —— OUR GOLDEN JUBILEE —— 1920
The Mutual's Wonderful Year

"Nineteen-nineteen" will stand out for all time as a conspicuous landmark in the forward march of the Mutual of Canada. In amounts paid to policyholders, in assets, in new assurances written, in assurances in force—splendid increases were recorded. Nineteen-twenty bids fair to eclipse last year for the demand for Mutual policies is insistent. "The reason why" is no mystery. Fifty years of just and generous dealing lie behind the immense demand for Mutual protection. The Mutual has disbursed $29,981,000 to beneficiaries and holds to guarantee future payments $37,689,000—in all $67,668,000—either paid to or held for beneficiaries. All assets including surplus being exclusively the property of our policyholders.

Putting Money in the Bank

regularly is better than Life Insurance if you live.

Yes, if you live, and also if deposited regularly! But how many live long enough to provide for their family after they are gone?

Again, there are not very many who deposit with persistent regularity. Therefore, there is no doubt that Life Insurance is the better and certainly the safer way of accumulation.

Interesting particulars of suitable Policies will be mailed you on request. Write, giving name, address and date of birth to

NEWS OF MUNICIPAL FINANCE

Peterboro' and Kitchener Tax Rates Up—Edmonton Finance Committee Recommends Capital Expenditure of Over $1,000,000—Regina Assessment Increases Over $1,500,000

Owen Sound, Ont.—The town is applying to the legislature to be incorporated as a city.

Kitchener, Ont.—The city council has struck a tax rate of 30½ mills, or 1½ mills higher than last year.

Peterboro', Ont.—The city's tax rate has been fixed at 35 mills, which is four mills higher than last year.

North Vancouver, B.C.—The tax rate for the year has been fixed at 30 mills. This is two points higher than last year.

Fort William, Ont.—Estimates for the year for public school purposes will call for the raising of $202,719, of which $157,533 is for lower schools and $45,185 for collegiate. The estimate will consume 10.123 mills of the city tax rate.

Edmonton, Alta.—Over $1,000,000 of capital expenditure is recommended to the council finance committee by the city commissioners. The big item is the power plant. Approximately $750,000 is allowed for extensions in that department. The proposed provision for city telephone extensions is $351,545, with $131,268 for the waterworks department and $24,800 for the light service.

Victoria, B.C.—City Solicitor Pringle has filed with the council a redraft of the agreement with Saanich regarding the sewer work. The agreement stipulates that Saanich place a by-law before the ratepayers each year until passed, providing for the payment of the $46,225, with interest. The debt was incurred when the city built the north-west sewer line through Saanich.

Swift Current, Sask.—The long-drawn-out arbitration case of Swift Current vs. Leslie *et al* has been brought to a close by judgment being handed down against the city. The award is that the city pays to Leslie *et al* for land $14,700, interest on that amount, $4,226; solicitors' fees, $2,200; witness fees, $400, making a total of $21,526. Interest was only allowed from December 11th, 1914, the time that the award was first made.

Oak Bay, B.C.—The municipality has purchased through Messrs. Gillespie, Hart and Todd, Ltd., bond dealers, $250,000 of province of British Columbia securities, maturing in 1939, at an attractive price. These securities are payable as regards both interest and principal in Canada and the United States, and will eliminate the payment of the premium on the interest of the Oak Bay bonds, the great majority of which are payable in New York.

Burnaby, B.C.—The tax rate for 1920 is fixed at 29 mills on improved property and 48 mills on wild lands, which is an increase of 25 per cent. over last year. The amount to be levied is $432,040, which is an increase of about $48,000 over that of last year. The total expenditures, as estimated by the council, was $468,040, but of this sum $29,000 is to be raised from waterworks revenue and $7,000 from general receipts. Fixed charges make up the largest amount, and total $201,497.

South Vancouver, B.C.—The estimates of the municipality have been reduced to $817,819, according to Commissioner Gillespie. The tax rate will be fixed at 41.40 mills for improved land and 50 mills for wild land. Improvements will be assessed at 45 per cent. of their value. Last year improvements were assessed at 33½ per cent. of their value, while the rate of taxation on improved lands was the same as this year. Property served with water will be taxed an additional 5 cents per front foot, an increase over the 1½ cents frontage tax of last year.

London, Ont.—The city council has adopted a 40-mill tax rate. The new rate represents an increase of 7.5 mills over that of last year, the increase being distributed as follows: Schools, 2.78; hospital, .64; police, .55; board of health, .15; playgrounds, .24; and council, 1.32. The balance is adjustment of accounts, from business of 1918 and 1919. The schools will require 14.63 mills of the total levy. The municipal budget calls for an expenditure of $2,002,662, but sources other than taxation will provide $402,349, leaving $1,660,312 for collection on the 40-mill rate.

Regina, Sask.—According to City Assessor Westgate, assessment for the current year, which is placed at $42,909,750, has increased $1,666,580 over last year. Of this year's amount, $40,100,000 is assessable to public school supporters and $2,809,750 for separate school supporters. The figure does not include property exempt from taxation, which is placed at $15,229,000. Of the total taxable amount, $9,525,920 is assessed on building improvements, being at the rate of 30 per cent. of the actual value of the building, and $5,048,270 business and income tax, leaving a net amount of $28,335,560 as the assessment on land. It is probable that the mill rate this year will be higher than it was last year, viz., 35.5 mills, as this rate would only bring into the city treasury an additional amount of $50,000 on the new assessment.

Winnipeg, Man.—The proposed civic income tax measure, which was rejected by the legislature in 1919, is again opposed by the provincial government. The rates under the proposed measure are:—

(a) On the first $1,000 of taxable income, or any part thereof, 1 per cent.; on the next $1,000 of taxable income, or any part thereof, 1½ per cent.; On the next $1,000 of taxable income, or any part thereof, 2 per cent.; on the next $2,000 of taxable income, or any part thereof, 3 per cent.; On the next $5,000 of taxable income, or any part thereof, 5 per cent.; on any taxable income in excess of $10,000, 8 per cent.

(b) On the taxable incomes of such corporations paying taxes to the province of Manitoba under the Corporations Taxation Act, 5 per cent.

EMPLOYMENT SHOWS SLIGHT FALLING OFF

The Employment Service of the Department of Labor reports that returns for the week ended February 28th, show a decrease in placements as compared with the preceding week. During the week the 95 offices reported that they had referred 6,654 persons to regular positions, and that 5,593 of these were placed. This represents a decrease of 539 placements as compared with the preceding week when 6,132 persons were placed. The decline was not confined to any one province and represents largely "between seasons" curtailment of operations. In addition 1,250 casual jobs were supplied as compared with 1,251 during the week ended February 21st.

During the week 8,787 applicants were registered of whom 658 were women and 8,129 were men. This represents a decrease of 15 in registration when compared with 8,802 applications of the previous week. The number of vacancies notified by employers during the week totalled 7,068 of which 1,182 were for women and 5,886 were for men. When compared with the 7,883 vacancies of the preceding week, a decrease of 315 is shown. The number of applicants unplaced at the end of the week totalled 26,249, while the number of vacancies remaining unfilled was 9,499. This compared with 28,090 unplaced applicants and 10,213 vacancies at the end of the week of February 21st. Of the placements in regular employment 450 were women and 5,143 were men. The number of ex-service men reported as placed was 2,964.

COBALT ORE SHIPMENTS

The following were the shipments of ore in pounds, from Cobalt station, for the week ended March 12th:—

O'Brien Mine, 64,257; La Rose, 87,859; Temiskaming, 72,008; McKinley Darr, 123,840. Total, 347,964. The total since January 1st is 3,118,613 pounds or 1,559.30 tons.

Messrs. Anderson, Robinson and Co., bond brokers, Toronto, have moved their offices from the Bank of Hamilton Building, to the new Canada Trust Building, also.

DEBENTURES FOR SALE

TOWN OF WALKERVILLE, ONT.

Sealed tenders addressed to the undersigned, and marked on the outside, "Tenders for Debentures," will be received up to noon on Friday, March 26th, 1920, for the purchase of the following debentures and accrued interest:—

Government and Municipal Bond Market

Quebec Province Makes Favorable Loan—Windsor Gets Good Price for Its Bonds—Bill to Borrow Nearly $9,000.000 on Pacific Great Eastern Account, Brought Down in British Columbia Legislature

THIS week was featured by the sale of $3,500,000 Quebec province 6 per cent. 5-year bonds to a syndicate headed by the Dominion Securities Corporation and Messrs. Wood, Gundy and Co., at 92.55 New York funds. Based on this price, the money which is needed to meet maturing obligations, is costing the province over 7.80 per cent., which is considered satisfactory in view of present conditions, and taking into consideration that Ontario paid over 8 per cent. for its loan in the United States market previously.

Many offerings of Canadian municipals are now being made, as can be seen from the list below, and the future promises to see many more issues placed on the market. There does not seem to be any notable change in prices, although the opinion is that the situation is improving generally. Of course, the embargo on foreign securities must be taken into consideration, and the artificial support given thereby.

Coming Offerings

The following is a list of offerings, of which mention has been made in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Niagara Falls, Ont.	$ 63,000	5	20-instal.	Mar. 22
Hamilton, Ont.	596,768	5	10 & 20-inst.	Mar. 24
Strasbourg, Sask.	6,000	6½	15-instal.	
Berwick, N.S.	23,000	6	20-years	Mar. 25
Walkerville, Ont.	75,000	5½	20 & 30-inst.	Mar. 26
St. Joseph, Que.	22,000	6	30-instal.	Mar. 30
Assiniboia R.M., Man.	16,500	6	10-years	Mar. 31
Kenora, Ont.	56,322	5½	Various	Apr. 1
Nokomis, Sask.	20,000	7	15-years	Apr. 1
Prince Rupert, B.C.	362,000	6	Various	Apr. 14

Berwick, N.S.—Tenders will be received until March 25, 1920, for the purchase of $23,000 6 per cent. 20-year water and light bonds.

Niagara Falls, Ont.—Tenders will be received until March 22, 1920, for the purchase of $40,000 and $23,000 5 per cent. 20-instalment school debentures.

Prince Rupert, B.C.—Tenders will be received until April 14, 1920, for the purchase of $362,000 6 per cent. serial bonds for various purposes. (See announcement elsewhere in this issue.)

St. Joseph, Que.—The village is offering for sale $22,000 6 per cent. 30-instalment debentures, dated November 30, 1920. Tenders will be received until March 30, 1920. A. L'Heureux, secretary-treasurer.

Walkerville, Ont.—Tenders will be received until March 26, 1920, for the purchase of $75,000 5½ per cent. 20 and 30-instalment debentures for school and hydro-electric purposes. (See announcement elsewhere in this issue.)

Assiniboia R.M., Man.—Tenders will be received until March 31, 1920, for the purchase of 6 per cent. 10-year debentures as follows: $8,000 to cover the cost of building a bridge at Headingly; $8,500 to purchase a fire engine for the municipality. (See announcement elsewhere in this issue.)

Kenora, Ont.—Tenders will be received until April 1, 1920, for the purchase of the following debentures: $10,000 5½ per cent. 15-instalment, electrical; $7,755 5½ per cent. 20-instalment, local improvement; $25,000 5½ per cent. 20-instalment, public improvement; $13,567 5½ per cent., due December 31, 1953, for the purpose of consolidating the debt of the sinking fund.

Debenture Notes

Moose Jaw, Sask.—The $91,200 issue of bonds which was advertised for sale recently has not been disposed of.

Saskatoon, Sask.—The request of the school board to issue short-term debentures for school buildings is now being considered.

Simcoe, Ont.—Ratepayers have approved of the by-law to issue debentures to the amount of $58,000 for the construction of four bridges.

Calgary, Alta.—The building committee of the school board has recommended that debentures be issued to the amount of $240,000 for the purpose of building new schools and improving others.

Dauphin, Man.—A bill is being introduced in the provincial legislature, authorizing the borrowing of $157,000 for construction and improvement of certain highways and roads in the municipality.

Regina, Sask.—The city council has passed another by-law for the issuance of $26,000 debentures. This amount will be added to that already allotted to be sold locally, bringing the total issue up to $117,000.

Manitoba.—Hon. Geo. Grierson, minister of public works, has given notice that during the present session of the legislature, he will bring down a bill to provide $5,000,000 for the construction of good roads throughout the province.

Chatham, Ont.—Out of the $130,000 issue of 5½ per cent. 10-instalment school debentures, which were offered at par locally, only $10,000 remains. As noted in *The Monetary Times* last week, a by-law will be submitted to ratepayers authorizing the borrowing of $371,000 for waterworks purposes. If this passes, debentures for that amount will be sold locally.

Town of Renfrew, Ont.—Two blocks of 6 per cent. bonds —namely, $40,549 20-instalment and $8,205 30-instalment, for which tenders were asked until March 12, were not awarded. The highest bid was from Wood, Gundy and Co., who offered 97.41. R. C. Matthews and Co. bid 94.54 and Dyment, Anderson and Co. bid 96.50 for the 20-year block and 95.88 for the 30-year block.

British Columbia.—Authority to borrow the net sum of $8,800,000 on Pacific Great Eastern account is contained in two bills which have been brought down in the legislature, by Hon. John Hart, minister of finance. The Pacific Great Eatsern Note Payment Loan Act calls for borrowing $4,800,000; the Pacific Great Eastern Construction Loan Act, $4,000,000. The $4,000,000 will be devoted to providing for the completion of construction of the government-owned railway to Prince George and for the purchase of necessary additional equipment. It will be secured by a mortgage upon the entire undertaking and assets of the railway. The $4,800,000 is being borrowed to take up the promissory note of the railway company given following the action of the government under the P.G.E. Settlement Act of last year, in arrangement with the Canadian Bank of Commerce, to advance that sum to the Union Bank of Canada, by which stock of the P.G.E. company of a par value of £1,217,522 was pledged by the former P.G.E. interests for an advance of $4,800,000. The loans will be floated at a rate not exceeding 6 per cent., and will be repayable not later than June 30, 1945. The railway company will be charged a like interest rate by the province.

Bond Sales

Quebec, Que.—The province has disposed of to a syndicate headed by the Dominion Securities Corp. and Wood, Gundy and Co., a $3,500,000 5-year 6 per cent. issue of gold bonds, at a price, in New York funds, of 92.55 and accrued interest. The money is required to meet an issue of the province's bonds, due on April 1 next.

(Continued on page 49)

Three Important Features

to be sought in an investment are security, fair yield and a convenient method of collecting interest. Canadian Government and Municipal Bonds possess these three qualities. The security is of the highest grade, coupons are promptly cashed and the yield ranges from 5.40% to 7%.

Details of our offerings will be mailed upon request.

Nova Scotia Steel and Coal Company, Limited

and Subsidiary Companies

NINETEENTH ANNUAL REPORT

To the Stockholders:—

As had been anticipated, the volume of business in 1919 was smaller than for several years, reaching a total of $6,889,941.90, as compared with $11,525,779.74 in 1918.

COLLIERIES

The temporarily decreased demand for coal which existed at the time of the last annual report, and followed the decreased requirements for steel manufacture and bunker coal at the close of the war, persisted until the autumn when the need for coal in Europe and the influence of the impending strike of coal miners in the United States caused an improved demand at the company's mines and piers and permitted operation to full capacity during the remainder of the year.

The output for the year was 550,965 tons, compared with 502,051 tons in 1918.

UNDERSEA COAL LEASES

Further improvements were made in the deep workings of the Princess Colliery during the year, the main haulage way having been completed to the full extent of the sinking making a complete double track haulage practically from the shaft bottom to the face.

Legislation was enacted at the last session of the Provincial Legislature empowering the Government to make such re-arrangement of the undersea leases as is considered advisable. Pending the investigation and final adjustment of this question, permission was granted to the Company by the Government to mine a block of coal on the north side of the Florence Slope. The Florence levels have therefore been extended through the boundary into this area and it has thereby been made possible to continue this mine in operation.

IRON ORE MINES

During the year the operations at Wabana were directed to the further development and extension of the submarine workings, and to increasing the capacity of the mines for output, with a view to resuming the sale of ore on a large scale as soon as shipping conditions will permit.

Mining operations were carried on throughout the whole year and 213,410 tons of ore were raised, as compared with 76,767 tons in 1918. Iron ore to the extent of 51,460 tons was shipped to North Sydney, the quantity being small because of the cessation of steel production at Sydney Mines during about six months of the year.

IRON AND STEEL MANUFACTURE

Owing to the lessened demand for steel products during the year, the opportunity was taken to reline the blast furnace, rebuild a number of the coke ovens and generally to overhaul and put in first-class condition the steel plant at Sydney Mines. Considerable repairs and renewals were also made at New Glasgow.

The blast furnace and open hearth plants were operated only about five months of the year, and while the rolling mills were totally shut down but for a short time the average monthly production of steel was very much curtailed as will be seen from the figures shown below:

	1917 Tons	1918 Tons	1919 Tons
Coke made	106,617	110,829	45,462
Limestone quarried ..	76,659	77,162	33,410
Dolomite quarried ..	6,573	7,827	2,187
Pig Iron made	86,153	92,174	35,676
Steel Ingots made ...	127,808	129,506	58,238
Steel Ingots cogged..	122,745	125,161	54,645
Steel Billets re-rolled.	122,869	104,753	44,468
Total Shipments of finished steel, forgings, etc., from New Glasgow ..	101,609	93,343	44,051

The demand for steel which was very limited for the first ten months of the year improved just at the close and this improvement has continued until at present the tonnage of unfilled orders on the Company's books is larger than it has been at any time since the signing of the Armistice, and the prices at which orders are being booked should show substantial profits.

SHIPBUILDING

The "Canadian Sealer," one of the two 2,800 ton steamers which the Company had under contract for the Canadian Department of Marine, was completed and delivered just before the end of the year. The second steamer is well advanced and will be ready to launch, probably about the latter part of March. The keel of a third vessel of the same type was laid early in January. The Company has also contracts to build a fourth steamer of the same type for the Canadian Department of Marine, and the hull of a large steel cruising yacht for a private purchaser.

LUMBER PROPERTIES

For some time the question of an adequate supply of lumber for the Car Plant, as well as for the general requirements of the Company, has given some concern. During the year valuable lumber areas in Pictou and Guysborough Counties were secured, and these, together with the Company's former holdings in Nova Scotia and Newfoundland, constitute a large tract of both mature and growing timber which will supply its needs for many years.

COALING PLANT AT HALIFAX

The growth of the shipping trade at Halifax has created a largely increased demand for bunker coal at that Port. The Company was able to secure at a very advantageous price the modern coal discharging and bunkering plant erected there the first of the year by the British Ministry of Shipping. The bunkering business is growing rapidly and for some considerable time will provide a profitable outlet for any additional coal the Company may have to dispose of.

THE EASTERN CAR COMPANY

Eighteen hundred cars were constructed and delivered during the year. These orders were completed early in July and the plant was idle for the remainder of the year with the exception of the operations necessary for the manufacture of some snowplows for the Canadian National Railways.

Orders have just been secured for a substantial number of box and general service cars, which will keep the plant employed for some months.

ACADIA COAL COMPANY

The most important action taken by the Company during the past year was the purchase of the First Preferred Stock of the Acadia Coal Company, Limited. The acquisition of this stock carries with it the control of the Company whose coal holdings have recently proven to be very extensive and valuable.

CAPITAL EXPENDITURE

During the year $830,331.92 was expended on extensions and renewals chargeable to Capital Account, the principal items of which were in connection with the surface plant at Wabana, the purchase and further equipment of the coaling plant at Halifax, the acquisition of lumber properties and in various extensions and additions to the plants of the Company generally.

Your Directors are pleased to report that the demand for the various products of the Company is more active than at any time since the Armistice was signed and the Company is in an excellent position to handle the business offering.

D. H. MacDOUGALL,
President.

AUDITORS' REPORT

We have examined the Books and Accounts of the Nova Scotia Steel and Coal Company, Limited, and Subsidiary Companies for the year ending December 31, 1919, and have obtained all the information and explanations which we required; and we certify that, in our opinion, the above Balance Sheet at December 31, 1919, is properly drawn up so as to exhibit a true and correct view of the state of the Company's affairs, according to the best of our information and the explanations given to us and as shown by the Books of the Company.

PRICE, WATERHOUSE & CO., Auditors

CORPORATION SECURITIES MARKET

No New Industrial Bond Issues Yet in Sight—Another Oil Offering—Riordon Pulp and Paper Co. to Increase Capitalization

CONSIDERABLE activity prevailed on the Canadian stock exchanges in the trading of outstanding industrial bonds, the most prominent issues being Sao Paulo, Quebec Railway, Cedars Rapids, Dominion Coal and Steel of Canada. No new offerings are in sight, however, although with the market improving generally, some developments may be expected shortly.

An offering of $500,000 7 per cent., cumulative preferred shares of the Canadian-American Resources, Ltd., is being made by that company at par (par value $10), with a bonus of 10 per cent. common stock. The company has an authorized capital of $50,000,000, preferred stock being $15,000,000, and common stock $35,000,000. Canadian-American Resources, Ltd., own a 60 per cent., interest in 4,818 acres of land in the Burkburnett Ooil Fields, on the dividing line between Texas and Oklahoma. When production starts, the bonus stock will be withdrawn.

Messrs. J. M. Robinson and Sons, of St. John, N.B., members of the Montreal Stock Exchange, are offering $100,000 8 per cent., preferred stock of Messrs. Clark Bros., Ltd., of St. Stephen, N.B., manufacturers of high-grade ladies' shoes, at par and accrued dividends.

Two Prospective Issues

A wire from our Winnipeg office states that the Magnet Metal and Foundry Co., Ltd., of Winnipeg, is offering to the public at the present time its preferred stock amounting to $50,000. The sale is being made through W. B. Sterling and D. L. Rossini, local bond dealers and others of the Winnipeg stock exchange. The plant is located in Winnipeg. The company is using largely western materials and manufacturing a line of goods for prairie farmers, namely, small agricultural implements and farmers' hardware.

Directors of the Riordon Pulp and Paper Co., Ltd., propose to increase the common capitalization of the company from $4,500,000 to $6,000,000 by the issuance of 15,000 shares of new stock. A special meeting has been called for April 15 next, when shareholders will be given a chance to discuss the matter.

Messrs. Hanson Bros., of Montreal, announce that they will shortly make offering to their clients and the public of an issue of the preferred stock of a new Canadian company formed to take over an already existing plant and to handle the Canadian and export business of the American parent company. The plant in Canada will be enabled to take advantage of the favorable preferential tariffs existing on the company's products. The American parent company is subscribing to a large block of the Canadian company's stock. The new company has a large domestic connections their customers include the majority of large industrial and manufacturing concerns. More definite particulars are expected to be announced shortly.

TRADING DULL ON LOCAL EXCHANGES

Some Stocks Register Declines—New York Market Closes Strong—Two New Listings in Toronto and One in Montreal—To Abolish Unlisted List

STOCKS on the New York market closed strong on March 17, following a week of exciting reports, which had the effect of creating buoyancy. Although it is not definitely stated, it is known that a shipment of gold between $20,000,000 and $30,000,000 is on the way from England via Halifax. The word from Washington that the secretary of the treasury had advised against the imposition of a tax on stock dividends until the beginning of next year, caused an advance in those industrials which were in direct line for stock dividends. Tightness in money at the beginning of the week was only temporary. Call loans which were at 15 per cent., on March 12, dropped as low as 6 per cent., on March 17.

Canadian Exchanges Inactive

Trading on the Canadian exchanges was extremely dull, although some advances were made. In Montreal the most active stocks were Spanish River, Brazilian and National Breweries. Spanish River advanced 1⅞ points over last week, with total sales of 6,440, while Brazilian advanced ⅝ with total sales of 5,582. National Breweries and Atlantic Sugar showed a falling off, the former 2 points, and the latter 1½ points, although the turnover of shares in both stocks was considerably large. Steel of Canada remained unchanged with very little trading, while Dominion Steel registered a decline of nearly 1 point, with total sales of 2,042. The announcement of Riordon's capitalization plan had the effect of causing a break from 184½ at the close of the previous week, to 176.

On the Toronto exchange, what little activity there was, was displayed chiefly by Brazilian with total sales of 1,988, and an advance from 47¾ bid last week, to 48½ bid this week. Atlantic Sugar dropped a point at 90½, while Steel of Canada remained unchanged at 80. Bank stocks were firm, the chief changes being in the Bank of Toronto which advanced four points to 194 bid, and Imperial 2 points to 194 bid. Dominion registered a decline of ¼, while Royal and Standard were also lower. In trust and loan Huron and Erie declined 1 point to 111½ bid, and Toronto Mortgage 2 points to 134 bid. The others remained unchanged.

Two new listings were made on the Toronto Exchange. The Dominion Steel Corp., listed $8,000,000 common stock, bringing the total up to $43,000,000. This block of stock, it is understood, was issued to the British interests who are providing the funds for necessary development purposes. The Barcelona Traction, Light and Power Co. has listed an additional $2,450,000 of stock and £505,000 of first mortgage bonds. This brings the total listings of the company up to $27,450,000 stock and £7,505,000 bonds.

The Montreal Stock Exchange called $1,800,000 common and $3,965,800 of 6 per cent. non-cumulative preference stock of the Canada Iron Foundries, sales being made at 46.

I have audited the accounts of King Edward Hotel Company, Limited, for the twelve months ended December 31st, 1919, and I hereby certify that in my opinion the above Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Corporation's affairs as shown by its books, subject to the remark that no provision has been made for any amount that may be payable as Taxes under the provision of the Income War Tax Act for the calendar year ending December 31st, 1918, and 1919, no assessment having been received from the Department.

My requirements as Auditor have been complied with and I have received all the information and explanations required by me.

CHARLES DOHERTY, General Auditor,
United Hotels Company of America.

Toronto, February 21st, 1920.

GOVERNMENT AND MUNICIPAL BOND MARKET

(Continued from page 42)

Dauphin R.M., Man.—Messrs. Harris, Read and Co., Regina, have purchased the $35,000 6 per cent. 30-year issue of road debentures at 94.38 and accrued interest. Other tenders were:—

Bond and Debenture Corp. of Can., Ltd.	94.38
Brent, Noxon and Co.	92.65
R. C. Matthews and Co.	92.37
Wood, Gundy and Co.	92.31

Windsor, Ont.—Messrs. Wood, Gundy and Co. have purchased a block of $752,345 bonds of the city, at a price which is on a basis of about 6⅜ per cent. The bid was $705,098. The Dominion Securities Corp. bid $695,543 and Messrs. W. A. Mackenzie and Co., $693,738.

The issue is made up as follows: $7,300 5½ per cent school debentures, 30-years; $350,000 5½ per cent. school, 30-years; $10,000 6 per cent. patriotic purposes, 20-years; $235,045.86 5½ per cent. local improvements, 10-years; $150,000 6 per cent. hydro-electric system extensions, 20-years.

Ryan, Grier and Hastings, stock brokers, of Montreal, announce the appointment of Lt.-Col. J. Ewart Osborne and Capt. Newbold C. Jones as resident managers of their Toronto office.

A seat on the Montreal Stock Exchange has been acquired by Henry Geoffrion, who is commencing business as a stock broker. For some time past he has been associated with Aldred and Co.

MONTREAL EXCHANGE UNLISTED SECURITIES

The decision has been arrived at by the committee of the Montreal Stock Exchange to abolish the publication of the sales and prices of stocks listed on the unlisted department of the exchange, and in fact to abolish the old "listed" unlisted department.

It was the custom formerly when the securities of a company desired to go through a probationary period before being listed on the regular exchange to have them listed for a nominal fee on the unlisted department. After a certain period of time if directors did not express a wish to list the securities of their company, on the regular exchange, they were removed from the unlisted department, a case in question being that of the Canada Felt securities some time ago.

To be listed on the unlisted department does not necessitate passing over to the listing committee the financial situation of the company, which must be done before the securities are listed on the regular exchange, so that by remaining on the unlisted department a stock got all the privileges of the listed security, and even more publicity than if it had a stock exchange official sheet all to itself which was distributed to subscribers along with the regular exchange sheet.

The Union Casualty Co. of Winnipeg, have applied for a change of name to the Union Fire and Casualty Co.

Messrs. A. L. Hudson and Co. are taking over the entire business of Messrs. J. P. Bickell and Co., stock brokers, Toronto. The former organization will be retained intact, including full connections with all the big market centres.

Investments and the Market

Canada Iron Foundries Stock Listed on Montreal Exchange—Record Earnings of C.P.R. Offset by High Operating Expenses—Scotia Report Reflects Dullness in Steel Trade in 1919 —Winnipeg Electric Makes Good Showing—Outlook for Riordon Pulp Exceedingly Bright

Collingwood Shipbuilding Co.—At the annual meeting of the company at Collingwood, Ont., on March 5th, 1920, the following were elected to the directorate: H. B. Smith, S. Dyment, J. W. Norcross, R. M. Wolvin, H. W. Cowan, F. S. Izard and J. S. Leitch, the latter succeeding Capt. Alexander McDougall, of Duluth, resigned. At a subsequent meeting H. B. Smith was re-elected president, Messrs. Norcross and Wolvin, vice-presidents, and S. H. Lindsay, secretary-treasurer. John S. Leitch now occupies the position of managing director.

Canada Iron Foundries, Ltd.—The common and preferred shares of the company were called on the Montreal Stock Exchange for the first time on March 17th. The preferred, it is understood, is to be placed on a 4 per cent. dividend basis in the near future, disbursements being made to shareholders at the rate of 2 per cent. semi-annually. Of the authorized preferred issue of $4,500,000, there is outstanding at the present time $3,965,800 par value. The common capitalization authorized is $1,800,000, of which all has been issued. Both stocks were changed from a par value of $10 to $100 in the capital adjustment of the enterprise, effected some time ago.

Winnipeg Electric Railway Co.—The financial statement of the company, which was presented to shareholders at the annual meeting on March 12th last, showed gross earnings of $4,343,118, an increase of $695,756 over the previous year. Operating expenses, fixed charges, depreciation, etc., totalled $4,246,313. There has been a heavy increase in wages and other operating expenses, but notwithstanding this, the net revenue shows an increase of $8,971 over the previous year.

At the annual meeting of the company on March 10th the following directors were re-elected: Sir Augustus Nanton, A. W. McLimont, F. Morton Morse, G. V. Hastings, Hugh Sutherland, J. D. McArthur, G. W. Allan, W. J. Bulman and W. R. Bawlf. The officers are: Sir Augustus Nanton, president; A. W. McLimont, vice-president and general manager; F. Morton Morse, secretary; J. S. Mackenzie, treasurer; L. Palk, assistant secretary.

King Edward Hotel Co.—The report of the company as of December 31st, 1919, covers the full calendar year, and in consequence, includes the first three months of the year covered by the statement at the last meeting. The operations for the year resulted in a net profit of $126,111 after providing for all costs of operation, bond interest, taxes, manager's commission, rates and depreciation.

Two dividends of 5 per cent. each were paid on the common stock in 1919, and a further dividend of 5 per cent. will be paid on April 1st next. During the year 151,004 guests were registered, and a daily average of 319 rooms were occupied. Alterations and improvements in the present buildings have been carried on steadily, resulting in an expenditure of $199,759. The balance sheet shows current assets of $221,751, and current liabilities of $198,522. Reserve for depreciation is $95,015, and total assets are $2,845,143.

Directors are as follows: Frank A. Dudley, F. W. Rockwell, B. M. Johnston, representing the United Hotel Co., and the following from Toronto: J. R. L. Starr, J. H. Spence, George H. O'Neil and C. E. Calvert.

Porto Rico Railways Co., Ltd.—Gross earnings for the year 1919 amounted to $1,129,782, an increase of $93,827, as compared with the preivous year. The net income was $459,543, as compared with $446,629 in 1918.

First mortgage bonds to the amount of $48,000 were purchased and delivered for cancellation, the total so far being redeemed being $452,000. Expenditures on capital account during the year amounting to $174,853 were paid out of earnings. After providing for interest charges and dividends on the preferred stock, the surplus earnings amounted to $195,659. This, with the undistributed profits at the end of 1918, $203,513, made a total of $399,172 for distribution. From this, $100,000 was transferred to reserve for depreciation, $10,000 to income tax reserve, and $289,172 carried forward. The assets of the company now amount to $8,311,413, of which current assets are $261,870, against current liabilities of $114,573.

In his report president D. E. Thomson said: "Operating expense during the year was excessive beyond all former experience. The causes were higher wages, higher prices for materials and supplies, and drought during parts of March and April, and again in November, compelling resort to steam plant operation at a loss of over $30,000."

Holt-Renfrew Co., Ltd.—The annual financial statement of the company, just made public, shows that profits from operations for the year ended January 31st, 1920, after deducting general selling and administrative expenses, amounted to $403,592. From this is deducted $43,912 for depreciation, $7,875 bond interest and $42,832 other interest, leaving a balance of $308,973. From this is deducted approximate profit for the period ending July 1st, 1919, when the present company took over the business, transferred to reserve for contingency and for government taxes accrued up to that date, $100,000, leaving a balance available on the preferred stock of $208,974, out of which was paid $35,000, being dividend on the preferred shares for the half-year ending December 31st, 1919. This left a balance to be carried forward to credit of the 1920 profit and loss account of $173,974.

The balance sheet shows total current assets of $2,109,654 and current liabilities of $938,167, leaving net working capital at the end of the year at $1,071,487.

Canadian Pacific Railway.—The annual statement of the company for 1919, just made public, shows earnings at the rate of 10.80 per cent. on the $200,000,000 outstanding common stock. The report showed the following results: Gross earnings, from railway and lake steamers, $176,929,060; working expenses, $143,996,024. Net earnings from railway and lake steamers, $32,933,036. Deduct fixed charges, $10,161,510. Surplus, $22,771,526. Deduction for pension fund, $500,000. Net revenue, from earnings of railway and lake steamers available for dividends, $22,271,526. After payments of all dividends declared for year, the surplus from earnings of railway and lake steamers is $844,250. Special income for year, after making allowances for contingent reserves, $9,049,342.

Although gross earnings from railway lines and inland steamers were the highest in the history of the company, aggregating $176,929,060, an increase of nearly $20,000,000 over 1918, working expenses increased by almost $21,000,000, or equal to an excess of 17 per cent. After fixed charges and preferred dividend requirements were met, and a contribution of $500,000 made to pension fund, there remained in the general revenue account a balance of $19,044,250. After common dividend disbursements were made, there remained a surplus from the year's operation of railway and inland steamers of $844,250, compared with $2,203,621 in 1918 and $12,420,915 in 1917.

Riordon Pulp and Paper Co.—The annual financial statement of the company for the year ended December 31st, 1919, shows gross earnings of $1,810,126, as compared with $1,443,046 in 1918, an increase of $367,080. After all charges

DIVIDENDS AND NOTICES

EST. 1884

Dividend Notice

NOTICE is hereby given that a quarterly dividend of **Two and One-half Per Cent.** (2½%) for three months ending March 31st, 1920 (being at the rate of **Ten Per Cent. Per Annum**), has been declared upon the Capital Stock of this Institution, and the same will be payable at the offices of the Company, Toronto, on and after Thursday, the 1st day of April, 1920.

The Transfer Books will be closed from the 20th to the 31st of March, both days inclusive.

By order of the Board.
G. A. MORROW
Managing Director.

THE CANADIAN CROCKER-WHEELER CO., LIMITED

DIVIDEND NOTICE

The Directors of The Canadian Crocker-Wheeler Company, Limited, have declared a One and Three-quarter per cent. (1¾%) dividend on the preferred stock of the Company for the three months ending March 31st, 1920, to shareholders of record March 21st, 1920. Also a dividend of One and Three-quarter per cent. (1¾%) on the common stock of the Company for the three months ending March 31st, 1920, to shareholders of record March 21st, 1920.

The stock books will be closed from the 21st to the 31st of March, both days inclusive.

Cheques will be mailed to shareholders on March 31st, 1920.

By Order of the Board.
H. A. BURSON,
Secretary.
St. Catharines, March 8th, 1920. 100

THE MONTREAL CITY AND DISTRICT SAVINGS BANK

Notice is hereby given that a dividend of two dollars and fifty cents per share has been declared on the Capital Stock, called and paid up, of this Bank, and will be payable at its Head Office, in this City, on and after Thursday, April first next, to shareholders of record, Monday, fifteenth March next, at three o'clock p.m.

By Order of the Board.
A. P. LESPERANCE, General Manager.
Montreal, February 23rd, 1920. 99

DOMINION CANNERS, LIMITED

DIVIDEND NOTICE

PREFERRED STOCK

Notice is hereby given that the quarterly Dividend of 1¾ per cent. has been declared on the Preferred Stock of the Company.

The above Dividend is payable on April First next to Shareholders of record at the close of business on March 20th next.

By Order of the Board.
W. R. DRYNAN, Secretary-Treasurer.
Hamilton, March 11th, 1920. 104

CANADIAN CAR AND FOUNDRY COMPANY, LIMITED

Notice is hereby given that a dividend of one and three-quarters per cent. (1¾%) on the Paid-up Preference Stock of the Company, for the quarter ending March 31st, 1920, has been declared payable on the 10th day of April, 1920, to Shareholders of record at the close of business on the 26th day of March, 1920.

By order of the Board.
A. C. BOURNE,
Secretary.
Montreal, February 28th, 1920. 96

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of two per cent. (2%) on the Common Stock of the **Dominion Textile Company, Limited**, has been declared for the quarter ending 31st March, 1920, payable April 1st to shareholders of record March 15th, 1920.

By Order of the Board.
JAS. H. WEBB, Secretary-Treasurer.
Montreal, 23rd February, 1920. 89

---

were met, the balance available for application to the common stock was $851,088, representing earnings on the junior securities at the rate of 18.91 per cent., as compared with $366,563, or 18.14 per cent. in 1918. The higher 1919 showing was made, despite the writing off of $200,000 as a proportion of the discount on general mortgage bonds, which had no counterpart in the 1918 statement.

The regular common dividend disbursements took the usual $450,000, leaving a balance of $401,088 to be added to surplus account, as compared with $366,563 in the previous year, which addition brought total surplus up to the substantial level of $2,591,796, or equal to 63 per cent. of the company's outstanding common capitalization.

The report draws attention to the extensive construction work conducted at the Kipawa plant during the year. Active productive operations at that property were begun in December last only, so that little or no return from the substantial outlay in that investment is contained in the 1919 showing of the parent company. Since the end of last year the Kipawa output has exceeded original expectations, however, and by April 1st next, it is anticipated, the new mills will be producing from 100 to 125 tons of bleached pulp instead of its present lower tonnage of the easy-bleached product.

McKinley-Darragh-Savage Mines.—Net profits of the company increased by nearly $46,000 in 1919, and the surplus more than $84,000. The net value of ore produced last year was $789,879, as against $815,902 in 1918. Cash on hand of $264,481 compares with $234,772 at the end of 1918. Surplus amounts to $365,601, as against $281,196 at the end of 1918.

Right-of-Way Mines, Ltd.—The annual financial statement of the company for the year ended December 31st, 1919, has been submitted to shareholders. The profit and loss account shows a balance at debit, December 31st, 1919, of $12,661, as compared with the balance at credit, December 31st, 1918, of $514. The balance at debit to ore account amounted to $9,616, and other expenses, $1,630. The amount written off on plant, buildings, furniture and equipment totalled $2,254. Current assets total $9,049, and the fixed assets $1,689,474. The current liabilities amount to $16,443.

Nova Scotia Steel and Coal Co.—The annual report of the company for 1919 reflects dullness in the steel trade for the greater part of last year. President D. H. McDougall said:—

"During the depression it was found necessary to accept a considerable amount of business, even below cost, in order to furnish employment and hold the organization together, so that the company's profits for the year were affected, not only by the decreased output, but also by the lower prices obtained for its products. The demand for steel, which was very limited for the first ten months of the year, improved just at the close, and this improvement has continued, until at present the tonnage of unfilled orders on the company's books is larger than it has been at any time since the signing of the armistice, and the prices at which orders are being booked should show substantial profit."

Speaking on the outlook of the iron and coal trade, Mr. McDougall remarked:—

"The demand for coal, which had been decreased from the armistice until last autumn, was so strong as to permit operation to full capacity for the remainder of the year. Further improvements were made in the deep workings of the Princess Colliery. Mining operations were carried on throughout the whole year and 213,410 tons of ore raised, as compared with 76,767 in 1918. Iron ore to the extent of 51,460 tons was shipped to North Sydney, the quantity being small because of the cessation of steel production at Sydney Mines during about six months of the year."

The financial statement shows that combined profits from operations for the year were $2,193,304, as compared with $3,535,525 for the previous year. The volume of business was smaller than for the two previous years, totalling $6,889,941, compared with $11,525,779 in 1918 and $12,539,113 in 1917. Net profits were considerably reduced, standing at $1,029,876 after the deduction of interest on mortgage bonds and debentures, as compared with $1,716,492. The company's liquid position corresponds to its generally changed position, with current assets at $9,063,081, as compared with $11,468,828 in 1918, and current liabilities of $1,391,524, compared with $1,403,750. Cash on hand and in banks totals $1,529,296, a decrease of about $1,000,000. Other interesting comparisons are:—

	1919.	1918.
Surplus forward	$2,726,461	$2,616,584
Interest charges	608,834	612,064
Dividends	920,000	830,000
Depreciation, government taxes, etc.	554,593	1,206,968
Coal output (tons)	550,965	502,051
Shipment of steel, etc. (tons)	44,051	93,343
Coke made (tons)	45,462	110,829
Pig iron made (tons)	35,676	92,174
Steel ingots made (tons)	58,238	129,506
Reserves	$2,729,487	$2,877,722
Inventories	3,547,944	3,158,661

RECENT FIRES

Fewer Fires Reported this Week—Principal Losses at Buckingham, Que., Lacombe, Alta., Port Arthur, Ont., and Winnipeg, Man.

Acton Vale, Que.—March 13—Plant of the Acton Biscuit Co. was badly damaged. One death.

Aurora, Ont.—March 17—Factory occupied by Fleury and Sons, Ltd., agricultural implement manufacturers, was damaged. Cause, spontaneous combustion.

Bridgewater, N.S.—March 9—The Halifax and Southwestern Railway station, with all its contents, was destroyed. Estimated loss, $10,000.

Buckingham, Que.—March 14—St. Joseph's Catholic Church was destroyed. Estimated loss, $150,000, partly covered by insurance.

Hamilton, Ont.—March 15—Charcoal Supply Co., situated at the foot of Victoria Avenue, was damaged. Estimated loss, $3,000.

Lacombe, Alta.—March 6—The Bell Building, Merchants Bank, post-office, telephone office and the Berry Building were damaged. Estimated loss, $25,000, partially covered by insurance.

Millerton, N.B.—March 11—The Vanderbeck mill, run by R. A. Snowball, Chatham, was destroyed. Estimated loss, $15,000, with very little insurance.

Montreal, Que.—March 17—Plant of the Barrett Co., manufacturers of roofing and paving materials, was damaged. Four hundred gallons of oil were burnt.

Port Arthur, Ont.—March 9—Repair shops and storage shed of the Port Arthur Electric Street Railway at the Van Horne Street barns, with four street cars, were destroyed. Cause unknown. Estimated loss, $100,000, fully covered by insurance.

Sturgeon Falls, Ont.—March 13—Tenement house was destroyed. Six deaths.

Selkirk, Man.—March 9—Building of the Star Clothing Store, situated on Eveline Street, was destroyed. Damage was also done to the White Cafe. Estimated loss to the former, $16,500, and to the latter, $1,500.

Sydney, N.S.—March 9—House occupied by Neil McSween, near the city limits, on King's Road, was damaged. Estimated loss, $1,800.

Toronto, Ont.—March 7—Home of Herbert Foster, 8 Moscow Avenue was destroyed. Cause, gasoline explosion. Four deaths. Estimated loss, $1,600.

March 16—Home of John Dickson, situated on Lake Shore Road, was damaged. Estimated loss, $5,000.

Tyron, P.E.I.—March 9—The Reid-Rayner Knitting Mills, with contents, were destroyed. Cause unknown. Estimated loss, about $40,000, with $25,000 insurance.

Winnipeg, Man.—March 12—Three stores, occupied by Gibson Gage, butcher; J. M. McVicar, tailor, and a shoe shine parlor, situated at 522-526 Notre Dame Street, were destroyed. Slight damage was done to the old Knox Church building at corner of Donald Street and Ellice Avenue, also to the Pacific Avenue Building, occupied by the MacDonald-Chapman Co. Estimated loss, $55,000.

Winnipeg, Man.—March 13—Building situated on Ross Avenue, occupied by a number of wholesale fruit companies and other firms, was damaged. Estimated loss, $50,000.

ADDITIONAL INFORMATION CONCERNING FIRES

London, Ont.—March 5—Columbia Handle and Lumber Co., Ltd. was damaged. Estimated loss, $18,164. Insurance carried in the following companies: Law, Union and Rock, $1,000; Western Assurance Co., $1,000; General Fire Insurance Co., $1,000; Protectors' Underwriters, $2,000; Globe Underwriters, $1,500; Atlas Insurance Co., $2,500; Alliance Insurance Co., $2,000; British Empire Co., $1,000; Queens Insurance Co., $1,500; Dominion Insurance Co., $1,000; St. Paul Insurance Co., $1,000; Yorkshire Insurance Co., $2,000. Total, $17,500.

Our Trade and Exchange With United States*

Invisible Factors Swell Our Adverse Balance With That Country—All Important Exchanges Are At a Discount in New York—Some Important Effects on Canadian Trade—The Securities Embargo and Its Effects.

By D. A. CAMERON
Manager, Canadian Bank of Commerce, Toronto

FOREIGN trade as conducted between civilized nations to-day is, after all, only an improved system of barter. Instead of exchanging one or more articles for one or more other articles as was the custom in by-gone days, and is now in some outlying districts, we carry on trade by mediums of exchange, that is, by the use of various credit instruments, the most common of which are bank credits of various kinds and bills of exchange with shipping documents attached, in fact, it may very properly be said, that every foreign trade transaction unless purely barter is represented by a credit instrument in some form. When such documents have been washed—that is, set off against each other—and this to all intents and purposes is done daily,—the balance due to or by a country is determined.

Settlement of Balances

For many years prior to the war these balances were settled by shipments of gold, or sale of securities which simply postponed the debt. As this was done at a comparatively small cost, the question of foreign exchange gave us little or no concern, because the moment the premium on the funds of a creditor nation reached a point where it paid to ship gold—between here and New York the cost was 75c. per $1,000—the gold was exported and the debt cancelled. As a matter of fact, transactions were not always cleared in the direct manner I have just described. Frequently they were settled by a three-cornered transaction or possibly even further extended. For example, Canada might buy cotton from the United States on the one hand, and sell wheat or meat to Great Britain on the other, which latter country might direct the Argentine to cover its debt to Canada, either by the shipment of goods and, or the shipment of gold to New York. Canada would thus be placed in funds with which to extinguish its debt to the United States. The war has changed all this, however. Because of the inflation of the currency of practically all the civilized countries of the world, the shipment of gold was prohibited by their respective governments. The country, therefore, which imported more goods than it exported, created an adverse balance which could not be settled as in the past by the shipment of gold, hence the citizens of such debtor country having obligations to meet in a creditor country, were forced by the competition for funds available in such country, to pay a premium, therefor—the premium being governed by the supply and demand.

This is the situation which at present exists between Canada and the United States—Canada the debtor nation and United States the creditor.

Our Balance With United States

According to the best information obtainable at the moment, we exported last year goods to the value of approximately $300,000,000 more than we imported. Against this, however, we had large payments to meet for interest on our obligations held abroad, and for shipping charges, insurance premiums, etc., all of which payments have the same effect on the exchange situation as the importation of goods.

It is estimated that $1,200,000,000 Canadian securities are held in the United States, the interest charge on which is placed at $65,000,000 and about $2,700,000,000 securities are held in Great Britain, the interest charge on which is approximately $125,000,000—or a total annual interest charge of say $190,000,000. To this large sum must be added our payments for shipping charges and insurance premiums, estimated for the past year at $60,000,000. Another feature not to be lost sight of, is our exports to Europe during the year for which we have not yet been paid. This as closely as I can gather amounted to a further $60,000,000 or a total of say $310,000,000 against the $300,000,000 excess exports—a net debit balance for the year of $10,000,000. To this must be added a further large sum for repatriated securities, if I may use the term. You will, doubtless, have learned through the newspapers or otherwise, of the recent action of the Minister of Finance in requesting bond dealers and brokers to discontinue the importation of Canadian securities from Europe, which in most cases were comfortably domiciled there for years to come, but which on account of the favorable rate of exchange, insofar as Canada is concerned, were being purchased and brought over here in large amounts, with the result that our cash resources, so necessary for the carrying on of the commerce of the country, were being rapidly depleted.

The amount of the securities so purchased and obligations liquidated are estimated roughly at $100,000,000, a considerable proportion of which were afterwards sold in the United States, but insofar as we can learn $25/50,000,000 have been retained in Canada, or went to reduce the debenture indebtedness of certain investment institutions doing business in Canada.

Final Balance Against Us

You will, therefore, see that our real position for the year, insofar as foreign trade is concerned, was an adverse balance of between $30/50,000,000, and this accounts for the present discount on the Canadian dollar in the United States.

I do not claim that the figures which I have just quoted are accurate. While care has been exercised in compiling they are, after all, only estimates, as apparently it is

Dominion Faced With Heavy Expenditure

Estimates for 1920-21 Show Large Deficit, in Spite of Reductions—House Discusses Marine Policy of Government—Some Comparisons With Pre-War Fixed Charges

(Special to *The Monetary Times.*)

Ottawa, March 24, 1920.

THE long-delayed government estimates were laid on the table of the House by Sir Henry Drayton this week. This is the latest for the estimates for years. They have been pared and repared in an effort to have expenditures and revenues balance, but despite all the efforts of the finance minister and drastic retrenchment in many departments, our expenditure will be $166,000,000 over the estimated revenue of $370,000,000. This includes $38,000,000 to clean up demobilization and $58,000,000 on capital expenditure. The consolidated account, which means the ordinary running expenditure for the year alone shows a total of $440,000,000, or a deficit of $70,000,000.

Fixed Charges Very Heavy

It is not a matter of extravagance on the part of the government, so much as general all-round increase in fixed expenditures and in the ordinary running of the civil administration. As an example of what Sir Henry has had to face, the interest charges on the national debt in 1913-14, the year before the war, were $14,000,000. For the coming year they will total $130,000,000. Pensions in the last pre-war year totalled the modest amount of only $312,000. This coming year they are estimated at $27,000,000, and if demands go through for increased pensions this will run up to possibly $35,000,000. The Soldiers' Settlement Board scheme calls for an expenditure of no less than fifty millions and civil re-establishment of soldiers another thirty-four millions. These items account for $241,000,000. Subtracting these it means that the ordinary expenditure would be only some two hundred millions or not a great advance on pre-war expenditure considering increases necessary through increase in salaries, material, etc.

However, the facts are that this year the government will run behind by $70,000,000 on ordinary expenditure, and, capital expenditure included, by $166,000,000. They are not pleasant figures, but will have to be faced. He would be a bold man, too, who would suggest just where Sir Henry could slash expenditures more. Every cabinet minister and deputy minister insists that his particular vote has already been cut so much as to threaten efficiency. There cannot be charged extravagance in public works. The "pork barrel" is very slim. There is an actual decrease in expenditure of this department of over three and a-half million dollars.

Government Marine Attacked

One place where the Opposition, or a section of it, has suggested some reduction, is in the vote for $20,000,000 to finish the mercantile marine program of the government. It was the first item of the estimates touched. This is a policy of which Hon. C. C. Ballantyne, who inaugurated it, is exceedingly proud. The story, as he related it to the House, is that from modest beginnings of two years ago, there has been produced a fleet of twenty-five vessels, with an aggregate of 121,000 tons, and when the program is completed, there will be sixty-three vessels. Six types of vessels are being built ranging from 3,800 tons to 10,800 tons. The cost of construction has varied from time to time, but, roughly speaking, has averaged about $175 per ton, a cost less than that of the American yards. Mr. Ballantyne said that up to December 31, 1919, the gross earnings had been $3,448,036 and the net earnings, $1,406,600. This will provide an interest of 5½ per cent. on the government investment. The Opposition critics claimed that we should follow the example of the United States and withdraw from government operation of a mercantile marine as soon as possible.

Twenty-Five Ships in Operation

The vessels in operation at the present time, with their tonnage and routes, are as follows:—"Voyageur," 4,575, St. John-London; "Pioneer," 8,408, Halifax-South America; "Warrior," 3,995, St. John-West Indies; "Ranger," 8,382, St. John-Liverpool; "Recruit," 3,964 (stranded in St. Lawrence); "Volunteer," 4,485, laid up at Quebec; "Trader," 3,341, Halifax-West Indies; "Sailor," 3,357, Halifax-West Indies; "Trooper," 4,540, Halifax-London; "Seigneur," 8,391, Halifax-Liverpool; "Miller," 8,390, Halifax-Liverpool; "Signaller," 3,990, Halifax-West Indies; "Adventurer," 3,408, Halifax-West Indies; "Gunner," 3,990, Halifax-West Indies; "Aviator," 5,100, Halifax-West Indies; "Sower," 3,400, St. John-West Indies; "Navigator," 4,575, St. John-London; "Settler," 5,100, Halifax-Glasgow; "Spinner," 8,393, Halifax-South America; "Raider," 5,100, Vancouver-Australia, N.Z.; "Importer," 8,390, Vancouver-Australia, N.Z.; "Exporter," 8,390, Vancouver-Australia, N.Z.; "Drummond," 3,000 St. John-West Indies; "Sheba," 3,500, Halifax-West Indies; "Makee," 3,000, St. John-West Indies.

It is understood that Hon. Mr. Tolmie, Minister of Agriculture, has been pressing for cattle boats, and also for those fitted with cold storage for the carrying of our meat exports, in which he has been taking a great interest, and which have shown very great development in the past year; while the Minister of Trade and Commerce and the Minister of Marine are more in favor of general cargo boats. The packing houses in Canada are now said to be filled with beef.

BANK EMPLOYEES ASK SALARY INCREASE

The Bank Employees' Association has drawn up an agreement, which has been submitted to the head office of all Canadian chartered banks. The agreement reads in brief as follows:—

1. A salary increase of 25 per cent. upon all salaries up to $2,000.
2. No employee to be called upon for night duty except on Mondays and Saturdays, and special occasions, such as pay nights.
3. Alternate staffs to be provided when night work is absolutely necessary.
4. Employees unable to leave at lunch hour to be allowed time off at stated periods.
5. Employees to have equal representation in the administration of pension funds where instituted.
6. All employees now in the service of Canadian chartered banks, who are eligible to membership in the association, and shall become and remain members of the Association, and all employees taken in the service of Canadian chartered banks shall, after 30 days from date of entering service if eligible, become and remain in the association during the period, as stated in the agreement.
7. The head office of the bank to meet and treat through its officers, with duly accredited representatives of the Employees Association, on all matters of grievances which may arise from time to time between employers and employees.
8. Officials of the association and also those attending conventions to be granted time off when occasion arises if need can be shown.
9. The following privileges to be retained by the members of the association: Annual vacation with two weeks' holidays; necessary time for recovery in cases of illness with convalescence on full pay; remuneration not in any case to be affected by bonuses given in lieu of overtime.
10. Full right to discuss restrictions of the liberty of the staff, such as are imposed by the banks in general with particular reference to interference with rights of marriage.

DIVIDING THE UNEARNED INCREMENT

A Possible Solution of the Tax Sale Dilemma—Municipality Might Postpone Tax Payments for Share in Increased Value

By Harry Bragg

A MOVEMENT is on foot in Montreal to follow, at least to some extent, the plans adopted in Great Britain a few years ago by collecting from land owners a part of the unearned increment. Around the commercial metropolis, as in other growing cities of the Dominion, many purchasers of building lots have failed to secure the tremendous prices which the real estate salesmen promised them would come their way in a few months. Consequently, there are very many land owners who cannot keep up the payment of the taxes on their vacant lots with anything like comfort. It is generally agreed that it is not only very hard on these owners that the councils should sell their property for accumulated taxes, as the law requires, but this also is a bad thing for the municipality concerned, as being advertised as selling land for taxes is not a very desirable position for any place. Further, such sales are a bad advertisement for the proprietors who do pay their taxes, so that everyone interested is properly averse to such tax sales. And yet, what can a municipality do when taxes are in arrears, except sell the delinquents' property?

Postpone Payment of Taxes

In order to avoid this unfortunate position, and, to do justice to the paying taxpayer, while treating the unfortunate delinquent generously, it is proposed to allow each municipality to make a bargain with the delinquent. Such bargains would generally be in effect the freeing of vacant lots from part, or even the whole of the taxes, for a certain period, or even until the property was sold, on condition that the owner, out of the sale, paid up the arrears of taxes, and also a proportion of the increase in value, or the unearned increment.

For instance, take the case of an owner of a property who has paid, say, $500 for it, and should pay the municipality $10 per annum as taxes. By his agreement, the taxes are not collected for ten years, when he sells the property for $2,000. The municipality first collects the taxes for the ten years—namely, $100, and then takes one-third of the increase in price, which would be be $1,500, less the total taxes, $100. Thus the owner gets a gain of $1,400, less the proportion of the municipality for carrying the property without taxes, or $934; while the municipality gets $466, for helping one of its citizens along.

Rapid Increase in Values

The injustice of the unearned increment is seen to the extreme in this province, where church property and that of educational establishments is free from municipal taxation. And this is made the more unpopular because, in many cases, it is not only the actual property used for religious or educational purposes, but areas adjoining the actual buildings, that are tax free. Then the tremendous increase in the city of late years, both in area and value, has afforded opportunities for these good institutions to sell off their downtown property at enormous increases over the cost, and then to purchase other immense properties with the profits on the original investments. There are several cases of churches which have ceased to be useful, because their congregations have moved away, leaving the old building, in what has become a purely business neighborhood.

These derelict churches, pathetic abandoned buildings, have been sold for fortunes, and the money invested elsewhere, so as to meet again, as far as possible, their congregations. But it was the community that made such tremendous profits possible, and yet, it was also the community that had to pay for all the improvements that had to be undertaken to meet the growing demands of an ever increasing, and more highly civilized population. One extreme case occurred in a neighboring municipality. A certain brotherhood, occupied in education, purchased a farm some years ago, giving $2,000 for it. They built a fair school house, costing, while costs were lower than they are to-day, about $60,000. They worked a large part of the land, and either sold the crops, or used them in the school, thus saving expenditure. Not long ago, the canny brothers sold this property for two million dollars, and with this fat profit, bought elsewhere, doubtless hoping to play the same game again. For all the years they owned the property, they were allowed exemption from taxes, because they ran an educational establishment.

Such cases have aroused public opinion, and while there has been a general protest against the position, a practical means of rectifying it has not been offered. The plan outlined is felt to be a possible solution of the question, and it is being discussed. Already it has been presented informally to one of the leading men in Quebec, and he expressed himself as favorable on general lines. Of course, it will need full discussion, and may have to be modified to meet the several interests involved, but its advocates are sure that if it has proved successful in Great Britain, a similar plan, perhaps modified to suit Canadian conditions, will prove popular here, because it will prove beneficial to all concerned—municipality, taxpayer and tax-procrastinator.

CONSIDER RURAL CREDITS AND MORATORIUM

Manitoba Farmers Anxious to Get Funds for this Year—Legislature May Adjourn this Week

(Special to *The Monetary Times.*)

Ottawa, March 24th, 1920.

THE legislature of the province of Manitoba is likely to adjourn this week, and there is considerable anxiety among the members of the Rural Credits Society as to where money for their needs will come from this year, the deadlock with the banks having become a reality. A farmers' editor, writing on the matter,says: "The break is a serious one for the farmer, and could not have come at a more unfortunate time. There are scores of applications in the hands of the local boards for money to carry on necessary spring work, to purchase seed, implements, etc. Many of these applications have been approved, and the applicants have been notified of the approval, and have confidently counted on this source of credit."

The banks are coming in for a good deal of criticism over this matter, as it is felt that if the farmers do not get necessary money the acreage in Manitoba will be considerably cutrailed. The legislature will undoubtedly bring in legislation authorizing the taking of deposits, and in discussing the matter with prominent Winnipeg citizens, *The Monetary Times* learned that many would be glad to transfer savings deposits to the government and receive greater interest, and have their money used to the advantage of the farmers of the provinces.

It is not expected that any change will be made in the present moratorium legislation. Large lending corporations in the city and many private individuals are interested in possible action which the present legislature might take on the matter of the moratorium. One of the somewhat unjust results of the legislation arises from the fact that there has been no adjustment of the interest rate. Large loans were made some years ago at a low rate, and money is becoming increasingly dear. The legislature, at the time when the law was passed, had no intention of creating a condition of affairs such as exists at the present time. Lending companies and individuals do not, as a rule, demand that the principal should be paid. If an arrangement was effected so that the interest rate was made fair, the loaning companies would probably not object to other features of the existing situation.

Building permits in Winnipeg this week totalled $234,650, and to date this year $679,600 for 169 buildings.

BANK BRANCH NOTES

La Banque Nationale Active in Quebec Province—Royal Bank Acquires New Property in Montreal—Bank of Nova Scotia Will Open in London, Eng.

The following is a list of branches of Canadian banks recently opened:—

Sarnia, Ont.	Bank of Nova Scotia
Montreal, Que. (Bonsecours Market)	La Banque Nationale
Shawinigan Falls, Que. (St.-Marc)	La Banque Nationale
Paincort, Ont.	Canadian Bank of Commerce
The Pas, Man.	Dominion Bank of Canada

Eleven sub-agencies have been opened by La Banque Nationale as follows: North Timiskaming, Que.; St.-Urbain, Charlevois, Que.; Beaumont, Que.; Robertsonville, Que.; Grand-Cascapedia, Que.; St.-Sauveur-des-Montagnes, Que.; St.-Anaclet, Que.; Rivière-Blanche, Matane, Que.; Winslow, Que.; St.-Leon-le-Grand, Que.; Sully, Que.

La Banque Nationale has announced the following changes: Sub-agency at Courclees, Que., has been closed; sub-agency at Princeville, Que., has been turned into a regular branch; and the branch at St. Ferdinand, Que., has been turned into a regular sub-agency.

The Canadian Bank of Commerce has announced the closing of their sub-agency at Tracadie, N.S.

The Union Bank of Canada now has 400 branches. It has more branches in western Canada than any of the other banks, the total number there being 276.

New Premises Acquired

The Bank of Nova Scotia having secured property in London, England, will open an office there shortly. E. C. McLeod, formerly of Winnipeg, has been appointed manager of the new branch. Mr. McLeod is at present in Toronto, but will sail on April 10th for Great Britain to take up his new work.

The Imperial Bank of Canada, Moose Jaw, Sask., has purchased the Battell Building north of the Hammond Building, and will move into their new premises some time this year.

The Royal Bank of Canada has purchased the block on St. James and Notre Dame Streets, but will not take possession of it until May, 1921. The expansion of the bank's business renders the present quarters on the opposite side of St. James Street inadequate to meet present and future demands.

Mr. J. Simon has been appointed manager of the branch of the Canadian Bank of Commerce, Paincort, Ont.

Mr. G. A. G. Geddes, formerly manager of the Bank of Montreal, at Magrath, Alta., has been appointed manager of the same bank at Brandon, Man.

EXCHANGE QUOTATIONS

Messrs. Glazebrooke and Cronyn, exchange and bond brokers, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. funds	9⅛ pm	9¼ pm	....
Mont. funds	Par.	Par.	⅛ to ¼
Sterling—			
Demand	$4.1850	$4.19	....
Cable transfers	4.1950	4.20	....

The New York quotations of exchange on European countries, as furnished by the National City Co., as at March 25, 1920, are as follows: Cable, London, 385, cheque, 384¼; cable, Paris, 14.05, cheque, 14.07; cable, Italy, 19.45, cheque, 19.50; cheque, Belgium, 13.50; cheque, Swiss, 5.83; cheque, Spain, 17.55; cheque, Holland, 36¾; cheque, Denmark, 18.10; cheque, Norway, 18.55; cheque, Sweden, 21.10; cheque, Greece, 11.20; cheque, Finland, 6.45; cheque, Roumania, 165.

RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the first three weeks in March:—

Canadian Pacific Railway

	1920.	1919.	Inc. or dec.
March 7	$3,244,000	$2,469,000	+ $ 775,000
March 14	3,130,000	2,645,000	+ 485,000
March 21	3,283,000	2,832,000	+ 451,000

Grand Trunk Railway

	1920.	1919.	Inc. or dec.
March 7	$1,185,857	$1,224,388	— $ 38,531
March 14	1,248,993	1,159,337	+ 89,656
March 21	1,320,407	1,235,013	+ 85,394

Canadian National Railways

	1920.	1919.	Inc. or dec.
March 7	$1,690,099	$1,369,774	+ $ 320,325
March 14	1,625,485	1,480,946	+ 144,539
March 21	1,577,062	1,487,313	+ 89,749

IMPERIAL OIL FORMS NEW SOCIETY

The Imperial Oil, Ltd., has formed a co-operative investment trust society, and every employee with one year's service, will be allowed to purchase stock in the newly formed company. To become an entrant in the trust the employee, according to the prospectus, may deposit during any period of twelve consecutive months an amount not to exceed 25 per cent. of his annual compensation from the company. The deposits shall be made in equal instalments, payable monthly or semi-monthly on the dates of payment of such compensation or on such other dates as may be fixed by the company's deposits. The company will deposit concurrently to the credit of such employees a sum equal to 50 per cent. of his deposits. It is the intention to invest the proceeds of these joint deposits in stock of the company. All dividends on stock so purchased shall be a portion of the trust, and invested in like manner.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended March 25, 1920, compared with the corresponding week last year:—

	Week ended Mar. 25, '20.	Week ended Mar. 27, '19.		Changes.
Montreal	$121,556,498	$100,572,938	+	$20,983,560
Toronto	96,115,240	68,497,648	+	27,617,592
Winnipeg	42,274,150	28,685,000	+	13,589,150
Vancouver	18,401,955	10,634,746	+	7,767,209
Ottawa	8,170,430	6,277,892	+	1,892,538
Calgary	8,380,117	5,342,012	+	3,038,105
Hamilton	6,630,091	4,948,833	+	1,681,258
Quebec	5,864,998	4,077,274	+	1,787,724
Edmonton	6,184,947	3,203,035	+	2,981,912
Halifax	3,839,681	3,490,685	+	348,996
London	3,423,271	2,250,948	+	1,172,323
Regina	3,994,017	2,709,838	+	1,284,179

INSURANCE FIGURES SHOW LARGE INCREASES

STATEMENTS of fire insurance companies for the year 1919 show, on the whole, a lower loss ratio, and a substantial increase in business, coupled with a wider margin of profit. One of the notable features is that many companies have actually been able to do business on a smaller ratio of expenses, in spite of increased costs for salaries, supplies, etc.

The preliminary figures for the business of fire insurance for the year 1919, which have now been compiled, show the year to have been one of the most profitable of the whole fifty years over which the government records extend. The premiums received amount to approximately $40,000,000, an increase of about $4,000,000 over the amount received in 1918. The losses paid amount to about $16,600,000, compared with $19,300,000 in the preceding year.

The ratio of losses paid to premiums received is 41.7 per cent. The corresponding ratio for 1918 was 53.8 per cent., and the ratio for the last fifty years about 59 per cent. This does not take into account the increase in the statutory reserve, or the outstanding premiums and losses. Taking account of these items, the ratio of losses incurred to premiums earned is approximately 45 per cent.

The loss ratio in the different provinces is, as usual, varied. In the majority of provinces a substantial reduction has been experienced. For Alberta, the approximate 1919 loss ratio is 35 per cent., for British Columbia 29 per cent., for Manitoba 24 per cent., for New Brunswick 52 per cent., for Nova Scotia 51 per cent., for Ontario 41 per cent., for Prince Edward Island 47 per cent., for Quebec 51 per cent., for Saskatchewan 42 per cent. The corresponding ratios for last year were approximately for Alberta 45 per cent., for British Columbia 30 per cent., for Manitoba 62 per cent., for New Brunswick 43 per cent., for Nova Scotia 28 per cent., for Ontario 59 per cent., for Prince Edward Island 21 per cent., for Quebec 53 per cent., for Saskatchewan 49 per cent.

In several branches of casualty insurance an equally favorable experience is shown, the most interesting figures being those for explosion insurance, including riot and civil commotion, for which $514,808 was received as premiums, the losses incurred amounting to $1,152.

The business of hail insurance, on the other hand, has been unprofitable, premiums received amounting to $2,680,958, and losses paid to $1,740,158, the ratio being about 65 per cent.

The amount of life insurance business issued and paid for in Canada during the year, exceeds by far the amount issued in any previous year, the total amount being $519,864,000, compared with $307,280,000 issued in 1918. The total net amount of business in force increased from $1,785,061,000 at the end of 1918 to $2,180,834,000 at the end of 1919. The amount of policies become claims by death during the year was $16,939,000, as compared with $23,904,000 in 1918. Group insurance in force at the end of 1919 amounted to $11,400,000.

There has been a large increase in the number of companies licensed, the total number at the end of 1919 being 230, while the number licensed a year before was 214.

The figures given above are not entirely complete, as a few companies have not yet sent in all their results to the department. These additions will not materially affect the loss ratios, etc., and it is evident that 1919 was not only a phenomenal year in respect of insurance expansion, but also a good one as regards profits. Further details will be available in about one month.

CAPITAL AND PUBLIC OWNERSHIP

PERSISTENT opposition, on the part of capital to public ownership has encouraged the view that investors fear the acquisition by the state of essential industries. This opposition has been due in part to a disinterested anxiety as to the results of government operation on a large scale; and partly to the fact that public opinion has been so hostile towards the corporations that even arbitration does not ensure a fair valuation of property. The popular desire for public ownership, on the other hand, has been stimulated by a too ready use of stock watering, and by profits which in many cases have been too high. It is now evident that there has not been sufficient public control over public utility and industrial corporations which are no longer subject to competition.

Whether essential or "key" industries are operated publicly or privately, is ultimately a matter of indifference to the investor. If they remain in the hands of private corporations, then control will necessarily be such as to limit profits to a fair return upon investment, but that return will have to be assured. Public ownership goes but one stage farther, for here the state assumes direct responsibility, and borrows the money on its own credit. Public credit is ordinarily higher than that of a private body, which means that it can borrow at a lower rate of interest, but on the other hand the risk of loss is reduced to a minimum. In effect, therefore, the acquisition of an industry by the state means that the investor exchanges his private securities for those of the government, bearing a lower rate of interest but involving less risk.

It was recently estimated that over a period of one hundred years the return on capital had averaged just about 5 per cent. Large profits received from investments in successful enterprises are offset by failures out of which neither principal nor interest can be collected. The real price of money, therefore, as determined by the forces of supply and demand over a long period, would appear to be around 5 per cent. per annum. The rate will, of course, vary from time to time, but it will be remembered that this was about the return, before the war, from investments in first-class mortgages and municipal bonds. Interest rates have been going down since the armistice was signed, and the same level may again be reached in the near future. A large sum of money invested in mortgages or in government and municipal bonds would, therefore, yield about the same interest as if it were spread over a wider range of more speculative enterprises, in which large profits in some cases would be counterbalanced by total losses in others.

The function of capital in our economic system is too important to permit of its elmimination being possible. A government such as the Bolshevist régimé in Russia, may, by a wholesale policy of confiscation, rob investors of the fruits of their savings. Similarly, the net return to an individual can be reduced by a personal income tax. But as a factor in production, capital will still be required continuously, and a reward, in the form of a rate of interest, the amount of which will vary in accordance with supply and demand, must be offered to induce saving and investment.

CONSERVATION AND CANADIAN POLICY

IF the question were asked, in what countries of the world will the greatest expansion take place during the next fifty years, most answers would include the United States, the larger British colonies, Russia and the South American republics. Some might omit the United States, thinking that as a result of its unprecedented development, it has reached a condition of comparative maturity. India and China would scarcely be included, for though these countries are still in a backward economic state, their population is so great as to prevent that increase in wealth which is commonly associated with economic progress.

Without questioning the correctness of these views, it is worth while to examine the basis on which they rest. Undoubtedly, it is the possession of natural resources in proportion to population. The war has demonstrated the value of such assets in strenuous times; it has been shown that it is easier to supply the military organization and the financial sinews than to substitute for those gifts which nature alone endows. As has been emphasized by Sir John Willison, president of the Canadian Reconstruction Association, raw materials are the greatest economic asset a nation can have under its control. A high standard of living can be preserved only by maintaining a high ratio of such resources in proportion to population. True, the great advance made during the last century has been due largely to changes in the processes and in the organization of industry. But sooner or later increase in population offsets the benefits thus derived, and forces down the standard of living until it approaches a minimum in the case of unskilled workers; this is not only a theory which stands uncontroverted over a century, but is also borne out by experience.

The country, therefore, which would guard its future, must exercise the greatest care in the utilization of natural resources. Prodigality has too often been mistaken for development. The fact that capital comes to a country for profitable investment is not an unmixed benefit, and may mean that greedy eyes are seeking new fields to conquer after home industry has been "developed" to a standstill. The supply of some resources cannot, of course, be maintained, as in the case of coal, the formation of which is beyond human power. But our forest resources, our fisheries and the fertility of our agricultural areas must be preserved. That such has not been done in the past is indicated by the fact that the older wheat-growing districts of the west must now be used for mixed farming, some of our fisheries have declined greatly in value, and good lumber has increased enormously in price.

The protection of these resources assumes a consideration of the future, too distant to permit of the problem being handled in the ordinary political field. The connection between ordinary government departments and the demands of the public is too close to allow them to handle the problem. It is for this reason that conservation can be best carried on by a body such as the Commission of Conservation in Canada, which was established for the purpose. The work must be pursued more vigorously than ever before, or Canada will only too soon be in the position of the older countries, which must look abroad for an outlet for surplus capital and population.

R. A. Pringle, K.C., as counsel for the newsprint manufacturers, is now searching for some of the weak spots in the regulations put into effect when he was paper controller. At the same time the Board of Commerce, which now controls the industry, must consult him in the capacity of ex-paper controller, to learn how the previous efforts worked out.

* * * * *

About $100,000,000 of the 1919 Victory loan was repurchased this year to support the market for the bonds. Most of this total, however, has been resold since the price was lowered two weeks ago. It was understood that the special committee, which controls the market, was adjusting supply and demand through the medium of price. The public should be better informed as to the use which is being made of money raised to meet essential post-war expenditures.

* * * * *

Depositors in the Farmers' Bank, which failed in 1913, have revived their claims for re-imbursement. The amount involved is $1,200,000, and the number of depositors is about 7,600. In May, 1914, the House of Commons passed a bill to repay the depositors, but it was rejected by the senate and the war prevented further consideration of the question. It is at least essential, however, that the Dominion government should not be regarded as guarantor for any bank's deposits or circulation.

* * * * *

"The national railway system includes, or soon will include, more than half of the railway lines in Canada, and the state, having recognized the propriety of dealing with other social questions, might take into consideration the promotion of public welfare by developing and extending commutation services." This statement is from an editorial in the Toronto *Globe* of March 10. The *Globe* has been a strong advocate of public ownership and non-political administration. The "promotion of public welfare," however, is rather the concern of legislatures than of business corporations, which serve the public equally well by selling their services on a profitable basis.

Australia and New Zealand

Every effort is being put forth to foster and increase trade between Canada and Australasia. The correspondents of this Bank include the principal banks of both Australia and New Zealand, and on the Pacific coast of both Canada and the United States it has branches in all the principal sea-ports. With many years' experience gained in transacting a foreign business, its services are at the disposal of Canadian exporters and importers.

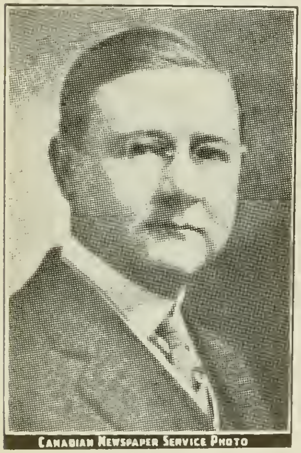
J. P. BELL - - General Manager

PERSONAL NOTES

Mr. J. L. Noble has resigned his position as secretary of the Vancouver Fire Insurance Underwriters, Victoria, B.C., and will hereafter be identified with the Terminal Agencies of Vancouver.

Mr. C. A. Holland, resident manager and director of the British Columbia Land and Investment Agency, Limited, with offices in Victoria, returned last week from a prolonged visit to London, England.

Mr. Roy M. Wolvin was elected president of the Dominion Steel Corporation on March 24th. Mr. Wolvin was born in St. Clair, Michigan, in 1880, and was with the Western Transit Co., Duluth, Minn., from 1896-97. He then became general manager of the Great Lakes and St. Lawrence Transportation Co. and Standard Steamship Co., occupying these positions till 1910. He next became president of the Standard Shipping Co., of Winnipeg, the Duluth Shipping Co., and the Central Shipping Co., of Chicago. He later became president of the Montreal Transportation Co., Ltd., Montreal; vice-president and managing director, Halifax Shipyards, Ltd.; vice-president, Collingwood Shipping Co., Ltd.; president, Reid Towing and Wrecking Co., Ltd., Sarnia, Ont., as well as occupying many other responsible positions. He has been intimately associated with transportation work, and worked in close contact with Mr. J. W. Norcross, of the Canada Steamship Lines. He was appointed a director of the Dominion Steel last year.



Mr. A. W. Burgess for many years insurance manager for Waghorn, Gwynn and Company, Vancouver, has severed his connection with that institution, to become provincial manager for British Columbia, of the Caledonian Insurance Company.

Mr. William Phillips, has been appointed European manager for Canadian National Railways and Canadian Government Merchant Marine, Limited, with headquarters in London, England. Mr. Phillips is a Canadian, and has had a wide experience in both rail and ocean branches of transportation service, in Europe and America. Previous to the appointment, Mr. Phillips was executive agent in Canada for the Cunard Line.

Mr. J. H. Baird, who for the past five years has been connected with the Winnipeg office of the Aetna Life Insurance Company as salesman, has in recognition of his work in that capacity, been made manager for the company at Seattle, Washington. In our issue of March 12th, it was stated that Mr. Baird was manager of the Winnipeg office. That was incorrect, as that office has been for several years and is now under the direction of Mr. D. J. Jonhston.

OBITUARY

Mr. Wm. H. Frost, president of the Smith's Falls Malleable Castings Company, Limited, Smith's Falls, Ont., died March 18th. He was seventy-three years old, and was the oldest malleable casting manufacturer in Ontario.

TRAINING OF BANK MANAGERS*

Frequently Get no Insight Into Duties Until Placed in Charge—Tendency in Other Lines is to Train Beforehand

By A. B. Barker

In the large mercantile corporations particular care is taken to train the representatives and salesmen handling their products. This training consists of a regular course in salesmanship, with practical illustrations, supplemented each year, when the annual convention of representatives is held, by descriptions and examples of selling tactics. In addition to this there is usually an official, whose duty it is to make periodical trips through the territories covered by various agents, to assist the local men in planning campaigns and deciding on the best methods of interesting prospective purchasers.

One bank in the United States recently adopted this method in making clear to its staff the principles on which banking credit is based. In the course of the illustration, customers statements were analyzed by the bank's credit man, and the reasons for his recommendations or refusals were given in detail.

Accountant's Experience is Limited

Under our Canadian system some such scheme of education should prove of great value both to the staff, particularly to those in line for managership, and to the institution; to the former on account of the increased confidence the knowledge would give, to the latter, from the lowered chances of loss by errors in judgment of its officers. In the ordinary system of promotion the managers are drawn from the ranks of the accountants and, when a vacancy occurs, the list of accountants and the files of managers and inspectors' reports are consulted, and the appointment based on this

(Continued on page 49)

R. L. Nicolson,
Manager for Alberta, Union Casualty Co.

LETTER TO THE EDITOR

CITY MANAGEMENT AND CITY FINANCE

Sir,—Permit me to reply to an article that appeared in your paper recently from the pen of a Mr. Angus Lyell, in which he criticized commission forms of city government generally, and especially denounced the council-commission form as we have it here in Calgary.

Mr. Lyell says, that "considering the state of Calgary's finances it is reasonably certain that the question of appointing a city manager will come up at an early date." In the first place, I wish to deny that Calgary's financial condition is bad as compared with other cities, and in substantiation, I quote the three Canadian bond houses who jointly bought a block of Calgary's bonds not long ago. They stated in their prospectus when placing these bonds on the market, that "Calgary is in excellent financial condition. She owns and operates her public utilities representing a value, which, when deducted from her total obligations, leaves the city a net debt of only seven million dollars." The wording may not be exact, but that was the substance of their very flattering statement. I would ask Mr. Lyell to name another city of our size on this continent, of which the above can be truthfully said.

Debt Burden is Widespread

But, if Mr. Lyell is so concerned about Calgary's debt, what must be his distress at the terrible burdens of debt that are weighing down so heavily on nearly all of the cities of America, absolutely regardless of what their forms of government are? And should this not suggest to his mind that there is something far more fundamental that needs changing than merely their forms of government? Has it ever occurred to him that they will have to change their system of taxation if they are to get rid of the real cause of their debts. All of our cities are burdened with enormous interest charges on excessive investments in public utilities and public works, scattered over areas three and four and in some cases ten times larger than the population warrants. Added to these interest charges are the annual expenses of operating over these large areas and what is it all for? Simply to put value into thousands and thousands of privately owned city lots—mostly vacant.

The city of Los Angeles owns its water works, but a writer from there says that "the users of water don't get much benefit, because the city charges twice what the water is worth, and the profit is used to extend the system out past the vacant land to enrich the ground-hogs out there."

Discrimination Against Industrialism

One family (Marshall Field's), owns over 43 million dollars worth of the land of Chicago, and hundreds of millions of dollars worth of other lands are privately owned in that city and none of the owners are paying anything like their fair share of the city's taxes, the deficiency being made up year after year by taxing the homes of the people and imposing business taxes upon the industrious people of the city, and collecting licenses from the little news-boys and boot-blacks.

In New York, 88 per cent. of the people live in rented houses on which they are paying exorbitant taxes (through their rents), while scores of millionaires are dodging the taxes on their enormous land holdings in that city. Then look at the exemptions from taxation in our Canadian cities. In Vancouver 77 million dollars worth of property is exempt from taxation, Winnipeg 44 millions, Toronto 66 millions and Montreal 215 millions, and right here in Calgary, some years ago before our present form of government got working properly, an infant industry known as the C.P.R. Hotel was started and actually got a "fixed" taxation. The city has already lost $144,950 by that brilliant arrangement, and, barring monkey-wrenches, the deal holds good for all time to come. Arnold Bennett has said that this world is the lunatic asylum for the solar system, and the foregoing would seem to indicate that our cities are trying to qualify as the padded cells.

Manager Not Close to People

Mr. Lyell rings the changes about city government being "simply a matter of business," but does he know that all of this shouldering of taxes off onto the other fellow, by the gentle art of fixed assessments and total exemptions has been done at the behest of big business—at all events business big enough to do the shouldering? Does he think that city managers "appointed" by big business to sit behind closed doors, far removed from the vulgar crowd that pays their salaries and finances their tax restricting and exempting business policies is going to rid our cities of their debts? Contrast this autocracy with Calgary's democratically elected open-and-above-board council-commission form of government, taking its orders directly from the people. And in view of what has happened, isn't it about time the people took a hand in the game?

Our present foolish, dishonest system of taxation has been fastened upon our cities by the actions of unsophisticated incompetents who don't know any better, ably seconded by the designing beneficiaries who do. Mr. Lyell speaks of inefficiency and dishonesty. These are the two greatest evils in city government or in any other government, but both can be killed dead by publicity, as thieves and incompetents simply cannot stand the light of day. That is why there is absolutely no comparison between Calgary's system of government and the autocratic frame-up advocated by Mr. Lyell. Here the heads of the departments, as the technical experts, make recommendations pertaining to their departments at the regular public meetings of the commissioners, where they are carefully considered and if found to be in line with the city's general policy are passed on to the council, and again subjected to discussion and criticism in the presence of the press and the public, and passed, modified or annulled as thought best. Contrast this with Mr. Lyell's city manager playing the role of city doctor, solicitor, auditor, engineer and all around miracle man, passing out judgments without full discussion and playing a lone hand generally, The results are bound to be inefficient even if the manager is honest, and disastrous if he is not.

The suggestion of changing from one form of government to another is like putting court-plasters on boils, when the patient really needs a monstrous cathartic of "fair and equal taxation" that will clean out the system and purify the blood.

I am surprised that Mr. Lyell is a teacher in Israel, who writes to the newspapers about municipal problems, and knowest not these things.

A. J. SAMIS,
City Commissioner, Calgary, Alberta.

ALBERTA TO SPEND NEARLY TWENTY MILLIONS

The government of Alberta proposes to spend $10,555,507 in the ordinary public affairs of the province, but, as Hon. C. R. Mitchell, provincial treasurer, pointed out, will still keep safely within the realms of revenue, the estimated income surplus for 1920 being placed at $277,095. The government also proposes to spend another $9,334,486 from capital account, making a grand total of $19,889,999 in the way of expenditure for the administration of the laws and for the building of new institutions and carrying on of improvements in the various branches of public service.

The Western Canada Finance Co., Ltd., has opened offices in the McCallum and Hill Building, Regina, Sask., in charge of Robert S. Salmond, formerly of the Canadian Oil Co., Regina.

The North American Life Assurance Co. has created a new district for Northern Saskatchewan, with R. J. Thibaudeau, inspector-in-charge, who will make his headquarters at Prince Albert.

OUR TRADE AND EXCHANGE WITH UNITED STATES

(Continued from page 5)

not possible to obtain accurate figures. Of one thing we may feel quite certain, however, our imports including our payments for interest, freight and insurance charges, repurchase of securities, etc., exceeded our exports both visible and invisible, because the discount on the Canadian dollar is a sure indication of such fact, just as accurate as the thermometer in indicating the temperature. The situation is not at all dissimilar to a customer conducting an account with his bank. If he has a credit balance, the books of the bank will show it, if he has overdrawn his account that condition will be exhibited in the books. A creditor nation will have balances at its credit in foreign countries on which it can draw. A debtor nation will have an overdrawn account, or will have outstanding obligations to meet, without the necessary funds at credit to enable it to do so.

With the exception of Holland, Switzerland and Spain, all of which countries made large profits out of the war, the Canadian dollar is, and for some time past, has been at a premium in all the countries of Europe, largely for the reason that their adverse balances are greater than ours.

Rates in European Countries

The following quotations taken from the board yesterday will prove of interest in this connection:—

Country.	Present rate.	Gold parity.	Premium.	Discount.
Belgium, francs	8.69	$19.30	...	55%
Denmark, kroner ...	19.82	26.80	...	25%
France, francs	8.40	19.30	...	56%
Greece, drachmas ..	12.55	19.30	...	35%
Holland, florins	41.38	40.20	3%	....
Italy, lire	6.21	19.30	...	67%
Norway, kroner	20.38	26.80	...	24%
Sweden, kroner	23.07	26.80	...	14%
Switzerland, francs..	19.48	19.30	1%	....
Spain, pesotas	20.00	19.30	3½%	....
Germany, marks	1.74	23.80	...	92½%

U.S. Not Always on Top

Of all the great countries in the world, the United States at the moment is "top dog" insofar as the value of its dollar is concerned. This was not always so, however. For fourteen years after the conclusion of the war between the north and the south, the United States dollar was at a discount, dropping during the war as low as 40c., and all of you will doubtless remember that immediately war was declared between Great Britain and Germany, the British pound went to a considerable premium in the United States. For a time it remained in the neighborhood of $5 to the pound. The reason of this was the withdrawal of large sums of money by Great Britain which she had at her credit in that country. This situation changed very rapidly, however, because of the necessity of the purchase by Great Britain of large quantities of foodstuffs, munitions and other materials necessary for the prosecution of the war.

There is another country where the United States dollar, in common with the currency of most other countries is at present, or in any event a short time ago was, at a discount, namely—Uruguay, in South America.. Uruguay exports nearly 2½ times more than she imports, the figures for the year 1917—the last available—show, exports, $96,000,000, and imports, $38,000,000, which accounts for her currency being at a premium practically the world over.

The case of Uruguay is, perhaps, as good an example as I can give you of the fact, that when a country's exports exceed her imports, her currency will be at a premium in other countries.

Excess is Not Desirable

In this regard it is questionable if it is a real advantage to a country to have exports largely in excess of its imports. The ideal situation is to have them balance as nearly as possible. It is obvious that purchasing countries will buy—all other things being equal—where their currency will secure the largest quantity of goods. Take the case of Uruguay as an example, one of her chief, if not her chief export, is meat products. The same may be said of Argentine a few miles away. Assuming that the currency of a purchasing country is at a par in Argentine, and at a considerable discount in Uruguay, the purchasing country would naturally prefer dealing with Argentine, unless it could secure its meat products sufficiently cheaper in Uruguay to offset the discount in her currency. In other words, to compete with Argentine, the seller of meat products in Uruguay would have to sell cheaper than the merchant in Argentine, the difference being the discount on the funds of the purchasing country. Let us look at the situation from the conditions which at present obtain in the United States and Canada. Assuming that a European country desires to purchase wheat, and has the money to pay therefor, the farmer in Canada should receive on the basis of to-day's rate, 11 per cent. more for his wheat than a farmer in the United States. If the price were $2 per bushel in the United States, the farmer in Canada would receive $2.22 per bushel. It would, therefore seem, if the United States is to hold her foreign trade, that she will have to be prepared to extend, possibly for long terms, credit to purchasing countries in Europe.

Restriction on Purchase of Securities

I do not wish to be understood as adversely criticizing the brokers, bond-dealers and investment institutions who imported Canadian securities or liquidated their long-dated obligations, as in the absence of a mandate from those in authority their action would not seem open to question, in fact, it would generally be regarded an act of wisdom on the part of a company to liquidate its outstanding obligations, provided it had the funds available, and particularly if it could save money by doing so. In some cases, I understand, a profit was made on such transactions equal to three or four year interest on the securities taken up. From a national standpoint, such transactions presented quite a different aspect, however, as they placed an added burden on Canada's shoulders, besides incidentally forcing those who had to import coal, cotton, iron and other raw materials necessary for our industries, to pay a considerable premium to obtain the American funds with which to liquidate such purchases. The merchants and others who imported luxuries —no matter from whence they came—would seem more open to censure, as everything imported which does not serve some useful purpose, acts as a further aggravation of our foreign exchange situation. There is only one cure—viz., to import as little as possible, only what is absolutely necessary, and to produce and export as much as possible.

The situation could, of course, be temporarily tided over by borrowing outside of Canada, as such action would immediately furnish us with New York funds, and if the amount were large enough, the Canadian dollar would at once rise to par. But this at best would only be a temporary expedient, and if before the maturity of such loans, we did not speed up production and exports, or curtail imports, or preferably both, the result would be a still higher premium for New York funds than at present exists.

Saskatchewan Association of Rural Municipalities

Hail Insurance Association Has Now Accumulated Surplus—Municipalities Want Higher Provincial Grants—Urge More Attention to Public Health—Assessment Question Not Yet Settled

(Staff Correspondence.)

THE annual conventions of the Satkatchewan Municipal Hail Insurance Association and the Saskatchewan Association of Rural Municipalities were held in Saskatoon, March 9 to 12 inclusive, the latter being attended by between 500 and 600 delegates from all parts of the province. The first day was devoted to the affairs of the Municipal Hail Association. There are this year 115 rural municipalities operating under the Hail Insurance Act, a decrease of ten from the preceding year. The majority of those who have dropped out are located in the sections afflicted by crop failure last year.

In addition to the flat rate of four cents an acre it required a levy of 26 cents on excess seeded acreage basis to meet all liabilities. The aggregate losses for the year, based upon a $5 indemnity for total loss amounted to $1,941,470. The total revenue from assessment was $2,247,137. After making allowances for indemnities not yet settled and other sources of revenue the balance sheet shows a surplus of $264,496 and this, the convention decided, is to be used as the nucleus for a reserve fund, to be added to as conditions permit.

Comparison With Companies

Comparisons with the activities of the line companies showed that 39 companies doing business in this province paid out $1,803,717 to farmers who insured with them or $112,725 less that this association paid out in 125 rural municipalities. The total premiums of the companies for 1919 was $2,296,000 and their estimated expenses between 30 and 40 per cent. of the premium income as compared with an administration cost of 5¼ per cent. to the association including payments to municipal secretaries.

The question of providing for more prompt and efficient inspection of claims was discussed. Last year there were 36 inspectors doing the work. The convention felt that the association could afford to spend more money on this work and authorized the directors to do so.

It was also the general concensus of opinion that some scheme should be devised to permit the minority in municipalities voting against the adoption of the act to secure the advantages of municipal hail insurance and the directors were given a mandate to outline a project with this in view and report at the next convention.

Municipal Questions Discussed

Equalization of taxation as between the urban centres and rural districts, increased expenditures for road work, extension of public health facilities are among the more important matters approved by the Saskatchewan Association of Rural Municipalities during its three days session.

It is curious to note that the urban and rural municipalities are not asking for the appointment of a commission to equalize assessments for the purposes of provincial taxation. The rural municipalities complain that they are raising more than their share of the public revenue tax. On the other hand the urban centres contend that while they have to provide high schools and hospitals, largely for the benefit of people in the country they are bearing considerably more than their proportion of the construction and maintenance costs of these institutions.

Equalization and Assessment

A year ago the Union of Saskatchewan Municipalities (urban) appointed a special committee including the commissioners of the three large cities to investigate the question of equalization and assessment. The government contributed $1,000 towards the expenses of this committee. The committee has since thrown up its hands on the ground of lack of time to devote to a question involving so much study and work, and the committee intends to recommend the appointment of a commission by the government.

In his annual report to the convention of Rural Municipalities, E. G. Hingley, secretary-treasurer, urged the appointment of a commission owing to the fact that the rural communities last year paid three-fourths of the total public revenue tax, and contended that this year they would pay four-fifths of the aggregate tax. He declared that he had been told by the clerk of one of the towns that they had reduced their assessment last year twenty per cent. for the express purpose of reducing the amount of their contribution to the provincial revenue. The rural municipalities, on the other hand, have no opportunity of meeting this competition, the final arbiter of their assessment being the provincial Wild Land tax commissioner and his advisory board.

Want Some of Wild Land Tax

A proposal to revert to the old order of things, permitting local secretary-treasurers to fix assessments did not meet with the approval of the convention, the association having placed itself on record two or three years ago as approving the principle of equalization of assessments as between the different rural municipalities, but a resolution was passed calling upon the government to turn over to the municipalities "a reasonable and proportionate share" of the wild land tax. The wild land tax, formerly known as the surtax, was previously enjoyed by the municipalities but three years ago was diverted to the provincial treasury, and ever since that time, the convention has persistently demanded the return of the proceeds of the tax or at least a proportion of it. The government, however, contends that it is inherently a provincial revenue and was only given to the municipalities, in the first place, as an act of grace.

Expenditure on Public Health

Public health matters were much to the fore in the discussions of the convention. Hon. Geo. Langley, said, that in addition to the ten union municipal hospitals in the province, twelve others were in process of organization and applications had been received to organize another twenty-nine. He deplored the lack of interest by the rural municipalities in the establishment of these institutions. They were leaving organization work too much to the small towns, he said, and as a result there was a tendency to create much smaller districts than was necessary or wise from an economic viewpoint.

Tuberculosis, Mr. Langley said, carried off last year more people than all other communciable diseases combined, despite the fact that the sanitarium at Fort Qu'Appelle is crowded to capacity. An appeal to the municipalities to furnish funds to enable the Anti-tuberculosis league to make additions to the sanitarium buildings was made by A. B. Cook, president of the organization. During the discussion the question was raised whether this institution should not be placed directly under control of the government, since it was proposed to raise the funds from public sources and a resolution was passed pledging the support of the municipalities to the work and requesting the government to provide for its upkeep out of the public funds of the province. Following the passage of the resolution, Mr. Langley hinted that the government might ask each municipality to contribute $100 a year towards the sanitarium upkeep and the delegates intimated they were prepared to support such a levy.

MONEY TO LOAN ON IMPROVED FARMS AND MODERN CITY PROPERTY

REGINA - SASK.

Why Individuals Don't Become Famous as Executors:

How many individuals do you know who have made business reputations purely as trustees? Not many.

How many trust companies do you know whose reputations for business efficiency have grown solely through their services in positions of trust? Quite a number in Canada alone.

The reasons are two. Few people act as executors often enough to learn how to manage estates efficiently. The company is managing various estates from day to day. This means that to any new business the company brings a skill and organization developed through years of experience.

If you will send us your address we shall be glad to mail to you our booklets telling why it is a duty for every man to make a will; and why trust companies make the best executors.

Grants to Hospitals

The convention called upon the government to establish homes for the aged and incurables to be provided out of provincial revenues and also asked that the government grant to hospitals be increased from 50 cents per day, per patient, to one dollar. Under the existing municipal acts municipalities are required to pay $2.50 per day, per patient, for indigent patients sent to outside hospitals. This, in the opinion of the convention is insufficient and a resolution was passed asking the government to permit the hospitals to collect the average daily cost from the municipalities.

A good deal of time was spent by the convention in considering questions pertaining to the construction and maintenance of roads. The president, C. M. Hamilton, M.L.A., urged the plea that only men who are deeply interested in good roads should be elected to the councils and the Hon. S. J. Latta, minister of highways addressed the convention at some length, dealing with the system of government grants and outlining the project which he has initiated for the construction of a system of main highways and market roads throughout the province with the co-operation of the municipalities. Practically all the municipalities in the province have submitted their plans and with necessary changes to ensure linking up as between municipalities they have been approved, and grants on the basis of these roads are now being made.

A resolution asking the department of highways to furnish rural municipalities with materials for building bridges and culverts at cost was approved on the ground that big private interests were holding up the price of lumber and cement and it was contended that the department could secure better terms than individual municipalities.

Borrowing for Road Purposes

The convention also approved a proposal for legislation permitting the municipalities to issue debentures for the construction of new roads on a plan similar to that in operation in Manitoba, it being the opinion of the convention, that future generations who will reap the benefit of the roads should contribute towards their first cost.

Hon. Mr. Langley informed the convention that there had been a total outlay of $296,000 for flour and $1,205,000 for fodder this winter in the form of relief in the districts suffering from crop failure. Loans for this relief are being made by the municipalities under government guarantee. The amounts to be expended for seed grain relief will total between $600,000 and $700,000. The bulk of these advances are being made by the loan companies, and where the security is deemed insufficient, the federal and provincial governments jointly are guaranteeing repayment.

SASKATCHEWAN LIFE INSURANCE ASSUMING LARGE PROPORTIONS

At a banquet of the Saskatoon Life Underwriters' Association last week, Mr. A. E. Fisher, insurance commissioner for Saskatchewan, quoted figures showing that during the six-year period ending December, 1918, no less a sum than $17,443,735 had been received as premiums in this province by the various companies operating there, the amount not including expenses. The aggregate premium income has shown a steady annual increase from $1,897,151 in 1913 to $4,401,941 in 1918. The amount of claims paid during the period was $3,286,899, but Mr. Fisher pointed out that the difference between the premium income and the claims paid did not constitute profit, as every policy will at some time or another become a claim. The claims paid in 1918 amounted to $1,222,767, which was an increase of $522,052 over 1917.

The life insurance companies have large sums of money invested in Saskatchewan. At December 31st, 1918, they had a total of $35,520,808 invested there, distributed as follows: Bonds, $10,426,062; mortgages, $25,094,736; other securities, $538,933. Statistics relative to 1919 business have not yet been completed, but Mr. Fisher states the figures will show a general increase in premium income.

CANADIAN GENERAL ELECTRIC COMPANY

Had Good Year Notwithstanding Depression During Early Months—Future Prospects Excellent

IN presenting the report of the Canadian General Electric Co., Ltd., for the year ended December 31st, 1919, the directors referred in confident terms to the excellent prospects of the company, so far as the future is concerned. Profits amounted to $1,617,989, from which is deducted the sum of $524,668, which has been reserved for depreciation, leaving a net profit of $1,093,320, as compared with $1,436,484 in the preceding year. The net profit, although showing a reduction as compared with 1918, when the company's war work was at its height, is nevertheless both satisfactory and encouraging. During the earlier months of the year, immediately succeeding the armistice, the business of the company was conducted without profit, but the improvement in trade conditions during the latter months in a measure compensated for the previous period of depression, and at present this improvement shows no signs of abatement.

Dividends at the rate of 8 per cent. per annum have been paid on the common stock and 7 per cent. on the preferred stock, and $313,320 has been carried to the credit of the profit and loss, which, added to the balance from the preceding year, makes a total of $836,097 at the credit of that account. From this should be deducted the sum of $400,000 transferred to reserve, which now stands at $5,000,000. This amount, added to the balance of $436,097 at the credit of profit and loss, results in a surplus of $5,436,097, equal to 54.36 per cent. of the par value of the company's shares, both common and preferred. The company has no outstanding bonds, debentures, mortgages or prior liens, other than a nominal charge of $21,000 on property purchased, on which an existing mortgage, which is still current, is not yet due.

Commenting on the struggle back to normal business which took place during the year, Senator Frederic Nicholls, president, said:—

"At the end of the war, that is to say, shortly after the armistice was signed, we, in common with others, were beset with cancellation orders from governments, corporations and individuals, in our case for munitions, machinery and supplies to the value of several million dollar.s The situation at that time was more discouraging than at the commencement of the war, but has since improved to a remarkable extent. For the first six months of the year, owing to the heistancy of the public in placing orders, conditions were far from encouraging, but as the year progressed new conditions were offered in ever-increasing volume. For the second half of the year our sales exceeded those of the first half by 115 per cent., and by the end of the year our payrolls had increased to the rate of over $5,000,000 per annum. During the later month our sales were exceeding those of any previous period in the history of the company, and for the past three months have reached an average of over $2,000,000 per month. In the judgment of your directors, the demand for the products of the company will continue to increase, at least for some years to come, for the reason that the electrical industry has a certain assurance for the future which begets a feeling of confidence and warrants constructive effort."

The balance sheet, compared with last year, reveals some interesting comparisons, included in which are the following:—

	1919.	1918.
Net profits	$ 1,093,320	$ 1,436,483
Dividends	780,000	780,000
Surplus for year	313,320	656,483
Transferred to reserve	400,000	600,000
Balance profit and loss	436,097	522,776
Total surplus	5,436,097	5,122,776
Inventory	6,043,173	5,280,385
Total current assets	10,705,961	9,393,278
Current accounts payable	2,403,364	1,357,620
Total assets	23,489,457	21,692,471

Comprehensive Service

The services rendered by the modern TRUST COMPANY are so broad as to cover the financial needs of those in every walk of life.

From the savings Trust account of the child, to the administration and final settlement of the largest estate, it renders specialized, trustworthy and uninterrupted service.

The Trust Company can help you in any of your financial problems.

Still More Need For Conservation

Good Reduction in Fire Losses Compared with 1918, but Total Still High—Per Capita Loss for Some Cities—Losses by Classes of Industries—Conservation can be Practised in Many Fields

In his address at the annual meeting of the Commission of Conservation in Montreal recently, James White, assistant to the chairman, pointed out that what was, at the inception of the work ten years ago, a program of promise and anticipation, has now become, in part, a program of accomplishment. Emphasis is, however, laid on the fact that there is still more conservation needed. This is especially true of the forests, to which the commission already gives considerable attention. The public health work which has been one of the main duties of the commission was last year transferred to the new federal department of health, housing, town planning, agriculture, mining, fishing and power development are also dealt with.

The fire prevention work of the commission has also been transferred to the department of insurance. Last year's developments are, however, reviewed in the commission's report as follows:—

"During the past year, the fire prevention movement in Canada has made distinct progress. Signs are manifest that the interest awakened by the Commission of Conservation is already bearing fruit in a diminished fire loss. So far as figures are presently available, property values destroyed by fire in the year 1919 amounted to $22,973,450, as compared with $33,623,000 in 1918, $24,800,000 in 1917, $25,600,000 in 1916 and $19,022,000 in 1915. This reduction of approximately 30 per cent. over the year 1918 has been brought about despite greatly appreciated property values but may, undoubtedly, be accounted for by the fact that destructive fires in large properties were less numerous than in former years. The provinces in which organized fire prevention campaigns have been carried on during the year report the greatest reduction. In Ontario this reduction amounts to approximately 39 per cent. and in Manitoba and Saskatchewan to over 50 per cent.

Fatalities Still Numerous

"Unfortunately, the loss of life by fires in 1919 has not been greatly less than in former years, the total number of deaths being 239. Classified by causes, returns show that 131 persons lost their lives in burning buildings, 35 through kindling fires with coal-oil and gasoline, 24 through ignition of clothing from over fire and lights, 23 through playing with matches, 14 in bush fires and 12 by miscellaneous explosions. Children were the victims in 60 per cent. of these fatalities.

"I would once again emphasize the fact that records of losses by fire in Canada show that no great improvement can be affected until it is more generally recognized that fires in large manufacturing and mercantile properties are responsible for the larger proportion of the annual loss. While 16,245 fires caused the destruction of property values at $22,973,450 in 1919, almost 50 per cent. of this loss resulted from 51 fires. Analysis shows that these fires occurred in the following properties:—

Class.	No. of fires.	Total loss.
Woodworking plants	8	$ 1,950,000
Grain and flour mill properties ..	7	1,688,000
Metal working plants	5	1,153,000
Miscellaneous industries	7	1,250,000
Mercantile properties	11	1,527,000
Institutional buildings	4	1,050,000
Conflagrations	9	2,700,000
	51	$11,318,000

Per Capita Loss in Cities

"The truth shown by these figures is supported by the returns from cities, towns and villages. Herewith is appended a comparative table of the total losses and per capita losses in the larger cities in Canada. The places in which destructive fires occurred show a per capita loss greatly exceeding the average of $2.49 per capita for the entire group:—

Cities	Property total loss.	Property loss per capita.
Amherst, N.S.	$ 4,634	$ 0.42
Belleville, Ont.	10,024	0.81

Messrs. P. M. Liddell and Co., of Vancouver, have been appointed British Columbia representatives of the Continental Guaranty Corporation, of Toronto, to handle automobile financing.

A constitution and set of by-laws which it is proposed shall govern the fire boards of Vancouver and Victoria, have been passed upon by a selected committee and will come up for ratification at an early joint meeting of the two boards. An effort is being made to have one board only for British Columbia.

COBALT ORE SHIPMENTS

The following were the shipments of ore, in pounds, from Cobalt Station, for the week ended March 19th:—

Coniagas Reduction Co., 194,458. Total, 194,458. The total since January 1st is 3,313,071 pounds, or 1,656.53 tons.

THE WESTERN TRUST COMPANY

Total assets of the Western Trust Co. as at January 31st, 1920, were $2,514,435, as compared with $2,368,338 for the preceding year, showing a further strengthening in the position of the company. There was a slight reduction in investments, although real estate mortgages showed an increase, the amount being $912,020, as compared with $898,086 in the previous year. In the capital account, real estate mortgages showed a reduction, the figure for 1919 being $588,799, compared with $655,812 in 1918. Stocks, bonds and debentures, however, increased over $50,000 while cash in bank advanced over $23,000. On the liabilities side reserves were the same at $200,000, while the balance from profit and loss was $66,412, compared with $48,476 for the preceding year. The company's profit was $3,685 higher than in the year before, being $74,685.

THE DRAIN ON CANADIAN FUNDS

New elements which have been introduced into the trade situation because of low rates of exchange on Europe are discussed in the Bank of Commerce Letter for March. "While foreign trade returns continue to show a balance in our favor," says the article, "this being $263,000,000 for the ten months ending January, it is more than offset by the aggregate of interest charges, credits granted, repurchases of securities held in Great Britain, the redemption of debentures of investment institutions, and the liquidation of many other forms of indebtedness to the United Kingdom. For instance, a very large proportion of our exports is carried in vessels owned outside of Canada, and the relative insurance is bought largely from British companies, the cost of these services amounting to a considerable sum. The numerous British insurance companies operating in Canada find it advantageous, owing to present exchange conditions, to remit their profits to London instead of investing them here, as was the practice to some extent when exchange rates were normal. British fire insurance companies are extending their operations by purchasing control of Canadian companies, and this will result in adding to the already large amount paid for this class of insurance to companies outside of Canada. The aggregate premium receipts in Canada of all outside insurance companies are $60,000,000, of which a considerable proportion goes abroad. Reference was made in our February letter to the fact that continental holders of mortgages were taking advantage of the exchange situation to dispose of their Canadian holdings, and it is now more evident that many British companies and individual investors are taking full advantage of the advance in exchange to realize on their mortgages and their lands.

"All these constitute a steady drain upon Canadian funds which more than offsets the favorable trade balance and creates a difficult situation, the danger of which cannot be met by temporary expedients, for these will be of no avail unless they are followed promptly by greater production and by drastic curtailment of unproductive expenditure. Adverse exchange rates, and the higher prices of commodities which inevitably follow, do not appear to have checked the demand for goods, which is as pressing in rural as in industrial districts. The average price of 272 commodities in January was 4.8 per cent. above the level of December, 1919, and 18.1 per cent. above the level of January, 1919. In spite of this, it is obvious that the people as a whole are continuing to buy."

EMPLOYERS' ASSOCIATION OF MANITOBA

Employers in the province of Manitoba are organizing, according to a statement of Chas. F. Roland, 510 Electric Railway Building, Winnipeg. In an announcement on March 15th, Mr. Roland said:—

"Conditions arising from a new order of things generally has brought about the organization of employers in Manitoba, but there will be no overlapping with any other business body of men, as the employers' association will deal with labor problems only. There will be no desire whatever to condemn labor unions if properly and lawfully conducted by honest and industrious men. It is the intention, I believe, to carry on educational research work in which the fundamental economic laws and conditions upon which successful production and increased turnover depend, and the results of such investigations will be available not only to members, but to employees as well. When you touch the question of practical economics, you touch a question relating to every man, woman and child in the province. Therefore, it is a big proposition, involving wide interests."

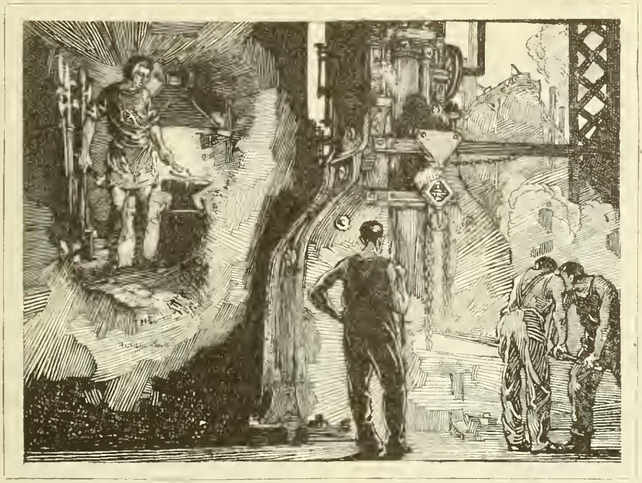
RECOMMENDS NEW CIVIL SERVICE CLASSIFICATION

New grouping of all positions in the Ontario civil service, and generally higher salaries, are recommended in a report of J. M. McCutcheon, civil service commissioner for Ontario. This report, which is the result of investigations extending over several months, has just been submitted to the legislature. It says, in part:—

"A study of the salaries of employees in the various positions in the public service has disclosed many inconsistencies and anomalies, due largely to the fact that the departments have been run more or less as independent units without due regard to the application of sound employment principles in the question of salaries. During the survey of the service many cases were discovered where the salary bore little relation to the duties and responsibilities of the position. In some instances whole groups of employees were found to be underpaid, and in others incorrect relations were found to exist between the compensation paid in different vocations. The salaries of highly-qualified officials are, in many cases, too low, which is also true of many other classes.

"Where there is no classification, the tendency is to attach undue weight to length of service. The salaries of many employees have been increased year after year regardless of any substantial change in their duties or responsibilities, with the result that some of the older civil servants are now receiving larger salaries than the value of their position warrants. Several employees in advanced age are drawing substantial salaries, although only performing nominal duties, and there are, unfortunately, a few on the payroll at full salary who are giving practically no service. This condition of affairs is largely due to the lack of a retirement system."

The commissioner finds that extra remuneration for special work has been a source of considerable dissatisfaction, and recommends a minimum wage in proportion to the cost of living. In submitting the schedule of maximum and minimum salaries, he takes account of the fact that present wages are inflated, and that, in the interests of both the service and the employees, it would be best to adopt a level that would not involve a downward revision upon the return to normal conditions. But he also recognizes the fact that living costs are now very high, and may continue high for some little time, and to meet that condition he recommends that the graded bonus system, approved by the government in December last, be applied with such revision as may be warranted from time to time until conditions return to normal. The salary schedules are accompanied by a recommendation that where the new maximum for any post is less than the salary now being received by the employees, the present rate of pay be continued.



The bellows, anvil, and sledge were almost the sole mechanical equipment of the early iron worker. His output was limited. Today, in our great mills, the worker directs the intricate operations of giant machines, making possible the huge and varied production needed by the world.

Manufacturing and Banking

ONLY through contrast is it possible to realize the advance made in the utilization of nature's resources. Where the early artisan smelted a few pounds of iron ore, today's blast furnace turns out thousands of tons; where the weavers of the Middle Ages wove with infinite patience a few yards of their uneven stuffs, our mills turn out miles of perfect cloth. In almost every vital industry has similar progress been made.

As production has grown, so has banking developed to meet its needs. Modern commercial banking makes possible the free exchange of products between all quarters of the globe. It enables the manufacturer to finance his operations and to conduct them on a larger and more profitable scale.

In assisting industry to achieve its miracles, the modern bank has been a partner. Through its broad commercial banking service, this Company is prepared to render the fullest aid in the continued advancement of industry.

ALBERTA HAIL INSURANCE BOARD

Convention at Calgary Last Week—Secretary Looks Forward to Prosperous Year—Expects 5,000,000 Acres Will Have Insurance in 1920

THE annual convention of the Alberta Hail Insurance Board was held in Calgary, on March 17 and 18 last. according to the financial statement submitted for the period ended January 31, 1920, the net assessment for hail insurance was $778,132, while the losses totalled $503,957. The total surplus and reserve was $198,358, after commissions to municipal districts, expenses and interest changes were deducted. The end of the year found the board with a reserve fund of $100,000 on hand invested in provincial bonds. The total amount of accounts outstanding totalled $108,279.

During the year a total of 1,609,314 acres was insured, while of this total nearly 100,000 acres was insured on the application of 734 farmers from forty different municipalities outside the hail insurance district. In addition to this, land owned by soldiers to the amount of $170,000 was insured and the premium rebated. The total losses sustained during the year amounted to over a half million of dollars, and not a claim remained unpaid.

Loss Four Per Cent. of Risk

That in the neighborhood of 5,000,000 acres in the province of Alberta would be insured under the Municipal Insurance Act during the coming season, was the opinion expressed by A. H. Tovell, secretary-treasurer of the board, at the opening session on March 17. Mr. Tovell in a brief address lauded the work done during the last season by the adjusters and superintendents throughout the province, showing how, out of 2,200 claims adjusted, only five were appealed, and in three of these instances the same adjuster corrected the difference, making a satisfactory settlement.

The actual loss sustained during the season was four per cent. of the risk. Showing that immediate action was granted the farmers in their claims, the secretary stated that an average of but nine days elapsed after a storm before the claims were adjusted. It is expected that this season the province will be divided into six sub-divisions instead of four as at present, in order that the work of the board can be better utilized.

Four New Directors

Four new directors were elected to the board. D. Sinclair, of Hearnleigh, who had been appointed by the board to act till the annual meeting to fill the vacancy caused by the resignation of A. H. Tovell, who was appointed secretary-treasurer, was elected without opposition to complete the remaining two years of the three-year term. The retiring members of the board were E. Hinkley, Ponoka; James Sage, Clive, and David Pearson, Carstairs. Seven nominations were received for the three vacancies on the board, the successful candidates being Harry Bell, of Namao; E. Hinkley, Ponoka, and Harry Bright, of Macleod.

The financial report was adopted without amendment. The amendments as arranged for by the board and passed by the legislature were adopted by the convention and a few minor amendments suggested and referred to the board for embodiment into the act.

Expect Prosperous Year

With a banquet on March 18, at which over a hundred delegates were present, the convention was brought to a close. Optimism was the keynote of the various addresses. It was the first real get-together affair in the history of the association, and it is thought the benefits of this hearty co-operation between the board and the various municipalities affected will doubtless rebound to the welfare of the association during the coming year.

At the afternoon session, the work as planned by the board for the season was explained fully to the various secretaries of municipalities who are affected by the Hail Insurance Association. Mr. Tovell explained at some length the workings of the act, and the duties imposed upon the secretaries in the securing of hail insurance. He impressed upon his hearers the necessity of securing an even greater volume of business this year, explaining that, now that the merits of the act were proven, the farmers would readily appreciate the benefits accruing through the protection offered by the Hail Insurance Board.

ALBERTA-BRITISH COLUMBIA INDUSTRIAL CONGRESS

Large Gathering of Representatives of Leading Canadian, British and American Interests to Take Place in the West This Year

A GATHERING of the industrial and financial men, representative of leading interests in Canada, Great Britain and the United States will take place in western Canada this year, when the second annual Alberta-British Columbia Industrial Congress is held from June 2nd to 10th. The congress, which was originated last year by Mayor M. A. Brown,, of Medicine Hat, along with a number of progressive citizens of the other cities of Alberta, takes the form of an informative tour of the centres of Alberta and British Columbia. Invitations are being sent in person to many of the leading business men of this continent and Great Britain and the management are confident that the gathering will surpass that of last year in every respect.

The success of the 1919 congress has aroused the enthusiasm of the business men of the west and all the cities are co-operating in their plans for showing the delegates the potentialities of the resources of western Canada. At the various sessions of the congress they will be addressed by men who are recognized authorities on the two provinces.

Epoch in Western Development

The Industrial Congress is hailed this year as marking an epoch in the development of western Canada; chiefly in view of the fact of the splendid co-operation of the two provinces. Each has recognized the supreme necessity of industrial expansion and the development of the latent resources, and has reached the realization that they can do more by combined effort than singly.

In Alberta the 1919 congress brought about the permanent establishment of the Alberta Industrial Development Association, with offices in Calgary. Brig.-Gen. H. F. McDonald, C.M.G., D.S.O., was appointed general manager at the 1st of the present year, and it is from this office the 1920 congress is being managed. The offices of the association are the headquarters for an active campaign for the expansion of industry in Alberta and the introduction of new lines which can make use of the tremendous natural resources to hand.

Municipal housing commissions do not meet the so-called housing shortage. In its report on last year's operations, the Toronto commission states that it is impossible to continue building operations in the face of an increase of about 50 per cent. in costs, without endangering the capital advanced by the city.

Mr. O. B. Edgett, of the Edgett Agencies, Lethbridge, Alta., recently arranged for a loan of $24,000 on the irrigated for of John McD. Davidson at Coaldale, Atla. This figures out at $50 per acre, and establishes a new record for loans on irrigated land in Southern Alberta. The loan was placed with United States investors, and Mr. Edgett is of the opinion that there will be a steady flow of American money for development of Southern Alberta.

ANNUAL REPORT OF THE DIRECTORS

Submitted to the Shareholders at the Annual General Meeting of the Company in Toronto, on Monday, March 22nd, 1920

Your Directors in submitting their Annual Report for the year ended 31st December, 1919, take the opportunity of congratulating the Shareholders on the successful outcome of the Company's operations during the critical period dating from the signing of the armistice until the present.

During past years very large sums have been set aside from year to year from surplus profits with the object of creating as quickly as was possible, consistent with a fair return to the Shareholders, a Reserve for Depreciation of Plant and Machinery of such proportions as would provide against all contingencies.

This Reserve for Depreciation has now reached the sum of $4,700,466.09, which is equivalent to 81% of the book value of our Machinery, Tools, Patterns and Drawings, which are carried on the books at $5,644,397.71.

The Real Estate and Buildings owned by the Company have increased in value to an extent largely in excess of any depreciation through wear and tear which may have taken place, and therefore our Reserve for Depreciation may be considered as applicable to Machinery, Tools, Patterns and Drawings only.

The net profit for the year, while less than during the preceding year when the Company's war work was at its heighth, is nevertheless both satisfactory and encouraging. During the earlier months of the year, immediately succeeding the armistice, the business of the Company was conducted without profit, but the improvement in trade conditions during the latter months in a measure compensated for the previous period of depression, and at present this improvement shows no signs of abatement.

The Profit for the year amounted to $1,617,989.32, from which is deducted the sum of $524,668.51, which has been reserved for Depreciation, leaving a Net Profit of $1,093,320.81. Dividends at the rate of 8% per annum have been paid on the Common Stock and 7% on the Preference Stock of the Company, and $313,320.81 has been carried to the credit of Profit and Loss, which, added to the balance from the preceding year, makes a total of $836,097.48 at the credit of that account. From this amount there should be deducted the sum of $400,000.00 transferred to Reserve, which now amounts to $5,000,000.00. This amount added to the balance of $436,097.48 at the credit of Profit and Loss results in a total surplus of $5,436,097.48, equal to 54.36% of the par value of the Company's shares, both Common and Preferred.

A record of Dividends paid out since 1893 will be found on page No. 21. The amount that has been disbursed for Dividends, added to the Reserve for Depreciation and accumulated Surplus, aggregates no less than $20,937,645.71.

The Company has no outstanding Bonds, Debentures, Mortgages, or prior liens of any description, other than a nominal charge of $21,000.00 on property purchased, on which an existing mortgage which is still current is not yet due.

In regard to our Inventory, your Directors have adopted a conservative policy. All active materials have been taken at or below cost; any goods that may be considered obsolete have been taken at their scrap value, and adequate Reserves have been provided to guard against any shrinkage in value.

The last previous issue of Capital Stock to the Shareholders was in May, 1912, or nearly eight years ago. Since that time surplus profits to an amount of several million dollars have been used in extensions and additions to the Company's properties, without calling upon the Shareholders. The great demand for the Company's products, however, which commenced during the summer of 1919, necessitated a forward programme of construction and equipment, and your Directors in December last decided to offer for subscription to Shareholders at par ten thousand Common Shares of a total par value of $1,000,000.00. The issue was accordingly made and the money received from the sale of these shares will be expended on capital account for extensions and additions to our manufacturing and distributing properties.

The liquid condition of the Company's Assets may be noted. Cash and Current Assets amount to $10,705,961.14, whereas Current Accounts and Bills Payable, and War Tax and Contingent Liabilities amount to only $3,171,894.37, leaving a Surplus of Current Assets of $7,534,066.77. The amount at the debit of Accounts Payable at the end of the year was larger than normal, as a result of exceptionally large purchases of raw materials and finished products necessitated by the increased volume of orders received.

During the last six years, within which we have seen both the Declaration of War and a Treaty of victorious peace, your Directors have had many difficult problems to confront them. At the beginning of the war many orders were cancelled, and because of the uncertainty of the future new orders for standard products were not forthcoming. Your Company, however, rapidly adjusted itself to the new conditions, and engaged in the manufacture of munitions, marine engines, etc., on a large scale.

At the end of the war, that is to say shortly after the armistice was signed, we, in common with others, were beset with cancellation orders from Governments, Corporations and individuals, in our case for munitions, machinery and supplies to the value of several million dollars. The situation at that time was more discouraging than at the commencement of the war, but has since improved to a remarkable extent. For the first six months of the year, owing to the hesitancy of the public in placing orders, conditions were far from encouraging, but as the year progressed, new business was offered in ever-increasing volume. For the second half of the year our sales exceeded those of the first half by one hundred and fifteen per cent., and by the end of the year our Pay Rolls had increased to the rate of over Five Million Dollars per annum. During the later months our Sales were exceeding those of any previous period in the history of the Company, and for the past three months have reached an average of over Two Million Dollars per month. In the judgment of your Directors the demand for the products of the Company will continue to increase at least for some years to come, for the reason that the electrical industry has a certain assurance for the future which begets a feeling of confidence and warrants constructive effort.

It is well known that in the Province of Ontario in particular, as well as in the other Provinces of the Dominion, the demand for hydro-electric power is greatly in excess of the supply. In Ontario the Hydro-Electric Power Commission, with characteristic foresight, are bending their energies to rapidly complete the Chippewa Power Development at an estimated cost of $35,000,000, which will provide an additional 400,000 horse-power of electrical energy. This energy, when distributed, will provide a market for such apparatus, accessories and supplies as are manufactured and sold by your Company, and of which we expect, as in the past, to secure our fair share. The Hydro Radial Railways policy having been approved by the public and the Government, there will be expended many millions of dollars for electrical apparatus and supplies for the construction, equipment and operation of this comprehensive system of Provincial interurban electric transportation, and the electrification of certain sections of existing trunk line steam railways is under consideration at the present time. The International Joint Commission on Waterways, which is now sitting, have under consideration plans for an International Water-power Development on the St. Lawrence River, which, if proceeded with, will create upwards of two million horsepower of electrical energy. Engineering studies for this work are now in progress. The various Housing Commissions throughout Canada, supported by Federal, Provincial and Municipal grants and subsidies, have undertaken the construction of thousands of new houses and as these will be within the sphere of influence of local Hydro-Electrical distributing areas, the demand for electrical wiring and household appliances should increase to a considerable extent. It is further a well-known fact that many new industries promoted by Canadian and British capital and many branches of great United States industrial corporations are being located in various sections of the Dominion, and more particularly along the border line between the two countries at the Niagara River and the Detroit River. These being within the Hydro-Electric zone, will be operated by Hydro-Electric power and become continuing customers for electrical machinery, apparatus and supplies.

The manufacturing and distributing facilities of the Company being overtaxed, new extensions and additions have been authorized, and are being proceeded with, as the future of the Company's activities is more assured and promising than at any previous period.

The extensions and additions to our Peterboro Works will afford much needed additional floor space, and be equipped with electric travelling cranes and the latest design of machinery suitable for our requirements, and it may be noticed that our main shop, when completed, will be U shaped, 2,500 feet long, or equivalent to nearly half a mile in length. In connection with our extensions at the Peterboro Works we have applied to the City Council of Peterboro for an extended term of ten years for our present fixed assessment, and a by-law has been passed by the Council granting the extension requested, subject to the approval of the ratepayers. As previously mentioned, the total Pay Roll of the Company is upwards of Five Million Dollars per annum, of which about one and a half Million Dollars have been disbursed at our Peterboro shops, and when our improvements are completed, it is anticipated that the numbers on our Pay Roll there will be largely increased, with a corresponding increase in the Pay Roll.

A recent contract awarded the Company by the Hydro-Electric Power Commission of Ontario is for two generators, each of 50,000 horse-power capacity. These will be installed at the Chippewa Hydro-Electric Power Development and will be of larger capacity than any that have heretofore been built in any country. The Shareholders will be gratified to know that our Company possesses the plant and equipment and has in its service the necessary engineering skill to enable us to undertake a work of such magnitude.

A new factory for the manufacture of interior conduit has been completed, and is about to start operations.

A new factory for electrical fittings and supplies will, when completed, contain about 170,000 square feet of manufacturing floor space.

These additions and extensions, with their equipment, will cost about one and a half million dollars.

During the year to facilitate the sale and distribution of the Company's products, new branches have been opened at Windsor, Ontario; Sherbrooke, Quebec; and St. John, New Brunswick. The extension to the Head Office Warehouse, 47′ x 185′, should be finished during the coming summer, and will afford much needed additional accommodation. When completed, the area of the Executive Offices and Warehouse will be approximately 150′ x 185′, six stories and basement, equal to about 200,000 square feet of floor space. The direction of our sales and purchases, and the distribution of fittings and supplies is handled from these buildings. That this expenditure was amply justified is evidenced by the fact that our Sales from this Department have increased by 47% since the first extension was completed a year ago, and the latest addition now under construction will permit of still better service to our customers, and enable us to handle the larger volume of business offering but for which our present facilities are inadequate.

During the past year we inaugurated a national advertising campaign, which has shown excellent results, and has been much appreciated by our customers, who were benefited thereby A new catalogue of electrical fittings and supplies, and a catalogue of automobile accessories were issued at the end of the year. These catalogues are equal to any that have heretofore been published in any country, and are looked upon as text books of the industry.

It is with great regret that your Directors refer to the death of the late Mr. W. D. Matthews, who had served the Company faithfully and well as Vice-President and Director since the inception of the Company.

DOMINION OF CANADA GUARANTEE PROFIT-SHARING PLAN

Every member of the office staff of the Dominion of Canada Guarantee and Accident Insurance Co., who has been in the company's service for a period of two years, will participate in a profit-sharing plan recently authorized by the directors of the company. The plan provides for 15 per cent. of the net underwriting profits for the previous year to be disbursed among the staff on a pro rata salary basis. The first dividend under this unique plan was given to the staff last month. This is but one of the benefits extended to its employees by the Dominion of Canada Guarantee and Accident Insurance Co. For years past the whole staff has been insured against loss of salary through accident and sickness. In addition the company has recently taken out a life insurance policy covering all salaried members of the organization.

IRRIGATION BONDS GIVEN PREFERENCE OVER MORTGAGES

Alberta Will Make Good Losses in Proportion to Deterioration of Land—Decision Arrived at After Consultation With Mortgage Companies' Representatives

IRRIGATION bonds may be made first lien on the land in irrigation districts, according to the decision reached by the government of Alberta after consultation with representatives of mortgage companies. The arrangement will be that where the mortgagee finally suffers a loss by reason of the security going down in value instead of up through the bonding of a district for irrigation, the government will make good the loss to the extent that it can be shown that the land has deteriorated below what it was worth as dry land before the bonds were put on. The government will say to the mortgagees: "We will see that irrigation bonds being put ahead of your mortgage does not adversely affect your security. If, in pursuing remedies you suffer a loss by reason of the land deteriorating in value below what it is now worth as a dry farming property, the government will make good that loss."

It is proposed, and has been agreed to by the mortgage and loan company representatives, that in cases in irrigation districts, where the mortgagor has failed to pay up his water right charges and the lands are being sold under the hammer, the government can buy up such land with the mortgage on it at an upset price to protect the government and the mortgagee against any loss on the security. The government can then resell the land.

Attorney-General J. R. Boyle believes that, as a matter of fact, the risk of any loss is negligible, but says the arrangement satisfies the mortgage concerns and relieves the province of any accusation of bad faith as regards original mortgage holders. New mortgages in such a district, of course, take their security subject to the bonds as first lien on the land, and the arrangement does not apply to them.

Mortgage Men Want Irrigation

During the conference the mortgage men made it plain that they wish to see irrigation projects put through as soon as possible; all they were anxious about is that the credit of the province be not disturbed through any legislation that might have the appearance of impairing the security of mortgages, even though it did not have that actual effect. Hence, they put it up to the premier that if the province would take steps to protect the security of existing mortgages, they would not push objections to making the bonds the first lien in the property. A resolution along these lines was placed in the premier's hands but its text was not given out for publication.

Just how such security should be given is another problem, and the mortgage representatives are holding another meeting to discuss the problem. The subject is becoming so complicated, however, that many legislators are of the opinion that the government can save itself much trouble by giving a straight provincial guarantee of the bonds, where engineers report favorably on projects, and cut out all the red tape, putting the credit of the province directly behind projects which are favorably endorsed by the engineers employed by the province. This would obviously make it unnecessary to put the irrigation bonds ahead of mortgages to make them desirable to investors.

L. M. Roberts, the solicitor appearing for the mortgage men, told the premier that latest inquiries on the subject showed that irrigation bonds could be sold in the United States at this time at about 82 for 6 per cent. bonds. This would mean payment in American dollars, thus giving the project the benefit of the exchange, and would figure out a return of approximately $4,500,000 on the $5,000,000 bond issue for the Lethbridge Northern project.

R. W. Clewlo has taken charge of the fire department of the Union Casualty Co., for Ontario, with office at 36-37 Imperial Bank Building, Yonge and Queen Sts., Toronto.

ALBERTA HAD SURPLUS IN 1919

Treasurer's Statement Shows that Revenue Exceeded Expenditure by Nearly $317,000

THE province of Alberta ended the fiscal year on December 31st last, with an actual cash surplus of $316,990.78 on ordinary revenue or income account, according to the figures in the public accounts of the province laid on the table of the house Tuesday afternoon by Provincial Treasurer C. R. Mitchell. The treasurer's statistics show that there was a total revenue of $9,462,739.32 and a total expenditure of $9,325,784.54 in the year's accounts. From this cash surplus, former capital account charges for patriotic purposes during the war were reimbursed to the extent of $200,000, according to the annual statistics.

According to Mr. Mitchell's figures, the telephone business of the province alone, on ordinary account, had a gross income of $1,638,263.22, and an ependiture of $1,620,418.07, ending the fiscal year with a net surplus of $17,845.15. Mr. Mitchell says that it was apparent that the operations of the telephone system were on a business footing as the expenditures included adequate sums to cover maintenance, depreciation, reserve and sinking fund, in larger proportions than formerly. The public accounts figures state that the consolidated revenue account, which includes revenues from all sources, including capital funds, shows a total revenue of $14,398,980 and a total expenditure of $14,134,838, with an actual cash balance on hand of $264,141.

Detailed Statement

The statement of revenue and expenditure for the year ended December 31 last is as follows:—

Revenue:	
Dominion subsidy	$1,621,075.00
School lands	586,571.23
Grant to seed fair	652.67
Treasury department	428,152.67
Provincial secretary's department	1,200,994.36
Attorney-general's department	1,234,928.21
Public works department	300,929.86
Agriculture department	193,997.25
Dairy and poultry industry	639,098.68

Expenditure	9,525,748.54
	$ 116,990.78
	200,000.00
Surplus	$ 316,990.78

BEAMSVILLE BOARD OF TRADE FORMED

A board of trade has been formed at Beamsville, Ont., for the special purpose of booming Beamsville as a centre for factories, and to carry out a program to advertise the town and generally to boom business. The following officers were elected: President, J. B Drope; vice-president, T. W. Woodland; secretary-treasurer, R. J. Montgomery.

ROYAL INDEMNITY TO ENTER CANADA

The Royal Indemnity Co., according to information supplied to *The Monetary Times* by the president, Mr. Chas. H. Holland, has applied for a license from the Dominion government and proposes to extend its operations from the United States to Canada. Owing to the fact that the license has not yet been secured, the company is not in a position to announce any definite plans. It is expected, however, that they will be able to undertake business in the provinces of Ontario and Quebec within the next few weeks.

NEW RECORD FOR BANK OF HAMILTON

The Bank of Hamilton closed its fiscal year on February 29 last, with protfis of $847,104, as against $571,226 in the previous year, an increase of $275,878, representing the best showing in the history of the institution.

The year's income included premiums on new stock issue amounting to $500,000. Payments in dividends amounted to $469,183, compared with $360,000 in the previous year. There was paid out in pensions $40,317. The sum of $100,000 was transferred to bank premises account, compared with $173,096 in the previous year. The premium on new stock went to reserve fund, for which the amount transferred this year was $700,000, as against $200,000. The reserve fund now amounts to $4,200,000. The balance carried forward is $85,249, compared with $85,114. The bank's assets have now reached the sum of $84,124,109, an increase during the year of $6,729,988. Deposits have also shown a fair increase, amounting to $68,665,705, a gain of $4,288,647. Quick assets now stand at $16,111,990, an increase of $1,652,224. Call and short loans in Canada have reached $8,169,905, an increase of $3,748,527.

The British Columbia government has set apart 300 square miles of the wonderful Garibaldi Mountain area, which is situated directly north of the city of Vancouver. This latest addition to Vancouver's scenic and holiday attractions is fascinating in its beauty and charm, and the people of British Columbia are naturally very loud in expressions of approval of what the government has done in thus increasing their already large park areas. No section of this new region is less than 3,000 feet above the sea, and when easy transportation to the new area is an accomplished fact, which will doubtless be soon, full advantage will be taken of it by the people of Vancouver.

SECURITIES ASSIGNED TO BANK

Preference Given by Insolvent Debtor to Creditor is Void Under Saskatchewan Assignments' Act, Says Court of Appeal

In a recent case before the Saskatchewan Court of Appeal it was held by the court that a gift or conveyance, made by a debtor when he is insolvent, which has the effect of giving a creditor a preference, is void under section 39 of the Assignments Act of Saskatchewan—provided that the transaction is attached in the manner laid down in the statute within sixty days after it takes place.

The evidence in the case showed that the defendant was insolvent in May and June, 1918, at the time the securities in question were given the bank, and also that he was insolvent in October, 1917, when it was alleged the advance was made and the security agreed upon. The taking of these securities under the special circumstances of the case must necessarily have had the effect of giving the bank a preference. The securities were attached in the present action within the statutory period of 60 days and *prima facie* are void under section 39 of the Assignments Act of Saskatchewan, which provides in effect, that every gift, conveyance, assignment or transfer of any property, real or personal, to a creditor by a person who is insolvent, or is unable to pay his debts in full, or knows that he is on the eve of bankruptcy, and which has the effect of giving such creditor a preference over other creditors of the debtor, "shall in and with respect to any action or proceeding which within sixty days thereafter is brought, had or taken to impeach or set aside such transaction be utterly void as against the creditor or creditors injured, delayed, prejudiced or postponed."

Judgment of the Court

In his written judgment on the case, Haultain, C. J. C., says:—

"A great deal of the argument on appeal was addressed to the question whether the giving of the securities by formal documents in pursuance of a verbal agreement alleged to have been made in October, 1917, would take the case out of the provisions of sec. 39. That is to say, that the advance was made and the security given under the verbal agreement, and that the 60 days would begin to run from the date of the verbal agreement and not from the date of the formal documents.

"In my opinion, the actual words of sec. 39 do not admit of such a contention. The section says, 'every gift, conveyance, assignment or transfer, etc.,' made under certain conditions 'shall in and with respect to any action or proceeding which within 60 days thereafter is brought to impeach or set aside such transaction be utterly void, etc.' The equitable doctrine which regards that which has been agreed to be done as done, is no doubt applicable as between the parties to the document, but that doctrine cannot, in my opinion, be applied to make the words '60 days thereafter' mean '60 days after an agreement to make any gift or execute any conveyance, assignment or transfer, etc.,' instead of 60 days after the actual date of the gift, conveyance, etc.

"The provisions of sec. 46 are clearly the only other provisions which can apply to the facts of this case, and, in order to escape the effect of sec. 39, the defendant bank must establish that the securities in question were given for a pre-existing debt, where, by reason or on account of the giving of the securities, an advance in money was made to the debtor by the creditor in the *bonâ fide* belief that the advance would enable the debtor to continue his trade or business and pay his debts in full. There is absolutely no evidence to show any such belief on the part of the bank."

The Underwriters' Bureau of British Columbia, which was organized at a recent meeting in Victoria, B.C., is to take over the work of the Vancouver Fire Underwriters' Association and the Mainland Fire Underwriters' Association.

Trade of Canada Makes Some Notable Gains

Exports of Wood, Wood Products and Paper Advanced $50,000,000—Animals, Animal Products Also Increased Substantially—Less Iron and Steel Imported, but Home Production Greater—Miscellaneous Products Show Reductions Both Ways

CANADA'S trade for the month of February, 1920, amounted to $177,854,194, as compared with $150,210,475 for February of the previous year. For the eleven months ended February 29, 1920, the figure was $2,110,548,504, compared with $2,006,621,672 for the previous period, an increase of $103,928,832. Imports entered for consumption increased over $77,000,000, while exports of domestic merchandise advanced nearly $30,000,000. Exports of foreign products, however, declined approximately $3,000,000. The Dominion's favorable trade balance now approximates $224,000,000, while in 1919 the balance was somewhat over $271,000,000.

In the column of imports the principal increases were in agricultural and vegetable products, and in fibres and textiles, the former showing an incline of nearly $46,000,000, and the latter, $28,000,000. Some advances were also made in wood, wood products and paper, and animals and animal products, while iron and steel and miscellaneous products registered declines.

Under exports, wood, wood products and paper increased over $50,000,000, and animals and animal products increased over $76,000,000. Other increases were: Agricultural and vegetable products, fibres and textiles, iron and steel and non-metallic minerals. Miscellaneous products showed a reduction over $170,000,000, while chemicals and chemical products, and ores, metals and metal manufactures also showed declines.

The following is the summary of Canadian trade:—

IMPORTS ENTERED FOR HOME CONSUMPTION

—	Month of February				Eleven months ending February			
	1919		1920		1919		1920	
	Free	Dutiable	Free	Dutiable	Free	Dutiable	Free	Dutiable

NEWS OF INDUSTRIAL DEVELOPMENT

Further Extensions in the Pulp and Paper Field—New Brunswick Features in the Numerous Deals—Ames-Holden Rounding Out Organization

SEVERAL announcements have been made in connection with the development of the pulp and paper trade. Two mills in the Miramichi District, New Brunswick, are being taken over by interests allied with the Howard Smith Paper Mills Co. of Montreal. One of the mills is that of the Dominion Co., and the other is the Milerton mill. It is understood that no timber limits are concerned, and that negotiations are now under way for securing certain Crown Lands, and that later it is expected that other limits will be taken over. The mills will have a daily capacity of about 100 tons.

The transfer of the Crown Lands held by the estate of Sir William Van Horne to the Dalhousie Lumber Co., a subsidiary of the International Paper Co. of New York, has been officially announced. The lands consist of 122½ square miles, and are located in Northumberland County, New Brunswick, on the Serpentine stream, which runs into the Tobique River.

The Miramichi Company is erecting a new lumber mill at Douglastown, N.B. Two new lumber mills which will employ 250 men, are also being erected by the Fraser Company, of Edmundston, N.B. It is estimated that with the above additions, there are now approximately 150 portable lumber mills in the province of New Brunswick.

A party of American capitalists, with John Burns, of Charlesbourg, Que., are planning to operate the pulp mills at Peribonca, which have been idle for some years back. This enterprise controls timber limits near Peribonca.

Preparations are being made by the Mattagami Pulp and Paper Co., for the installation of a third drying machine, at its mills, which should be in operation by September 1, and will then have the effect of increasing the mills' output from thirty thousand to forty-five thousand tons per annum. Installation of this additional equipment will not only increase the output, but should materially reduce the cost of production per ton.

Construction work on the new sulphite mill at Three Rivers, Que., which is being built for the International Paper Co., is reported to be proceeding ahead of schedule. The sulphite mill, which will have a capacity of 100 tons of sulphite pulp daily will be completed before the end of next summer. The newsprint mill, which was planned for a capacity of 200 tons of print daily, will not be completed until late in 1921. In the meantime, the company will ship sulphite pulp manufactured at Three Rivers, to its newsprint mills in the United States. The restrictions which prohibit the exportation of wood cut out on Canadian Crown lands, do not apply where the wood is manufactured into pulp in the Dominion, so that the company will be free to ship its product to the mills of the United States.

Expansion in New Brunswick

In addition to the announcements above in connection with the lumber and pulp and paper industry in New Brunswick, many other firms have enlarged their plants, or erected new ones in the province.

At St. Stephen, Ganong Bros., chocolate manufacturers, have made important additions to their plant, and provided housing accommodation for 100 girls. The Canadian Cottons Ltd., of Milltown, have made additions to their plant during the year which will increase their output by one-third. At Moncton, the J. A. Marvin have recently put up a three story concrete structure with a floor space of 37,000 feet, and will increase the number of their employees by 20 per cent. J. A. Humphrey and Son, of Moncton, have also erected a new woollen mill, which will enable the company to increase its output fifty per cent.

Expansion in the rubber, felt and footwear trade, is foreshadowed by the announcement of Ames-Holden-McCready, Ltd., to round out its entire organization. The company has recently, through subsidiary concerns, established large tire plants and has now concluded arrangements for the manufacture of Ames-Holden felt footwear. The announcement is also made that the company has made a revision of its contract with an outside rubber company, and as a result arrangements are being made for the installation of machinery and equipment in the Montreal factory of the company for the manufacture in the near future of Ames-Holden rubber and canvas footwear. In this way the Ames-Holden system will comprise all branches of shoe manufacture and enable the parent company to take full advantage of its selling staffs during the entire period of the year.

Directors of the company have authorized the incorporation of a subsidiary company for the manufacture of felt footwear, under the name of Ames-Holden Felt Co., Ltd. The new plant is located at Kitchener, Ont., and will be producing in May. The plant of the Ames-Holden Tire Co., is also located at Kitchener, and is now practically completed, and its first tires have already been produced.

Other Notes of Industry

Charles W. Stanger of Adrian, Michigan, has definitely decided to locate his Canadian factory in St. Thomas, Ont., for the manufacture of Nuway suspenders and belts, and has secured temporary quarters in the old Masonic Hall in West Talbot. Mr. Stanger until recently owned and operated the Nuway Suspender Co., in Adrian, Mich. He hopes to have the local plant in operation early in April, and states that he will employ more than one hundred hands within a year.

The Rubberset Co., of Newark, N.J., one of the largest manufacturers of brushes in the world, will establish a plant at Gravenhurst, Ont. A vacant factory, belonging to the A. R. Williams Co., of Toronto, has been secured, and fitting up will start immediately. Manufacturing will begin in about a month, and at least fifty hands will be employed at the start. The local plant will produce finished brush handles for both the Canadian branch in Toronto, and the parent concern in Newark, N.J.

It has been announced by the Border Chamber of Commerce that the Harris Abbatoir Co., of Toronto, has engaged space in Windsor, Ont., from which they will conduct a distributing warehouse.

The Northwest Biscuit Co., is commencing the construction of a $25,000 warehouse at Regina, Sask. The company intends to add to this warehouse later on, and there is a possibility of establishing a manufacturing plant in the city. The company is now erecting a $350,000 biscuit factory at Edmonton, Alta.

WAWANESA MUTUAL INSURANCE COMPANY

The balance sheet of the Wawanesa Mutual Insurance Co. for the year ended December 31st, 1919, shows the company to have strengthened its position during the past year. Policies in force at the end of the year were 40,000, and insurance in force was $83,290,110. The increase in business during the year amounted to $7,658,573. Cash on hand and in bank amounted to something over $92,600, compared with $110,211 for the previous year. The company's investments and war bonds has now reached the sum of $235,350. Total assets are now $1,437,252.

It might be interesting to note that the Wawanesa has no connection with the Western Mutual Fire Insurance Association or any other combination of mutual companies, but operates independently.

Ryan, Grier and Hastings, Ltd., has been incorporated in Montreal, with a capital of $100,000, to carry on a bond business in affiliation with Ryan, Grier and Hastings, stockbrokers. E. de B. Panet, who has been with the stock firm, will join the bond firm as partner and manager. Larger premises are being taken at 98 Notre Dame St. West.

1870 —— OUR GOLDEN JUBILEE —— 1920

They Put On More Insurance!

Mutual Life Policyholders last year increased the amount of their protection taking out additional policies to the amount of more than ten million dollars. They were alert business men who realized the necessity for increasing their life insurance because of the increase in the value of the necessities of life. In proportion as money loses its purchasing power we require more and more of it to maintain the same protection. Have YOU increased YOUR insurance since prices went up? The smaller the value of the dollar the more dollars we need As a company, the Mutual does not advocate an excessive amount of insurance. At the same time every reasonable effort should be made to increase the insurance in times of inflated prices. Follow the example of 3139 Mutualists who increased their insurance last year. Put on more insurance!

NEWS OF MUNICIPAL FINANCE

Montreal Tax Exemptions Nearly Two and a Quarter Millions—Saskatoon Assessment Revised—Alberta Legislature Refuses Edmonton Civic Income Tax—Bond Dealers Advise Regina on Payment of Sterling Bonds

Montreal, Que.—The net assessable valuation of the city for the current year is $627,114,570, the gross valuation being $851,024,716, and the exemptions totalling $223,910,146.

Windsor, Ont.—The board of education will ask for the sum of $340,362 from the city council, according to estimates brought in at a meeting on March 19th. The total expenditures will be $371,070, as compared with $221,312 last year, an increase of $149,757. The expenditure for the various types of work are made up as follows: Public schools, $261,586; collegiate, $84,646; industrial classes, $24,837.

Saskatoon, Sask.—The statement of assessment, revised in accordance with the decision of the court of revision, which was given on February 24th, and which was presented to the city council last week, shows the following figures: Land, $24,959,740. improvements, $6,776,730; business, $363,558; income, $224,159; total, $32,324,187; total exemptions, $2,669,955; net total assessment, $29,654,232; net separate school assessment, $1,359,489.

London, Ont.—The city will make application to the legislature for permission to collect income and business tax the same year the assessment is made. At present the assessment is made a year in advance, and it is claimed that the city loses much money through assessed persons moving to other parts. City Clerk Baker states that the city has been assured by the government that the request will be granted if a properly worked-out scheme is presented.

Ontario.—The larger municipalities of the province from Ottawa to Windsor sent representatives to lay before the Ontario government a number of proposed changes in the Municipal Act and other statutes. The chief requests made were that police court fines go to the municipalities instead of to the province; that the government appoint a commission to investigate and report on the best form of municipal government, and that a bill should be introduced on behalf of that city providing for commission government. London was ready to show the way in regard to the latter clause, and let the rest of the province have the benefit of its experience. The government promised consideration of the various requests.

Edmonton, Alta.—The municipal law committee of the Alberta legislature has struck out the civic income tax clause from the city's charter. Several members of the committee suggested that the income tax powers granted to other cities should be withdrawn. Such action, undoubtedly, would have been taken, except for the fact that it was not possible to make a general rule apply in dealing with the Edmonton charter only. Mayor Joseph Clarke, of Edmonton, made protest against the taking away of Edmonton's right to impose taxation on incomes, but Attorney-General J. R. Boyle was obdurate. In reply to the demands from the Edmonton executive as to where the city was going to get the money to carry on, Mr. Boyle suggested that Edmonton raise its assessment on buildings to 100 per cent. of their value. The attorney-general remarked that he thought a general act compelling all cities to assess buildings at 100 per cent. of their value would be a good thing.

Toronto, Ont.—A private meeting of the board of control was held last week to discuss the reduction of expenditure on local improvements that have been authorized, but not yet begun. These involve expenditures exceeding $4,000,000, in addition to the $2,500,000 on works already being proceeded with. There was considerable discussion, but no decisions reached as to how much should be eliminated. Finance Commissioner Thomas Bradshaw presented a statement of the financial situation, pointing out that the city was approaching the limit of its borrowing powers for capital expenditures, that large expenditures for the street railway would have to be faced shortly, and that loans could be floated in the American money markets only at a loss under present conditions. He advised the strictest economy. Mayor Church suggested the reduction of the proposed expenditures by 75 per cent., but his proposal was not welcomed. Several aldermen expressed the opinion that certain expenditures already approved by the board of control were less necessary than some of the works included in the list under consideration and might be passed over in favor of the latter.

Regina, Sask.—The city council is in receipt of a letter from the Bond Dealers' Association, advising careful consideration in the matter of payment of interest on the city's sterling bonds. The letter says:—

"It is the unanimous opinion of members of the section that should Regina decline to meet its obligations at par of exchange an injury will be done the securities, not only of Regina itself, but of western municipalities generally. The investment market is extremely sensitive at all times. It is particularly so just now with respect to western Canadian municipal securities. Several cities and towns have defaulted and their default has prejudically affected the market for this class of security. It is of the utmost importance that we should all co-operate to re-establish the damaged credit of western Canadian municipalities.

"We are informed that while legal advisers of the city are of the opinion that the corporation is entitled to meet its obligations at the current rate of exchange, eminent counsel such as Mr. Alex. Bruce, K.C., and E. G. Long, express a contrary opinion. It would seem evident that unless the city recognizes the claim of the holders of the bonds a costly law suit will ensure. Bond dealers of the country would greatly regret further injury to our credit which such an action would inevitably inflict.

"It can hardly be deemed that it was the intention of the municipality when the bonds were issued to make payment except at the par of exchange. The purchasers of the bonds bought in the faith that payment would be so made. Furthermore it has always been the custom of Canadian municipalities issuing securities payable in the alternative in England or Canada, to meet such obligations at par of exchange. Any deviation from this practice will be regarded by investors as a breach of faith.

"It need hardly be pointed out that the holders of these securities are by no means asking the corporation to sustain any loss. Your accounts have been kept on the footing that payment would be made at the par of exchange. The municipality in contending otherwise proposes to take advantage of an extraordinary financial situation to procure an unexpected profit. We suggest that you should most carefully consider whether this profit is not being made at the expense of investors whose good-will the city is bound to cultivate."

DOMINION FIRE TO EXTEND SCOPE

The Dominion Fire Insurance Co., of Toronto, is applying to the Dominion legislature for power to extend its present scope, so as to enable the company to carry on the business of marine insurance and other kinds of insurance as may be authorized from time to time under the provisions of the Insurance Act in addition to the business of fire, hail and automobile insurance which is now being transacted.

Two other new companies are applying to the legislature for incorporation. Application will be made to incorporate a company to be named "United Canada Fire Insurance Company," with a capital of $3,000,000, and empowering the company to do all classes and kinds of insurance, except life insurance, with all other usual and necessary powers, and with head offices at Winnipeg, Man. Application will also be made to incorporate a company under the name of "Canada Security Assurance Company," with its head office at Toronto, Ont., for the transaction of fire, automobile, hail, accident, sickness, guarantee, plate glass, burglary, inland transportation and explosion insurance, and also to take over the assets, liabilities and obligations of Canada Security Assurance Company.

Government and Municipal Bond Market

Considerable Activity During Past Week and Decided Improvement in Tone — Victories Advance in Price — Quebec City and Province Both Dispose of Issues—Canadian Provincial Bonds Popular in United States

THE past week has witnessed considerable activity in the Canadian government and municipal bond market, and there appears to be a decidedly better tone. Of course, this is only natural, as the market for Canadian Victories has improved greatly.

On March 20th last, a conference between Sir Henry Drayton, minister of finance, and some of the members of the Bond Dealers' Association, was held in Toronto, and resulted in the advance in all Victories, excepting the 1927 and 1934 maturities. The comparison of the old and new prices, with the present yield, is as follows:—

Maturity.	Present price.	Old price.	Present yield
1922	99½	99	5.68%
1923	99¼	99	5.71%
1927	100	100	5.50%
1933	100½	100	5.45%
1937	102	101	5.32%
1924	98½	97½	5.85%
1934	97	97	5.80%

Accrued interest to date of delivery must be added to the above prices.

American Activity in Canadian Bonds

That high-grade Canadian provincial bonds are in demand in New York is evident by the way in which recent issues have been absorbed. The last Quebec issue, which was offered at 95.84 and interest to yield 7 per cent., is practically all gone, according to the underwriters. In a recent issue the New York Tribune said:—

"In the heightened activity in the bond market of recent days Canadian issues have been in particular demand. The new offerings of the provinces of Quebec, Ontario and Manitoba were not only quickly taken up, but also the floating supply of outstanding Canadian provincial and Dominion bonds was substantially reduced, according to bond men. Most of the business in the Canadian issues has been done over the counter."

The Wall Street Journal gives the following list of future maturities of Canadian provincial issues offered in the United States:—

Issue.	Rate %.	Maturity.
$3,000,000 Province of Ontario	5½	Sept. 1, 1953
3,000,000 Province of Ontario	5	Mar. 1, 1926
1,000,000 Province of Ontario	4	May 15, 1922
4,000,000 Province of Ontario	5	Jan. 1, '20/'24
500,000 Province of Manitoba	5	May 15, 1922
1,000,000 Prov. of New Brunswick . .	5½	Aug. 15, 1924

Coming Offerings

The following is a list of debenture offerings, of which mention is made in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
St. Joseph, Que.	$ 22,000	6	30-instal.	Mar. 30
Assiniboia R.M., Man.	16,500	6	10-years	Mar. 31
Kenora, Ont.	56,322	5½	Various	Apr. 1
Charleswood R.M., Man.	10,000	6	20-instal.	Apr. 3
Nokomis, Sask.	20,000	7	15-years	Apr. 1
Stamford Tp., Ont. . .	20,000	6	20-instal.	Apr. 5
Mount Royal, Que. . .	850,000	5½	5-years	Apr. 6
Prince Rupert, B.C.	362,000	6	Various	Apr. 14

Stamford Township, Ont.—Tenders will be received until April 5th, 1920, for the purchase of $20,000 6 per cent. 20-instalment debentures.

Mount Royal, Que.—Tenders will be received until April 6th, 1920, for the purchase of $850,000 5½ per cent. 5-year debentures, dated November 1st, 1919. A. L. Mackenzie, secretary-treasurer.

Charleswood R.M., Man.—Tenders will be received until April 3rd, 1920, for the purchase of $10,000 6 per cent. 20-instalment debentures. The money will be used for bridge purposes at Headingly. A. B. Blakely, secretary-treasurer.

Debenture Notes

Langley, B.C.—Two by-laws calling for the expenditure of $48,500 have been defeated by the ratepayers.

Blenheim, Ont.—Ratepayers have approved of the expenditure of $10,000 for new fire-fighting apparatus.

South Vancouver, B.C.—It is probable that the municipality will ask permission to float a bond issue of $200,000 for street purposes.

Essex County, Ont.—The county council has authorized the expenditure of $250,000 for road construction and $20,000 for maintenance.

Sydney, N.S.—The city solicitor has been instructed by the city council to seek legislation to borrow $225,000 for streets, schools and sewers.

Glace Bay, N.S.—The town solicitor has been authorized to draw up an act empowering the town to borrow $175,000 for the construction of a new school.

Windsor, Ont.—Three money by-laws have been carried as follows: $12,000 for street flusher; $30,000 for sidewalks; $17,000 for use in connection with the city incinerator.

Regina, Sask.—The city will have to set aside a little over $300,000 this year to provide for repayment of debenture principal, according to the report of the city treasurer.

Saskatoon, Sask.—The council has again postponed its issue of $993,000 bonds. Although it is realized that the market is improving, it is not yet considered an opportune time to float the loan.

Montreal, Que.—The borrowing of $3,000,000 to increase the working capital account to $6,000,000 is proposed. It is the working capital fund that will be available for supplying money for carrying on such public works this summer, which will require the expenditure of over $1,000,000. The borrowing of an additional $500,000 for aqueduct improvements is also proposed. A by-law has already been passed authorizing the borrowing of $1,500,000 in connection with this work.

Toronto, Ont.—By a vote of 14 to 10 the city council in committee decided in favor of the construction and equipment of the Mount Pleasant Road civic car line at an estimated cost of $1,060,000 by using $117,000 remaining to the credit of by-law No. 7,629, and applying for a private bill to raise the balance of $943,000 by issuing debentures without the consent of the ratepayers.

It has been announced that it would cost the city $225,000 to retire $1,500,000 worth of bonds falling due in New York this year. It was also stated, however, that what the city gained on the London, England, exchange rate would more than offset the loss in New York.

Edmonton, Alta.—On April 12th next ratepayers will be called to vote on borrowing $1,466,000 for capital expenditures. It was decided that the debentures should be at the rate of 6 per cent. When dealing with the rate of interest, the council was at first disposed to fix it at 5½ per cent., it being contended that that rate would help the city's credit. Subsequently, Comptroller Mitchell informed council that it was likely that the interest rate on the $2,000,000 of debentures hypothecated to the bank might have to be increased from 5½ to 6 per cent. when they were placed on the market, his information being that the city was more likely to get

a price nearer par by taking that course. It was then decided that the debentures on the by-laws to be submitted in April should bear 6 per cent. interest.

Bond Sales

Niagara Falls, Ont.—The United Financial Corporation, Ltd., has purchased $63,000 5 per cent. 20-instalment school debentures at 90.13, which is on a basis of about 6¼ per cent. Other tenders were: R. C. Matthews and Co., $56,555.10; C. H. Burgess and Co., $55,956.60; Wood, Gundy and Co., $55,774.

Montreal, Que.—Messrs. Versailles, Vidricaire, Boulais, Ltd., have purchased at 97.11 an issue of $2,000,000 5½ per cent. 5-year bonds of the Montreal Catholic School Commission. The issue was made to cover the payment of $1,000,000 short-term bonds maturing shortly, and to provide for the building of new schools. The commission paid a little more than 6 per cent. for its money.

Regina, Sask.—The city has established a precedent in the sale of $117,000 debentures locally. The sale, as an experiment in selling city bonds over the counter in the west, has been a success. The debentures were made up of two maturities, one for $56,000, maturing February 1st, 1928, and the other for $61,000, maturing July 1st, 1934. They both bear interest at 6 per cent., and have found ready buyers at 100 and accrued interest. The debentures are issued in denominations of from $50 to $1,000.

Quebec, Que.—The city has awarded its issue of $2,125,000 6 per cent. 10-year bonds to Messrs. Wood, Gundy and Co. and the Dominion Securities Corporation at 98.17, which is on a basis of about 6.25 per cent. Other tenders received were: National City Co., Ltd., Harris, Forbes and Co., United Financial Corporation, Ltd., and Hanson Brothers, 98.099; A. E. Ames and Co., R. C. Matthews and Co., C. H. Burgess and Co., Housser, Wood and Co., and R. A. Daly and Co., 97.329; Royal Securities Corporation, 97.326; Bank of Hochelaga and syndicate, 97.10.

Province of Quebec.—Messrs. Harris, Forbes and Co. and the National City Co. have purchased $3,500,000 6 per cent. 5-year bonds at 93.87, New York funds, which means that the province pays around 7½ per cent. for its money. Other bids were:—

United Financial Corporation, Ltd.	93.57
Dominion Security Corporation and Wood, Gundy and Co.	93.52
A. E. Ames and Co.	93.27

This new issue now completes the financing necessary in connection with the province's maturing obligations in New York. The deal was more profitable from the province's point of view than the previous one, which brought a price of 92.55.

Hamilton, Ont.—Messrs. Harris, Forbes and Co. and C. H. Burgess and Co. have purchased the $596,768 5 per cent. 10 and 20-instalment bonds of the city at 93.13. Bidding was very keen, as can be seen from the following list:—

A. E. Ames and Co.	92.893
Wood, Gundy and Co.	92.815
W. A. Mackenzie and Co.	92.54
W. L. McKinnon and Co.	92.536
Brent, Noxon and Co.	92.531
United Financial Corporation, Ltd., and R. C. Matthews and Co.	92.43
Dominion Security Corporation	92.38
National City Co., Ltd.	92.089

The 10-instalment bonds are now being offered to Canadian investors to yield 6 per cent., and the 20-instalment bonds to yield 5⅞ per cent.

The province of Ontario is calling for tenders until April 1st, 1920, for the purchase of $2,000,000 6 per cent. 15-year gold bonds, dated April 1st, 1920. Principal and interest is payable in gold coin at the treasurer's office, Toronto, or at the Bank of Montreal in Canada.

INSURANCE DEVELOPMENTS IN BRITISH COLUMBIA

Warning Against State Health Insurance—Suggested Protection for Disabled Veterans—Fire Prevention League Begins Work

(Special to *The Monetary Times.*)

Vancouver, March 20th, 1920.

A CONSTITUTION and set of by-laws, which it is proposed shall govern the fire boards of Vancouver and Victoria, have been passed upon by a selected committee, and will come up for ratification at an early joint meeting of the two boards. An effort is being made to have one board only for British Columbia.

The following resolution was passed at a meeting of the insurance section of the Vancouver Board of Trade: "That this section recommends for the serious consideration of the full board the danger threatening the progress of the province of British Columbia by the proposed introduction of compulsory health insurance." This resolution will have been considered at a meeting of the general council on the 18th of March.

Mutual Live Stock Insurance

At a joint executive meeting of the Dairymen's Association and the Stock Breeders' Association the following proposition was put up to Hon. E. D. Barrow, Minister of Agriculture for British Columbia: "That the farmers of British Columbia be invited to start a mutual life insurance company to write up the lives of cows." The minister expressed approval of the project. The idea is to establish a compensation fund on the theory that all government slaughtering of diseased animals is for the welfare of the whole dairying industry.

Colonel C. Douglas Hamilton, of Vancouver, proposes that the government be asked to form a nucleus of an insurance fund with the $40,000,000 appropriated for unemployed veterans, and add to it by other means for the purpose of establishing some form of insurance for the thousands of veterans who fought, and in many cases were stricken in health, but got no pension or financial benefits.

Fire Prevention Activity

The newly-formed Fire Prevention League of British Columbia met this week, with A. C. Flummerfelt, president, in the chair. J. L. Noble is secretary of the league. It was decided that the provincial government be asked to amend the Act under which the league operates, so that Mr. Thomas, whose duty it is to report extra hazardous fire risks to the government, may be empowered to order occupants of buildings to remove the cause of the risk. At the present time the fire chief is the only one empowered to take this action.

Bell Telephone to Increase Bonded Indebtedness by $5,500,000—Two New Theatre Offerings

TRADING in industrial bonds on the local exchanges was brisk during the past week, Canada Cement, Asbestos Corp., Dominion Cotton and Riordon being the feature issues. There is still, however, little prospect for new issues.

The Bell Telephone Co. of Canada, Ltd., will ask their shareholders at a special general meeting on March 31 next, for authority to increase the bond issue to the extent of $5,500,000, to increase their capital stock and amend the powers of the company with respect to the issue of bonds or debentures. At present the company is authorized to issue bonds to the extent of 75 per cent. of the paid-up capital, which at present amounts to $18,000,000 out of a total authorized of $30,000,000. The outstanding bonds, which amount to $11,149,000, mature in five years. They are a first charge upon the whole lines, works and plant of the company, but do not create lien or privilege upon real estate. The last issues of the bonds were $1,250,000 in 1911, and $4,500,000 in 1913. The last issue of common stock was $4,500,000 last year.

The Sydney, N.S., Board of Trade is endeavoring to aid in the financing the construction of a $580,000 hotel. Besides the issue of common and preferred stock, there will be a bond issue of $450,000, bearing interest at 7 per cent. Citizens of Sydney will be given a chance to purchase $100,000 worth of bonds direct, and Mr. Cozzolino, promoter of the new hotel scheme, has promised to underwrite the balance with a bonding corporation.

Famous Players Canadian Corporation

The Royal Securities Corp., Ltd., is making public offering of $4,000,000 8 per cent. cumulative first preferred shares of the Famous Players Canadian Corp., Ltd., at 100 and accrued dividends, with a bonus of 25 per cent. in common shares.

Another theatre issue in the Allen's Kingston Theatre, Ltd., $175,000 8 per cent., cumulative preferred stock, is being made. The price is 100, with a bonus of 25 per cent., common stock, and the underwriters are the Ontario Securities Co., Kingston, Ont.

Two Railroad Issues

Two large Canadian railroad issues are being offered in the United States, involving the sum of $24,000,000. According to official reports from New York, the Canadian Northern Railway is selling through a strong syndicate, headed by Wm. A. Read and Co. and the National City Co., $12,000,000 5½ per cent. equipment trust notes, $6,000,000 of which are due December 1st, 1922, and $6,000,000 due December 1st, 1924. The notes are guaranteed by endorsement as to principal and interest by the Dominion of Canada. Offering of the 3-year notes is being made at 96.64, yielding 7.01 per cent., and of the 5-year notes at 94.50, yielding 6.96 per cent.

The other issue is that of the Canadian Pacific Railway, which amounts to $12,000,000, with interest at 6 per cent. The bonds mature $500,000 semi-annually from October, 1920, to April, 1922. Offering is being made of the first twelve maturities on a 6¾ basis, and the remaining twelve on a 6⅝ basis. Those names mentioned in connection with the deal are: Guaranty Trust Co., National City Co. and the United Financial Corporation, Ltd.

ACTIVITY IN TRADING ON MONTREAL EXCHANGE

Dullness Prevailed in Toronto, However—New York Market Experienced Bad Break—Call Money at 14 Per Cent.

AFTER a week of strength, and during which several speculative favorites reached the highest quotations in their history, the New York stock market, on March 24th, encountered a bad break, which was far more severe and far-reaching than any movement since the early part of February. The extravagant operations of professional interests, combined with many street rumors and the high rate of call money, were held responsible for this. Call money, which hovered around 6 and 7 per cent. on March 18th, rose to 9 per cent. on March 22nd, later falling off to 8 per cent. On March 24th, however, another rise was experienced, the rate being 14 per cent., with renewals around 7 and 8 per cent.

In Montreal, activity and strength marked operations. Those stocks which furnished the most trading were: Spanish River, preferred and common, Atlantic Sugar, Dominion Canners, Laurentide and National Breweries. Spanish River common led with a turnover of 17,249 for the week ended March 24th, the closing price being 92¾, a gain of 5½ points as compared with the previous week. Preferred was active, with total sales of 5,490, and a gain in price of 2½ points. Atlantic Sugar declined 1⅜ points to 89⅝, with a turnover of 12,018 shares. Dominion Canners and Laurentide made substantial gains, with sales of 11,685 and 8,288, respectively, while National Breweries dropped a fraction of a point to 49½, with sales of 4,965. Abitibi made a big advance toward the latter part of the week, although trading was not heavy. The closing quotation was 322, as compared with 282 at the end of the previous week. This movement is evidently due to the placing the common stock of the company on a 30 per cent. dividend basis.

Trading on the Toronto exchange was extremely dull, the most active stock being Brazilian, which had a turnover of 1,801 shares, and a drop in price of 1 point to 47 bid, as compared with the preceding week. Dominion Steel Corporation experienced a rise of 1¼ points to 71¼ bid, with total sales of 1,281. Other industrials furnished little trading, and the price movements either way were small in proportion.

Some declines were registered in the banking section, the only stocks showing advances being Royal 1 point and Montreal 7 points. Merchants and Union were unchanged at 189 and 156, respectively, while all the others showed drops of ½ to 4 points.

It's a Hard Rub

For a woman to unexpectedly find it necessary to become a breadwinner. You wouldn't like your wife to come to that, would you?

But what about your widow? Why not provide for her a regular monthly income to begin at your death and continue as long as she lives? You can do it by means of an Imperial Life policy.

THE IMPERIAL LIFE
Assurance Company of Canada
HEAD OFFICE - TORONTO

TRAINING OF BANK MANAGERS

(Continued from page 12)

information. This method worked well enough when the banks were smaller, and the members of the staff as a rule more experienced. Just now, however, conditions have decidedly changed. The banks are larger, the expansion has been rapid, and the work, formerly handled by experienced men, is often of necessity done by boys and young women of slight business experience, thereby throwing more responsibility on the seniors in charge. Even under the old system the gap between accountant and manager was wide, the ordinary work of an accountant, then as now, being entirely routine which, of itself, gives no insight into the manager's dealings with customers. In some institutions accountants are supposed to have access to head office correspondence, but, in practice, it is doubtful if this is always observed, particularly if the manager's work is the subject of adverse comment, as it sometimes is. As a rule, the transaction is completed when it reaches the accountant, and his connection is limited to recording it in the office books, yet the duties of his position are supposed to train him to take charge of a branch. It would surprise many to know, that frequently men are sent out as managers, who are unable to analyze a customers' statement intelligently. It is not because they are not anxious to learn, nor yet because they have not the ability, but because, in most cases, they have had no opportunity. How many managers have analyzed and discussed a statement with their accountant?

Trusts to Luck at First

The result is that when promotion comes, and the new manager is thrown on his own resources, there is often a great deal of luck in his first operations. He may be fortunate and get a branch with a friendly clientele, attracted to the institution through the pleasant relations established by his predecessor, or, he may be landed in a locality where the former manager has antagonized everyone. Again he may be a city man, sent to a small country branch, or to one in a section where the business is of an absolutely different character to any he has been accustomed to. In any case he gets very little practical help from his head office, unless he specially asks for it, and naturally he hesitates to show his ignorance. The ancient system of teaching a lad to swim was to throw him into the water and let him struggle. It was no doubt effective in some cases, and some fine swimmers began that way, but in many others the process destroyed the boy's confidence. Nowadays, however, the best practice is to provide instruction first, in order to develop confidence before putting them to the test, and a wonderful increase in the number and efficiency of swimmers has resulted, as sporting records show.

Intensive training in banking has been adopted by the National City Bank of New York, and regular courses for the members of its staff are held, with most satisfactory results. That bank has entered the foreign field, and every man intended for that branch of the service is given a thorough grounding in foreign banking practice and banking law, before leaving the home office.

Banking from the bank's standpoint is largely a "selling proposition." The bank has service to sell and wants customers whom it can supply. Is there any reason why it should not take the same care in instructing its representatives as the mercantile corporation? The problem is the same, the only difference is in the commodity handled, and the method of applying the principles governing the more complex business of banking.

A bill before the Massachussets legislature authorizes insurance companies of that state to invest in the public funds of the Dominion of Canada or of any province of the Dominion of Canada.

Investments and the Market

St. Maurice Paper Profits Show Big Increase — National Breweries Year Best in History of the Company — Ames-Holden Report Reflects Good Conditions in Tire, Felt and Footwear Trade — Lake Superior Bond Negotiations Completed

Grand Trunk Railway.—Operations of the company for 1919 show a surplus of £277,600 for lines operated in Canada, as compared with £338,600 in the previous year. After allowance was made for an estimated deficit of £276,500 on account of branches under United States government control, there remained a surplus of £1,100, as against £1,800 in 1918.

St. Maurice Paper Co.—The annual report of the company for 1919 shows profits of $1,418,804, compared with $1,168,488 in 1918. The surplus for the year showed an increase of nearly $30,000, as compared with the previous period, the figure standing at $529,425.

The control of the St. Maurice Company is invested in the Union Bag and Paper Co.

West India Electric Co., Ltd.—Gross earnings of the company for 1919 amounted to $383,665, according to the financial statement presented at the annual meeting in Montreal this week, compared with $294,725 in 1918 and $287,211 in the preceding twelve months. The increase in gross receipts, amounting to $88,940, however, was offset by a larger one in operating expenses, which grew by $92,360 in the year to $247,598. This, together with higher taxation charges during the period, brought the net earnings from operations about $6,000 under the 1918 level.

La Rose Mines, Ltd.—The report of the company for the year ended December 31st, 1919, shows a surplus of $514,424, compared with $456,046 in the previous year. The net profit on production was $30,205, and with added income on ground rentals amounting to $6,978 and interest and exchange amounting to $14,554, brings the total up to $51,736, as against $45,544 in 1918, an increase of $6,192. Of its entire surplus of $514,424, La Rose holds $372,834 in cash, call loans and Victory bonds. At the end of 1919 the buildings and equipment were valued at $52,768, as against $54,317 for the previous year.

Ticonderoga Pulp and Paper Co.—The company, which is a subsidiary of the Riordon Company, for the year ended December 31st last, showed gross income of $618,824, as compared with $881,426 in 1918. After allowing for depreciation and deducting bond and other interest, as well as disbursing $108,000 in bonuses to directors, officers, and employees, there remained a surplus of $281,685, as against $218,970 at the end of the previous year, and $552,568 in 1917.

The year's surplus was equivalent to 70.4 per cent. in 1919, as compared with 56.4 per cent. in 1918, and over 150 per cent. in 1917. Dividends on the small outstanding capital stock of the company, which was increased in the year by $12,000 to $400,000, amounted to $476,000, as compared with $649,200 in 1918, and $73,600 in 1917. These disbursements last year resulted in the reduction of the surplus carried in the balance sheet from $861,285 at the end of 1918 to $604,556 as at December 31st last.

Western Grocers, Ltd.—The annual statement of the company, which formerly went under A. Macdonald Co., Ltd., reflects the satisfactory conditions that have prevailed during the year, and after deducting all operating charges, interest charges, making provision for bad and doubtful debts and writing off depreciation on warehouse, office and delivery equipment, and depreciation on buildings, profits amount to $324,000 as compared with $303,464 in 1918. After making provision for dividends on the preferred stock, amounting to about $12,400, earnings on the common of $311,600 remained, equal to approximately 10.4 per cent. During 1919, Western Grocers absorbed the Cranbrook Jobbers, Limited, and the Nelson Jobbers, Limited, while they also opened a new branch at The Pas, Manitoba, giving the organization a total of thirteen branches.

National Breweries, Ltd.—The annual report of the company for the year 1919, presented to shareholders at the annual meeting in Montreal on March 17th, revealed the best showing in the history of the company. The total trading profits of the organization in that time amounted to $1,061,350, after war taxes to the end of the year, as compared with $616,266 in the twelve months of the 1918 fiscal year, and $417,226 in 1917. Net earnings applicable to the common shares amounted to $637,146 for the fourteen months, against $236,510 in 1918 and $33,049 in 1917. The surplus on the year's operations was $479,345. This, added to the previous surplus, gives a profit and loss balance to be carried into the current year of $1,379,938, against $900,593 in 1918, and $664,083 in 1917.

Total current assets amount to $2,681,369, against total current liabilities of $350,237, leaving surplus current assets (working capital) of $2,331,182. This is an increase of $125,121 over the showing at the end of 1918.

The following directors were elected for the ensuing year:—Andrew J. Dawes, president; Vesey Bosewell, first vice-president; H. A. Ekers, second vice-president; Thomas Cushing, George R. Hooper, Duncan Robertson, C. E. A. Bosewell, N. J. Dawes, L. A. Ekers, Gordon Cushing and A. J. Grubert. Norman J. Dawes is managing director, and J. D. Hudson, comptroller and secretary-treasurer.

Ames-Holden-McCready, Ltd.—The financial statement of the company for the eight months ended December 31st last, reflects good conditions in the tire, felt and footwear trade. This year it is not possible to make a comparison with the previous year, except in some special instances, as the statement now going forward to shareholders only covers a period of eight months from May 1st to December 31st. This is due to the fact that for the convenience of the recently associated companies, the company has found it more convenient to have its fiscal year terminate on December 31st instead of on April 30th, as heretofore.

In the general boot and shoe trade the eight months from May to December are generally regarded as the quiet months, as about 40 per cent. of the revenue of the year is obtained in these months, and 60 per cent. during the last four months, when shipments in anticipation of spring and fall trade assume their largest value. Notwithstanding this condition, however, the net profits of the eight months of the period amounted to $307,400, which compares with $323,321 for the entire previous year. The surplus account now stands at $992,354, as compared with $830,729 at the end of the previous year.

The general statement of assets and liabilities shows total current assets of $5,097,457; accounts receivable, $511,009, and due to the company on account of debentures sold, $228,750. Current liabilities amount to $2,519,236, and include bank loans against inventories, $1,410,000; accounts payable, $681,862; accrued interest on bonds and debentures and accrued charges and wages, $80,266, and dividend on preferred stock payable January 2nd, 1920, $43,750.

The president, T. H. Reider, says:—The prospects for 1920 are promising. Retail footwear orders on hand at December 31st, for spring delivery, amounted to $2,036,002. Since January 1st salesmen have been taking footwear orders for fall and winter delivery, and in many lines the volume is two and three times that of a year ago.

DIVIDENDS AND NOTICES

Est. 1884

20 Victoria St.,
Hon. Supervisor in Toronto.

Lake Superior Corporation.—Negotiations have been completed with the bondholders' committee representing the Algoma Central and Hudson Bay Railway Co. and the Algoma Central Terminals, Ltd., in London, according to President W. Cunningham. Meetings of the bondholders will be called immediately for the ratification of full settlement and discharge on all defaults in guarantees given by the Lake Superior Corporation upon the following terms:—

The present outstanding issues of $10,080,000 Algoma Central and Hudson Bay Railway Co. first mortgage 5 per cent. bonds, fully guaranteed by the Lake Superior Corporation as to principal and interest, to be converted into an issue of $10,080,000 3 per cent. bonds, guaranteed by the Lake Superior Corporation as to the first 40 per cent. of the principal and as to the first 1 per cent. of the annual interest.

The present outstanding issue of $5,000,000 Algoma Central Terminals, Ltd., first mortgage 5 per cent. bonds, fully guaranteed by the Lake Superior Corporation as to principal and interest, to be converted into an issue of $5,000,000 5 per cent. bonds, guaranteed by the Lake Superior Corporation as to the first 40 per cent. of the principal and as to the first 4 per cent. of annual interest.

The above, in effect, reduces the guaranteed obligations of the Lake Superior Corporation from $15,000,000 to $6,003,200 in principal and from $754,000 to $300,160 in annual interest. The Lake Superior Corporation, in consideration of its being relieved of its guarantee of $9,001,800 on said bonds and in full liquidation of unpaid accumulated guaranteed interest approximating $3,000,000, or a total of, say, $12,000,000, agrees to deliver for distribution to said bondholders $4,000,000 par value out of an issue of $16,500,000 of Algoma Steel Corporation second preferred 5 per cent. stock, Class A, and $3,000,000 par value out of an issue of $6,500,000 Algoma Steel Corporation second preferred 5 per cent. stock, Class B.

Any dividends declared on said above stocks during the period ending January 1st, 1923, to be payable to the Lake Superior Corporation and thereafter to the holders of said stock.

Under the above settlement the Lake Superior Corporation is to be reinstated in control and management of the railway and terminal companies, and the bondholders' committee is to surrender, free and unencumbered, its holdings of $3,000,000 out of an issue of $5,000,000 5 per cent. second preferred stock of the Algoma Central & Hudson Bay Railway Co., to the Lake Superior Corporation as its sole property. When the agreement has been duly ratified by the above bondholders a meeting of the stockholders of the corporation will be called for the purpose of completing the ratifications.

ADDITIONAL INFORMATION CONCERNING FIRES

Hamilton, Ont.—March 15—The Charcoal Supply Company's shed, owned by the Standard Chemical Co., Ltd., was damaged. Cause, sparks from stove. Estimated loss, $3,000, covered by insurance.

Few Changes In February Bank Statement

Current Loans in Canada Increased, But Call Loans Decreased During Month Call Loans Abroad Increased by $14,000,000—Falling Off in Circulation and in Demand Deposits—Savings Deposits Continue to Increase

	February, 1919.	January, 1920.	February, 1920.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$ 566,775,434	$ 621,408,024	$ 620,069,555	+ 9.5	— .16
Deposits after notice	1,018,184,512	1,163,297,037	1,187,027,307	+16.6	+ 2.06
Current loans in Canada	1,095,301,791	1,226,962,963	1,257,015,902	+14.7	+ 2.6
Current loans elsewhere	130,590,063	182,533,124	180,711,238	+38.4	— 1.09
Loans to municipalities	36,830,183	46,147,388	52,690,790	+44.4	+13.04
Call loans in Canada	79,154,121	132,015,334	127,251,919	+ 6.7	— 3.7
Call loans elsewhere	155,983,681	170,206,805	184,469,882	+18.7	+ 8.2
Circulation	210,894,809	237,269,805	223,979,666	+ 6.1	— 5.9

THE above are the principal changes shown by chartered banks' statements as at February 28, compared with one month and one year previous. Savings deposits continue to grow, though not so rapidly as last year. Demand deposits decreased slightly, along with a reduction in current loans in Canada. Additional funds have been placed on call in New York.

The following additions to paid-up capital and reserve were made during the month of February:—

	Capital subscribed.	Capital paid up.	Reserve.
Merchants	......	$ 7,450	......
Union	......	7,420	......
Hamilton	....	30	$200,015
Sterling	......	653	......
	......	$15,553	$200,015

The figure of circulation quoted at the beginning of this article is the maximum for the month, showing a decrease of $13,290,139, compared with the maximum for January. The total outstanding at the end of the month was $223,377,781, compared with $216,691,916 at the end of January. The balances due to the Dominion government have been reduced by $7,500,000, and those to provincial governments by $400,000.

The course of current and savings deposits for the past thirteen months was as follows:—

	Deposits payable on demand.	Deposits payable after notice.
1919—February	$566,775,434	$1,018,184,512
March	566,797,268	1,037,851,766
April	571,412,857	1,070,985,080
May	568,730,118	1,107,983,072
June	605,927,027	1,139,569,570
July	584,176,765	1,175,092,155
August	584,300,855	1,196,632,931
September	650,743,015	1,277,437,715
October	705,280,241	1,262,746,984
November	728,657,589	1,137,858,277
December	703,329,292	1,138,086,691
1920—January	621,408,024	1,163,297,037
February	620,069,555	1,187,027,307

Deposits outside of Canada are $277,478,631, compared with $285,203,939 at the end of January.

The following table shows deposits for the past six years:—

Feb.	On demand.	After notice.	Total.
1915	$331,415,179	$ 671,088,613	$1,002,503,792
1916	389,825,667	827,242,609	1,118,068,276
1917	430,331,801	880,456,637	1,310,788,438
1918	569,266,642	908,822,988	1,478,089,630
1919	566,775,434	1,018,184,512	1,584,959,946
1920	620,069,555	1,187,027,307	1,807,096,862

The principal changes among the other items on the liability side are an increase of $1,724,120 in deposits by and balances due other banks in Canada, an increase of $3,168,630 in those due banks outside of Canada and the United Kingdom, and small reductions in bills payable and acceptances under letters of credit.

Turning to the assets statement, we find the following increases in holdings, of coin and notes:—

Gold and sub. coin in Canada	+	$ 54,471
Gold and sub. coin elsewhere	+	30,239
Total	+	$ 84,710
Dominion notes in Canada	+	1,570,228
Dominion notes elsewhere	—	196
Total	+	$1,570,032

There is no change in the deposits with the minister of finance for the security of note circulation, but deposits in the central gold reserve have increased from $103,200,000 to $104,450,000. Holdings of notes of other banks have increased by $3,500,000, but holdings of cheques are $2,000,000 less.

Amounts due from banks and banking correspondents in the United Kingdom have been reduced by nearly 50%, to $16,241,197. Holdings of Dominion and provincial government securities, and of Canadian municipal securities and of those other than Canadian, are reduced by $1,357,769 and $14,804,712, respectively.

Loans to municipalities are increased for the month by $6,543,402, and those to provinces by $1,818,900, showing substantial increases over the same figures for one year ago.

TO DEVELOP NEW BRUNSWICK POWER

The New Brunswick government's policy with respect to the development of the water powers of the province, and the legislation to make that policy effective, have been presented to the legislature by Premier W. E. Foster, who also tabled the report of the New Brunswick Power Commission. In brief, the policy calls for development of three water powers in various parts of the province to supply the most pressing electrical needs of the larger centres. This work is to be carried on as a public enterprise by a permanent commission, and the sum of $1,000,000 is to be set aside this year to meet immediate expenditures. The New Brunswick Power Commission has been investigating this subject for some time past, having been appointed because it was felt that full use was not being made of this resource.

RAILWAY DEFICIT LARGER THAN ANTICIPATED

Combined National System Did Not Meet Operating Expenses During First Year of Operation—Minister Submits Figures to Parliament

(Special to *The Monetary Times.*)

Ottawa, March 31, 1920.

RESULTS of the first year's operations of the combined national railway system were presented to parliament on March 30 by Hon. J. D. Reid, minister of railways and canals. While earnings were considerably greater, a total deficit of $47,000,000 was incurred, this figure including the deficit on the Grand Trunk Pacific, which was operated by the department after it announced its inability to meet bond interest. The deficit is made up as follows: Operating loss on Canadian Northern, $6,500,000; operating loss on Intercolonial and Transcontinental, $7,500,000; interest and fixed charges on Canadian Northern, Intercolonial and Transcontinental, $19,000,000; operating loss on Grand Trunk Pacific, $5,500,000; and fixed charges on Grand Trunk Pacific, $8,500,000.

Freight Traffic Decreased

The minister regretted this bad showing, but stated that as the Grand Trunk Pacific and the Transcontinental were really colonization roads, he did not think it would be possible for them to pay expenses for many years. Although the freight revenue was greater, there was a falling off of three million tons in freight traffic. Eleven and one-half million passengers were carried, an increase of one and three-quarter millions. The wage bill for the year exceeded $73,000,000, an increase of $39,000,000. Dr. Reid explained that, whereas in 1914 the average wage per year of railway employees in Canada was $700, in 1919 on the National system it was $1,447.

Regarding a construction program, the minister said that again this year construction in western Canada would be confined to branch lines on which work was well under way. In all, 349.6 miles are to be built, and 123.4 miles are to be graded. While there were many branches in the west, as also some important connections in the east, which were needed, they would not be proceeded with until the financial situation improved. The Hudson Bay Railway would not be completed this year, for the same reason.

While the management of the road took the position that, if rates were increased in the United States, probably by 26 per cent., they should also be similarly increased here, Dr. Reid said that he was not prepared to say that freight rates should be increased generally for the purpose of assisting the C.N.R. Another proposal to carry on the operation of the system was the continuing of the deficits for a few more years, which he did not think would be for long. It was his intention to leave it to the consideration of the House and the Canadian people to say which course they desired to have adopted. Dr. Reid said he did not think it would be practicable to tax out of the C.P.R. any increase in earnings.

GOVERNMENT BOND QUOTATIONS

The following quotations of active bonds are supplied by the National City Co., Ltd., and are in New York funds:—

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920)	97 15/16	98 1/16
United Kingdom 5½% (Nov. 1, 1921) ..	95½	96
United Kingdom 5½% (Nov. 1, 1922) ..	92¼	92¾
United Kingdom 5½% (Aug. 1, 1929) ..	89¾	90¼
United Kingdom 5½% (Feb. 1, 1937) ..	88¼	88¾
City Paris 6% (Oct. 15, 1921)	90	90¼
French Cities 6% (Nov. 15, 1934)	89	89½

Japanese Govt. 4% (Jan. 1, 1931)	63½	63¾
Japanese Govt. 1st 4½% (Feb. 15, 1925)	77¼	77¾
Japanese Govt. 2nd 4½% (July 10, 1925)	77	77¾

TRADE BOARD OPPOSES HEALTH INSURANCE

Compulsory Live Stock Insurance Again Discussed—Automobile Insurance Difficulties

(Special to *The Monetary Times.*)

Vancouver, B.C., March 27th, 1920.

THE Vancouver Board of Trade has gone on record as opposed to state health insurance by a vote of 41 to 19. By resolution, it was decided to take no further action until the Dominion government had reported on the matter, as they had decided to do some time ago. Mr. Winn, who was chairman of the state health insurance commission, was present, and again advocated the measure, stating, in the course of his remarks, that the Insurance Federation was the only body opposed to the Act. Representatives of several industrial bodies present challenged the accuracy of those statements. Mr. Winn concluded his remarks by saying that there would be no state health insurance legislation passed at this session of the British Columbia legislature.

Farmers' Insurance Company Probable

The proposal for a farmers' insurance company to insure the lives of cattle seems to be taking more definite shape. Hon. E. D. Barrow, provincial minister of agriculture, is said to favor the idea. R. H. Pooley, M.L.A., has advocated in the House some form of government compulsory insurance among dairymen. He was supported by David Whitesides, M.L.A., who said that another twelve months should not be permitted to pass without this step being taken. Mr. Barrow said that dairymen were gathering the necessary data, and that next year the necessary legislation would be passed.

The police of Vancouver have been instructed to make war on automobilists who break traffic regulations, owing to the very numerous accidents of late, some of them fatal. The last fatal accident, caused by a driver of a stolen car running down and killing a young woman, caused a great deal of indignation and many appeals to the police to be more strict in enforcing the law, while joint action is being taken by the Automobile Underwriters' Association and Automobile Club, requesting that a detective be assigned to the single duty of securing evidence in cases of stolen autos and tires.

The proposed amendments to the Motor Act are in print, and do not appear to be at all drastic. The speed limit remains at fifteen miles in the city and thirty in the country, so that the rumor that the provincial government were to remove the speed limit has been set at rest. The persistent rumor that the rule of the road was going to be changed to conform to the United States regulations is also without foundation.

EXCHANGE QUOTATIONS

Messrs. Glazebrooke and Cronyn, exchange and bond brokers, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. funds	8 9-16 pm	8 11-16 pm	....
Mont. funds	Par.	Par.	⅛ to ¼
Sterling—			
Demand	$4.1850	$4.1950	....
Cable transfers	4.1950	4.2050	....

The New York quotations on European countries, as supplied by the National City Co., Ltd., as at March 31, 1920, are as follows: London, cable, 387½, cheque, 386¾; Paris, cable, 14.90, cheque, 14.92; Italy, cable, 20.55, cheque, 20.60; Belgium, cheque, 14.05; Swiss, cheque, 5.73; Spain, cheque, 17.30; Holland, cheque, 37; Denmark, cheque, 18.50; Norway, cheque, 19.40.

P. M. Liddell & Co., Vancouver, have been appointed British Columbia representatives of the Continental Guaranty Corporation, head office Toronto, with branches in New York and London England, to handle automobile financing, both wholesale and retail.

FUNDS FOR MANITOBA RURAL CREDITS

HAVING failed to reach an agreement with the Canadian banks for loans to the rural credits societies of the province, the Manitoba government has decided to finance them itself, and to accept deposits from the public to secure the necessary funds. There has been some disagreement in the province regarding what should be done. G. W. Prout, M.L.A., has resigned from the office of administrator, but it is understood that the other officers will continue the administration of the Act. Mr. Prout had desired the government to make it possible for a member of the legislature to have charge of the operations of the act, and to receive a salary for this work.

The new legislation was introduced in the assembly on March 24th, by Hon. Edward Brown, provincial treasurer. The Act is entitled, "The Provincial Savings Act." Power to accept deposits is given in the second clause, reading as follows: "The Lieutenant-Governor-in-Council is authorized and empowered to borrow money from such persons, in such amounts, and on such terms of re-payments as may seem proper." The control is to be vested in a board of trustees, consisting of not more than ten and not less than three members, and local boards may be appointed throughout the province.

The money secured in this way is to be loaned under the Rural Credits Act, or may be invested in Dominion or provincial bonds, or bonds of Manitoba municipalities.

As previously reported in these columns, Hon. Edward Brown, after consulting with bankers in the east early in March, announced that the 6 per cent. arrangement would be continued this year, with the understanding that a higher rate would be authorized by the legislature at the next session. There was some misunderstanding, however, regarding the terms of the agreements. In a letter to the provincial treasurer, F. L. Patton, chairman of the western sub-section of the Canadian Bankers' Association, said: "The council of the Canadian Bankers' Association having taken the view that the matter was one to be decided by each bank for itself, the western representatives of the banks have communicated with their head offices, and I am now advised that in the absence of a definitive understanding for an increase in the rate at the end of the present season, most of the banks are wholly unwilling to continue lending to members of the rural credit societies at the rate of 6 per cent. net now provided for by the act."

Mr. Patton, in his letter, then went on to explain that the banks had always protested against the fixation of the rate at 6 per cent. by the government, but had financed the banks in the expectation that the unfairness of this rate would be recognized in due course; that the societies had been organized as adjuncts to the banks, but that if public deposits were going to be accepted in competition with the banks, the latter could scarcely be expected to lend money to the societies at less than current rates; while 7 per cent. is considered a fair rate for such loans in the west, the banks had offered a compromise rate of 6½ per cent. and that the banks, like all other institutions, are meeting increased costs of operation, but money rates have not been raised. In conclusion, Mr. Patton said:—

"While each bank is entitled to act independently, I am of opinion that banks interested would grant approved credits for rural credit societies during the present year at 6 per cent. net, on receiving positive assurance from the provincial government, that at the next session of the House the Rural Credit Societies Act will be amended either by increasing the rates or by eliminating the fixed rate. Obviously, the amount of credit to be granted to any society or any individual member is a matter to be determined by the lender from time to time."

2/4/20

ADJUSTMENT—NOT READJUSTMENT

It has been repeatedly emphasized in political, commercial and financial circles that after the war conditions cannot revert to those of 1913—that the war has produced a permanent change. Nevertheless we persist in talking of "readjustment," viewing pre-war conditions as the goal towards which present developments should lead, although they seem to be working out in an entirely different way. This point was impressed by Alexander D. Noyes, financial editor of the New York "Evening Post," in an address before the Canadian Club, Toronto, on March 29. On the other hand he pointed out that the statements sometimes made that government authority had been destroyed as a result of the war was quite wrong.

Analysing the principal features of the present situation, Mr. Noyes dealt first with the political uprising. This had taken the form, first, of a downfall of practically all remaining monarchies, and second, the ambitions of organized labor as a class separate and distinct from the citizens as a whole. Direct action had been taken by labor in Russia and Germany, with unfortunate results in Russia at least. The possibility of any one class dominating politics and controlling industry he did not consider probable. The second phase of the present situation Mr. Noyes considered to be the greatly increased production brought about by the war.

In summing up, Mr. Noyes compared the effect which a league of nations would have in the present disorganized world to the effects following upon the adoption of a constitution by the American states in 1783. It would have a stabilizing effect, and he believed that when the transition period was once passed, the sequel would be better, not worse. The power of economic production, and of national revenue has been underestimated, he said, though Europe had not got on its feet as quickly as had been anticipated.

IRRIGATION DISTRICT BONDS

Securities based on agriculture, which is and for some time will continue to be the principal industry of Canada, should rank second only to those of governments and municipalities, which have all branches of industry for security. Bonds of stable farming communities such as Ontario counties have always been considered better than those of most urban centres. Bonds of an irrigation district, even if there is no provincial or Dominion guarantee, should, therefore, rank high among industrial securities and if the district has the power to levy taxes to meet its obligations it will virtually be a municipality, and its bonds municipal securities.

Canadian bond houses will do well to consider the merits of irrigation bonds, for it is probable that considerable amounts will be coming on the market during the next few years, and unless investors are educated as to the merits of the securities the business will go across the line. The market is not now in a condition to encourage a bond house to introduce a new security, however, and such projects are, therefore, not likely to be received with favor. When a leading Canadian bond house was approached regarding financing one of these issues, it replied as follows: "When this proposition is whipped into shape, the legislation necessary obtained, and the legality of the bond issue passed upon, providing, of course, that the province guarantee the issue, we should be glad to be advised and consult with you as regards the term of the bond, the rate of interest it will bear, and discuss the price we are prepared to secure for you on the issue." Meanwhile, United States houses are actively negotiating for the issue. While most of it would no doubt be sold to investors there, it would be desirable to have some part of the issue placed in Canada, and for this purpose it should be brought to the attention of the Canadian public through investment organizations on this side.

LOANING INSTITUTIONS IN THE WEST

When the development of the Canadian west had reached a stage at which use could profitably be made of substantial amounts of capital, the financial institutions of the east were not slow in meeting the situation. The banks had been in the forefront of expansion, and the mortgage loaning institutions followed with the funds necessary for the improvement of property. With the increase in wealth in the west in more recent years, the trust companies of the east have established branches there, not only investing funds, but also offering their services as executors and administrators for the benefit of residents of the west.

At the annual meeting of the Dominion Mortgage and Investment Association in Toronto a few weeks ago, Premier Martin, of Saskatchewan, acknowledged the important part which eastern financial institutions had played in developing the west. He also pointed out, however, that it had been profitable business, and there is no doubt but that, in spite of frequent differences of opinion on details, both the west as a borrower and the east as a lender have benefited by the transactions. Competition for funds in Ontario and Quebec has always been keen, and the success of a financial institution depended to a large degree on its ability to maintain high earnings. As the west was a new country, money rates have been highest there, and good connections with loan agencies in the west were, therefore, of great value.

The financial growth of the western provinces has now reached such a stage as to encourage the establishment of local institutions. The west now has a number of life and fire insurance companies, trust and loan companies, a bank in Saskatchewan, and one large bank some years ago moved its head office to Winnipeg, The main difficulty of the loaning institutions has been to secure funds to meet the demands, and this has been accentuated during the money stringency of the war period. This point was referred to by J. F. Bole, president of the Saskatchewan Mortgage and Trust Company, at their annual meeting on February 19, and he intimated that connections were being made to secure more funds. A. E. Whitmore, the vice-president, said: "In this western country a trust company should have funds for loaning purposes. This country is still a borrowing country and will probably continue to borrow money for an indefinite period. Money is required to develop our natural resources; it takes capital to transform the virgin prairie into improved productive farms. During the past we have not been able to meet the demand upon us and your directors are now trying to work out a solution of the problem."

CO-OPERATION IN MARITIME PROVINCES

After being discussed from time to time for fifty years, a political union of the maritime provinces seems still impossible. A step in that direction will probably be taken in the near future, however, in the form of co-operation in certain lines of endeavor. The New Brunswick government was waited on by representatives of the Maritime Board of Trade on March 26, to discuss this subject, and Premier Foster undertook that New Brunswick would call a conference of the three provinces at an early date.

Among the subjects for joint action are representations which will be made from time to time, to the Dominion government, on commercial questions regarding which the maritime provinces are already in accord. Educational authorities have already expressed themselves in favor of standardization, and on such matters as road construction, railways, and the development of natural resources there is room for profitable co-operation. If benefits are derived in this way, the greater saving which would result from political union, by eliminating whole government departments and strengthening credit, will be more apparent.

International Trade

In the transaction of foreign business, knowledge and experience count for much. The experience gained by this Bank at its own offices in such centres of international trade as the following:

London, Eng.	Mexico City
New York	San Francisco

is available for extension of Canadian trade abroad. In addition it maintains a Foreign Department specially equipped to handle all foreign exchange transactions.

CHIEF CANADIAN AGENTS.

Canadian Bank of Commerce Bank of Montreal

PERSONAL NOTES

Major C. F. Hanson has joined the company of Hanson and Ferguson, Montreal stock brokers.

Mr. Charles Bruce Pitblado, Jr., connected with J. Pitblado and Company, stock brokers, Montreal, has been elected a member of the Montreal Stock Exchange.

Mr. Gordon Taylor, connected with A. E. Osler and Company, was this week elected a member of the Toronto Stock Exchange.

Mr. John H. Romig, for several years connected with the head office of the Monarch Life Assurance Company, Winnipeg, has been appointed Ontario field secretary for that company, with headquarters on the third floor of the Temple Building. Mr. Romig's duties will be to look after the head office's interests in this province and to develop the field organization which is already assuming substantial proportions.

Mr. Egbert W. West, who was recently elected president of the Glen Falls Insurance Company, was born in Glen Falls and entered the service of the company in 1873. From time to time he was promoted and was special representative for a considerable territory for about twenty years. He also served as the company's general agent, secretary and vice-president. His connection with the institution covers a period of forty-six years.

Mr. C. C. Balfour, Inspector of Branch Returns of the Union Bank of Canada, Toronto, Ont., has been appointed to the position of assistant chief accountant, to be resident in Winnipeg, will leave Toronto early in April to take over his new duties. Mr. Balfour, who is well known in banking circles in the city, has been in the service of the Union Bank of Canada for a long period, most of which time has been divided between the Montreal and Toronto branches in varying capacities. He entered the bank at Montreal as a junior clerk in 1903. From 1912 until 1914 he was the assistant manager of the main Toronto branch, King and Bay Streets. From 1914 until 1918 he was manager of the St. Catharines, Ont., branch and was then transferred to Toronto and attached to the eastern superintendent's department as Inspector of branch returns.

Mr. H. S. Osler, formerly vice-president of the Canadian Mortgage and Investment Company, Toronto, has been elected to the office of president. He succeeds Mr. L. A. Hamilton, who has resigned. Mr. Hamilton's business connections require his absence from the city for a considerable part of the year, and it is for this reason that he requested to be relieved of his duties on the board. Mr. Joseph Henderson, who has been one of the directorate for some time, becomes vice-president. Two new directors have been elected in the presence of Mr. Charles Beatty and Mr. Geo. Perry.

BRITISH COLUMBIA ESTIMATES HIGHER

Increase of About $4,000,000 in Revenue, and of About $3,000,000 in Expenditure, Anticipated by Finance Minister

Estimated receipts for the fiscal year ending March 31, 1921, of $13,978,245, compared with the estimate made last year of $9,985,390 for the present fiscal year; and estimated outlays of $17,410,673, against $14,137,485 for the present fiscal year, have been presented to the British Columbia legislature by Hon. John Hart, minister of finance. According to these figures the minister expects an increase in receipts during the coming year of $3,992,855 with an increase in expenditures for conducting the business of the province of $3,273,188. The expenditures on current account are estimated at $13,960,711 and on capital account $3,449,961.

The estimated revenues are set forth as follows:—

Current Account

Department of Agriculture	$ 45,000
Attorney-General	1,552,500
Education	45,500
Finance	7,689,715
Fisheries	36,000
Lands	4,009,000
Labor	30,000
Legislation	2,000
Mines	162,000
Provincial Secretary	306,630
Public Works	61,900
Railways	38,000
Total receipts	$13,978,245

Expenditures are estimated as follows:—

Current Account

Public debt	$ 1,838,378
Legislation	109,170
Premier's office	13,880
Department of agriculture	342,736
Attorney-general	3,487,884
Education	2,864,613
Finance	957,679
Fisheries	18,090
Industries	27,040
Lands	1,324,395
Labor	97,600
Mines	375,201
Provincial secretary	2,013,086
Public works	2,745,233
Railways	49,900
Total current account	$13,960,711

Capital Account

Sinking funds	$ 1,183,761
Pacific Great Eastern	907,200
B.C. House, London	9,700
Songhees reserve	50,000
Johnson St. bridge	200,000
Roads, streets, bridges and wharves	116,300
Industrial school and boys' sub-normal school	250,000
Police station, bridge crossing	5,000
Police station, Kelowna	3,500
Police station, Clinton	5,000
Police station, elsewhere	5.000
Mental hospital, Essondale	81,000
Buildings, Pouce Coupee	12,000
Buildings, Williams Lake	20,000
Buildings, Barkerville	3,500
Technical school	175,000
Forestry offices	18,000
Okhalla prison farm	5.000
Main highways, etc.	300,000
Total capital account	$ 3,449.961

OPPORTUNITIES FOR AMERICAN INDUSTRIES

Canada is United States' Second Best Market, Because of Proximity, Language and Customs

THOUGH American industries may lose business as a result of the depreciation of the Canadian dollar, they may regain it by opening branches here. Discussing this phase of the exchange situation in the "Trade Bulletin" of the Alexander Hamilton Institute for February 25, E. L. Stewart Patterson, Eastern Superintendent of the Canadian Bank of Commerce, says:—

"It is apparently not fully realized in the United States that, owing to exchange and other conditions, the trade with one of their oldest and best foreign customers, Canada, is gradually decreasing, and will in all probability reach an irreducible minimum of raw material requirements, unless immediate measures are taken to purchase more from Canada in the shape of merchandise or securities. During the last calendar year Canada imported from the United States $740,000,000, but only exported to that country $456,000,000, leaving an adverse balance of payment for the year of $285,000,000, which fully explains the heavy premium on New York funds in Canada or, conversely, the heavy discount on Canadian funds in New York. The United States has it in its power to correct this condition and retain this desirable trade either by buying more goods from Canada or extending long term credits until conditions become more normal. Under ordinary conditions Canada would correct an adverse exchange rate by shipping gold. This she is unable to do under present conditions, and her only alternative is to stop buying everything except raw and other materials essential to her industrial life.

Foreign Trade and Credits

"The position of Canada in general foreign trade is very satisfactory. Her total exports for 1919 were $1,295,000,000 against imports of only $941,000,000, or a favorable balance of $354,000,000. Canada has extended credit to Great Britain and other countries for some of these exports, consequently the proceeds are not presently available to liquidate her unfavorable balance with her neighbor. Otherwise New York as the exchange clearing house for Canada would be a debtor for the above amount and the exchange situation between the two countries would be reversed.

"Even before the war Canada was one of the best customers of the United States. A reference to the figures of the last normal year ending December 31, 1913, shows the following foreign exports (in millions):—

United States Exports, 1913

Great Britain	$ 591
Germany	352
France	154
All other European	403
Total Europe	$1,500
Mexico, Cuba, etc.	$ 198
South America	146
Asia	126
Oceania	82
Africa	29
Canada	403
Total United States exports	$2,484

Canada is not only the second largest customer, but her trade equals the combined exports to all the countries of South America, Africa, Asia and Oceania. Practically the whole world, with the exception of Europe, representing a market of over a billion people, did not buy any more from the United States than Canada with her small population of less than eight million people.

"During the past year the papers have been full of the various methods that have been or are about to be put in force by American exporters to increase trade with countries, where they are confronted with long-term credits, strange languages, and unusual customs and conditions. Canada is as much a foreign country as Argentine or China, although with practically all the advantages of a home market, speaking the same language with similar business customs and with facility of access, both for goods and representatives. The glamor of foreign trade with distant points, however, has apparently completely obscured the necessity of at least holding, if not increasing, the trade with a good neighbor. The old proverb 'A bird in the hand is worth two in the bush' is evidently considered to be out of date.

"If an individual, or a country, cannot pay for goods and cannot get credit, his, or its, purchases must perforce be curtailed or even cease. Canada must continue to purchase raw materials, such commodities as steel, iron, cotton, etc., but her purchases of manufactured goods and non-essentials from the States must practically cease, even if this has to be brought about, as in the case of Denmark, by the Canadian government placing an embargo on such imports. Such drastic though unavoidable cessation of exports in certain lines will involve a serious loss of business to many American industries, which loss will not probably be recoverable through other markets.

"Made in Canada" Campaign

"The slogan 'Made in Canada' was started some years ago, but was probably preached more than practised. Now it meets a condition instead of a mere theory, and will be more closely observed. A premium of 17 per cent., or more, for exchange on top of 30 to 50 per cent. of duty should convert the most heedless.

"It is apparent, therefore, that the United States, as a nation, must be prepared to see a steady diminution of her trade with Canada. To the individual manufacturer with enterprise and vision, however, the loss may easily be turned into a gain. If orders cannot come to the factory, take the factory to the orders. In other words, open a branch establishment in Canada. Before the war a large number of important American industries had located in Canada, and by so doing not only was the tariff eliminated (as an immediate benefit but the future expansion of Canada gave assured promise of a steadily enlarging market. Since the armistice this movement has been even more pronounced, and it is estimated that during the past year nearly 200 American firms have established branch factories or acquired an interest in existing Canadian industries. The undoubted great future of Canada with scarcely one-quarter of her natural resources developed, the tariff question, the exchange situation, her immense water powers, her satisfactory labor conditions, and last, but perhaps not least, the well founded belief that she will be in a preferential position with regard to the British Dominions, are all factors that have more or less influenced the decision of the wide-awake executives of these industries to come to Canada."

COMMERCIAL LIFE ASSURANCE COMPANY

On July 27th last this company received official notice from Ottawa that it could thereafter use its new name, under authority of legislation passed at the 1919 session of parliament. The name formerly was the Alberta Saskatchewan Life. While awaiting authority to use the name the company was not able to pursue a vigorous policy, and it was active, therefore, only five months of the year. At the beginning of 1919, 4,000 of the 10,000 shares of the company had been subscribed for; at the end of the year this had been increased to 7,600.

New business to the amount of $254,470 was written, making the total in force $401,012. The mortality experience was *nil*. Receipts for the year were $34,978, and disbursements, $23,646. Total assets are $95,428, and reserves on business in force, $17,731. In addressing the shareholders at the annual meeting in Edmonton on February 20th, the president, Arthur Davies, referred to the fact that no losses had been incurred by the company so far, and he also complimented the shareholders on having as their general manager so able a man as J. W. Glenwright.

COMBATTING THE FORGERY EPIDEMIC

Banks and Merchants Have Not Escaped Present Wave of Crime—Customer First Poses as Honest Depositor

By A. B. Barker

WHY is it, that at certain periods in the business life of a country, or community, forging is so much more prevalent thant at others? Is it a sort of chemical reaction due to the recurrence of certain economic conditions? Or is it simply that we have a new generation of seekers after easy money? Whatever the reason, there is, at the present time, a wave of this particular criminal effort in Canada, in the United States and in Europe. In Canada, the favorite method at present is either by raising the amounts of regularly accepted cheques, or by using facsimiles of the ordinary rubber acceptance stamps of the banks. The initial of the ledgerkeeper offers no difficulty, as anyone can scrawl a hieroglyphic in the upper left hand corner of the cheque, and no one is the wiser. In the United States, some of the banks now insist that such acceptance, to be valid, shall have the full signature of a senior officer.

Merchants Take Too Many Risks

In practice the banks will take the necessary precautions before negotiating a cheque, whether accepted or not, by insisting on proper identification; the ones who will be the losers, will be the merchants who, misled by a faked stamp, will take a chance rather than lose a possible sale. It is not only the small dealers who are caught. In one recent instance, a merchant accepted a marked cheque for $6 raised to $600 in payment for a $350 fur coat and gave the forger his own cheque for $250 in change, and apparently the man and woman who presented the cheque were quite unknown to him. True, he finally recovered his property, and the man got two years but a little ordinary precaution would have saved him a somewhat unpleasant experience, and possibly given the young man a lesson, which might have made him a decent member of society.

The class, against which the banks have to be on their guard, is that type of man or woman who will open an account with one of the branches, and maintain a fair balance for a time—possibly, depositing cheques on other centres, and suggesting at first that these be sent on collection, as the endorser is a new customer. Later on, as confidence is established, he may be able to negotiate a fraudulent cheque for an amount sufficient to pay him for his patience and then disappear. This method was explained at length in a series of articles, appearing recently in the "Saturday Evening Post," by a man who had fleeced banks, and others from coast to coast. In this article, he explained that, in every case his game might have been spoiled, if definite enquiries had been made from those in other cities, with whom he professed to have had business dealings.

At times, the fashion in forgery runs to letters of credit, but only the higher class of forgers will try this. It requires considerable address and skill to handle it successfully, as those who usually negotiate drafts under these instruments, would readily detect the ordinary crook.

Amateurs at Work in Canada

In Canada the class which has been working the public, so far, seems to be more of the amateur rogue than the skilled professional, and with proper publicity, as to their methods, the game should soon be ended.

The banks in south Africa, before the war, used the finger print system of identification in the issuing of drafts to men returning to England, and taking their savings with them. These drafts were often for large amounts, and to guard against fraud, and to protect both bank and client, the finger prints of the purchaser—who would be the payee—were taken in triplicate, one copy of which went with the bank's advice to its correspondent. Some banks in Canada use this system with illiterate depositors. It would probably pay to extend its use, as it would prove a valuable deterrent—the one thing a crook is afraid of is to leave this clue where it is available to the authorities.

BANK BRANCH NOTES

Fifty-Two New Branches Opened in Month of February—Change in Sterling Bank Management at Regina

THE only new branch announced this week is that of the Sterling Bank, at Richmond Hill, Ontario.

It was announced recently that the Dominion Bank of Canada has leased property at 181 N. Front Street, Sarnia, Ont., and will open a branch there about May 1st. H. S. Smith has been appointed manager of this new branch.

The Royal Bank of Canada has purchased property in Cloverdale, B.C., and will shortly erect a bank building.

A wire from our Regina correspondent states that H. R. Warren, former manager of the Sterling Bank of Canada, Almonte, Ont., has been appointed to the Regina branch to succeed Major Complin, who has occupied the post for a year. The latter came to Regina from Toronto and has resigned to engage in other business enterprises.

Mr. Clark, manager of the Royal Bank of Canada, Magrath, Alta., has been transferred as manager, to the branch at Saskatoon, Sask.

Fifty-two branches of Canadian banks were opened in February, distributed among the various banks as follows: Merchants, 4; Union, 6; Royal, 13; Standard, 3; Hochelaga, 5; Provinciale, 4; Sterling, 2; Dominion, 3; Hamilton, 2; Nova Scotia, 2; Nationale, 3; Commerce, 5.

The following is a list of branches of Canadian banks which were opened in February, and which have not already been mentioned in *The Monetary Times*: *Artley, Alta., Merchants; Bristow, Sask., Standard; *Bruxelles, Man., Hochelaga; Burstall, Sask., Standard; Caimanera, Cuba, Royal; *Claire, N.B., Provinciale; Clarkstown, Ont., Hochelaga; Corunna, Ont., Royal; *Hilda, Sask., Standard; *Huntingdon, B..C, Royal; *Kazabazua, Que., Provinciale; *Labroquerie, Man., Hochelaga; *Ladysmith, Que., Merchants; Nanticoke, Ont., Hamilton; *Notre Dame de Lourdes, Que., Hochelaga; *St. Prime Lac St. Jean, Que., Commerce; Shippegan, N.B., Provinciale.

BANK OF HAMILTON HAS GOOD STATEMENT

In respect to increase in profits the financial statement of the Bank of Hamilton for the year ended 28th of February, 1920, has one of the best of the year. Net profits were $847,104, compared with $571,226 for the preceding year. The paid-up capital of the bank was increased during 1919 from $3,000,000 to $4,000,000, the new stock being issued at a price of $150 per share. $500,000 paid in as premium upon this stock together, with the net profits for the year, and a balance of $85,114 brought forward, made a total of $1,432,219. The sum of $700,000 is transferred to reserve fund, $100,000 to bank premises account, $469,183 paid out in dividends at 12 per cent. per annum, $40,317 transferred to pension fund, $37,468 set aside for war tax bonds and war circulation, and the balance of $85,249 carried forward.

The balance sheet, like that of other Canadian banks shows substantial increases in the volume of business, total assets being $84,134,109 compared with $77,404,120 on February 28th, 1919. Circulation has increased from $5,354,902 to $5,941,901. Both demand and savings deposits also increased, the total now being $68,665,705. The bank's reserve fund has been raised to $4,200,000, exceeding the paid-up capital by $200,000. On the assets side, holdings of coin and government notes have increased, but the deposit in the central gold reserve is $1,750,000, a reduction of $750,000. Call and short loans have increased from $4,421,377 to $8,169,905, and other current loans in Canada are now $45,318,138, an increase of $7,600,000.

Considerable expansion has been made during the year by the opening of new branches, etc. With its increased capital and reserve the bank is now able to take a still more important part in commercial and financial activities in the Dominion.

Alberta Expenditures Will Be Heavy

Annual Provincial Budget Reveals Large Increases in Both Capital and Income Accounts — Bonded Indebtedness Nearly $35,000,000 — Co-operative Credit and Farm Loans Acts—Ability and Extent of Taxation a Valuable Asset

LARGE increases in capital and current expenditure for 1920 was the feature of the annual budget presented to the Alberta legislature by the Hon. C. R. Mitchell, provincial treasurer, on March 18th. While the expenditure side is increased, estimated revenues for 1920 show like increases, so that the treasurer was enabled to forecast an estimated surplus of $27,095 for the coming year. How small this is in comparison to the sums involved is seen from a review of some of the items. Under income account in 1919, the actual expenditure was $9,525,784; for 1920 the estimated expenditure is $10,555,507, or an increase of $1,029,759 over the actual expenditure for the previous year. Under income account, in 1919, the actual revenue was $9,642,739, and for 1920 the estimated revenue is $10,582,602, an increase of $939,863.

Still greater estimated expenditures are shown under capital account, where the estimated capital expenditures for 1920 are put at $9,334,686, as against $3,992,293 for 1919. The provincial treasurer, however, pointed out that there were two items under capital expenditure for 1920 for which allowance should be made. These included $750,000 for aid to the dairy industry, which will be repaid by the end of the year, being a bookkeeping transaction to a large extent, while $1,200,000 put in capital account for relief to the farmers in the drouth area, being secured by liens, will be largely repaid. Subtracting these two items, Mr. Mitchell pointed out, would bring the capital expenditures down to $7,384,486 for the year 1920.

Cause of Increases

The increases in capital and income expenditure are attributed to largely increased programs of public works and public services, together with bonuses and salary increases. But the provincial treasurer sounded a note of warning that the increase was bound to continue for at least another year, even if there were no further extensions of service programs and social legislation, which always involves the expenditure of money.

The list of what all the departments are asking for in total expenditures chargeable to capital and income are as follows: Public debt, $1,475,000; civil government, $682,502; legislation, $160,105; administration of justice, chargeable to income, $1,449,169; to capital, $15,150; public works, to income, $1,563,226; to capital, $2,454,626; educational department, to income, $1,825,090; to capital, $220,000; agriculture and statistics, to income, $540,310; and to capital, $1,371,500; public health department, to income, $440,025; and to capital, $50,000; railways and telephones, to income, $1,981,509; to capital, $4,000,000; railways branch, to income, $8,100; to capital, $220,710; general administrative purposes, to income, $223,340; to capital, $5,000; department of municipal affairs, to income, $138,290; to capital, $120,000; miscellaneous, $68,790, to income, and $127,500 to capital.

Under the revenue estimates it is estimated that the Dominion subsidy will bring $1,621,075; interest on principal of school lands' fund and other sources, $700,000; treasury department, $4,678,673; attorney-general's department, $1,508,700; provincial secretary's department, $1,464,405; public works revenue, $336,170; educational department, $79,500; agricultural department, $538,100; dairy and poultry industry, $750,000; railways and telephones, $5,995,000; municipal affairs, $2,042,000; public health, $34,785; legislative assembly, $2,030; King's printer, $10,000; public utilities commission, $4,000. Grand total, $19,794,440.

"The public accounts of the province," said Mr. Mitchell, "which have been tabled, show for the year 1919 a total revenue on income account of $9,642,739, an increase over the year 1918 of $1,981,977, thus bearing out the prediction of my last year's statement, in which it was pointed out that the year 1919 had opened favorably, so far as collections were concerned.

"The expenditure on ordinary account amounted to $9,325,748, exceeding that of the previous year by $1,021,941, so that I am able to announce an actual surplus for the fiscal year ended December 31st, 1919, of $316,990. Out of this surplus there was set aside the sum of $200,000 as a reimbursement to capital account for patriotic expenditures made during the war.

"It is intended to continue this policy in the future, i.e., in any year when a surplus on income account is available, a portion of it will be set aside as a refund against extraordinary expenditures that had been charged to capital account, but for which no tangible assets exist. Such payments in the past have included patriotic expenditures and disbursements in connection with drought relief.

Municipal Affairs and Telephones

"The municipal affairs department collected less than was estimated, but the total collection exceeded the year 1918 by $400,000. The telephone department received more than estimated figure by $13,289. The previous year, however, was passed by some $260,000. On the expenditure side there is a rather remarkable approximate to the amount estimated in most departments.

"On public debt interest there was a saving of almost $50,000, due to the fact that $1,000,000 of our authorized borrowing remained unissued during the year. On public works there was a saving of about $145,000 on the estimated expenditure. The education department kept well within their estimate, having a margin of $136,895. Agriculture and statistics exceeded the estimated expenditure by a small amount only.

Bonded Indebtedness

"The bonded debt of the province as at December 31st, 1919, amounted to $34,635,200, with a sinking fund of $980,623, leaving a net bonded indebtedness of $33,634,576.

"There is then a net increase in the bonded debt of the province over last year of $2,888,427. This is represented by the sale of two bond issues, one for $1,000,000, sold January, 1919, on a basis of 5.57 per cent., and the other for $3,000,000, sold December 20th, 1919, on a basis of 5.99 per cent. Only a portion of the latter loan, however, is chargeable against 1919, as a considerable portion of the proceeds were not paid into the treasury until January, 1920. Both of these issues were 5½ per cent., the period of the first issue being twenty years, and the last ten years.

"Of the loans authorized by this legislature last session, which amounted to $4,000,000, it has only been necessary to issue bonds for $3,000,000. This issue was sold at a very good price to the province, the basis being a fraction less than 6 per cent., and, as the province had no maturing obligations in the United States to meet with the proceeds, the exchange situation did not affect this province.

"I know of no other province in Canada ranking with this in size and importance that has carried on its business during the past year with less dependence upon outside sources of capital (on account of savings certificates, sales and bank loans), and at such low interest rates. This has been partly brought about by the fact that no maturing obligations had to be met on account of past bond issues, as was the case with other provinces. This was particularly fortunate in view of the high exchange rates prevailing."

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

Mr. Mitchell made the announcement that the provincial government was working out a plan for floating securities within the province, selling direct to the people, taking advantage of the knowledge gained through the sale of the Victory bonds.

Co-operative Credit Act

"The Co-operative Credit Act of Alberta," said Mr. Mitchell, "which is one of the measures by which the farmers' credit is strengthened, was designed to meet the requirements of rural districts. Under the provisions of this Act the supervisor of rural credits and his assistant are available at the expense of the province to give whatever assistance is necessary in the way of organization of societies. What will this Act do? This Act is designed to strengthen the weaknesses that in some cases are inherent in the present banking system of this country. A great deal has been said about the banking system of this country and its deficiences. Of late years, I believe, the banks have opened their eyes to the necessity of extending greater borrowing facilities to the farmers of this country, and not having their energies and opportunities available only for the industrial or mercantile classes. We see that on every side.

"All the banks in this country appear lately to have been more anxious to loan to the farming community than they were in the past, or at least that we had the impression that they were in the past. This co-operative society is designed to strengthen, and, I think, it has strengthened, certain weak points in the present branch bank system of this country, and is more representative of the other type of banking system, that is, the unit banking system, which we hear a great deal about to-day. With a board of eight men selected from the local community itself, men who, no doubt, will be men of good judgment, with a thorough knowledge of the moral responsibility of the men in their community, they should be able to, and I believe they can, dispense credit where losses will reach the minimum, because the whole control of this organization rests absolutely and entirely in the board of eight members selected by the society itself.

Farm Loans

"Proper consideration of the Farm Loan Act, which was designed to assist farmers to obtain cheaper money on long-term loans, has not, I can assure you, been neglected. For a young province, perhaps we have displayed more caution in proceeding with the operation of this Act than might have been expected. I have pointed out more than once—and, I think, in this House—the large financial requirements the successful administration of the Act demands. The first necessarily is cheap money. This has not been available since the Act was passed in sufficiently large sums to make the undertaking of so ambitious a plan workable.

"To make loans at 6 per cent. and 6½ per cent., it would be necessary to obtain money at or near 5 per cent. To secure this money in adequate amounts at these rates is impossible at the present time, and there is no bright prospect of better conditions in this respect for some time. For example, up to December 31st, 1919, this province has enabled the farmers to borrow $4,363,143 at rates of interest varying from 5 per cent. to 7 per cent. under the following heads:—

Live Stock Encouragement Act	$1,507,663
Municipal Seed Grain Act	2,251,511
Seed Grain Relief (unorganized districts)	470,769
Drought Relief	133,200
Total	$4,363,143

Assets, $150,000,000

Mr. Mitchell estimated the total assets of the province at $150,000,000, a detailed statement on the subject not being ready yet, and added: "There is another asset that cannot be set down in any statement—that is, the ability and extent to which taxation may be imposed. This depends indirectly upon the population of the province and the wealth of the individuals, as well as our immense natural resources. Failure to collect any considerable portion of our taxes in any year, no matter how certain its eventual recovery may be, cannot but disturb our ability to successfully carry on the finance of the province.

"At December 31st, 1919, the total arrears on land taxes alone amounted to $3,468,120, of which $2,347,824 was arrears of taxes on land, largely due to drought conditions."

PROVINCE ANTICIPATES BETTER FINANCIAL YEAR

New Brunswick Treasurer Estimates Greatly Increased Revenue and Expenditure, with Surplus for Present Year

REVENUE of New Brunswick for the present fiscal year ending October 31st, 1920, was estimated at $2,829,483 by Hon. Robert Murray, provincial secretary-treasurer, in the legislature on March 24th. He estimated the expenditures at $2,497,712, which would leave a surplus of $331,771. For the year ended October 31st, 1919, expenditures were $2,496,508, and receipts, $2,168,822.

The increase this year is to come largely from the territorial revenue, from which $860,795 was received last year, and from which source it is estimated $1,490,000 will be received this year, including $1,200,000 from stumpage as a result of the increased rates and the record cut of lumber on the Crown lands. Another large item is that of motor vehicle fees, from which $185,000 is the estimated amount of receipts, this being about $80,000 more than the actual receipts last year. Other items of the revenue are: $75,000 from succession duties, $65,000 from amusement admission tax and $50,000 from the Provincial Prohibition Act.

Expenditure Increases

On the expenditure side, provincial hospital maintenance, where the high cost of living enters directly into the expenditure, is estimated as costing $156,000, which is $29,000 more than last year's estimate. Offsetting the revenue of $185,000 anticipated from the motor vehicle fees, it is proposed to expend $172,500 for sinking funds and interest and $12,500 on administration expenses, salaries, etc. Enforcement of the Prohibition Act, it is estimated, will cost $36,000, which is about the same as the actual expenditure last year, while there is an additional item of $30,000 in the estimates for the prohibition referendum. Almost half a million dollars—$482,000, to be exact—is the estimated expenditure for ordinary public works, which is somewhat in advance of last year's estimate, although the accounts show $727,934 actually charged to this service last year. For sinking funds, $37,580 is the estimate, the amount including $6,245, which is a new amount that is in the estimates for the first time this year, and goes towards the payment for the now politically famous patriotic potatoes.

For school books the estimated expenditure is $38,000, while the receipts from this source are estimated at $22,000, which means the province is meeting a loss of $16,000 in selling school books for the primary grades at the present prices. For vocational education an expenditure of $27,900 is estimated, which includes some $14,000 which will come back to the province from the federal government.

LONDON, ONT., CLEARING HOUSE

At the annual meeting of the London, Ont., clearing house, the report and financial statement of the year ending December 31st, 1919, were read and adopted, and the huge increase in the bank clearings was very gratifying. The following officers were elected for the ensuing year: E. C. Bowker, chairman; G. H. Montgomery, vice-chairman; B. N. Sylvester, secretary, treasurer.

Able, Experienced and Responsible

By the very nature of its organization, a Trust Company is better able to care for estates and trusts than any individual. It never becomes ill, dies or takes a vacation.

Add to these qualifications the broad experience gained in closing hundreds of estates and investing millions in trust funds—and you have the strongest arguments for naming a Trust Company as your Executor and Trustee.

It will bring to your estate every essential qualification for dependable and economical service. Its financial strength and the character of the men behind it are your *guarantee of responsibility*—the final requisite in the choice of the one to represent the interests of yourself and your heirs.

SOME CANADIAN ECONOMIC PROBLEMS

Deflation of Currency, Greater Production and Exports, and New Immigration Are Three Remedies for Present Abnormal Condition

"WHILE it is impossible to counter the statement that this country is prosperous (for which we should be truly thankful), is it not time, now that the war has been over for more than a year, to take stock, and ascertain to what extent such prosperity is founded on a solid basis, and, conversely, to what extent our present condition is due to our having mortgaged the future?" asks B. B. Carter, eastern superintendent of the Union Bank of Canada, in an article treating upon some of Canada's present economic problems in the March issue of the "Union Bank Monthly." Analyzing the situation, Mr. Carter says:—

"Previous to the outbreak of the war the funded debt of Canada was $303,000,000. At the present time the debt is about $2,000,000,000. Consequently, the annual interest charge at the present time is between 25 per cent. and 30 per cent. of the total pre-war debt. During the same period there has been an expansion in the circulation of Dominion government notes from $117,000,000 to $298,000,000, and in bank notes from $105,000,000 to $237,000,000.

Condition is Not Permanent

"Even the most conservative man must have long ago admitted the necessity for the raising of money and expansion of circulation. At the same time, are we not, at least to some extent, living in a 'fool's paradise,' and should we not, now that the war is over, adjust our affairs with a view to evolving some method which will in time bring us to normal conditions?

"How, then, are we to set our sails so as to get back to something approaching our pre-war condition. Undoubtedly, this is going to take a very long time, and unquestionably during the process we will see a contraction in what might be called the 'good times' now being enjoyed. Inasmuch, however, as everyone must admit that we cannot go on indefinitely as we are, it would seem that the sooner such reforms as are necessary are instituted the better. To my mind there are three great factors to be dealt with: (a) Deflation of currency; (b) increased production and greater exports; (c) increased immigration.

Currency is Most Important Factor

"I mention deflation of currency first because, in my humble opinion, it is the most essential factor of the three. I repeat—a great many of our people; in fact the vast majority, no longer possess a proper sense of the value of money, and this can only be rectified through deflation. Obviously, if in place of $100 one had $50—the $50 having an equal value with the $100 formerly held—the $50 would go further. In other words, with less money—even though of the same value—one would be more careful of it. Most people will admit that with less money in circulation prices generally will show some contraction. Consequently, not only would deflation make people less extravagant, but at the same time, help in some degree to reduce the high cost of living. Moreover, from the standpoint of our trade with other countries, it is quite apparent the nearer our Dominion currency is to a gold basis, the better position will we be in.

"In so far as England is concerned, a recent report indicates that by March 31st, there will be a reduction in currency notes in circulation of substantially more than £20,000,000. On February 5th, a press despatch from Ottawa mentioned that a gradual reduction in Dominion notes was being planned by the government—presumably from proceeds of loans or from revenue. Let us hope that the revenues of the country will be the source. The same article stated that during the Civil War American currency (gold backs) had an actual gold value of only thirty-nine cents—a situation almost identical with our Domnion circulation to-day.

Production and Exports

"With regard to production and exports. For the fiscal year ended March 31, 1919, our total exports were $1,240,000,000, as against $1,199,000,000 in 1918. Great Britain is still our largest customer (528 millions), although taking forty million dollars' worth of goods less than in 1918. The United States is next, with 454 millions, or 21 millions more than in the preceding year. These changes are significant. France shows the heavy falling off in purchases, from 97 millions in 1918 to 65 millions last year. It is particularly interesting to notice large increases in the exports to Australia, British East Indies, British West Indies, Newfoundland, New Zealand, and other parts of the Empire.

"No one can doubt our being able to dispose of all our exportable goods for some years to come, and the fact of the government having done everything possible towards cultivating the markets of our sister Dominions and the South American countries will mean much in the future. Moreover, through the establishing of the Canadian mercantile marine the transportation problem has been solved.

Room for More Population

"As to immigration: With a country capable of supporting five to ten times its present population of 8,835,000, and burdened with a heavy debt ($225 per capita), one in theorizing on the possibilities of the country's position being improved, immediately reflects that one of the main channels should be through immigration, for obviously if there were more producers the burden would be more largely distributed.

"I do not feel that all classes should be admitted, as in past years, but that strong efforts be made to obtain desirable immigrants from the British Isles, the United States and certain of the Northern European countries. The government statistics tell us that during the fiscal year 1917-1918 the total number of immigrants was 79,074, and in 1918-1919, 57,702, a falling off of 21,372, or 27 per cent., during the last mentioned period. A closer scrutiny indicates that whereas the numbers from the United States show a falling off of 30,599, the immigration from the British Isles increased 6,736. Taking the seven months of current fiscal year (beginning with April, 1919), we find that the total immigration was 83,346, as against 31,159 during the same seven months in 1918, an increase of 167 per cent.; moreover, it is noticed that the figures representing those from the British Isles have increased from 2,258 in 1918 to 42,991 in 1919. These figures indicate what is being done towards encouraging the best class of immigration to Canada."

ONTARIO PUBLIC ACCOUNTS SHOW $7,000,000 SURPLUS

In the public accounts which were tabled in the Ontario legislature by the Hon. Peter Smith, provincial treasurer, a few days ago, a surplus of $7,603,110 at the end of 1919, as against $5,140,176 at the beginning of the year, was shown.

It has been customary for the public accounts to be brought down with the treasurer's budget, but a departure was made this year in view of the fact that the accounts in question had all been incurred by the late government before Hon. Mr. Smith took office. The fiscal year ended October 1, 1919, while the present government did not assume office until two weeks later.

Ordinary receipts for the year were $19,904,772, and ordinary expenditures $21,464,574. Capital receipts, however, bring the total up to $54,964,059, and capital expenditures brings the expenditure up to $47,350,675.

Revenue totalling $27,416,898 was received from provincial loans during the year, and loans totalling $7,152,772 were repaid.

The Imperial Bank of Canada has increased its distribution of profits for the current quarter by a bonus of 1 per cent., payable on May next, in addition to the regular dividend at the rate of 12 per cent. per annum.

EXTRA PROVINCIAL CORPORATIONS IN ONTARIO

B.N.A. Act in Relation to Company Incorporations—Provincial Charter Gives Power to Obtain Extra Provincial Rights

On an appeal to the Supreme Court of Canada, the Court recently decided that a provincial legislature is not precluded by item 11 of section 92 of the B.N.A. Act from creating companies with a capacity to accept extra provincial powers and rights. In the special case, that of Housberger vs. the Weyburn Townsite Co., it was held that a Saskatchewan company, on obtaining a license under R.S.O. (1914) ch. 179, may do business in Ontario and may institute and maintain an action in that province, even though the required license be not granted until after the commencement of the action.

The questions raised on the appeal were, whether or not the respondent company, incorporated under the Companies Act of Saskatchewan for the purpose of buying and selling land, could enforce in the Ontario Courts, an agreement for sale of its land in Saskatchewan to a purchaser in Ontario; and whether or not license to resort to the Courts of the latter province had been validly granted by the authorities there.

The trial Judge held that the company could not carry on its business outside of Saskatchewan and dismissed the action. His judgment was reversed by the Appellate Division.

Followed Bonanza Creek Judgment

In his decision in the appeal to the Supreme Court of Canada, Davies, C. J., in various parts of his judgment says:—

"This appeal must, in my opinion, be decided in accordance with the law as laid down by the Judicial Committee of the Privy Council in the Bonanza Creek case, as to the powers and capacities of companies incorporated by provincial legislatures."

"I think, as I have said, the headnote of the Bonanza Creek judgment correctly epitomizes the gist of that judgment, namely, that while the 'powers and rights' which a provincial legislature can bestow are confined to those exercisable within the province, that does not preclude such legislature from legislating so as to create by statute a corporation with the general capacity to acquire in another province of the Dominion power to operate in that province with respect to the carrying out of its corporate powers granted by the province incorporating the company."

"The question in this case was confined to two points; first, whether the company had the capacity given to it by the legislature to obtain power *ab extra* to carry on in another province its authorized business of buying and selling real estate in Saskatchewan and, secondly, whether it had obtained such power from the province of Ontario, assuming that its contract in question was made there."

Had Right to Obtain Power

"I am, as I have said, of the opinion that its corporate powers 'to carry on real estate loan and general brokerage business' in the province of Saskatchewan, conferred on it the capacity to obtain such power from Ontario under what is known as the law of comity."

"Of course, such a statutory corporation as the respondent could not obtain *ab extra* power to carry on any business not strictly within its corporate powers, but within these powers it had such capacity. My construction of the powers conferred upon the company 'of real estate loan and general brokerage business' is that they referred to real estate in the province of Saskatchewan alone, and not to real estate elsewhere. The lands in question in this case were, of course, situate in the province of Saskatchewan.

"The question is then raised whether it did obtain such powers *ab extra* or not. On that point I cannot think there can be any doubt."

"The appellant relied upon the Extra-Provincial Corporations Act, R.S.O. ch. 179. The plaintiff admitted it did not have the license required by sec. 7 of that Act until after it had commenced this action, but it did then obtain the license and the statute expressly provides that the granting of the license put the company's right of resort to the Ontario Courts in the same position as if it had been granted before the action was instituted.

"In the result, I am of the opinion that whether the contract sued on was made in Saskatchewan as found by the Appeal Court, or in Ontario, as contended by the appellant, the right of the plaintiff to maintain an action upon it in Ontario was clear."

DOMINION FIRE CHIEFS' ASSOCIATION

At a meeting in St. Thomas, Ont., on March 26th, the executive committee of the Dominion Fire Chiefs' Association decided to hold the 1920 convention in that city from August 3rd to 7th. This will follow the international convention, to be held in Toronto, July 25th to 30th.

The committee discussed the proposal to establish a training college for fire chiefs at Ottawa, and Chief Armstrong, of Kingston, Ont., who favored the proposal, pointed out that the duties of the fire chief were now enlarged to include the prevention of fires. The committee also placed itself on record in favor of better fire protection in theatres and other amusement places, and passed a resolution recommending the members in every town and city of the Dominion to co-operate in a salutary drive, and to rigidly enforce the provincial laws governing the construction and equipment of theatres. They also instructed the secretary to have copies of the standard regulations for construction and equipment of theatres, as adopted by the Dominion Fire Prevention League, printed and mailed to every member of the association.

EMPLOYMENT CONDITIONS SHOW IMPROVEMENT

Reports from employers to the Dominion headquarters of the Employment Service of Canada, Department of Labor, indicate that, disregarding loss of time due to strikes, there was a nominal increase in the volume of employment during the week ending March 6th, as compared with the figures from the same firms for the preceding week. A substantial increase in the volume of employment had been anticipated, only part of which, however, was realized. A further large increase was expected for the week ending March 13th. In comparison with the figures for the base week, January 17th, a marked increase was registered.

The returns when analyzed by provinces, indicate reductions in Alberta, Saskatchewan and British Columbia. New Brunswick, Prince Edward Island, Nova Scotia, Quebec and Manitoba showed increases. For the week ending March 13th, Nova Scotia, Quebec, Ontario, Alberta and British Columbia expected to have increases. New Brunswick, Prince Edward Island, Manitoba and Saskatchewan, however, anticipated reductions.

Reports for the week ending March 6th were received from 4,834 firms. These firms reported 688,817 persons on their payrolls, as compared with 688,540 persons on their payrolls for the week ending February 28th, and with 680,916 persons for the base week (January 17th). An increase, therefore, of 277 persons was reported during the week ending March 6th, as compared with the returns for the preceding week. These same firms, moreover, anticipated having a further increase of 1,135 persons, or two-tenths of 1 per cent. for the week ending March 13th. An increase for the week of March 6th had been anticipated, since the returns for the week of February 28th indicated an estimated increase of 1,221 persons or two-tenths of 1 per cent. for the succeeding week. The returns for the week of March 6th as indicated above show that only part of this increase materialized. When the returns are compared with the base figures the substantial increase of 7,901 persons or one and two-tenths per cent. is indicated.

AUDITORS' REPORT

In accordance with the provisions of Sub-sections 19 and 20 of Section 56 of the Bank Act, we report to the Shareholders as follows:—

We have examined the above Balance Sheet with the books and vouchers at Head Office and with the certified returns from the Branches, and we have obtained all the information and explanations we have required, and in our opinion the transactions which have come under our notice have been within the powers of the Bank.

We have checked the cash and verified the securities of the Bank at the Chief Office and at several of the principal Branches during the twelve months covered by this statement, as well as on February 28th, 1920, and have found that they agreed with the entries in the books of the Bank with regard thereto.

In our opinion the Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs according to the best of our information and the explanations given us, and as shown by the books of the Bank.

Montreal, 25th February, 1920.

To the Shareholders of BRANDRAM-HENDERSON, Limited

Your Directors herewith submit their Thirteenth Annual Report, with Statement of Assets and Liabilities and Abstract of Profit and Loss Account, for the year ended December 31st, 1919.

The net profits amounted to $299,736.21 which, with $20,000.00 transferred from a special reserve for depreciation against a contingency which did not occur; along with the balance of $501,519.30 carried forward from the previous year, makes the sum of $821,255.51 to the credit of Profit and Loss Account. Out of this sum has been paid the interest on the issues of First and Consolidated Bonds respectively, and a reserve provided on both issues for the months of October, November and December, amounting in all to $50,798.79. The dividend on the Preferred Stock of $35,000.00 at the rate of Seven per cent. and the dividend on the Common Stock of $38,800.00 at the rate of Four per cent. have been paid. The sum of $20,000.00 has been provided for a reserve for depreciation. A reserve for the Fourth Year's War Tax of $19,629.61 has been provided, and the sum of $18,000.00 has been applied for Sinking Fund purposes. The total to the credit of Profit and Loss Account, after the deduction of these provisions, amounts to $639,027.11.

The costs of upkeep and renewals incurred during the year at all the Company's plants have been charged to operating expenses.

It will be noted that there is a marked decrease in the total of Current Liabilities. This is due to the elimination of the item "Loans from Bank," which last year appeared as $444,706.64. This has been accomplished and other important advantages secured by the issue of $1,250,000 Twenty-Year Six Per Cent. Consolidated Mortgage Sinking Fund Gold Bonds, some $655,000 of which were sold early in the year 1919. As projected in the last report, the balance of these Consolidated Bonds has been dealt with by placing $345,000 in escrow to retire a like amount of First Mortgage Bonds outstanding, while the balance, $250,000, is held, only to be issued at some subsequent date, to the extent of 75% of the cost of any future capital expenditure.

Your Directors are pleased to report an increase in sales on a large scale, both at home and abroad.

During the early months of the year, foreign sales were disappointing, but as the months passed by conditions rapidly improved, until, by the end of the year, our export shipments and booked orders represented a bigger percentage of the totals than ever before. This was in no way attributable to any decrease in home trade, because each Canadian division reported a half-yearly increase, and also an increase for the year.

Your subsidiary, The Alberta Linseed Oil Company, Limited, has been kept in full production throughout the year, except during a few weeks in early autumn, when it was impossible to secure seed, and has been a source of great advantage to the parent Company.

Under an agreement entered into with Brandram Bros., & Co., Limited, of London, England, at the time of the promotion of your Company, permission to sell white lead, dry or in oil, outside certain allotted countries, was withheld for a period of twenty years from 1906. With the demand experienced from Great Britain and other prohibited countries, it was considered desirable to have these restrictions removed if possible, and this has been accomplished, on the occasion of a recent trip of your President to London, by means of a supplementary agreement with Brandram Bros. & Co., Limited, which provides for the sale of the greater number of our brands of white lead to buyers in all parts of the world, except in the territory constituting the Empire of Russia before the war.

Large sales have resulted from this agreement, and increased production has in consequence been provided for at our lead works in Montreal.

Your Directors also wish to advise that an interest has been acquired in the Pacific White Lead Company, Limited, corroders and grinders of white lead, of Vancouver, B.C., and an arrangement come to with this company whereby the direction of its sales policy and the general conduct of its affairs will be assumed by your Company.

Your Directors consider the position of the Company justifies their recommendation of a continuance of the present dividend of Seven per cent. on the Preferred and an increase to Five per cent. of the dividend on the Common Stock, payable quarterly to shareholders of record one month prior to dates of quarterly payments.

In conclusion, your Directors take advantage of the opportunity to express their appreciation of the fidelity and efficiency of the officers and other employees of the Company, whose efforts have done so much to advance the Company's progress.

All of which is respectfully submitted on behalf of the Directors.

GEORGE HENDERSON,
President and General Manager.

COMMERCIAL LIFE ASSURANCE COMPANY

OF CANADA

Head Office - Edmonton

SALIENT POINTS TAKEN FROM REPORT

Seventy-eight per Cent. (78%) of the Company's funds are invested in Government and Municipal bonds.

The Company has assets of $351.00 to every $100.00 of liabilities and their assets are only such as are allowed by the Dominion Insurance Department.

Managing Director and Secretary,
JOHN W. GLENWRIGHT.

HOW CO-INSURANCE CLAUSE APPLIES

Is Effective when Loss is Up to Percentage Mentioned—Effects of Increased Property Values

THE working of the co-insurance clause in fire insurance policies, and the importance of the assured fully understanding it, is pointed out by Irish and Maulson, Toronto, in a circular addressed to their clients. Briefly, this clause means that the assured maintains insurance bearing a relation to value, as indicated by the percentage set forth in the clause. The result is that the value of the property is figured on the cost of replacement at the date of the fire, and the clause is applied on the result of such valuation. The rapid rise in costs has, it is pointed out, greatly increased this replacement value.

A co-insurance clause usually reads: "It is a part of the consideration of this policy and the basis on which the rate of premium is fixed that the assured shall maintain insurance concurrent in form with this policy on the property hereby insured to the extent of at least.....per cent. (..%) of the actual cash value thereof, and that, failing so to do, the insured shall be a co-insurer to the extent of an amount sufficient to make the aggregate insurance equal to ..% of the actual cash value of the property hereby insured, and, in that capacity, shall bear that (their) proportion of any loss that may occur."

In explanation of the clause, it is pointed out that the provision is not operative when the property is wholly destroyed, nor when the damage exceeds the amount of percentage mentioned in the clause. It operates only in event of a partial loss amounting to less than the percentage mentioned. Thus, in the case of a property worth $1,000, insured for $700, with a required percentage of 80 per cent., if the loss were $400, the company would be required to pay only seven-eighths, or $350.

FUR DEALINGS OVER FIVE MILLIONS

At the first sale held by the Canadian Fur Auction Sale Co., in Montreal, March 22 to 27, transactions totalled $5,093,120. Senator Webster, president of the company, in an address to buyers at the conclusion of the sale, stated that another sale would be held here in August or September.

URGE FURTHER CASH GRATUITY

The fifth annual convention of the Great War Veterans' Association was held in Montreal, March 22 to 28. The delegates came to a decision on several important financial questions, and Port Arthur, Ont., was chosen as the meeting place next year. The association went on record in favor of: Additional cash gratuities to every member of the Canadian forces ranging in amount from $1,000 to $2,500; higher rates of pay to those taking vocational training; extension of the vocational training period to twelve months or longer if necessary; investigation by the government of regimental funds and canteen profits.

TRUST COMPANY FOR NEW BRUNSWICK

Moncton is to be the head office of New Brunswick's first trust company, if the organization of the Central Trust Co. is completed. Application is now being made to the provincial legislature for incorporation, with a capital of $500,000. The promoters are residents of Moncton and Sackville. A building will probably be erected for office premises.

The following were the shipments of ore, in pounds, from Cobalt Station, for the week ended March 26:—

McKinley Darragh, 82,260; Coniagas Mines, 88,000; Hudson Bay, 60,916; total, 231,176. The total since January 1st is 3,544,247 pounds, or 1,772.13 tons.

JANUARY BUILDING PERMITS

Decrease Nearly 22 Per Cent., Compared with Previous Month, but Show Big Improvement Over a Year Ago

THE report of the Department of Labor on the value of building permits for January, 1920, shows figures from fifty cities instead of thirty-five as previously given. As compared with the figures for December, 1919, the total value of building permits issued during January in the fifty cities showed a decrease, the value falling from $5,056,198 in December, 1919 to $3,956,247 in January, 1920, a decline of $1,099,951, or 21.8 per cent. Alberta and British Columbia were the only provinces to show increases in this comparison.

As compared with the corresponding month in 1919, there was an increase of 239.2 per cent., the value for January, 1919, having been $1,163,316. Increases in this comparison were shown in all the provinces except in Manitoba, where there was a slight decline, and in Prince Edward Island, where no permits were issued in this month of either year.

The following are the details:—

CANADA'S EXPORTS INCREASE $30,000,000

Imports Also Show Large Gains—Foreign Trade Makes Some Big Advances

CANADA'S trade for the twelve months ended February 29th, 1920, shows large gains, as compared with the previous year. Total imports for the year were $993,870,100, while in the preceding period the figure was $935,266,472. Total exports for the twelve months were $1,295,277,176, as compared with $1,265,646,785 for the previous year.

Canada imported from the United Kingdom goods to the value of $106,605,527, as against $74,806,773 a year ago, an increase of over $31,000,000. Exports to that country declined, however, the figure now being $507,091,477, compared with $546,790,141 at the end of February, 1919. Imports from the United States totalled $764,185,943 during the past twelve months, which is approximately the same as in the previous period. Exports to that country show an increase of $2,000,000. Trade with British colonies shows a slight falling off in some cases. Some big advances in foreign trade are being made, however.

The following is the summary of Canadian trade for the twelve months ended February 29th, 1920, with comparisons, as compiled by the Dominion Bureau of Statistics:—

	Twelve Months ending February		
	1918	1919	1920
IMPORTS FOR CONSUMPTION	$	$	$
Dutiable Goods	546,253,779	528,010,608	649,076,632

Colonel C. Douglas Hamilton, of Vancouver, proposes that the government be asked to form a nucleus of an insurance fund, with the $40,000,000 appropriated for unemployed veterans and add to it by other means for the purpose of establishing some form of insurance for the thousands of veterans who fought and in many cases were stricken in health, but got no pension or no financial benefits.

Stein and Co., Ltd., $5,000.

EQUITY LIFE'S BUSINESS INCREASED

Premium income of the Equity Life Insurance Co. for the year 1919 was $100,970, compared with $87,621 for 1918. Interest also increased from $28,916 to $34,521, making the total income for the year $135,491. Payments to policyholders totalled $46,282, and expenses, $33,577, leaving an excess income of $55,631. During the year 461 policies for $832,693 were placed, and 2,583 policies, for a total of $3,682,603 are now in force.

Assets of the company total $668,607 the principal investments being first mortgages on real estate, $323,658; municipal and government debentures, $222,992, and loans on policies, $95,344. The reserves required on policies in force, $601,178, and, after providing for other liabilities, a surplus of $45,327 to policyholders remains. In addition to this, there is the $318,600 of capital subscribed but uncalled.

WEYBURN SECURITY BANK'S PROFITS LESS

Net profits of the Weyburn Security Bank for the year ended December 31st, 1919, were $62,220, compared with $74,343 for the year previous. Dividends at 7 per cent. per annum were paid, requiring $33,506; $4,900 was written off fixtures, $4,407 appropriated for war tax on circulation, and $6,269 for business profits tax for the years 1917 and 1918. Ten thousand dollars was transferred to reserve fund, and $8,545 carried forward in profit and loss, compared with $5,457 brought forward from 1918. Last year $40,000 was added to reserve, but dividend payments, taxes, etc., were not so large.

The volume of business shows a small increase, total assets being $4,588,163, compared with $4,517,119 at the end of 1918. Savings deposits increased by $34,000, but demand deposits are reduced by $577,000. The balance due to the Dominion government is $629,306, compared with $103,873 at the end of 1918. Circulation shows an increase of $18,000. Among the assets, holdings of coin and notes have increased from $213,618 to $235,633, holdings of securities are greatly increased and balances due by other banks reduced.

News of Industrial Development

Fraser Companies Have Extensive Plans—International Paper to Develop Grand Falls Power—Guelph to Get Large Motor Truck Plant

FURTHER important developments in the Canadian pulp and paper trade, are indicated in some recent announcements. The Fraser Companies, Ltd., one of the most extensive pulp and paper corporations in Eastern Canada, is applying to the New Brunswick legislature for an act of incorporation with "power to erect, construct, maintain and operate a dam at or near the Tobique Narrows, in the county of Victoria, for the purpose of generating, developing, selling, distributing, using and disposing of hydro-electric power and with power to erect, construct, maintain and operate pulp and paper mills and other manufactories," and various other rights.

The primary intention is to have extensive paper mills at the Tobique Narrows, as well as a ground-wood pulp mill in connection therewith, and that the pulp manufactured at Edmundston at the Fraser Companies' plant there, will be brought to the proposed new paper mill for manufacture, while pulp supplies will also come from the new pulp mill, for which, it is said, the company have ample sources for securing wood. This proposition involves many millions of dollars. The authorized capital at the outset will be probably $1,000,000, but with authority to increase the amount to $5,000,000. It all depends upon whether the company is able to obtain a workable charter or not from the legislature.

International Paper Plans

The International Paper Co. has determined to expend the necessary $100,000 this year in the power development at Grand Falls, N.B., to comply with the provisions of the Act of the New Brunswick legislature, and thus retain their rights for which they have already posted $60,000 with the provincial government. An official announcement to that effect was made by a representative of the International interests, last week at Fredericton.

While the International Paper Co. is thus prepared to comply with the conditions necessary for the retention of their rights, it is also declared that there is little likelihood of the complete development plans at the Grand Falls being proceeded with under present economic conditions. It is understood that engineers have advised that not less than $9,000,000 would be required to carry out the plans which a few years ago were estimated to cost $3,000,000.

More than 160 million feet of lumber has been cut in the Miramichi district, New Brunswick, this season, and is now ready to be brought out by the spring's driving operations which will soon commence. The cut on the Southwest Miramichi amounts to more than 100 millions, and the increase over last year's operation is almost 70 per cent., the output last year being about 60 million feet. The biggest operators this year are the Fraser Companies, Ltd., whose total cut on the Southwest Miramichi amounts to about 31 million feet, while the Miramichi Lumber Co. are next with 23 millions, and D. J. Buckley has about 15 million feet.

The cut on the Northwest Miramichi amounts to a strong 60 million feet. The Sinclair Lumber Co. have about 10 millions coming out and so have the Ritchies, Burchills and one or two other concerns. The Miramichi Lumber Co.'s cut on the northwest branch has been about 7 millions, bringing their gross output up to about 30 million feet during the past winter.

Guelph Motor Truck Plant

The Guelph, Ont., Chamber of Commerce has announced that the city has secured the Commerce Motor Trucks, Ltd., the Canadian factory of the Commerce Motor Car Co., Ltd., of Detroit. The federal charter is now being applied for, and plans have already been prepared for the erection of a large motor truck factory. Building on the factory is to start within the next 30 days, and the directors hope that the building will be complete and ready for occupancy by next October. The new industrial concern will give employment to 500 men, when they start manufacturing, and indirectly will also give employment to another 2,000, as it is the intention of the company to purchase locally many of the parts that will be required for the assembling of their motor trucks. The parent concern was established in Detroit in 1910, and it now has a capacity of 12,000 trucks annually. The Canadian company will be designed to equal the one in Detroit.

The directors of the Canadian company are: Walter E. Parker, E. M. Baker, Charles L. Granger, Geo. D. Wilcox, all of Detroit; and J. M. Taylor, F. E. Partridge and J. E. Carter, of Guelph. In order to accommodate their employees, the employers will build several hundred houses.

Other Industrial Notes

A Canadian branch for the manufacture of structural steel devices, is to be established in London, Ont., at once, arrangements having been concluded by E. Begart, of Patterson, N.J. for the securing of a site in the city.

Representatives of American firms have been at Niagara Falls, Ont., looking for suitable sites and factory space to locate there. It is expected that the tenement factory building scheme will be soon carried through.

The Border Cities Wire and Iron Works, Walkerville, Ont., expects to double the capacity of its plant. The company was organized last January to take over the former business of the Page Co.

J. S. Fry and Sons, cocoa and chocolate manufacturers, Bristol, Eng., will establish a manufacturing plant in Montreal in the near future, as a result of their association with Walter M. Lowney Co., of Canada, Ltd.

Kitchener, Ont., is witnessing industrial expansion on a large scale. The Kauffman Rubber Co., will build a four-story structure, 80 by 80, at the corner of King and Francis Streets and the space of the Gies Foundry on Water Street will be increased by 7,000 square feet, by the erection of a two-story building on Charles Street. The Four Wheel Drive Co. have secured a new site off Count Hope Street, near Waterloo, where a series of factory buildings will be erected. The Lang Tanning Co. will also erect a sole leather tannery during the year. These industries will increase the number of employees by at least 1,000. Aggressive steps are being taken by local manufacturers and the Kitchener Construction Co. to provide sufficient number of houses to meet the demand.

Messrs. Geo. Cradock and Co., of Wakefield, Eng., manufacturers of wire and cable, will erect a large wire-rope factory in Vancouver, B.C., at the cost of $250,000.

An important industrial congress in the Niagara district, Ont., for the first week in August, 1920, is being arranged by the Niagara District Industrial Association.

GUELPH CHAMBER OF COMMERCE

At the annual meeting of the Guelph Chamber of Commerce on March 26, Ald. Evan A. Macdonald was elected president for the year, succeding J. M. Taylor, who declined a further nomination. J. M. Taylor, J. W. Lyon and G. B. Ryan were made honorary presidents, subject to the approval of the members, and the following officers were also named: First vice-president, F. E. Partridge; second vice-president, Ald. H. Quarmby; secretary-treasurer, Mayor Westoby. A committee with G. Powell Hamilton as chairman was appointed, and A. Gibson and John Sutherland, sen., were appointed auditors.

They Put On More Insurance!

Mutual Life Policyholders last year increased the amount of their protection taking out additional policies to the amount of more than ten million dollars. They were alert business men who realized the necessity for increasing their life insurance because of the increase in the value of the necessities of life. In proportion as money loses its purchasing power we require more and more of it to maintain the same protection. Have YOU increased YOUR insurance since prices went up? The smaller the value of the dollar the more dollars we need. As a company, the Mutual does not advocate an excessive amount of insurance. At the same time every reasonable effort should be made to increase the insurance in times of inflated prices. Follow the example of 3139 Mutualists who increased their insurance last year. Put on more insurance!

News of Municipal Finance

Edmonton Secures Bank Credit of $1,000,000—Saskatoon's Assets are Over $11,000,000 — Toronto Budget Calls for New Capital of Over $8,000,000 — Montreal Revenue Showing Improvement—Fredericton Assessment Increased

Kingston, Ont.—The general tax rate this year has been fixed at 35½ mills, an increase of 7 mills over last year.

Galt, Ont.—The tax rate has been fixed at 39 mills, an increase of 9 mills over last year. The amount required to be raised this year is $351,467, an increase of $78,500.

Haileybury, Ont.—The tax rate for the year 1920 has been fixed at 46 mills for public school supporters and 52½ mills for separate school supporters. These figures represent an increase of four and a-half mills, respectively, on last year's rates, due to increased demands for money for educational purposes.

Sherbrooke, Que.—The municipal tax rate for this year will be 16½ mills on the dollar, an advance of 3 mills over last year. The school taxes, it is understood, will be six mills for the Catholic and nine for the Protestant ratepayers, the last being raised one mill over the rate for the past year. The budget which has been passed by the council, shows estimated revenue of $705,762, and estimated expenditure of $593,593.

Edmonton, Alta.—Arrangements have been completed between the city and the Imperial Bank of Canada, whereby the city's account has been credited with the sum of $1,000,000. This has been secured by the assignment of 1920 taxes to meet the requirements of the city until May 15th, when the taxes will commence to come in. The credit is simply to meet the current expenses of the city and will not involve any new program of capital expenditures.

Fredericton, N.B.—The city assessment for 1920 has been fixed at $215,000, an increase of $65,000 over last year. Under ordinary circumstances, the tax rate, which was $2 last year, would be increased to something like $2.60, but some $700,000 or more will be added to the valuation for assessment purposes by the assessors as a result of adding womens incomes and making real estate values correspond with increased rental charges; thus the tax rate will probably not exceed $2.25.

Regina, Sask.—Providing the city council adopts the estimates, the tax rate for public school supporters will be 37 mills, including 2 mills for provincial revenue, in the old city limits, and 34.8 mills in the annexes. The separate school rate will be 41.3 and 39.1 mills, respectively. The total amount to be raised for all purposes, including the public revenue, is $1,561,700, of which $933,692 is required for operating the civic machine. The levy will produce for the public schools, $409,436; for the separate schools, $41,120; for the library, $30,059; for the collegiate institute, $85,883, and for the provincial treasurer, $61,508.

New Westminster, B.C.—Finance Chairman Keary has presented to the council for approval a program calling for a 35-mill tax rate; $27,000 for street construction and repayment to the bank of an overdraft of $130,000, which, in former years, has only been reduced by $10,000 a year. At 35 mills, the receipts from the real estate tax is calculated to yield $372,346. Last year, on a 32-mill rate, the total levy was $407,000 odds. This means that the total amount which property owners are asked to contribute this year will be some $35,000 less than last year, or equivalent to a reduction of three mills in the rate had the assessment remained the same.

Saskatoon, Sask.—According to the city auditor's report, the total assets of the city are now $11,117,112. Total debentures issued to December 31 last amounted to $8,893,691. The sound condition of the sinking fund, taking care of redemption of debentures, is also shown in the report, which states that the sinking fund at December 31, 1919, should have been $1,628,066. It really amounted to $1,662,444. Sinking fund arrears, represented in non-collected taxes for the year 1919, thus totalled $37,738. The total of debentures issued up to December 31, amounted to $8,893,691. This, less waterworks, electric light, street railway and local improvement debentures, amounting to $5,151,179, which are not included as in the city debt, leaves the city's net general debt at $3,742,511; and this again, less for sinking fund in respect to the net general debt and debentures, redeemed which aggregate $688,464, leaving the net debenture debt of the city $3,054,056. Debentures mature in small percentages year by year, until 1940, when more than half, or 50.29 per cent. of the city's issues are payable. After this date, however, the city has the privilege of retiring all, or any part, or none of the debentures, on any interest date between 1941 and 1961. Interest payment dates are twice annually, April 1 and October 1. The total interest payable in 1920 on debentures and stock will be $437,787, and sinking fund requirements for 1920 are estimated at $152,006.

The net assessment of the city for taxation purposes is: Land and improvements, $29,066,515; on business, $363,558; on income, $224,159; making a total of $29,654,232. Exemptions, not included in the above, amount to $2,669,955. The total tax rate for supporters of public schools, as before announced, is 40.40 mills, for supporters of separate schools, 42.30 mills and the total tax levy for 1920 is $1,191,168. Total revenue for 1920 is estimated at $1,534,403.

Montreal, Que.—The city's revenue returns for the first there months of this year compare favorably with a year ago. The outstanding accounts on the realty taxes now amount to $3,937,663, as compared with $4,831,664 a year ago, and with a larger collection roll as well. Regarding water and business taxes for last year, 90 per cent. of which had been collected on January 1st. last, further returns up to March 20th indicate that the balances now due amount to about 2 per cent. on the whole. The amount of business taxes on the roll was $1,353,884, and at the end of December, 1919, there had been collected the sum of $1,289,397, leaving an unpaid balance of only $64,486. Of this latter amount, there had been collected up to March 20th, 1920, the sum of $32,781, which leaves an unpaid balance due of $31,704—a balance of 2½ per cent., or representing again a total collection of 97½ per cent. on the whole amount.

As the realty taxes are the greatest source of city revenue, the calculations run into many millions. The total amount on the 1919 roll was $14,107,054, of which there had been collected between September 1st and December 31st the large sum of $9,352,045, which left a balance due on January 1st last amounting to $4,755,009. The collections on this latter sum during the months of January and February of this year amounted to $817,345, and the balance still due when the last figures were available was $3,937,663.

South Vancouver, B.C.—The total amount of tax arrears, not including tax sale properties, is $550,547, not $26,511, as stated in *The Monetary Times* of March 12th. Consolidated taxes collected in 1919 amounted to $26,511. The amount of tax sale corporation purchases during the year was $582,319. The figure, $10,180, is not an improvement in the amount of sinking fund paid this year, as against the amount paid in 1918, as reported, but is an improvement to the amount stated in the balance of outstanding arrears now owing to sinking fund, as against the 1918 figure. Outstanding loans increased during the year by $148,999. The bank balance at the end of 1919 showed a big increase, the amount being $428,727, as against a balance of $34,869 in the previous year. Total expenditure, given as $1,393,418, includes temporary loans repaid amounting to $275,000, and treasury bills retired, $43,370, making a total of $318,370, which

DOMINION BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co. during the past week, in provinces, as compared with those of previous weeks, and corresponding week of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P.E.I.	Total.	1919.
Mar. 26th ..	4	5	0	0	2	0	0	2	0	13	19
Mar. 19th ..			Figures not yet available.								16
Mar. 12th ..			Figures not yet available.								19
Mar. 5th ..	1	7	3	1	1	0	3	0	0	16	11

THIRTY-THREE INCOME TAX OFFICES

Replying to a question by W. A. Buchanan, Lethbridge, in the Commons on March 29, Sir Henry Drayton stated that there are at present thirty-three places in Canada where officials of the finance department were located for the administration and collection of the income tax and the business profits tax. Steps are being taken to open further offices at Dauphin, Man.; Lethbridge, Alta.; and Prince Rupert, B.C. By provinces there are offices as follows: Prince Edward Island, one; Nova Scotia, two; New Brunswick, one; Quebec, two; Ontario, thirteen; Manitoba, two; Saskatchewan, six; Alberta, two; British Columbia, three, and Yukon Territory, one.

should have been deducted. Assets of municipality now amount to $9,561,106.

St. Catharines, Ont.—The tax rate has been struck at 36 mills, an increase of 4½ mills over last year.

Niagara Falls, Ont.—At a meeting of the city council, on March 30th, it was decided to take over the local line of the N., S. and T. Railway. The city solicitor was instructed to notify the company to that effect, and also the Ontario Railway Board of the appointment of a court of arbitration.

St. Thomas, Ont.—The tax rate this year will be 33½ mills. The city's assessment is $12,830,231, an increase of $1,585,420 over last year. Nearly $600,000 is the total of the civic budget, of which $57,879 will be required for interest and sinking fund on debentures.

Toronto, Ont.—The civic budget for 1920 features an increase in the general revenue of 16 per cent. over that of last year and a surplus from last year's operations amounting to 2.75 mills on this year's assessment, as compared with a surplus of 1.50 mills last year. The total revenue from miscellaneous sources (including surplus) available for meeting the city's actual expenditures this year is $10,608,026. The estimates submitted call for an aggregate expenditure of $29,890,129. There is left, therefore, a balance of $19,282,103, between expenditure and revenue, to which is added $188,997 for probable tax losses, or $19,471,100 in all, to be raised by general taxation. It necessitates a rate of 30.5 mills on the assessment of $637,771,320.

A comparison of the proportion of expenditure borne by taxation, general revenue and surplus in the budgets for 1919 and 1920 shows an increase in the latter and a decrease in the former. General revenue this year will provide 27.2 per cent. of the total moneys to be expended, while last year it provided 27.6 per cent., and taxation will provide 64.7 per cent., as compared with 68.5 per cent. last year. This decrease is made possible by an increase in surplus of 8.1 per cent. of expenditure as compared with 3.9 last year.

The surplus from last year is $1,756,218. This consists of $1,123,401 in net excess revenue over that estimated, and $746,522 in net savings in appropriations, less $113,705 for unprovided expenditures. A considerable portion of this surplus is due to savings in last year's appropriations on war account, interest on temporary loans and to excess revenue over that anticipated, the budget points out. This year nothing is included in the estimates for war purposes, with the exception of interest on war debt. Estimated revenue for 1920 amounts to $8,192,681, an increase of $1,153,109 over 1919. This includes a provision of $400,000, not appearing in other years, representing the revenue expected from the assignment or surrender of life assurance policies on soldiers. It is a special source of revenue applicable only in 1920. In reference to capital requirements, the budget states that the total new capital to be raised in 1920 is $8,156,895, involving annual debt charges of $735,200. About half of this will be for non-self-sustaining services, upon which the annual debt will approximate $365,000, and must be raised by general taxation, adding over half a mill to the rate.

The permanent debt, represented by debentures outstanding, which will mature and be redeemed this year, is $4,179,831. Thus, if the works now proposed are proceeded with, amounting to more than eight millions, the debt will be increased by about four millions, it is pointed out. The total debt charges amount to $8,901,107, of which $4,578,397 is for interest, $4,247,710 for redemption of principal and $75,000 for exchange and other purposes. Special receipts and revenue from self-sustaining enterprises provide for $4,082,624, or 46 per cent.; the balance has to be raised by general taxation. During the last six years, additions to non-self-sustaining debts have resulted in an increase of 50 per cent. in the tax rate for debt charges on such debts, rising from 5 mills in 1914 to 7.5 mills this year.

Government and Municipal Bond Market

Victory Bond Prices Again Increased—Manitoba Sells Bonds in New York—Greater Winnipeg Disposes of $1,000,000 Issue—Option on Previous $2,000,000 Exercised

THIS week was featured by the sale in New York of $2,850,000 province of Manitoba 6 per cent., 5-year bonds to a syndicate comprising J. P. Morgan and Co., the First National Bank, the National City Co., Harris, Forbes and Co., and Brown Bros. The bonds are being offered there at 95.84 at which price the yield is 7 per cent., and like the other Canadian issues which have lately been offered in the United States, are being absorbed rapidly. The province also has another issue to dispose of to the amount of $1,769,000, and Hon. Edward Brown announces that public tenders will be called in the near future, and the money will be obtained if possible in New York.

Greater Winnipeg Water District has sold another issue of bonds amounting to $1,000,000 to Messrs. Wood, Gundy and Co., at 98.389. The maturity is 20-years and the interest rate is 6 per cent., and at the price paid, the district paid about 6.14 for its money, which is somewhat above the rate on the last loan which was made in New York at the end of February.

When Messrs. Wood, Gundy and Co., and the Dominion Securities Corp., tendered for the $2,000,000 6 per cent., 10-year bonds of the district at the end of February, they offered 87.25, New York funds for $725,000 and a 30-day option on the balance at the same price. This option expired two or three days ago, and was duly exercised.

Victories Advance Again

Another advance in the prices of Victory bonds announced at the end of last week, is a promising sign for the Canadian government and municipal bond market. The prices of all maturities were raised from ½ to 1 point, with the exception of the 1934's which are still at the old price of 97. The comparison of prices and the present yield are as follows:—

Maturity.	Present price.	Old price.	Present yield.
1st Dec., 1922	100	99½	5.50%
1st Nov., 1923	99¾	99¼	5.57%
1st Dec., 1927	100½	100	5.42%
1st Nov., 1933	101½	100½	5.34%
1st Dec., 1937	103	102	5.24%
1919 VICTORY LOAN			
1st Nov., 1924	99	98½	5.73%
1st Dec., 1934	97	97	5.80%

Coming Offerings

The following is a list of debenture offerings, of which mention is made in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
CharleswoodR.M.,Man.	$ 10,000	6	20-instal.	Apr. 3
Stamford Tp., Ont.	20,000	6	20-instal.	Apr. 5

Prescott, Ont.	8,500	6	......	......
Vermilion, Alta.	26,000	6½ & 7	20-instal.	......

Vermilion, Alta.—Offering is being made by the town of $20,000 6½ per cent. 20-instalment debentures and $6,000 7 per cent. 20-instalment debentures.

Your
Surplus Earnings

In view of the sound investments they will buy at low prices, the wisest thing to do with surplus earnings to-day is to invest them in long term securities.

Canadian Government and Municipal Bonds, maturing from ten to forty years hence, can be bought to yield an interest return of from 5.24% to 7%.

Write us and we shall be happy to send you a list o such investments.

TELEGRAPH, PHONE OR WRITE ORDERS

G. A. STIMSON & CO., LTD.

UNION BANK BLDG. - - TORONTO
MAIN 2011

Prescott, Ont.—The town is offering $4,500 6 per cent. 5-instalment debentures and $4,000 6 per cent. debentures, due in 1929. No date is stipulated.

Debenture Notes

York Township, Ont.—The council has given authority for the issuance of $35,000 debentures for school purposes.

Niagara Falls, Ont.—A motion is being considered by the city council to submit a by-law to the ratepayers on April 26, to raise $250,000 for the purpose of constructing a trunk sewer.

Raymond, Alta.—Mayor Pack is asking more powers to raise money for the purpose of borrowing $15,000 this year to carry out a paving program. A private bill must be passed in the legislature for this purpose.

Sarnia, Ont.—Debentures are now being prepared for sale for the payment of the soldiers' civic gratuity, the by-law for which was passed at a special meeting of the 1919 city council, providing for the distribution of $70,000 pro rata among Sarnia officers and men who served overseas, and who were residents of the city for six months prior to enlistment.

Montreal, Que.—The city council has voted the sum of $2,409,637 which is practically the amount needed by the administrative commission for completing the aqueduct for a water supply, as well as what is required for the construction of a new low-level pumping plant. As the city commissioners are proposing improvements which will require an expenditure of $4,500,000, they will be obliged to go again before the council for the balance.

Edmonton, Alta.—In regard to the debentures to be sold this year in connection with capital expenditure, the city's attention has been drawn to the large amount of treasury bills maturing early in 1921, for which some arrangements will have to be made in 1920.

The city has secured the approval of the Board of Public Utilities Commissioners to borrow close to $1,500,000 this year, provided the ratepayers endorse the various by-laws under which the expenditures are to be made.

Ingersoll, Ont.—Members of the Board of Education have expressed the opinion that the board should not be asked to assume any responsibility for the sale of debentures for the new Central School, for which $120,000 was granted through a vote of the people and an additional $60,000 by resolution of the council, following circulation of a petition. The council feels that the board should authorize or endorse the payment of a commission for selling the debentures, while the trustees, though willing to help in any way to sell them, think there should be no resolution or other definite agreement.

Bond Sales

St. Anne R.M., Man.—Messrs. A. E. Ames and Co. have purchased $57,263 5½ per cent. 30-instalment debentures.

Gonor S.D., Man.—Messrs. H. J Birkett and Co. have purchased $3,950 7 per cent. 20-instalment debentures of the school district.

Brantford, Ont.—City Treasurer Bunnell reports that two-thirds of the $150,000 treasury notes offered to local citizens have been taken, but mainly by the larger class of investors.

Cape Breton County, N.S.—The Nova Scotia Trust Co. has purchase, and is offering $75,000 6 per cent. debentures, dated March 1st, 1920, and due March 1st, 1927, at par and interest. The bonds are issued under the authority of the Nova Scotia Highways Board for the construction of roads, and are guaranteed by the province.

Manitoba.—A syndicate, composed of J. P. Morgan and Co., the First National Bank, the National City Co., Harris, Forbes and Co., and Brown Brothers and Co., have purchased $2,850,000 6 per cent. 5-year gold bonds, dated April 1st, 1920. The bonds are the direct obligation of the province, and both principal and interest of bonds will be payable in gold dollars at the office of J. P. Morgan and Co.

Sandwich, Ont.—The town has awarded to the National City Co., Ltd., at 97.82, two issues of bonds as follows: $67,334 15-years 6 per cent., $87,598 10-years 6 per cent. Bids were received as follows:—

National City Co., Ltd.	97.82
A. E. Ames and Co.	97.63
Brent, Noxon and Co.	97.30
Wood, Gundy and Co.	97.08

Niagara Falls, Ont.—An issue of $100,000 of bonds of the city has been awarded to the United Financial Corporation, Ltd., Toronto and Montreal. The bonds bear 5 per cent. and are repayable in twenty instalments. The money is to be spent for the erection of a technical high school and collegiate institute. This is in addition to the issue of $63,000 for public school purposes purchased by the United Financial Corporation a few days ago.

Greater Winnipeg Water District, Man.—The commissioners have sold to Messrs. Wood, Gundy and Co. and the Dominion Securities Corp. $1,000,000 6 per cent. 20-year bonds at 98.389. Tenders received were as follows:—

Wood, Gundy and Co. and the Dominion Securities Corp.	98.389
A. E. Ames and Co.	96.29
W. A. Mackenzie and Co., A. Jarvis and Co., R. A. Daly and Co., and R. C. Matthews and Co.	94.21

ST. JOHN DRY DOCK AND SHIPBUILDING BONDS

An offering of $884,276 St. John Dry Dock and Shipbuilding Co., Ltd., 5½ per cent., first mortgage serial gold bonds, dated July 5, 1919, and maturing from 1920 to 1954, is being made by Messrs. W. A. Mackenzie and Co., Toronto. Principal and interest are to be paid by Dominion of Canada, by semi-annual subsidy.

The St. John Dry Dock and Shipbuilding Co., Ltd., was organized for the purpose of building and constructing at St. John, N.B., a graving dock of the first class, together with a shipbuilding yard. The dock will accommodate vessels of the largest size afloat, and will alone cost $5,500,000. In order to assist in the promotion and construction of this work the government of the Dominion of Canada, under authority of "Dry Dock Subsidies Act, 1910" and the "Dry Dock Amendment Act, 1917," provides an annual subsidy of $247,500 per annum, payable half-yearly. This subsidy is sufficient to meet the principal and interest on the total issue of bonds, amounting to $3,826,272, with interest at 5½ per cent. of which the present issue is the first series.

Work having progressed sufficiently, the company is entitled to draw a portion of this subsidy amounting to $28,599 half-yearly. This subsidy has been absolutely assigned to the trustee, and is sufficient to meet interest and principal on bonds amounting to $884,276, which are now being offered, and which are part of the total authorized issue. The subsidy paid by the government is irrevocable and assigned absolutely to the trustee, the Montreal Trust Co., to meet the interest and principal on these bonds, and this subsidy cannot be diverted, reduced, changed, or in any way dealt with, but is absolutely the property of the holders of the bonds. In addition, the bonds when issued are a first and only mortgage on all the works, plant and equipment of the company.

The annual meeting of the executive committee of the Union of Canadian Municipalities was held on Tuesday, 30th March, at Ottawa, under the chairmanship of Mayor Fisher, Ottawa, president. There were also present: Ald. Rondeau, M.D., Westmount, Que.; C. W. McCrae, treasurer, Sault Ste. Marie, Ont. Also the following officials: W. D. Lighthall, K.C., honorary secretary-treasurer; Fred. Cook, Ottawa representative; G. S. Wilson, assistant secretary-treasurer, and Fred. Wright, "Canadian Municipal Journal."

For the convention city, both Ottawa and Quebec put in claims, and this was left over to be decided by Mayor Fisher and Mr. Lighthall. Some changes were made in the financial arrangements, and other details were discussed.

Trading in Outstanding Bonds Not So Brisk—Leamington Tobacco Stock Offering

DULLNESS has prevailed in the market for industrial securities during the past week. Trading in outstanding bond issues was not so brisk as previously, and no new offerings are being made of any significance. The Leamington Tobacco Co., Ltd., is making an issue of $250,000 7 per cent. cumulative preferred stock at par (par value, $100), with a bonus of 50 per cent. common stock.

An issue that should be of interest to Canadian investors is that of the $15,000,000 Anglo-American Oil Co. 7½ per cent. notes, due April, 1923. The Anglo-American Oil Co. is one of the largest oil marketing concerns in the United Kingdom, and is in reality the Standard Oil Co. interest operating in England. The issue is being offered in New York.

New Stock Distributions

In a circular just issued, the directors of the Canadian Salt Co. state that the distribution of stock authorized at the recent annual meeting will consist of an issue of 4,000 shares of capital stock to shareholders on the basis of one share of new stock to each two shares of stock now held.

Directors of the St. Maurice Paper Co., Ltd., the Three Rivers subsidiary of the Union Bag and Paper Corporation, have declared a 30 per cent. stock distribution to shareholders of record April 2nd, and payable April 5th. The Union Bag and Paper Corporation holds some 75 per cent. of the outstanding common stock capitalization of the St. Maurice company, and will, in consequence of the decision of the board of the Canadian subsidiary, receive some 11,500 shares of new stock.

The Provincial Paper Mills, Ltd., is being formed to carry on the business heretofore conducted by the Provincial Paper Mills Co., Ltd. A meeting of the shareholders has been called for April 3rd next to arrange for the transfer. The new company will take over all the assets and obligations of the old. The transfer is to be made on a basis of one share of preferred in the new company for one share of preferred in the old, and for every two shares of common now held, three shares in the new company will be given.

Brandram-Henderson Bonds

The annual report of Brandram-Henderson, Ltd., in regard to the debentures of the company, says:—

"It will be noted that there is a marked decrease in the total of current liabilities. This is due to the elimination of the item, "Loans from Bank," which last year appeared as $444,706. This has been accomplished and other important advantages secured by the issue of $1,250,000 twenty-year 6 per cent. consolidated mortgage sinking fund gold bonds, some $655,000 of which were sold early in the year 1919. As projected in the last report, the balance of these consolidated bonds has been dealt with by placing $345,000 in escrow to retire a like amount of first mortgage bonds outstanding, while the balance, $250,000, is held, only to be issued at some subsequent date, to the extent of 75 per cent. of the cost of any future capital expenditure."

TRADING LIGHTER ON LOCAL EXCHANGES

Atlantic Sugar Again Heads Montreal Market with Reduction in Price of More Than Four Points—New York Stocks Irregular

FOLLOWING the break on March 24, the New York market rallied, stocks rising from 2 to 20 points. Easier money conditions and the announcement of the $10,000,000 shipment of gold from London had the effect of creating buoyancy. Call loans which were at 15 per cent., dropped to 12 per cent. on March 25, and on the following day to 6 per cent., remaining there, until March 29 the rate again rose to 12 per cent., leaving the prices net lower in most issues. On March 30, trading was lighter of volume and more restricted than in any session in several weeks, and prices were irregular throughout the day. Call money did not go above 10 per cent.

Trading on the Montreal exchange was lighter of volume than in the previous week. Atlantic Sugar lead with total sales of 13,190 for the week ended March 30, with a drop in price from 89⅝ to 84¼. National Breweries was fairly active with a turnover of 7,015 shares, the closing price being 51½, a gain of 2 points over last week. Spanish River with sales, of 4,899 and Brazilian with sales of 2,925 experienced a drop of ¾ of a point and 1 point respectively. Provincial paper rose 20 points in the past week closing at 128, although the turnover of shares was not large. This rise is accounted for by the new stock plans of the company, which are expected to be announced at a special meeting on April 3. The general tone of the market, as a whole, is better, although several stocks show extreme weakness.

Little activity was displayed in Toronto, outside of Brazilian Traction and the steel issues. Brazilian lead with total sales of 1,775, the closing price being 46½, a drop of 1 point from the level of the previous week. Steel of Canada remained unchanged at 82, while preferred gained a fraction of a point. National Steel Car preferred advanced nearly one point at 38⅞, with sales of 1,120. Most of the other industrials displayed weakness. Bank stocks registered further declines, while some advances were made in the loan and trust division.

All the Canadian stock exchanges are now operating under new time. The Montreal hours are 9 a.m. to 12.30 and 2 p.m. to 3 p.m. The Toronto and Standard exchanges open at 9 a.m. and close the morning session at 12 noon, reopening again at 1 p.m., and concluding the day one hour later. These changes are to conform to the sessions of the New York exchange, owing to the daylight saving regulations which have gone into effect there, and will only be necessary until May 2, when such regulations come into effect in Canada.

Longer Life for Power Equipment

CORRECT lubrication insures the maximum length of service from all power-producing and power-using equipment. It eliminates the grinding wear and abnormal strains resulting from a high friction load. Depreciation charges, operating costs, repair bills—all are lowest when the proper lubricants are used.

Look over the accompanying list of Imperial Lubricants. Each is scientifically formulated to meet the lubrication requirements of some particular mechanical operation and service condition. All are of uniform high quality, thoroughly dependable and available everywhere.

Imperial Polarine oils and greases for automobiles and trucks; Imperial Kerosene Tractor oils and other farm lubricants and Imperial Household Lubricant for the home are standards of quality. From one end of the Dominion to the other, Imperial Lubricants lead in every field.

Imperial Lubrication Engineers will gladly advise you on anything relating to lubrication. Write to us at 56 Church St., Toronto, or to any of our branch offices.

Investments and the Market

Winnipeg Railway Valuation Lowered $9,000,000 by Utilities Commission—High Operating Expenses Cause Decline in C.P.R. Net—Good Showing by Montreal Power—Export Trade of Brandram-Henderson Making Advance

Port Hope Sanitary Manufacturing Co.—The annual statement of the company for the year ended January 31st, 1920, shows a net profit of $79,411. Current assets of the company amount to $302,834, and current liabilities, $71,116. Reserves, including income war tax and other contingencies, amounts to $83,688.

Winnipeg Street Railway Co.—According to the report made by the Public Utilities Commission before Commissioner MacDonald in the street car fare case, the valuation of the company is placed at $20,023,236. E. Anderson, K.C., counsel for the company, claimed that there should be added to this amount approximately $1,000,000 for under-valuation and $8,000,000 for intangibles, such as working capital, going value, property worn out and destroyed, and increase in land values and franchise values. In all, the company claimed a total valuation of $29,000,000.

Canadian Niagara Power Co.—At the annual meeting of the Canadian Niagara Power Co. and the Niagara Falls Power Co. at Niagara Falls, Ont., on March 26th, the members of the respective boards were re-elected. They are as follows: Canadian Niagara—President, A. Monro Grier; general manager, Paul A. Schoellkopf; vice-president, Wm. H. Brouse; secretary, F. L. Durdan; treasurer, W. Paxton Little. Niagara Falls Power Co.—Chairman of directors, Jacob L. Schoellkopf; president, Paul A. Schoellkopf; vice-president, C. P. Hugo Schoellkopf; vice-president and general counsel, Morris Kahn, Jun.; secretary, Frederick L. Lovelace; treasurer, W. Paxton Little.

Ames-Holden-McCready, Ltd.—The annual meeting of the company was held in Montreal on March 25th last, and, with two exceptions, the board of directors was re-elected. W. B. Wiegand, formerly chief chemist of the Canadian Consolidated Rubber Co., was added to the board, and Lieut.-Col. C. W. McLean was elected to fill the vacancy caused by the retirement of Shirley Ogilvie.

The annual report was read and approved, and during the meeting the president, T. H. Reider, stated that the tire factory at Kitchener was in operation, the tire exhibit at the meeting being one of the first manufactured by the company. After adjournment, the shareholders made a tour of inspection of the extensions to the Montreal factory, which is being equipped to produce rubber and canvas footwear, automobile tubes, waterproofed fabrics, etc.

Canadian Pacific Railway.—Net earnings of the company for February, 1920, according to the monthly statement just made public, amounted to $713,873, which figure is $267,24 under the level reported in the corresponding month a year ago. Gross receipts from operation in the month were the most substantial ever reported by the company in any February since its existence, the gain in this respect being almost $2,500,000 over the figures for the same period in 1919, and over $4,000,000 in excess of those for February 1918. Working expenses, on the other hand, increased by $2,760,179 in the month, bringing about the poorer exhibit in the net for the period. The ratio of working costs to gross earnings in the period stood at 94.73 per cent., against 91.1 per cent. in February, 1919, while for the two expired months of the current calendar year the ratio was 95.27 per cent. compared with 89.48 per cent. in the corresponding period last year.

Montreal Light, Heat and Power Co.—In January, 1920, the company reported gross earnings of $1,081,800, as against $1,001,556 in the same month of the previous year, a gain of $17,244. Net earnings amounted to $538,655, as against $536,063, a gain of $2,592, and the surplus, after charges, was $448,496, against $445,294. For the months of December and January, the total gross amounted to $2,026,133, up from $1,951,201, a gain of $74,932. The net earnings were $1,066,619, as compared with $1,041,447, or a gain of $25,172, and the surplus, after charges, was $886,501, against $859,827, an increase of $26,674. The net February statement will, it is expected, show an even larger increase than the two previous months.

December, January and February are regarded as big months for consumption of gas and electric light, owing to the short days, but cost of coal and other products had the effect of lowering the net earnings. In view of this fact, however, the showing the company is considered to be an exceptional one.

Western Power Co. of Canada.—The annual report of the company shows that operating revenues in 1919 were $472,522, as compared with $448,709 in 1918, an increase of about 5.30 per cent. Operating expenses for the year amounted to $185,486, an increase of $22,067, or 13.50 per cent. over 1918. The chief causes of the increase were higher wages and taxes, exchange on transfers of funds to New York to pay first mortgage bond and debenture coupons and large appropriations for maintenance and depreciation. Non-operating revenues decreased $5,943 and gross income decreased $4,198, or 1.43 per cent. During the year $39,814 was expended for construction, the most important items being extensions to the transmission and distribution systems to supply power to new customers.

Total assets are $12,687,536, of which $11,233,492 is property account, capital liabilities are $5,850,000, and funded debt $6,500,000.

The company operates in Vancouver and district states, and because of the reduction of the amount of power supplied to the British Columbia Electric Railway, Ltd., necessitated by a period of low water in Stave Lake in October and November, the revenue from that source was about one per cent. less than during the preceding year, while the increase in commercial lighting sales was slightly greater than the decrease in commercial power earnings.

Steel Co. of Canada, Ltd.—The annual statement of the company for 1919 shows gross profits of $4,000,940, as compared with $5,367,120 in 1918 and $6,040,318 in 1917. The necessity in both the latter years of making allowances for the excess cost of construction of coke ovens and other plant due to war conditions did not exist last year, thus rendering the showing in the way of gross earnings at well up to the levels of the best record reached by the company in this respect. After allowance was made in the 1918 and 1917 statements for these writings off, there remained a balance a year ago of $3,932,669, and in the previous period, one of $4,233,832, as against the 1919 showing of $4,000,940, so that the earnings result of the year, so far as application to ordinary requirements is concerned, ranks second only to the record performance of 1917, when war conditions and their resultant prosperity to the iron and steel business were at their zenith.

The balance sheet shows further strengthening in the position of the company. Total assets are now $47,660,389, as compared with $45,652,831 in 1918. Current assets, although somewhat below the 1918 figure, show that the working capital of the company is in a splendid position. Cash on hand amounts to over $2,000,000, and inventories total over $5,500,000. Investments in other enterprises, including coal and ore properties, increased in the year by nearly $1,500,000 to $3,734,545, while securities set aside for special purposes, embracing Steel of Canada stock set aside for employees and other uses, showed an addition of some $850,000 in the period, standing at $1,037,147 at the end of 1919.

On the liabilities side, current liabilities amount to $3,598,799, compared with $3,706,154 last year. Reserves have been increased over $1,000,000, the figure now standing at $8,972,516. The surplus for the year is given as $8,195,302, as compared with $7,322,872 in 1918.

Brandram-Henderson, Ltd.—The company, in its statement for the fiscal year to December 31st, 1919, reports a period of steady expansion in sales. The year was one of unusual interest in general trade circles, because of the uncertain conditions which prevailed for many months after the armistice. While the foreign sales of the company during the earlier months of the year showed a decrease, in the latter months there was a very steady growth of export shipments, and at the end of the year the foreign business represented a larger percentage of the total than ever before. As the same time, there was no falling off in any portion of the home trade, and each Canadian division reported a half-yearly increase, as well as an increase for the whole year.

The company has acquired an interest in the Pacific White Lead Co., Ltd., of Vancouver, and an arrangement has been made by which the entire direction of the sales and general conduct of the affairs of the company has been assumed by the Brandram-Henderson organization. Of equal importance has been a new arrangement that has been effected by George Henderson, president of the company, whereby Brandram-Henderson, Ltd., will be able to sell its white lead products in practically all parts of the world. This has been made possible through a new arrangement with Brandram Brothers and Co., of London, England. This new arrangement has already proved of great advantage, and the company has found it advisable to considerably increase its production of white lead at the works at Montreal.

An examination of the general statement of assets and liabilities shows the company has now worked itself into an unusually strong position, as the total current assets amount to $1,610,703, as against current liabilities of only $339,410. The principal items in current assets include merchandise, $1,069,903, and accounts receivable, $529,689. Current liabilities are made up chiefly of accounts payable, $233,136, and bills payable, $61,182. There is a marked decrease in current liabilities, as last year they amounted to $802,622. This is due to the elimination of the item, "Loans from Bank," which last year appeared as $444,706. This has been accomplished, and other important advantages secured by the issue of $1,250,000 20-year 6 per cent consolidated mortgage sinking fund gold bonds, of which $655,000 were sold during the past year.

The profit and loss account is for the twelve months' period to December 31st, and shows net profits for the year of $299,736, as against $238,133, shown in the last report. The 1918 profits, however, were for a period of thirteen months. These profits, added to the balance of profit and loss carried forward from the previous year, amounting to $501,519, and a special reserve of $20,000 for depreciation against a contingency which was apprehended in the last report, but which did not occur, brought the total available for distribution up to $821,255.

DIVIDENDS AND NOTICES

NOVA SCOTIA STEEL AND COAL COMPANY, LIMITED

DIVIDEND NOTICE

A dividend of two per cent. (2%) on the Preferred Stock and one and one-quarter per cent. (1¼%) on the Ordinary Stock of the Company has been declared, payable on the 15th of April, 1920, to shareholders of record at the close of business on March 31st, 1920.

By Order of the Board.
THOMAS GREEN, Cashier.
New Glasgow, Nova Scotia, March 20th, 1920. 113

MARCUS LOEW'S THEATRES, LIMITED

The directors have declared a dividend of 1¾% on the Preference Stock and a Dividend of 5% on the Common Stock for the quarter ending the 31st day of March, 1920.

The above dividends are payable on the 15th day of April to Shareholders of record on the 31st March, 1920.

By order of the Board.
SAMUEL D. FOWLER,
Secretary.
Toronto, 29th March, 1920. 115

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of one and three quarter per cent. (1¾%) on the Preferred Stock of the **Dominion Textile Company, Limited**, has been declared for the quarter ending 31st March, 1920, payable April 15th, to shareholders of record March 31st, 1920.

By order of the Board.
JAS. H. WEBB,
Secretary-Treasurer.

RECENT FIRES

Largest Fires This Week at Fort Frances, Ont., Glace Bay, N.S., and London, Ont.—No Heavy Losses

Algonquin, Ont.—March 24—A barn and several outbuildings, owned by Blake Edwards, a farmer, were destroyed. Cause, explosion of lantern.

Alvinston, Ont.—March 26—Two large barns belonging to Alex. Meikle were destroyed. Some grain and other feed, with implements, were burned. Estimated loss, $5,000.

Cannifton, Ont.—March 24—Public school was destroyed. Cause unknown. Estimated loss, $11,000. Insurance carried, $4,000.

Danville, Que.—March 25—Barn belonging to Pierre Roy was damaged. One death.

Fort Frances, Ont.—March 26—The Canadian National Railway roundhouse was destroyed. Cause unknown.

Glace Bay, N.S.—March 27—High school was badly damaged. Estimated loss, $15,000.

Haileybury, Ont.—March 29—House situated on Little Street, occupied by W. Howard, was badly damaged. Estimated loss, $2,500. The Farr Block was also damaged.

Kitchener, Ont.—March 31—Fire destroyed the storage sheds of the Baetz Furniture Co.. Damage estimated at between $4,000 and $5,000. The fire department was able to prevent damage to the main building.

London, Ont.—March 29—Cow barn and granary belonging to the Ontario Hospital for Insane were destroyed. Estimated loss, $10,000.

Nicolet, P.Q.—March 22—Normal school building was destroyed. Estimated loss, $400,000. Insurance carried, $150,000.

Quebec, Que.—March 24—Tannery premises of Oscar Clement, situated at 24 St. Helene Street, were damaged. Cause unknown.

St. Catharines, Ont.—March 28—Store, dwelling and three other cottages owned by Charles M. Gibson, three miles from the city, were damaged. Cause unknown. Estimated loss, $5,000, partly covered by insurance.

Toronto, Ont.—March 26—Garage belonging to the Scholes Estate, situated at 13 St. Enoch Square, with three trucks belonging to the World Publishing Co., was damaged. Cause unknown. Slight damage was also done to Booth Brothers, printers, and the California Wine Co. Estimated loss, $1,500.

March 29—Building occupied by James Barrington, 205 Spadina Avenue, was damaged. Cause, gasoline explosion. Estimated loss to building, $1,000, and to contents, $700.

Condensed Advertisements

"Positions Wanted," 2c per word: all other condensed advertisements. 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rate charged for them, are payable in advance; 50 per cent. extra if charges

EX-NAVAL OFFICER (Accountant Branch), full war service, English Public School Boy, 17 years resident in Canada (banking), all Provinces but two, is visiting London at end of April and would execute commissions of any kind that will bear closest investigation. References. Box 283, *The Monetary Times*, Toronto.

WANTED.—An old-established General Agency in Winnipeg, with first-class business connections and writing facilities, requires a Manager for Casualty Department, writing all lines of miscellaneous insurance. Excellent opportunity for an energetic man, familiar with the business, and who can produce results. Apply in first instance, stating fully qualifications, etc. References required. Box No. 285, *The Monetary Times*, Toronto.

ADDITIONAL INFORMATION CONCERNING FIRES

Acton Vale, Que.—March 12—Plant of the Acton Biscuit Co., Ltd., was damaged. Cause unknown. Estimated loss, $67,430. Insurance carried in the following companies: British Colonial, $5,000; Mount Royal, $3,000; Missisquoi and Rouville, $1,000; Mercantile, $9,500; Mutuelle de Commerce, $3,000; Strathcona, $5,000; Sterling, $1,500; Stanstead and Sherbrooke, $2,000; Phœnix of London, $5,000; Nationale de Paris, $2,500; Canada, $2,500. Total, $40,000.

Manitoba.—According to the fire chief's report, the fire loss of the province in February was $93,151, as compared with $74,184 for the corresponding month in 1919, showing an increase in the fire loss of $18,967. Winnipeg's fire loss for February was $49,434 in 54 fires, as compared with $27,934 in February, 1919, in 50 fires. Brandon's fire loss for February was $13,920, in four fires, being an increase for the same period last year, as no fires were reported as having occurred during February, 1919.

Montreal, Que.—March 17—Plant of the Barrett Co., Ltd., situated on St. Hubert Street, was damaged. Cause, presumed to have been from a spark from a locomotive or a defective wire. Estimated loss, $75,000. Residence of Mrs. Renaud, 101 Mount Royal East, was damaged. Cause, carelessness with matches. Estimated loss, $125. Insurance carried, $500. Shed belonging to Wilfred Rogers, 945B St. Denis Street, was damaged. Cause, carelessness with matches.

Port Arthur, Ont.—March 9—The Port Arthur car barns were destroyed. Estimated loss, $90,000. Cause, presumed to have been from one of the following:—1. Having no watchman nor system of night patrol. 2. Smoking permitted by employees in and around the pits and tracks, and matches thrown around carelessly. 3. Tracks oil-soaked, rubbish and debris heaped around indiscriminately, oily rags and other inflammable material. 4. Use of locally made heaters in the pits, which have not been approved either by the Canadian Fire Underwriters' Association, or the Hydro-Electric Commission. 5. Lights on flexible cords carried and used everywhere without protection. 6. Spontaneous combustion.

Port Arthur, Ont.—March 9—Car barns, together with four street cars, owned by the Public Utilities Commission, were destroyed. Cause unknown. Estimated loss, $65,000. Insurance carried, $211,000.

Veregin, Sask.—February 23—Grain elevator, occupied by the Veregin Grain Co. and owned by Matechuck and Podovinnikoff, was destroyed. Cause, spark from engine on side track. Estimated loss, $28,000. Insurance carried, $12,000.

Vancouver, B.C.—Fire Chief Carlisle has submitted the following report of fire losses for the month of February:—The total loss sustained by fire for the month of February was $5,263, of which amount, $3,953 was covered by insurance, leaving the property loss above insurance at $1,310. The total value of the property at risk was $477,820, with insurance to the amount of $339,870, carried on same. The following will show the cause of fires, alarms, etc.:—Backfires (carburetter), 2; bush fires, 18; carelessness with cigarettes, 3; chimney fires, 19; defective boiler (Turps), 1; defective chimneys, 3; defective fireplaces, 1; defective oil-feed pipes (furnaces), 2; electrical origin (short-circuit-wiring), 1; false alarms, 7; hot ashes placed in wood on porch, 1; overheated boiler, 1; papers on hot furnace pipe, 1; smoking in bed, 1; sparks flying, 7; spontaneous combustion, 1; unprotected furnace-pipe, 1; unprotected stove-pipe, 1.

WINNIPEG PREMISES FOR CREDIT FONCIER

A new office building in Winnipeg is to be erected this year by Credit Foncier Franco Canadien according to an announcement just made by J. H. Bourgouin, manager of the company for Manitoba. A frontage of 73.65 feet has been secured in Smith St., at about $1,000 per foot. The company will occupy the ground floor and lease the upper floor.

Dominion Inspection of Loan and Trust Companies

Bills Now in House of Commons Provide for Annual Inspection, in Place of Optional Power to Inspect as Authorized by Acts of 1914—About Twenty-Five Companies Affected — Department of Insurance Will Have Charge.

PROVISION for the inspection of loan and trust companies doing business in Canada under Dominion charters is contained in two bills which were given their first reading in the House of Commons on March 30. The bills are practically identical, the one relating to trust companies being an amendment of the Trust Companies Act, 1914, and the one relating to loan companies being, an amendment to the Loan Companies Act, 1914. The inspections are to be made by the Department of Insurance. The trust company bill requires:—

"The superintendent shall visit personally or cause a duly qualified member of his staff to visit, at least once in each year, the head office of each company required by this act to make returns to the minister, and to examine carefully the statements of the condition and affairs of each company, and report thereon to the minister as to all matters requiring his attention and decision.

"For the purpose of such examination the company shall prepare and submit to the superintendent such statement or statements, with respect to the business, finances or other affairs of the company, in addition to that mentioned in the last preceding section, as the superintendent may require, and the officers, agents and servants of the company shall cause their books to be open for inspection, and shall otherwise facilitate such examination so far as it is in their power.

"The superintendent may examine under oath the officers, agents or servants of the company for the purpose of obtaining any information which he deems necessary for the purpose of such examination.

"The superintendent shall also prepare for the minister from the said statements, an annual report, showing the full particulars of each company's business.

Company's Certificate May be Cancelled

"If as the result of the examination as aforesaid of any company the superintendent believes that the assets of the company are insufficient to justify its continuance in business, he shall make a special report to the minister on the condition of such company.

"If the minister, after a reasonable time has been given to the company to be heard by him, and upon such further enquiry and investigation as he sees fit to make, agrees with the opinion of the superintendent, he may suspend or cancel the certificate of the company, and the company shall thereupon be held to be unauthorized to transact further business: Provided, however, that the minister may, during such suspension or cancellation, issue such conditional certificate as he may deem to be necessary for the protection of the public.

"If the minister deems it advisable, the said conditional certificate may provide that the company shall, during the continuance of such conditional certificate, arrange for the sale of its assets and for the transfer of its liabilities to some other company under the provisions of sections seventy-one and seventy-two* of this act.

"If upon the expiration of the conditional certificate no arrangemment satisfactory to the minister has been made for such sale and transfer, and if the company's condition is not then such as to warrant the restoration of the company's certificate, the company shall be deemed to be insolvent."

The Present Law

These provisions will constitute sections 70 and 70(a) of the Trust Companies Act, replacing clauses which state that "The Treasury Board upon the report of the minister may appoint some competent person as inspector to investigate the affairs and management of the company, who shall report thereon to the minister, and the Treasury Board may also prescribe the manner and the extent to which the investigation shall be conducted. It shall be the duty of all officers and servants of the company to produce for the examination of any such inspector all books or documents in their custody or control in relation to the matters under investigation. Any such inspector may examine upon oath the officers and servants of the company in relation to its business and may administer an oath accordingly."

The loan company amendment will also constitute clauses 70 and 70(a) of the Loan Companies Act, replacing clauses providing for an optional inspection of loan companies similar to that authorized for trust companies.

There are about twenty-five loan and trust companies operating under Dominion charter, so that the number to be inspected will not be large. Among the loan companies are: Canada Landed and National, Toronto; Canada Permanent, Toronto; Canadian Mortgage Investment Co., Toronto; Central Canada Loan and Savings, Toronto; Colonial Investment and Loan, Toronto; Dyment Securities Loan and Savings Co., Barrie, Ont.; Eastern Canada Savings and Loan Co., Halifax; Great West Permanent Loan Co., Winnipeg; Hudson Bay Mortgage Corporation, Vancouver; Mortgage Corporation of Nova Scotia, Halifax; Northern Mortgage Co. of Canada, Winnipeg; Port Arthur and Fort William Mortgage Co., Ltd.; Real Estate Loan Co., Toronto; and the Societe de Prets et Placements de Quebec.

Among the trust companies are: Canada Permanent Trust Co., Toronto; Canada Trust Co., London; Capital Trust Corporation, Ottawa; Chartered Trust and Executor Co., Toronto; Eastern Trust Co., Halifax; Imperial Trusts Co., Toronto; Mercantile Trust Co., Hamilton; Prudential Trust Co., Montreal; Sterling Trusts Corporation, Toronto; Western Trust Co., Winnipeg.

Annual returns have been received from all of these companies by the government, and until 1916 these returns were published in a booklet by the finance department.

---

*In the bill to amend the Loan Companies Act, sections eighty-one to eighty-four are referred to. This is the only difference in the wording of the two bills.

CAUSES FOR WESTERN MUNICIPAL DEFAULTS

Municipalities Were Too Anxious to Grow, and Took in More Land Than Was Necessary—Suggestions for Land Grants

By Andrew T. Drummond, LL.D.

THE discussion at the meetings, a few weeks ago, of the Dominion Mortgage and Investment Association over the defaults of certain prairie municipalities in the payment of the interest on their bonds, whilst emphasizing the effects of such defaults on provincial and Dominion credit, has not fully developed the causes which have brought these municipalities into such financial difficulties, nor have remedies been suggested to prevent their recurrence. Brokers and their bankers have, in the past, been too ready to purchase large amounts of the bonds of the western towns and villages on a mere official statement of, among other matters, assessment values, without first enquiring what the area is in acreage within the town or village limits covered by the assessment rolls, what are the number of buildings erected and the population of a permanent nature, and what the immediately surrounding sources of business.

Grants Covered Wide Area

Two leading causes can be cited that, in the case of very many towns, stand at the root of their financial troubles: The want of concentration of the settlers around the towns and villages, and the practice of so many of them in their ambition to be future important cities, and to at once increase their assessment rolls, to take within their limits adjoining quarter sections which have no chance for one or two generations of being built upon.

It will be recalled that the desire of the Dominion government to attract population to the western prairies, originally led to the settlers receiving, but only in alternate sections, free grants of land, each in area half a mile by half a mile, equalling one hundred and sixty acres, and to their being allowed to locate wherever land was available, even if 25 to 50 miles away from a railway, as constantly happened. There was no policy of concentration, under which, when a town was founded on a new main line or branch railway, it was because there was immediately surrounding it a farming population of considerable size to feed it. As a fact, settlers everywhere have been from half a mile to one mile and generally more, from each other, whilst, with limited help, few of them could satisfactorily cultivate even one-third of the 160-acre grant. Thus, with settlers relatively few in numbers around it, and so much of the land uncultivated, the business of the new town was necessarily circumscribed, and will remain so until, in the lapse of years, land becomes subdivided into smaller farms and population largely increases in the rural areas.

Vacant Land Taken In

But there has often been a serious cause within the town itself. Very many of the scores of new towns laid out by the three transcontinental railways appeared to have visions of, in a short time, becoming important cities, possibly another Regina, or Calgary, or Edmonton, and appropriate preparations were planned. Originally, in most cases only 80 or 160 acres were surveyed by the railway company into lots, but speculators, or the railway company itself, made subdivisions of further quarter sections alongside, and these subdivisions with, in most cases, not even a hope of a population upon them for a quarter or perhaps a half century to come, were eagerly incorporated into the town sites by municipal councils, which were thereby enabled on their own valuations, to largely increase not only the assessment rolls, but the apparent security for municipal debts which they then proceeded to incur. That during the past seven or eight years, many outlying lots in the original townsite, and considerable portions of these added subdivisions, should become town property through failure to pay the taxes, was inevitable. The rigid laws enacted by the legislatures of each of the prairie provinces, imposing not only very heavy penalties for non-payment of taxes, but additional taxes on the land for provincial revenues, greatly aggravated the matter. Thus it is that many towns in these three provinces have been faced with high taxation, large arrears of taxes, and of increasing accumulations of unsaleable property, in most cases, of no value beyond that of the surrounding farm land, although possibly still entered in the assessment rolls at the speculative figures of seven or eight or more years ago.

Legislation Should be More Strict

Legislation is urgently needed under which no city, town or incorporated village would be allowed to annex any new areas unless a given number of approved buildings had been erected and been permanently occupied on, for instance, each ten acres proposed to be annexed, whilst no village should be incorporated unless its boundaries were limited to a quarter of a section, or even less.

There should also be legislation under which, unless for public utilities which are purposed from the start to definitely pay their own way, municipalities, under stated populations, could not incur debts beyond a fixed proportion to their assessed property actually paying taxes, whilst as to these public utilities, no municipality should be permitted to undertake or share in any proposition which it does not entirely control, and which is not wholly within the municipal limits, as would be the case of an interurban railway. It is suggestive that all matters affecting the extension of municipal boundaries, and of borrowing capital for municipal purposes or undertakings, should be subject to the investigation and approval, not of the government of the province, or of any commission or body subject to it, but of an independent and uncontrolled board founded somewhat on the basis of the Ontario Railway and Municipal Board.

Make Settlement More Concentrated

The subject of limiting the free grants of land throughout the northwest to 80 acres, wherever these free grants are still available, rests with the Department of the Interior at Ottawa. It is, however, well aware that many, probably most, of the American settlers there purchase their land, and that to the British immigrant a free gift of eighty acres would be considered large. It also must see that a policy of concentration would lead to the number of settlers around each town being doubled, and the business of the town, including grain deliveries, correspondingly increased, whilst social conditions among these settlers would be greatly improved, land values would increase, and the distance from the town would, for most settlers, be greatly diminished. It is not too late for the government with its remaining crown lands to prevent a further repetition of what is now a marked detriment to the prosperity of the hundreds of towns and villages on the western prairies, and to the social and material advantages of the settlers themselves.

HIGHER OCEAN FREIGHT RATES

Passenger and freight rates on the transatlantic steamship lines between the United Kingdom and North American ports during the summer, will be increased as from April 1 on account of heavier working expenses and the rise in the cost of bunker. An increase of ten per cent. over existing rates, which are in some cases one hundred per cent. in excess of pre-war rates, may be made in passengr fares. Freight rate increases will be "substantial," it is stated. This action is being taken as a sequel to a decision at a conference of representatives of shipping interests now being held in Paris.

It is also reported that the present surcharge of $33\frac{1}{3}$ per cent. on rates now payable to balance exchange differences will be reduced to 25 per cent., although it was only a few weeks ago that the surcharge was increased from 20 per cent. to its present level.

LATE SPRING NOT HARMFUL TO WEST

Business Reported Good in Most Sections—Winnipeg to Celebrate Anniversaries—May Appoint Assessment Commission—Alberta to Regulate Sale of Subdivisions

(Special to *The Monetary Times.*)

Winnipeg, April 8th, 1920.

SPRING has been very late in Manitoba this year, but it will come in with a rush, and seeding will very soon be the order of the day. Old-timers predict that, as the winter and cold spring have been so prolonged, that seeding will be got in in a hurry and growth be rapid. Business in all lines is reported very good.

A monster pageant is being planned in Winnipeg this summer. The year nineteen hundred and twenty is the fiftieth anniversary of Manitoba's admittance into the Confederation, the fiftieth anniversary of Lord Wolseley's triumphant entry into Fort Garry, and the ending of the Riel rebellion, and the 250th anniversary of the founding of Hudson's Bay Co.

To fittingly celebrate these and other notable historical events, of which 1920 is the anniversary, it has been proposed to hold an historic pageant in Winnipeg in which the pages of history would be turned back to the days of the flint-stone and ox-cart, and then traced down through the years depicting the forward march of civilization in this province. The Board of Trade has the matter in hand.

J. L. Clarke, manager of the rural service department of the Merchants Bank of Canada, is warning western farmers against a period of tight money. He stated that the bank would continue to lend for ordinary farm needs, but advised against the undertaking of any large program of extension.

Henry Detchon, general manager of the Canadian Credit Men's Trust Association, recently returned from Vancouver, where he spent some days, discussing business conditions in the four western provinces with *The Monetary Times*, said:—

Business Good in the West

"In the Winnipeg and Manitoba area, wholesalers report sales first class, with prospects bright. During the past two weeks collections have been much interfered with by the blizzards and snow.

"Saskatchewan wholesalers report trade fairly active, with prices ruling higher. Some anxiety is being expressed with regard to the poor crop district, where numerous accounts are being carried over, but with an increased fall of snow both wholesalers and retailers are looking forward to remedying this condition by fall. Northern parts of the province are in excellent shape.

"Wholesale trade in Alberta is good, notwithstanding last year's setback to the southern part of the province. Wholesalers in the drought-stricken areas are having to carry the retail trade, but the prospects are bright in these districts, owing to the abnormal amount of moisture this winter. Collections in this province during March have shown an improvement.

"Vancouver reports are very optimistic. Wholesale trade is active. Prices still have an upward tendency and more caution is being exercised in the extension of credit. Considerable movement is taking place in the mining districts and increased trade there is anticipated. The retail clothing trade in British Columbia is slackening somewhat, some merchants attributing this to the fact that most of the men have returned from the front and their immediate wants have been satisfied. Hotels are becoming crowded to capacity and a big tourist traffic is assured for the early summer, this being helped by the high Canadian-United States exchange rate."

Restrict Sale of Alberta Subdivisions

In an effort to prevent any "wild-catting" in real estate in Alberta in the future, the legislature of that province has just amended the Act respecting subdivisions, so that permission of the Public Utilities Board must be obtained before any subdivision can be registered in the Land Title Office and placed on the market. The altered Act provides that the owner of any proposed subdivision will have to convince the Board of Public Utilities that the land in question is likely to be used for building purposes within a reasonable time.

Manitoba Assessment Commission

Appointment of the new taxation commission to supervise assessments throughout the province has been considered by the government in council. According to official information, the personnel will be L. W. Donley, at present assessment commissioner for Winnipeg, Prof. A. B. Clark, and Robert Forke. Mr. Donley will, it is said, head the commission. Prof. Clark is a member of the Faculty of the University of Manitoba and Mr. Forke is secretary of the Union of Municipalities, and has served on commissions to equalize the provincial assessment for Patriotic Fund purposes. The city council in considering the government proposal to include Mr. Donley, who is a very popular and efficient city official, in the new commission, decided to try to induce him to remain in the civic employ.

COMMERCE BOARD'S POWERS STILL UNCERTAIN

A reargument has been granted by the Supreme Court of the application to test the jurisdiction of the Board of Commerce and the constitutionality of section 17 of the Combines and Fair Prices Act, under which the Board of Commerce is given powers as a price-fixing tribunal. A rehearing will take place in the Supreme Court on May 4 next.

The application was brought on March 15 by counsel for the Retail Merchants' Association, the Canadian Manufacturers' Association, the Attorney-General of Alberta, and others, to question the *intra vires* of the act in forbidding hoarding of commodities, in appointing the Board of Commerce to impose penalties for offences against the act and require provincial courts to enforce them, in giving the board power to decide unfair profits in purely provincial transactions, and in prohibiting export of commodities from Canada.

When the Supreme Court sat on April 6 to read judgments at the end of the term, no judgment was handed down in this particular case, and it is understood that no judgment will be given until after the rehearing of the case.

BRITISH NORTHWESTERN INSURANCE CO.

The British Northwestern Insurance Co. has been acquired by the Eagle Star and British Dominions Insurance Co. The British Northwestern was originally incorporated in Manitoba in 1906 as "The Freehold Fire Insurance Co." In 1910 it was incorporated by Act of parliament and secured a Dominion license in 1912. The authorized capital is $2,000,000, of which $594,400 has been subscribed, and $244,589 has been paid-up. The amount of premium on capital paid in by shareholders was $49,508. The shares have a par value of $40. Some of them are fully paid, and on others only small payments have been made. The company has assets totalling $368,872, and liabilities totalling $70,116; this leaves a surplus exceeding the capital stock paid in, and the premium paid as well. It is understood that the price is $75 per share, although no announcement in this connection has been made by the company.

Most of the shareholders of the British Northwestern Fire reside in the west. The president was Hon. Edward Brown, of Winnipeg; the vice-president, E. E. Hall; and the managing director, F. K. Foster. F. K. Foster becomes general agent for the western provinces. The new officers are: President, Hon. Ed. Brown; managing director, J. H. Riddel; secretary, E. C. D. Johnson. The policies of the British Northwestern are to be guaranteed by the Eagle, Star and British Dominions. The head office of the company has been moved from Winnipeg to Toronto.

PARLIAMENT QUIET AFTER EASTER RECESS

Important Subjects to be Dealt With in Budget Speech—Additional Revenue Must be Obtained—Railway Problem a Difficult One

(Special to *The Monetary Times*)

Ottawa, April 8, 1920.

NO announcement has as yet been made at Ottawa as to when the budget speech, which will be an outstanding feature of this as well as of the war-time sessions, will be delivered. Outside of this, however, practically the whole of the government's legislative program has been placed before the house, and the members had an opportunity to digest it during the Easter recess, which lasted from April 1 to April 5 inclusive. This includes the naval policy—or lack of one,—the franchise bill, the ship-building program and the railway statement. It is not expected that the budget will contain anything particularly revolutionary. It has already been intimated that there will be no general tariff revision this session, although, undoubtedly, there will be some changes. Sir Henry Drayton may succeed in tapping some new sources of revenue, but there is no hint as to what they will be and most of the known founts of possible revenue are already producing. Any new taxation will be along the line of increased income tax or so-called luxury taxes.

Opinion Divided on Business Profits Tax

There is much speculation as to whether the business profits tax will be continued. Sir Henry is perhaps wisely keeping mum on the subject. Among parliamentarians there is wide difference of opinion. Those who want the tax continued argue that the government cannot afford to let this source of revenue dry up and that firms and corporations, which make such profits, should be prepared to return a share to the country's treasury. Those who want it abolished claim that it is stifling business, that it is a tax easily evaded by the unscrupulous and that it tends to extravagance along the lines of high salaries, unnecessary advertising, etc.,—the line of reasoning being that the money would only be going to the government in any case. It is claimed that there are only two ways in which excess profits can be used, either in expansion of business or dividends. If it is used in expansion of business this means further prosperity for the country, if in dividends the government will still get its share through the income tax, even if a little belated.

As an example of the payment of exceptionally large salaries a member of parliament, who is a large manufacturer, told me this week that he had recently lost both his office manager and factory manager. He thought he was paying them good salaries, namely, $6,000 and $8,000 respectively. They have been given by another firm no less than $15,000 and $18,000. He said he was convinced that the company in question figured that the government was paying the larger part of this salary out of the money, which otherwise would be paid through the business tax.

Railway Operating Expense a Burden

The results of the first year of railway nationalization, submitted to the House last week by Hon. J. D. Reid, have made a deep impression. It was a story which, no matter from what standpoint it is viewed, challenges reflection and is nothing to enthuse over. The outstanding fact was that the country sustained a loss of no less than $47,000,000 the figures being as follows:—

Canadian Northern, operating loss	$ 6,500,000
Intercolonial and N.T.R. operating loss	7,500,000
C.N.R. and N.T.R. fixed charges	19,000,000
Grand Trunk Pacific, operating losses	5,500,000
G.T.P. fixed charges	8,500,000
Total	$47,000,000

This great deficit was attributed by the minister to an abnormal growth in operating expenses. The cost of operation advanced for the year from $84,000,000 to $108,000,000. The largest part of this was due to wage increases, which jumped by $19,000,000. Dr. Reid made the statement, which will probably astonish most people, that 78 cents out of every dollar earned by the system went into the pockets of the employees.

The question that now confronts parliament is whether this deficit, which, at best, is likely to continue for some years, should be paid out of the general revenues of the country, or there should be an increase in rates. Hon. J. D. Reid put the problem before the House, but made no recommendation. He asked for advice. On the basis of last year's earnings of all Canadian railways, a 25 per cent. increase, which is now proposed in the United States, would wipe out a possibility of a deficit. However, it would, of course, also have to apply to the C.P.R., and it would mean altogether that an extra eighty-eight millions would have to be taken out of the pockets of the Canadian public. There is an alternative, that the C.P.R. surplus profits should be taxed, but that is, perhaps, easier said than done. The government has an open mind on the question, and is not prepared to make a decision one way or the other until it has the opinion of the country and the House.

GLENS FALLS INSURANCE CO.

The progress recorded by the Glens Falls Insurance Co., of Glens Falls, N.Y., in its statement for the year ended December 31, 1919, is in keeping with the previous record of this old company. The principal items from the balance sheet are shown elsewhere in this issue. Total assets are now $9,332,139, compared with $7,908,544 at the end of 1918; $4,262,216, or about 45 per cent., is invested in government, state, municipal, railroad and other bonds. Mortgage loans amount to $1,592,383, a slight increase for the year. Railroad, bank and other stocks comprise $1,091,108, the balance of the assets being made up of real estate, uncollected premiums and collateral loans.

The paid-up capital was increased during the year from $500,000 to $1,000,000. Reserve against unearned premiums is $4,175,440, against $3,569,543 at the end of 1918, and other liabilities $1,454,913. This leaves a net surplus of $2,701,786, over and above the paid-up capital of $1,000,000, a substantial increase over the net surplus of $2,576,742 shown last year.

The Glens Falls Insurance Co. was founded in 1849 and writes all leading lines of fire, marine and automobile insurance. The chief agent for Canada is W. H. George, Toronto, and the Canadian business has shown a continuous growth.

RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the month of March:—

Canadian Pacific Railway

	1920.	1919.	Inc. or dec.
March 7	$3,244,000	$2,469,000	+ $ 775,000
March 14	3,130,000	2,645,000	+ 485,000
March 21	3,283,000	2,832,000	+ 451,000
March 31	5,832,000	4,245,000	+ 1,587,000
	$15,489,000	$12,191,000	+ $3,298,000

Grand Trunk Railway

March 7	$1,185,857	$1,224,388	— $ 38,531
March 14	1,248,993	1,159,337	+ 89,656
March 21	1,320,407	1,235,013	+ 85,394
March 31	2,001,115	1,814,855	+ 106,260
	$5,756,372	$5,513,593	+ $ 242,779

Canadian National Railways

March 7	$1,690,099	$1,369,774	+ $ 320,325
March 14	1,625,485	1,480,946	+ 144,539
March 21	1,577,062	1,487,313	+ 89,749
March 31	2,868,680	2,822,003	+ 46,677
	$7,761,326	$7,160,036	+ $ 601,290

FEDERAL CONTROL OF INDUSTRY

ANOTHER blow at the Board of Commerce has just been dealt, this time by the Supreme Court of Canada. In deciding on an appeal from Price Brothers, the Court decided on April 6 that newsprint could not be classed as a necessity of life, and does not, therefore, come under the jurisdiction of the board. The latter accordingly announced on Wednesday, that it will not henceforth claim or exercise any control whatever over newsprint in Canada. The board points out that the effect of the supreme court's decision is to render inoperative the orders-in-council constituting the Board of Commerce controllers of newsprint paper in Canada, and for this reason the board announces its intention of abandoning the control of newsprint, unless the board is subsequently invested, if that be legally possible, with competently granted power. The board's announcement adds that the supreme court's decision does not involve the general powers of the Board of Commerce, except in so far as it, to some extent, limits the interpretation which the board might place on the expression "necessary of life." These general powers, it is added, will be pronounced upon by a subsequent decision of the court. This decision will follow a re-hearing in the Supreme Court on May 4 next of certain points in the recent argument heard in the court to test the powers of the Board of Commerce as a price-fixing tribunal.

The circumstances of the Price Bros.' case were that the Board of Commerce, after having been appointed paper controller by an order-in-council January 29, 1920, ordered Price Bros. to ship at the fixed price of $80 per ton, one car of newsprint weekly to the "Montreal Star," one car every ten days to the "Montreal Herald" and one car monthly to Poirier, Bassett and Co., Montreal. The board defined newsprint as a necessity of life under the Combines and Fair Prices Act, and contended that Price Bros. were "under obligation to supply newsprint at the lawfully fixed price to Canadian publishers at the rate of 11,250 tons per year, but that they had been delivering only at the rate of 2,500 tons per year.

The power vested in the Board of Commerce by the Combines and Fair Prices Act to declare a necessary of life such commodities as they may deem advisable, is not held by the Supreme Court to extend to such articles as newsprint. It is not necessary to the physical life of the individual, the court rules, and the decision of the Bench reflects its attitude during the hearing of the arguments several weeks ago.

The effect of the judgment will be that Price Bros. will be able to charge the current United States price for its newsprint supplied to Canadian firms, not only on future shipments, but also on those which it has made under the order. The difference between the Canadian fixed price of $80 per ton and the United States price of $90 and up has been deposited with a trust company in Montreal by the consumers, pending the decision of the Supreme Court.

In its announcement the Board of Commerce says:—

"The decision of the Supreme Court of Canada on the appeal of Price Brothers renders necessary a statement of the board's intentions with respect to newsprint control. The effect of the decision is that certain orders-in-council, recently made, and purporting to constitute the Board of Commerce controller of newsprint paper, and to vest in the board certain powers additional to those exercised by the former newsprint controller, were made without jurisdiction, and that, consequently, the exercise by the Board of Commerce as controller of newsprint paper of any of the powers so purported to be conferred was inoperative in law. The court further held, that the Board of Commerce as such has no jurisdiction over newsprint paper, because that commodity cannot be considered a necessary of life in the meaning of that expression as used in the Combines and Fair Prices Act, 1919.

"The decision does not involve the general powers of the Board of Commerce, except in so far as it, to some extent, limits the interpretation of the expression, 'necessary of life.' These powers will be pronounced upon by a subsequent decision of the court. The board will not henceforth, unless it be subsequently invested, if that be legally possible, with competently-granted power, claim or exercise any control whatever over newsprint paper."

BORROWINGS OF THE DOMINION GOVERNMENT

FIGURES placed before the House of Commons on April 7, showed that, since 1911, the Dominion government had borrowed the enormous sum of $3,831,191,782. All of this is not now outstanding, of course, and some of the funds borrowed were reloaned to provinces and other governments. Of these borrowings, however, the sum of $2,416,531,088 was still outstanding on March 29 last.

Up to May, 1915, practically all the borrowing was done in London. The total from 1911 up to that date was £29,300,000, all of which is still outstanding. Eleven loans have been made in the United States, totalling $280,873,000, of which $151,007,000 is still outstanding, in the form of $75,000,000 bearing interest at 5½ per cent. and $76,007,000 bearing interest at 5 per cent.

The loans in Canada include the following: Temporary loans from the Bank of Montreal at Ottawa, $15,000,000, since redeemed; two bond loans issued September 1, 1916, one at 3½ per cent. for $12,404,678, of which $2,000,000 is still to pay, and one at 4½ per cent. for $95,207,351, of which $65,207,351 is outstanding; the various war and Victory loans, totalling $2,250,868,550, of which $1,949,722,111 is still outstanding; five per cent. and five and a half per cent. debenture stock and war savings certificates and thrift stamps totalling $74,597,888, of which $532,326,625 are outstanding; treasury bills for $958,842,315, of which all but $73,820,000 has been redeemed, all of these being advances to banks, trust companies and elevator companies mainly. This makes a total in Canada of $3,407,920,782, of which $2,123,126,088 is outstanding.

PIONEER BANKING IN THE NORTHWEST

"TO anyone who knows anything about conditions in Canada, particularly those prevailing in the newer part of the Dominion, the Canadian north west, to regard the banker as invariably an occupant of a well padded swivel chair, standing behind a mahogany desk is impossible. In Canada, the bank man is as much a pioneer as the trapper, the railroad builder, or the farmer. For Canada, unlike the United States, still has a frontier, and the bankers of the western Canada play no small part in the extension of this frontier farther and farther into the wilderness. They have shared, and in many places still share, the hardships of the frontier life and have supplied and still do supply an indispensable nucleus around which the commercial life of the new settlements may be built." In these terms "The Financier," of New York acknowledges the part played by the Canadian banks in upbuilding the west. The article continues:—

"Thirty or forty years ago began the process of colonization which has with such rapidity and success transformed the grass grown Canadian prairies into rich farming country, dotted with prosperous towns and cities, bound together by the steel tentacles of a trio of railroad systems. In these towns and cities stand branches of the Canadian banks, not perhaps so impressive nor so luxurious as some of the eastern offices, but still a far cry from the primitive make-shift structures which housed their affairs in the days which after all lie such a short time back. Yet out on the outskirts of the rapidly growing Canadian west, lie branches of a quarter of a century ago. The pioneers of to-day, tomorrow they, too, will perhaps be quite as comfortable and impressive as the branches in the older centres.

"Could the full tale be told of the adventure and the hardship endured by the men who have founded the hundreds of branch banks in the Canadian west, it would constitute a story which it would be difficult to match even in the pages of fiction. But, unfortunately, these men do not regard the work they have done as unusual and regarding it as a part of the 'day's work,' they are reluctant to tell of their experiences.

"Although a complete history of the early history of Canadian banking in the west is yet to be written, some conception of the difficulties and the achievements upon which the present financial institutions of that part of the Dominion are to-day standing, can be gained from tales told in unguarded moments by some of the 'old timers.'"

The article then recites the experiences of the first managers of the Union Bank's branches at Grande Prairie, Alta., and at other points, showing the difficulties in transportation and accommodation faced in the early days.

GOLD SHIPMENTS AND THE EXCHANGE SITUATION

STERLING exchange in New York has been making a rapid recovery during the past few weeks, the latest quotation being $3.98 for demand. A few weeks ago the rate was around $3.40. This recovery is attributed to a number of factors, the most important being, no doubt, the gold shipments which have been arriving every few days in New York from the United Kingdom. Now that ocean transport is safe the normal routes for the carrying of gold from South Africa and Australia to Great Britain have been resumed. During the war much of this gold came through Canada by way of Vancouver and Ottawa to New York, because the Pacific routes were safer than the Atlantic.

Great Britain has apparently decided that one of the most important steps towards improvement of her financial position is the liquidation of credits abroad, as far as may be practicable. Announcement has been made that the Anglo-French loan, which matures in New York in October, will be entirely re-paid. This statement has also strengthened the position of sterling in New York. The vigorous steps taken by Great Britain to recover from war financial conditions, and the practice of levying heavy taxes, have shown that her financial position is greatly superior to that of the other European belligerents.

Sterling quotations in Canada have also recovered to a similar degree, the latest figure being $4.35 for demand. The premium on New York exchange here has also been reduced to around nine per cent., indicating the important interest which sterling exchange has upon rates between Canada and the United States.

In an interview recently, Frank H. Sisson, vice-president of the Guaranty Trust Co., New York, said regarding the present gold situation:—

"A question has been raised as to whether there is sufficient gold in Great Britain to permit her to make these shipments to us safely. Great Britain now has but $600,000,000 in the Bank of England, and France has a billion. What will be the effect of shipping gold to America?

"Primarily, I have great confidence in the men in control of the British financial policy. They have made a remarkable record during the war. This, of course, was in part due to the enormous resources of Great Britain—resources which allowed her to finish the war with $15,000,000,000 in foreign investments despite the effort she was called upon to make. But the policy controlling these resources was a remarkably judicious and successful one.

"Great Britain is yearly receiving from her colonies, chiefly Australia and South Africa, more than $200,000,000 in gold. She could, if she wished, pay us the whole amount. The only necessary safeguard would be with respect to her own issue of paper money, for which such gold would act as a basis.

"What has happened has been that England has stored her incoming colonial gold in anticipation of her October obligations, and now is beginning to ship it to us."

Our western manager, Geo. W. Goodall, leaves on April 12 for his semi-annual journey through the Canadian west to the Pacific coast. First hand information regarding business and financial conditions in the west will be gathered by Mr. Goodall and presented to our readers through these columns.

Trade with the Orient

With correspondents of the highest standing in China, Japan, India and other countries of the Orient, and branches in all the principal ports on the Pacific coast of North America, namely:

Prince Rupert	Portland, Ore.
Victoria	Seattle
Vancouver	San Francisco

this Bank is excellently equipped to serve the interests of Canada's growing trade with the Orient.

J. P. BELL - - General Manager

OBITUARIES

Mr. J. A. M. Alley, of Toronto, died last week. He was secretary of the Traders' Bank when the amalgamation with the Royal Bank took place. He was then appointed manager of the Toronto office of the Royal Bank, a position which he held until he retired from the bank's service. He was 65 years old.

Mr. W. D. Lummis, one of Toronto's most prominent lumbermen, died April 5th. Mr. Lummis was a native of Quebec, and was 69 years old. More than 40 years ago he entered the lumber business at Weybridge, Ont., and since that time has been connected with many companies operating in Canada.

Mr. Thos. Waterhouse, president of the Thomas Waterhouse Knitting Co., Ingersoll, Ont., died April 5th. He was born in Puthey, Yorkshire, England, and was engaged in manufacturing for forty years, until twenty-two years ago, when he came to Ingersoll. The woollen mill here was for some time conducted by Waterhouse and Bradbury. Fourteen years ago the present Thomas Waterhouse Knitting Co. was organized, which has grown rapidly ever since.

Mr. W. H. Pearson, of Toronto, died suddenly April 6th, at the age of 89 years. He retired about ten years ago from the position of general-manager of the Consumers' Gas Co. The late Mr. Pearson was born in Surrey, England, in 1831, but received his education in Toronto. In 1847 he became a clerk in the Toronto post office, and from 1854 to 1874 was chief clerk of the Consumers' Gas Co. In the latter year he was appointed secretary, and in 1888 he was made general manager. Other connections of the late Mr. Pearson were the Economical Gas Apparatus Construction Co., of which he was president; the Nelson Coke and Gas Co., of which he was also president; the Venus Gold Mining Co., of which he was vice-president; and the Owen Sound Portland Cement Co., of which he was vice-president. He was also a member of the American Gas Institute and of the American Gas Light Association, being president of the latter from 1895 to 1896.

PUBLICATIONS RECEIVED

The War in a Nutshell, or, The Shortest History of the Great War.—By G. H. Hallam. Macmillan Co. of Canada, Toronto; 12 pages; $0.10 per copy. A small work on a large subject, this pamphlet, nevertheless, has the advantage of conciseness, and will be found useful for reference.

Round Table, March, 1920.—Macmillan Co. of Canada, Toronto. Greatly increased costs have necessitated an advance in the price of this quarterly to $1.25 per copy, or $5 per year. *The Round Table* is a magazine of reliable news of the empire, and is distributed in Canada by the Macmillan Co.

5,000 Facts About Canada.—By Frank Yeigh. Canadian Facts Publishing Co., 588 Huron St., Toronto. 72 pages, 25c. Canadian enterprise has taken the lead in many lines of endeavor, and this little book, which has been issued annually for several years past, records the progress made from year to year. It is conveniently arranged and indexed, and gives information about finance and industry, as well as the geography, population, religions, etc., of Canada.

Workingmen's Standard of Living in Philadelphia.—A report by the Philadelphia Bureau of Municipal Research. Macmillan Co. of Canada, Toronto. 125 pp. with index, $2.50. This report is not merely an attempt to estimate the cost of living for a family of five; it also endeavors to set forth the actual amount of goods and services consumed, thus making possible reliable estimates of living costs as prices change from time to time. The calculations are based on investigations into the income and expenditures of 260 representative families.

Currency Reform.—By G. E. M. Johnson. Published by the Decimal Association, 229/231 Finsbury Pavement House, London, E.C. 2; 1/- net, postage 1½d. A brief history of the evolution of modern currency methods, an excellent historical account of the many attempts to introduce decimal coinage, and a resume of the arguments in favor of the £-mil system. Illustrated by repreductions of nearly all the lower value coins of the world, an overwhelming majority of which are decimal in their sub-divisions. The map of the world showing "countries *not* possessing decimal coinage" is most effective and the table of nickel-using countries will be valuable for reference.

PERSONAL NOTES

Mr. F. W. Armstrong, of Monkton, Ont., has been appointed clerk of Perth county. He has been a banker for fifteen years and is now manager of the Sterling Bank at Monkton.

Mr. A. K. Mair has been appointed town clerk of Collingwood, Ont. Mr. C. A. Macdonald has been appointed municipal auditor for the town, and Mr. Wm. Fryer has been appointed assessor.

Mr. A. L. Hudson connected with A. L. Hudson and Company, Toronto, successors to J. P. Bickell and Company, stock brokers, has been elected a member of the Standard Stock and Mining Exchange.

Mr. Charles Gifford, secretary of the Rural Credits Society, Winnipeg, Man., has been appointed supervisor of rural credits. This position was left vacant by the resignation of Mr. Geo. W. Prout, M.P.P.

Mr. W. J. Ptolemy, deputy provincial treasurer, of Manitoba, will retire from the government service, says a wire from our Winnipeg correspondent. He will be retired, at his own request by the government, after having served the province for 37 years.

Mr. Geo. E. Macdonald, general manager of the Pacific Great Eastern Railway Company has resigned from the government service. He will take a position as general manager of the sales, distributing and traffic department of the Blackstone Coal Company, Edmonton, Alta.

Mr. W. J. Northgrave, director and general-manager for the last three years of the City Dairy Company, Limited, has been appointed managing director. At the same meeting, Mr. F. Erichsen Brown was elected a director of the company, succeeding Mr. T. E. Robertson, deceased.

Mr. Geo. Day, formerly sales manager for Beatty and Sons, Welland, Ont., has been appointed Industrial Commissioner and secretary of the Board of Trade of that city. Mr. Day came from Cleveland, Ohio, six years ago. Mr. W. M. German, M.P., who has been Industrial Commissioner for some time past, is now retiring from that position.

Causes of Business Failures

Incompetence Rather Than Lack of Capital is Chief Cause of Failures—Some Practical Illustrations — Investors Frequently Exploited by Inexperienced Promoters, Who Have Failed in Other Lines of Endeavour.

By ANGUS LYELL

BUSINESS failures may consist of the failure of sole traders, firms or partnerships, or joint stock companies. During the past two or three years there have been comparatively few failures in Canada, because of the general industrial prosperity incident on war conditions and the fact that the weaker concerns went out of business during the preceding years, mainly in 1914, when there was a general contraction of credit following a period of inflated values. The cause of business failures is an interesting investigation. At present about the only data available is that prepared by the mercantile agencies, usually not from first-hand information. The reliability of the statistics in existence at present is, therefore, questionable.

In its record of failure statistics for the year 1918, Bradstreet states that "lack of capital led the list of causes of failure, as it has always done in Canada and as it usually does in new countries, with a proportion of 37.3 per cent., as against 25.4 per cent. for specific conditions and 19 per cent. for incompetence. The percentage due to incompetence and inexperience combined was 24.6."

Lack of Capital a Poor Excuse

Now, I question the accuracy of this classification, particularly the percentage of failure attributed to lack of capital. During the past six years I have had an opportunity of inquiring into the causes of nearly two hundred business failures in western Canada, and my opinion is that the cause of these, in most instances, was sheer incompetence. Lack of capital is a plausible excuse, but it is one which requires careful analysis. The important point is not that a concern had insufficient working capital. The essential thing is why that unfortunate condition.

Business conditions in western Canada have during the past few years, in some respects, differed from conditions in the east. From 1908 to 1914, the economic development of the Dominion was dependent mainly on the opening up of farm lands in the prairie provinces. There was a big increase in population there through immigration. New towns developed. Capital flowed into the country. Nearly one billion dollars was borrowed to aid development. Then conditions changed radically. First there was a contraction of values due to hard times. Next a healthy growth incident on the necessities of the war. These economic fluctuations materially affected the business life of the day.

Capital Was Easy to Get

In the west, especially in the prairie provinces, there was rapid business expansion during the period 1908 to 1914. In these days, it was usually very easy to obtain credit. As a matter of fact, many commenced business without having any capital at all. The wholesale houses in the east were ready to extend credit, and the retailer took a chance on a quick turnover for the obtaining of cash to pay his accounts. Some made good; others didn't. Some developed with the places in which they had located; others failed and disappeared. But the primary cause of failure during these years and the succeeding ones was hardly lack of capital. It was business incompetence.

Most men in Canada have faith in their ability to succeed in almost any sphere of activity. This faith may carry a man a long way provided he is willing to learn as he travels; but back of every successful achievement is knowledge, special knowledge of the work undertaken. Business activity is no exception. If a man is not well versed in what I think I may rightly call the science of business, his expectation of success cannot be founded on something very sound.

Business Requires Peculiar Ability

But while a man may lack the ability to succeed in business, it does not follow that he is one of the world's failures. There are other spheres of activity no less worthy. Some who have failed in business in Canada are very good farmers, others more or less successful lawyers, doctors, dentists, schoolmasters, mechanics, and so on. It is simply incompetence due to inexperience which wreck most business concerns. On proper analysis, it is often found that ventures which fail were little less than mere gambles.

Some few years ago, three farmers, who as such had proved themselves to be successful men, organized a company to manufacture an article of general household use. They were neither manufacturers, business organizers, nor financial experts, but they had some money and they imagined they could succeed in business. They were able, somehow or other to produce a good product, but their selling organization was weak as was their method of financing. The result of their activities ended in failure—failure due neither to lack of capital nor to fraud but simply to ignorance. There was no better proof of their honesty than the fact that they pledged all their personal assets as security for the debts of the company. An attempt was made at reorganization. But the reorganized company did not last long. The three men are again farming.

Management May Risk Little Capital

The worst failures, the cause of which may be attributed to incompetence, are usually those of companies. Losses are not, as a rule, heavy on the failure of sole traders and small firms—the kind of partnerships most common in Canada. In an unincorporated business those engaging therein risk their own money, unless they have been successful in obtaining loans. Such a business now-a-days cannot be commenced without capital, however small, and the credit obtained is in a measure governed by the capital investment. When circumstances prove too adverse, those engaged in the venture usually give up the struggle, losing, perhaps, all of their capital invested. But the conditions may be vastly different in the case of an incorporated company, where those responsible for the undertaking may have risked very little capital and where the shareholders, in addition to the creditors, may suffer a heavy loss.

Quite a number of companies that have failed in Canada during recent years have failed because of the incompetence of those responsible for their promotion and management. These self-styled business organizers have been mere commercial adventurers, gamblers who have played on the gullibility of the public, persuading them, usually through misrepresentation, of the possibility of big earnings, in this way raising capital to launch on enterprises which they knew not how to handle properly. But while the business lasted, these adventurers held good salaried positions. This was their main object.

Organizers Frequently Incompetents

Such promoters have not been drawn from any one class of men. Salesmen, bookkeepers, mechanics, builders, farmers, railwaymen, doctors, dentists, lawyers, retired policemen and army officers—all make up the motley crowd. These may have failed in everything else they have under-

taken, but they know the new venture is bound to succeed—if only the public will provide the capital. And the new venture may be a scheme to exploit a patent, or one to produce pictures for the "movies," or to write hail or fire insurance, or build a railway to help sell the adjoining land, or to manufacture a specific product, or subdivide vacant land, or prospect for minerals, or indeed anything calculated to appeal to the imagination of the public.

And the railwayman may be the expert who is to guide the destinies of the fire insurance company; the farmer, the financial wizard who will make hail insurance profitable; the retired policeman or army officer, the man bound to succeed in mining; the salesman, the Morgan or Rockefeller, to finance successfully the manufacturing company; the builder, the expert in the moving picture business; and the doctor or lawyer, the specialist in matters of investment.

All this is, of course, very foolish, but my illustrations are not merely the whims of imagination. It is surprising the extent to which the people of Canada have been gulle by adventurers, but the extent can be ascertained in a measure from the story of a number of business failures.

It is admitted generally that lack of capital is a drawback in most new lands. Where development is active, there is sometimes a shortage of money. But competent management can usually accomplish a good deal in obtaining adequate working capital. Capable men radiate credit. Bankers accommodate them and their creditors are lenient. Bradstreet's estimate of the number of business failures due to lack of capital is, in my opinion, entirely wrong. Such may have been the superficial, but certainly not the primary, cause of most of the failures. In discussing matters of business and finance it is most important to deal with the elemental things.

BANK BRANCH NOTES

The following is a list of branches of Canadian banks which have been recently opened:—

Drummondville, Que.	Royal Bank of Canada
Burgessville, Ont.	Royal Bank of Canada
Majagua, Cuba	Royal Bank of Canada
Limonar, Cuba	Royal Bank of Canada
Spanish Town, Ja.	Royal Bank of Canada
Cumanayagua, Cuba	Royal Bank of Canada
Hamilton, Ont. (Royal Markets Branch)	Bank of Hamilton

The Bank of Montreal has a new building under construction at Woodstock, Ont., and it is understood that the premises will be open for business on May 1st.

Announcement has been made that the Merchants Bank will shortly undertake the erection of modern banking premises at its new branch to be located on Granville St., south of Robson St., Vancouver, B.C., and also that plans are being made for the erection of another modern banking building at the corner of Alma Rd. and 4th Ave. in the same city.

Mr. J. M. Duff, formerly of the Canadian Bank of Commerce, Guelph, Ont., is resigning on pension on May 1st.

MUNICIPALITY RESPONSIBLE FOR FIRE

If workmen employed by a municipality are careless and cause a fire, the insurance companies liable for the fire loss can collect the damage from the municipality, according to a decision of the Supreme Court of Ontario on April 6th. The companies taking action were the National Insurance Co. of Hartford, the Phœnix Insurance Co. and the Liverpool and London and Globe. The properties destroyed were a butcher shop and grocery store in Ottawa on March 6th, 1918. The companies claimed that the fire was caused by civic workmen, who had lit a fire outside the stores for the purpose of thawing out water pipes. The court ordered the city to pay not only the amount of the losses sustained by the companies, but also interest on these sums since they had been paid out by the companies.

WEEKLY BANK CLEARINGS

Taxation Proposals In British Columbia

Finance Minister, in Budget Speech, Reviews Position of Province—Important Concessions to Municipalities—Revenue Has Doubled in Five Years and Financial Condition Greatly Improved, Says Minister

BASING his remarks on the British Columbia public accounts for the year ended March 31st, 1919, which were summarized last week in these columns, Hon. John Hart, minister of finance for the province, enlarged upon the present financial position of the province in his budget speech on March 24th. The showing was better than had been anticipated in the estimates, he said, and a great improvement had been made during the past four years. Much had also been done to assist in re-establishing war veterans in the province.

Dealing with the finances of the nine months of the present fiscal year, to December 31st last, Hon. Mr. Hart stated the revenue and expenditure shows a continuance of the steady improvement in the finances of the province. The estimated revenue for the whole year ended March 31st, 1920, was $10,209,960; the amount collected during the nine months was $10,609,454, or $399,474 more than the estimate for the twelve months. For the month of January the amount collected was over $1,000,000; for February there was collected $450,000, and on the basis of last year, March will see brought to the account of the treasury $550,000. He felt confident, therefore, that the revenue for the year will exceed the estimates by $2,400,000.

The current and capital expenditures charged to income for the nine months amounted to $9,147,412 against an estimated expenditure for the whole year on both accounts of $13,313,303, of which $11,071,113 is on current account and $242,190 on capital account. While he reiterated his confidence in an increased revenue he could not say definitely that the expenditure over all would or would not come within receipts. The steady growth in revenue since the present government took office, Hon. Mr. Hart stated, has been as follows, in the following fiscal years:—

	Revenue.	Increase.
1915-16	$ 6,291,693	....
1916-17	6,906,783	$ 615,090
1917-18	8,882,846	1,976,062
1918-19	10,931,279	2,048,433
1919-20	12,609,960	1,678,680
Total increase		$6,318,266

The estimates for the fiscal year 1920-21, Hon. Mr. Hart stated, displayed still further increases in revenue, the amount expected being $13,978,245 or $1,368,285, or eleven per cent. greater than the revenue for the present fiscal year, and $7,686,551, or 122 per cent. in total growth in revenue since the present government came into office. The best previous year was 1912-13, when a wave of prosperity was sweeping the country. Then there was got in $12,501,215, or $1,668,030 less than the estimates now before the house. Fifty-eight per cent. of that total was derived from land sales, land registry fees, timber licenses, and the province's share of the Chinese head tax, and only $280,000 from income tax. Land sales and Chinese head tax, both of which sources have since lapsed, accounted for $4,068,587, or one-third, of the whole in that year. A careful perusal of the estimates for 1920-21 would show that while the amount collected by direct taxation has increased, that from the development of natural resources has relatively increased, until only one-half of the total is being raised by direct taxation, the remainder coming from the utilization of such resources as timber, mines and fisheries.

Borrowings by the government since its advent to office have amounted to $13,770,000 up to the end of January, of which $9,270,000 is returnable, Hon. Mr. Hart stated in dealing with that phase of the financial activities of the administration. The greater part of this sum was loaned to the P.G.E. for construction work and is repayable to the province, which holds as security the entire share capital and all the assets of the parent company and its subsidiaries. In addition to this there is a sinking fund. Other borrowings were : $1,800,000 to be loaned to farmers through the agency of the Land Settlement Board, of which $1,100,000 has been converted into permanent securities, and the usual sinking fund established, the remaining $700,000 having been borrowed on treasury bills, the board holding security for all loans against the lands of the borrowers; $790,000 loaned to South Vancouver and secured by collateral in the shape of bonds of the municipality to an amount of $989,900; $1,500,000 borrowed from the Dominion for better housing purposes, of which $1,107,150 has been loaned to various municipalities at 5 per cent. and secured by debentures of the municipalities for 20 years, the loan to be repaid in annual instalments of principal of not less than $1,000; $110,000 borrowed for loans made under the Department of Industries; $200,000 borrowed under the Soldiers' Land Act, which is returnable, as is also $170,000 for the conservation of irrigation works, the latter being a charge upon the corporation upon whose works the government has had to make outlays. The only amount out of the $9,770,000 of borrowing for which the present government is responsible and which is not a realizable asset is $500,000 expended by the Department of Public Works on permanent roads and bridges in different sections of the province, but such constitutes a capital asset, the minister said.

Taxation Proposals

Regarding taxation, the minister said that an exemption will be allowed for married tax-payers and those with dependents, of $1,500, the same as at present, with an added $200 exemption for each dependent child. In the case of single persons, widows or widowers without dependents, the income tax exemption will be fixed at $1,200. Motor license fees will be materially increased, the scale now being prepared by the attorney-general. The increase is expected to total $400,000, which is to be ear-marked for a loan of $5,000,000 it is proposed to raise for main trunk road construction throughout the province.

Another year's extension of the exemption to soldiers in regard to arrears of taxes which have accumulated during the war will be given and provision for the taxing of bonds held outside the province will be made. It is proposed to make a new assessment of crown granted timber limits in line with the policy of 1918 when a re-assessment of real property was made.

More for Municipalities

Important concessions will also be made to municipalities in response to their requests for additional sources of revenue.

The province is to cease collecting the poll tax in organized districts and allow the municipalities to collect a minimum service tax of $5 from all males from 21 to 65 years of age, this tax to be ear-marked for schools and hospitals. It is also to increase the amusement tax to twenty per cent. on the admission and divide this tax with the municipalities on a fifty-fifty basis of the total tax collected within the limits of the municipality, this additional revenue to be also ear-marked for hospitals and schools. There will be no increase in the present tax on five and ten-cent tickets, but there will be added one cent to the fifteen and twenty-cent tickets and two cents to the twenty-five-cent tickets. It is estimated this will produce a total revenue of $600,000, one-half of which will go to the municipalities.

Further, in view of the shortage in sinking funds in Vancouver and Victoria, the government proposes to con-

For Your Real Property:
Trust Company Management

The reasons why a trust company is the best choice as Agent in the management of your real property are the same as those which commend its selection for positions of trust. Those which apply specially to its management of real estate are:—

1—Financial Responsibility
2—Experienced Staff
3—Systematic Records
4—Continuous Administration

sider the advisability of taking over those sinking funds and issuing its own debentures therefor.

In addition to the study and consideration given to its own financing and taxation it also became necessary for the government to devote some attention during the past year to the financial position of the municipalities of British Columbia, said the minister. In order to familiarize itself with the actual situation an analysis was made of the records of the municipalities, following which the premier and himself, assisted by the inspector of municipalities, the assistant deputy minister of finance and the secretary, held sittings in Victoria, Vancouver, Nelson and Vernon for the purpose of hearing representations from urban and rural municipalities in regard to their individual conditions. The result of the findings made very interesting and suggestive reading, he thought. Later the government hoped to issue a report going more into detail.

NORTHERN LIFE AGENTS MEET IN CALGARY

Over twenty agents of the Northern Life Assurance Co., in the southern Alberta district, gathered at Calgary, on March 29. H. H. McKinney, district manager, presided, and short addresses were given by S. B. Hillocks, R. B. Hood, J. T. North, G. W. Johnson and R. M. Sangster.

GREAT WEST LIFE WILL TRAIN AGENTS

Courses of training for life insurance agents are already being successfully conducted by two Canadian companies, and the Great West Life now announces a similar plan. describing the methods adopted, the announcement says:—

"The training systems of the different companies are made available to agents under various methods. Some companies offer their systems free to their entire field-forces and make it compulsory for all new men to take it. Others impose a charge, on condition of refunding the amount at the completion of the course. In a few instances it is a reward for a certain amount of production. There are obvious objections to the last named practice, the chief being that it precludes one of the most important uses of the system,—that of aiding beginners at the most difficult stage of their experience. The first is the ideal method and that which the company will use, but the second has been employed with good results by certain companies.

"It is highly desirable that the managers and inspectors of the company should take the course. They cannot fail to derive personal benefit from doing so, and familiarity with it will enable them to aid the study and practice of their men. Agencies will find it effective to make the current lessons regular subjects of discussion at their stated weekly meetings.

"The ultimate aim of the course is vocational efficiency, and the technical portion of the course is as complete and instructive as it can be made. This plan of education is based on the theory that personal efficiency is an essential foundation for vocational efficiency. It will be found that among a large proportion of any group of students, a pronounced improvement will be noticeable in the former respect. Therefore, the two sections of the course should always be studied in conjunction.

"A week will be allowed for the study of a lesson. A pâper from each section will either be sent out fortnightly or the lessons will be mailed alternately and a week apart. In either case, the course will extend over about seven months. The protracted period of study will not prove disadvantageous. On the contrary, it will be a valuable means of sustaining interest, a condition which it is desirable to contrive. With each instalment of lessons the corresponding Quiz Papers will be mailed, together with an addressed envelope for their return when filled in. Definite intervals will be set for these returns, the plan being to require their receipt at the point of distribution in time to admit of the printed sheets of correct answers accompanying the next set of lessons despatched."

TORONTO BUREAU OF MUNICIPAL RESEARCH

Difficulty of Estimating Results—Review of Six Years' Work —Financing the Bureau

SIX years of work were reviewed at the annual meeting of the Toronto Bureau of Municipal Research on March 31. Revenue for the year ended February 29, 1920, totalled $29,415, including $15,422 provided by the Federation for Community Service, $7,495 contributed by members under promises made prior to the organization of the Federation, and services revenue $6,360. Expenditures totalled $25,246. Assets now total $12,198, of which $9,200 is set aside as reserve for contingencies.

Dr. H. L. Brittain, managing director, said:—

"Organizations, the results of whose work are observable in increased material wealth, which carry on definite material operations, and which pay cash dividends, present a standard of measurement which their stockholders and the general public can readily use in appraising their achievements. Citizen organizations for the promotion of public and community welfare can offer no such standards, inasmuch as the dividends they produce are not in dollars and cents, and the highest values they create are not material values. The Bureau of Municipal Research belongs to this type.

Education of Citizens Desirable

While realizing the importance of standardized accounting, up-to-date budget making, centralized control of purchasing, reformation in civil service organization, administrative responsibility, departmental efficiency, etc., the Bureau believes that the only sure way of attaining these desirable results and of maintaining them when once secured, is to increase the number of thoroughly informed citizens and to build up an active public opinion which will naturally and irresistibly produce efficient governmental machinery.

"Some time in November, 1912, a small group of citizens met in conference to consider ways and means of improving Toronto's civic government.

"In the beginning, the improvement of the personnel of the city council seemed to be the first step to be taken, although, even then, there was a feeling that something more fundamental was needed than a mere change of leaders. This feeling grew into a conviction that the real root of trouble was with ourselves, as citizens, and that true reconstruction lay through the removal of the lack of information concerning and apathy toward civic problems on the part of citizens in general. Education, then, seemed to be the basal process and the movement which at that time seemed to offer the greatest promise of success in citizen education was the municipal research movement.

Results of Bureau's Work

"As a result, a fund was raised by a Committee of One Hundred Citizens to defray the cost of an independent survey of the chief civic departments. During 1913 this survey was made by a staff of specially trained men, with the hearty co-operation of the civic authorities, and the report of the survey contained many important constructive suggestions as to possible changes in methods of carrying on the city's business. The Toronto Bureau of Municipal Research was founded in March, 1914, to follow up these suggestions and carry on the work of building up citizenship through research and publicity.

"The concrete results of the Bureau's work have been many, but they have been, in a large measure, by-products of its educational program. Not infrequently, the dividends have been delayed, but they have been cumulative and substantial. It has not been the policy of the Bureau to 'claim credit' for specific results. This would detract from the dignity of its work, lessen appreciation of the disinterestedness of its motives, and impair the spirit of co-operation which is absolutely essential to the success of its program. The Bureau's motto is 'Service to the community,' not recognition of its own work, no matter how gratifying this may be."

How Estates May Suffer

It frequently occurs that a business associate is called upon to devote a good deal of time in the settlement of a friend's estate.

Being deeply engrossed in his own affairs, it is only natural that the estate suffers, because it does not receive the timely attention it deserves and demands.

By appointing a TRUST COMPANY as executor or trustee under your will, you are assured of efficient and uninterrupted service.

Bond Sales Reach Large Total In March

Nearly Fifty Millions of New Financing—Over $40,000,000 Secured in the United States—Three Provinces Make Favorable Loans—Two Large Railroad Issues

CANADIAN bond sales in March, 1920, according to *The Monetary Times'* record, reached the sum of $48,101,575, the largest amount of new financing during one month on record. This total compares with $7,984,514 in March, 1919, and $8,551,405 in February, 1920, and is classified as follows:—

Provincial	$14,850,000
Municipal	8,367,299
Railroad	24,000,000
Corporation	884,276
Total	$48,101,575

Of the above amount, over $40,000,000 was secured in the United States, all the provincial and railroad loans having been floated there, besides a good proportion of municipal bonds. The feature of the month was the big demand for high-class Canadian offerings in that market, and not only were such issues as Ontario, Quebec, Manitoba and the railroad bonds quickly taken up, but the floating supply of outstanding Canadian provincial and Dominion bonds was substantially reduced.

Activity in Municipals

Although municipal issues were not numerous, the amount reached substantial proportions, being $8,367,299, as compared with $5,393,405 in February, and $1,899,514 in March a year ago. The total was made up chiefly of three large issues, viz.: Quebec, $1,325,000; Montreal Catholic School Commission, $2,000,000; Greater Winnipeg Water District, $2,250,000; and is classified by provinces as follows:—

Ontario	$1,808,634
Quebec	3,325,000
Nova Scotia	175,000
Manitoba	2,288.950
British Columbia	737,000
Saskatchewan	32,715
Total	$8,367,299

MARCH FIRE LOSSES LOWER

Canadian Total for First Quarter is $6,326,625, Compared with $7,161,219 Last Year—Number of Deaths Increased

The Monetary Times' estimate of Canada's fire losses during March, 1920, was $1,793,200, compared with $2,154,095 in March, 1919, and $1,895,575 in February, 1920. The following is the estimate of March losses:—

Fires exceeding $10,000	$1,236,500
Small fires reported	56,700
Estimate of unreported fires	500,000
Total	$1,793,200

The Monetary Times' record for the past four years shows the following monthly losses:—

Month.	1917.	1918.	1919.	1920.
January	$ 1,918,660	$ 2,688,556	$ 3,915,290	$ 2,637,850
February	2,009,953	2,243,762	1,091,834	1,895,575
March	2,050,650	1,682,286	2,154,095	1,793,200

Totals	$20,086,085	$31,815,844	$23,207,647	$6,326,625

List of Large Fires

The following is a list of fires at which the loss amounted to $10,000 and over:—

Peterboro', Ont., March 3, apartment house belonging to J. R. Bell estate, $20,000.

London, Ont., March 6, G.T.R. freight sheds and offices, $125,000.

London, Ont., March 5, Columbia Handle and Lumber Co., $25,000.

Okanagan Lake, B.C., March 3, wharf sheds and stables of G. E. Galletely and Sons, $30,000.

Port Dover, Ont., March 5, business block, $40,000.

Sydney, N.S., March 8, electrical warehouse belonging to Dominion Steel Corporation, $100,000.

Tilbury, Ont., March 4, Tilbury Brick and Tile Co. plant, $30,000.

Toronto, Ont., March 4, McKinnon Building, $100,000.

Bridgewater, N.S., March 9, the Halifax and Southwestern Railway station, $10,000.

Buckingham, Que., March 14, St. Joseph's Catholic Church, $150,000.

Lacombe, Alta., March 6, the Bell Building, Merchants Bank and other buildings, $25,000.

Millerton, N.B., March 11, Vanderbeck mill, run by R. A. Snowball, $15,000.

Port Arthur, Ont., March 9, repair shops and storage shed of the Port Arthur Electric Street Railway, $100,000.

Selkirk, Man., March 9, Star Clothing Store, $16,500.

Tyron, P.E.I., March 9, Reid-Rayner Knitting Mills, $40,000.

Winnipeg, Man., March 12, three stores, situated on Notre Dame Street, $55,000.

Winnipeg, Man., March 13, building situated on Ross Avenue, $50,000.

Sydney, N.S., March 28, C.N.R. freight shed, with contents, $35,000.

Annapolis Royal, N.S., March 16, five buildings, $100,000.

Hamilton, Ont., March 18, the Empire Stock Wool Co., $25,000.

Iroquois Falls, Ont., March 21, two-story school, $25,000.

Oakville, Ont., March 20, plant belonging to the Oakville Basket and Veneer Works Co., $60,000.

Oxford, N.S., March 20, Wood Patton Block, $60,000.

The following structures were destroyed or damaged last month: Residences 11, stores 13, stables 4, house-boat 1, hotels 2, town hall 1, garage 1, business blocks 4, business buildings 24, grain elevator 1, icehouse 1, warehouse 1, knitting mill 1, tenement houses 2, station 1, factories 2, schools 2, church 1.

Among the causes reported were: Explosion of oil lamp 1, gasoline explosion 1, spontaneous combustion 2, defective chimney 1, defective stovepipe 1, overheated furnace 1, electric wire 1, carelessness with cigarette stubs 2, hot cinders 1, explosion of water heater 1, explosion of coal gas 1.

Fatalities More Than Usual

The following is a list of fires at which fatalities occurred last month:—

St. Fereol, Que., March 1, trapped in burning house	8
Cornwall, Ont., March 1, trapped in burning house	1
Cartwright, Man., March 4, coal oil explosion	4
Toronto, Ont., March 6, gasoline explosion	4
Sturgeon Falls, Ont., March 13, trapped in burning house	6
St. John's, Que., March 19, trapped in burning house	5
Newington, Ont., March 1, trapped in burning house	1
Fort William, Ont., March 11, explosion of coal oil stove	2
Acton Vale, Que., March 13, trapped in burning house	1
Clinton Township, Ont., March 26, clothing caught fire from bonfire	1
Oxford, N.S., March 20, trapped in burning building	1
Danville, Que., March 25, from an electric shock	1
Total	35

The following table, compiled by *The Monetary Times*. shows deaths caused by fire during the past seven years and this year to date:—

EXTEND CIVIL SERVICE INSURANCE

The Minister of Finance has given notice of a resolution by which persons in the naval service could be insured under the Civil Service Insurance Act; to increase the maximum of insurance that may be issued from $5,000 to $10,000; and to empower the Governor-in-Council to make regulations providing for the payment of the insurance money as an annuity for a term of years certain, or for the lifetime of the beneficiary or beneficiaries, or otherwise.

PORTAGE LA PRAIRIE BOARD OF TRADE

At the annual meeting of the Portage la Prairie, Man., board of trade, the following officers were re-elected for the ensuing year: President, D. R. Woods; vice-president, J. J. Garland; secretary, H. M. Dunham. At the meeting the announcement was made by Mayor Metcalfe that with the advent of hydro-electric power the rate to consumers would be cut about in half at once, and that eventually the rate would be reduced to only actually cover the cost of the power.

LIQUIDATION OF BANKRUPT SUBDIVISIONS

Productive Farm Lands Which Were Converted into Useless Subdivisions Should be Again Cultivated—Enabling Legislation Passed at Last Session

By T. SUNDAL

IS it not strange how a lapse of time may often bring people back to their ordinary senses? A period of time when the public may turn about and look back over the mistakes of the past. In fact, it seems as though it were yesterday when walking the streets of our municipal centres, we were greeted at every other door with elaborately decorated window fronts announcing the latest sensation in subdivisions.

Looking back it is only some seven or eight years ago since the western boom was at its height, when lots were sold over the counter as a grocer supplies his customers, when paper fortunes were made over-night and the new millionaires were the ordinary talk of the day, when investors as a rule were not particular as to the location of lots, but mainly insisting they could at least be reached in a day's run with a car. Invariably the lots were not purchased for home-making purposes but mainly with the idea of later reselling at a profit, and this day, however, only dawned with a few.

Movement Was Uncurbed

Those were days when the west was in the grip of a gigantic epidemic. Subdivisionitis, a fatal disease of the optimist, spread rapidly over the muncipal centres. A deadly germ seemed to affect the people's savings and, consequently, they were afraid to hold on. Had we investigated the cause of the epidemic we should have found it was mainly due to the vivid arguments of the silver-tongued salesmen, who were specially selected and trained for the purpose of convincing people to part with their hard-earned savings and invest them in wild-cat promotions. Ah, the crooked game could not go on much longer, the war put an end to that system of daylight robbery, when officials, governments, yes, the public, stood to one side and permitted the swindle to go on.

Has the western public yet learned the lesson and is it not a regrettable incident in the development of the west? Is it not time for a vigorous policy and a provincial-wide effort by our municipal authorities to untagle this subdivision mess and clear away the wreckage of a disastrous past? It is not fair to the outside investors to continue squandering their money in paying further taxes on worthless lots in illegitimate subdivisions, when this wealth might better be directed into more useful channels of national importance. It is a fraud on the part of our municipal councils to accept money as taxes on such stuff, which, after all, is not lots required for residential purposes, but prairie—the choicest of farm land urgeptly required for production purposes which has been cut up into so-called lots and sold to outside investors. We cannot altogether blame the distant investor who had every faith in the growing west and was willing that his funds be utilized for this purpose, but we, you and I, were to blame for permitting the wild-cat game, that the distant investor might be caught in the trap.

Subdivisions are Best Land

Let us consider for a moment many of the subdivided areas which were previously our best located farms, land elegantly situated to market and railway facilities, farms producing crops to supply the daily needs of the nation, bringing in a revenue by honest production and doing its share towards increasing our national wealth. Then, one day along comes the promoter in his large and handsome car, purchased on the instalment plan, with his tempting offer to the farmer, and as he did not deal in small figures such as ordinary farm values, quite naturally the land was sold. As a result the farm was abandoned, the cultivated areas soon grew up into weeds to be scattered broadcast over the country by the wind. As a farm the land was an asset to the nation, but in the hands of the promoter, it became a dumping ground of evils to the community.

In withdrawing these farms from actual production the west has suffered a substantial loss in national wealth. Furthermore, it was a public crime to subdivide the land when the town or city already was overburdened with vacant lots, possessing incorporated limits sufficient to accommodate a population thirty or forty times its size. This is the outstanding problem before our western towns to-day, the improved sections are thinly scattered over vast areas with large and open gaps in between. Consequently, when public improvements are required such as waterworks, electric lights or sewerage the municipalities are compelled to install a large and expensive plant to serve a small and scattered population at a minimum of income, when the same system should be serving a population of five or ten times its size. Do you wonder then at the prevailing high taxes and the known fact that owners of vacant properties are defaulting to the municipalities. Instead of a policy of expansion and additions over areas which cannot economically be served by public improvements, the incorporated limits might better be reduced and the people encouraged to build on the vacant spaces.

When a business fails its affairs are wound up and assets distributed among creditors. Likewise the illegitimate subdivisions should be publicly condemned and the municipal authorities asked to wind them up as speedily as possible. For this purpose an Act was passed at the last Alberta legislature granting the power to appoint one or more commissioners to deal with useless subdivisions. As the newly elected councils are now assuming their duties of office, they should grasp the situation and make immediate use of this important legislation, and thereby compel a clean sweep of this existing evil and restore to the farmer the valuable land which has been lost.

APPEAL ON HAIL INSURANCE

Failure to come to an agreement as to the amount of a policyholder's loss, has brought up the question of appeal from the decision of the Saskatchewan Municipal Hail Insurance Association. The latter claims that the powers granted by section 37 of the Hail Insurance Act make its decision final. The policyholder in the case is Wm. McLeod, of Marquis, Sask., and he has entered an action in the provincial courts.

OPPOSE HIGHER AUTOMOBILE TAX

The British Columbia finance minister's proposal to increase the tax on motor cars is being opposed by the Vancouver Automobile club and by the Vancouver Automobile Dealers' Association. The former criticizes the proposal to base the tax on weight and value, and favors a plan similar to that in force in Washington state. A Seattle motorist has to pay a minimum of $10.25, which covers the charges on a car up to a weight of 1,500 lbs. For all weight in excess of that the auto owner is charged at the rate of 50 cents a hundredweight in the case of private cars and 40 cents a hundredweight in the case of trucks. The Vancouver club will propose a modification in this plan. They will suggest that the minimum tax be $15 to cover a car weighing up to 2,000 lbs., weights in excess of that to be charged at the same rates as those collected in Washington.

Theatre proprietors are also opposing the increase in amusement taxes announced by the minister. The municipalities had asked for a share of the tax, it is pointed out, but the government had conceded the request by greatly increasing the rate. This tax is already high in British Columbia. James Pilling, manager of the Orpheum theatre in Vancouver, said in reference to the proposal: "If it is carried into effect there is a strong likelihood that some of the theatres in the city will have to discontinue business. Outside money that was to be invested in new places of amusement in the city is likely to be diverted to other cities and already it is definitely announced that the syndicate headed by Charles E. Royal, which was contemplating the building of a theatre on Robson Street, has called off the whole project."

ARE FIRE AGENTS' COMMISSIONS UNFAIR?

Rates Vary as Between East and West, and Between Cities, and Rural Communities—Commission Highest Where Losses are High, and Competition Keen

FOR every hundred dollars paid in fire insurance premiums, $63 is returned, on account of losses, $33 pays the expenses of conducting the business, and the balance is the companies' profit. This was shown by Justice Masten in his report on fire insurance in Ontario. The figures are for the year 1917, but it is probable that the ratios do not vary greatly from year to year. The item of expense includes agents' commissions, amounting to 18.60 per cent. of premium income, the cost of inspection and rating, general administration expenses, taxes, etc. It is felt by many, however, that the cost of doing fire insurance business is too high, and attention has been especially centred on the largest item, agents' commissions, to see if some reduction could not be made.

The whole question of fire insurance agents' remuneration in Canada has not been satisfactorily solved. The allowances vary from province to province, and even in different sections of the same province. The western agents point out that western business is more profitable than eastern business, and they object to receiving less remuneration than agents in the east. In an interview with *The Monetary Times*, H. Milton Martin, of Edmonton, points out that the commissions of agents in the west do not average 18.60 per cent., as in Ontario. This rate, says Mr. Martin, is not too high considering the cost of doing business at the present time. "The rate of commissions received by the agents in the provinces of Alberta and Saskatchewan will average probably 15.5 per cent.," he says: "The regular agency agreement provides for a 15 per cent. commission except in the larger cities. In such cities as Edmonton and Calgary the general commission rate is 15 per cent. with the exception of that which is received on business written on dwelling-houses and a few select first-class mercantile buildings where the commission rate is 20 per cent. The rate of commission is 15 per cent. on such three-year business as churches, hospitals, schools and seminaries. It is quite evident when compared with the 18.60 per cent. commission expenditure of the province of Ontario, the remuneration received by the agents in Saskatchewan and Alberta is unfair and inadequate. Neither does it compare favorably even with the provinces of Manitoba and British Columbia on either side of us in so far as it relates to the larger cities. The agents of Winnipeg, New Westminster, Vancouver and Victoria are recognized as being worthy of receiving from 20 to 30 per cent. commission, whilst those of the provinces of Saskatchewan and Alberta, up to the present time at all events, may only receive from companies, members of the Western Canada Fire Underwriters' Association, 15 per cent. excepting on the few select risks hereinbefore mentioned where the 20 per cent. rate is allowed, and to counterbalance which an agent is only allowed to receive 10 per cent. on business written in rated towns other than the one in which he resides.

Losses Lowest in the West

"Now to compare, if I may, the loss ratio of Alberta and Saskatchewan with that of Ontario and Quebec (and the latter are not by any means the provinces where the highest loss ratio occurred), I will quote from the report of the superintendent of insurance of the Dominion of Canada covering business of 1918 which shows the loss ratio for the four provinces mentioned to be as follows:—

	1918	1917	1916
Alberta	44.64	32.87	47.90
Saskatchewan	48.74	44.44	39.72
Ontario	59.47	62.77	77.46
Quebec	52.69	60.98	49.18

"It is quite evident from the above that western Canada is paying the way of the eastern business and, naturally, the western agents (I believe I am voicing the sentiments of the others) object to being sacrificed for the benefit of the eastern agents.

Making Profits for East

"The provinces of Manitoba, New Brunswick, Nova Scotia and Prince Edward Island will show a greater average of loss ratio for the three years than either the province of Alberta or the province of Saskatchewan. The natural deduction is that the lowest commissions are being paid in the provinces having the lowest loss ratios. Of course, insurance companies undoubtedly feel that in the provinces where, possibly, competition is keener, it is necessary to pay the higher commissions to secure business, even though that business is actually being carried on at a loss and that being possible only because of the lower operating expense incurred in Alberta and Saskatchewan. The provinces where business is being done on a, comparatively speaking, low expense ratio, counterbalance the larger provinces and permit of a declaration of dividends. The western agents, contentions are that they should be placed on exactly the same footing as other agents throughout Canada. The western agents have suffered more because of the increased cost of doing business than the eastern agents. The latter have benefited to a very large extent because of the industries which prospered throughout the war whilst in western Canada there was practically no industrial extension during the period 1914-1919. At the outset of the war stocks in the west were reduced, and they were held throughout the period of hostility at a lower level than in so-called normal times, and it is only at this late date that, generally speaking, are stocks being brought back to the same quantities as they were in pre-war days. To a very slight extent has additional value of merchandise proven a source of profit to resident agents in western Canada.

"I am well aware of the fact that the subject I am discussing is one in connection with which opposite views will be held by company representatives, but I think it is only fair that the views of a western agent be heard in eastern Canada."

TO INCREASE ONTARIO SUCCESSION DUTIES

Succession duties in Ontario are to be raised to new levels, according to Hon. Peter Smith, provincial treasurer. The most striking feature of the new schedule is the way in which it deals with estates that pass on to one or two beneficiaries or to other than near relatives. Where the old act took from twelve to fifteen per cent. in taxes, the new legislation will give the province authority to impose duties for a maximum of sixty per cent. of the estate. Where the estate exceeds $25,000 and does not exceed $50,000, and goes to wife, husband, children, parents, etc., the tax remains at one per cent. On estates up to $150,000 the old rates have been increased one-half of one per cent. On larger amounts the tax is practically the same, 10 per cent. being collected from estates of over $1,000,000.

A sharp increase is made, however, in the existing rates where a large amount passes to one relative. Where from $50,000 to $100,000 passes to one relative, 2½ per cent. will be taken in taxes, compared with one per cent. at present The existing schedule imposes a maximum of 5 per cent. on all amounts over $450,000 passing to a single near relative, but the new schedule taxes the bequest over $400,000 at 7 per cent. and takes a steadily mounting revenue from larger amounts. Thus, where a bequest of over $1,000,000 is made the province will collect 14 per cent. The maximum is 35 per cent., payable upon amounts over $3,000,000. The effect of this would be that an estate of over $3,000,000 passing to one near relative, beneficiary would have to turn over to the province at least 45 per cent. of the total.

The highest duties are reserved for amounts passing to other than relatives, starting with 10 per cent. of amounts from $5,000 to $10,000 up to 60 per cent. of amounts of over $800,000.

Report of the Directors

To the Shareholders:

Your Directors have pleasure in presenting herewith the annual statements of your Company as of December 31st, 1919, covering the operations for the period from May 1st to December 31st, 1919.

On account of the interruptions to your business caused by having the fiscal year terminate on April 30th, and for the convenience of our newly associated Companies, your Directors have changed the fiscal year to make it terminate on December 31st. Therefore the statements presented cover a period of eight months.

The net profits for the period amounted to $307,400.82, after deductions for interest and reserves for bad debts, property depreciations and Business Profits Tax. The surplus account now amounts to $992,354.40.

Inventories of manufactured goods, as well as materials and work in process, are much greater than at April 30th, because the units in quantity are always heavier at the close of the calendar year, and also because of the greatly increased cost of labor and all materials entering into the manufacture of your Company's product. All inventories are taken at cost.

Bank loans are higher than at May 1st, due partly to larger inventories and to larger accounts receivable resulting from increased business and partly to new plant extensions.

Your factories, both at St. Hyacinthe and Montreal, were operated continuously during the period and have given us a steadily increased pairage. Their daily output during the late Fall exceeded any previous records. Because of this increased production, causing greater wear and tear, a larger amount than usual has been charged to depreciation of plant.

Your sales for the eight months ending December 31st, 1919, amounted to $4,269,368.12 as against $3,246,725.66 for the corresponding period in 1918, an increase of $1,022,642.46, or over 31%. Included in the former period was war business amounting to $444,676.73, compared to only $214,026.11 in the latter.

Besides strengthening the staffs at our regular Branch Sales Offices, additional staffs were appointed and Branch Offices were opened during the period at Halifax, Quebec, Ottawa, London, Regina, Saskatoon and Calgary. The initial expenses incidental thereto have been absorbed in current expenses.

Your Directors have issued and sold the remaining authorized 6% First Mortgage Bonds of the par value $250,000.00. The proceeds will be applied to the plant extensions being made to your Montreal factory, and to the completion of basement and three stories of your Winnipeg warehouse, the construction of which was discontinued in 1914.

A revision of your Company's contract with the Canadian Consolidated Rubber Company, Limited, has been made, providing for an earlier termination thereof. Your Directors have, therefore, authorized the installation of machinery and equipment in your Montreal factory for the manufacture in the near future of your own rubber and canvas footwear.

For many years your Company and its predecessor in business purchased Felt Footwear equivalent to the total output of one of Canada's Felt Footwear manufacturers, and your Directors have authorized the incorporation of a subsidiary Company for the manufacture of "Ames-Holden" Felt Footwear under the name of Ames-Holden Felt Footwear Company, Limited. Your Company made financial arrangements for the Felt Company similar to those in connection with Ames-Holden Tire Company, Limited. The new plant is located at Kitchener, Ontario, and will be producing goods in May.

The plant of Ames-Holden Tire Company Limited, at Kitchener, is now practically completed and its first tires have already been produced.

Your property on Inspector Street, Montreal, has been leased to the Canadian Consolidated Rubber Company, Limited, for another year to April 30th, 1921, at a rental of $40,000.00 per annum and taxes.

Your property at Winnipeg has been leased at an annual rental of over $12,000.00. When the construction of this building was commenced in 1914 it was intended as a six storey and basement warehouse. In order to save the initial investment in 1914 construction, it was decided last Fall to complete the building to a height of three stories.

Your Directors take pleasure in recording that there exists complete co-operation amongst your officers and staff, and the splendid results obtained are due to the spirit of goodwill between employer and employed within your Company.

The prospects for 1920 are promising. Retail footwear orders on hand at December 31st for Spring delivery amounted to $2,036,002.00. Since January 1st, salesmen have been taking footwear orders for Fall and Winter delivery, and in many lines the volume is two and three times that of a year ago.

Respectfully submitted,

T. H. RIEDER, President.

March 10th, 1920.

BALANCE SHEET AS AT 31st DECEMBER, 1919.

		131,250.00
Surplus as per Balance Sheet		$ 992,354.40

UNION FIRE AND CASUALTY CO.

The financial statement of this company, formerly the Union Casualty Co., for the year ended December 31, 1919, shows that substantial progress was made during the year. Assets now total $210,132, of which $97,491 is invested in bonds. The reserve for unearned premiums is $52,502, and after providing for other liabilities there is a surplus to policyholders of $116,580, including $82,313 of paid-up capital. The business of the company was increased in 1918 by the purchase of the Western Accident Co., which had a paid-up capital of $75,000, and which was licensed to do business in all three prairie provinces.

The Union Fire and Casualty Co. has now, in addition to the head office in Winnipeg, branches in Saskatoon, Calgary and Toronto. It is licensed to transact fire, automobile,, bonding, liability, health and accident insurance in Manitoba, Saskatchewan, Alberta, and Ontario. As chief executives it has two men who formerly served as government insurance officials, A. E. Ham, the vice-president, having been superintendent of insurance in Manitoba for over a year, and J. O. Melin, the secretary-treasurer, having for eleven years been chief examiner for the state of Minnesota Insurance Department. The president of the company is M. J. McMichael, and S. D. Works is also a vice-president. The other directors are: R. L. Nicolson, Gordon Bell, F. C. Kennedy, Howard Everett, R. J. Coolidge, C. L. Hemberson, and J. A. Patterson.

TRUST OFFICER MUST BE VERSATILE

"The experiences of a trust company officer are many and varied," says the April number of "Executor and Trustee," issued by the Toronto General Trusts Corporation. "When he comes into his office in the morning he has little idea of the kind of work he may be called upon to perform before the day is over. In whatever kind of business men are engaged, when their executors have been directed to operate the same after death, there the modern trust company is to be found in the exercise of its functions. The trust company officer is liable to be notified at any time that someone in whose will the company has been named as executor has just died and that his business interests are requiring immediate attention. From conferring with a solicitor upon the terms of a trust deed, he may go from his office to secure the particulars of a drygoods business and make arrangements for carrying on the store.

"The businesses which the estates officers of the Toronto General Trusts Corporation have operated in the last few years have ranged from a peanut store, the property of an Italian, to a large bridge and munition plant, and between these two have included the following: Piano factory, summer resorts, wholesale liquor business, cigar stores and factories, wholesale jewelry business, gents' furnishings and ready-made clothes store, billiard parlor, pawnshop, boot and shoe store, laundry, grain elevators, winding up doctor's practice, sporting goods, tailoring business, saw mill, hotel management, furrier, etc.

"The essential requisites for estate management by an executor are good judgment, tact, accurate and up-to-date accounting, financial responsibility, a knowledge of the duties of trusteeship with its powers, its limitations and responsibilities and these are to be found within the organization of a modern trust company, whose officers are constantly called upon to exercise these qualities."

Banks advancing moneys for the purchase of seed grain in the dried-out sections of Saskatchewan are accorded the same government guarantee as the mortgage companies, according to a ruling of the provincial government on March 26th.

REQUIREMENTS OF ONTARIO HYDRO-ELECTRIC

About $27,000,000 Will be Required During Next Two Years for New Work and for Refunding Obligations—Abnormal Costs May Deter Work, However

THE financial position of the Ontario Hydro-Electric Power Commission is analysed by G. T. Clarkson, auditor, in a report tabled before the legislature on March 26. Amounts still to be spent on works planned or already undertaken are as follows: Chippawa works, $21,500,000; Nipigon works, $3,000,000 to $4,000,000; Rideau and other systems, about $450,000, other works, about $1,000,000. If the commission proceeds with the purchase and construction of railway lines as now planned, a total of about $27,000,000 will be required during the next two years. The commission is financed by the sale of bonds guaranteed by the province.

Borrowed Million Temporarily

In the report Mr. Clarkson says:—

"The commission is indebted to its bankers in $1,000,000—repayment of which is guaranteed by the province for moneys advanced to the Ontario Power Co. Sales of power are expected to provide funds for repayment of this debt, but in the event that they shall not do so, the province may require to advance a sufficient sum to meet the whole or some part of it. Should either of these amounts have to be provided by the province—by way of cash or guarantees—the Ontario Power Co. will—and is able to pay interest and sinking fund upon the same.

"In your letter you state that the government is sympathetic to the commission, and you request me to express my opinion as to whether there are any reasons why support cannot be continued and extended to the commission with benefit to the municipalities and the province. In reply thereto I beg to report that there is, in my opinion, every reason to justify the government in according a full measure of support to the commission in its efforts to develop and utilize the power resources of this province, particularly in view of the heavy advances in the cost of coal and other fuel which have taken place in the last year or two and the further increases which appear likely to occur in the near future. In providing such support to the commission, however, there are, in my opinion, certain conditions to which the province must pay regard, and to which the commission and the municipalities should also give attention in their own interests.

Province Has Assumed Heavy Liability

"The most pressing matter is the ability of the province to raise funds under present conditions for its own requirements and the purpose of other developments in view and at the same time continue to extend credits to the commission so as to permit it to enter upon projects of magnitude. At the present time the debt of the province is about $100,000,000, of which approximately $40,000,000 has been advanced in cash and securities to the commission, while $10,000,000 in cash and securities has been paid for the purchase and use of the central Ontario system, which is owned by the province and operated on its behalf by the commission.

"The province has, in addition, guaranteed other securities to the amount of about $8,300,000 to permit the commission to purchase the Ontario Power Co. and certain other minor properties. Sinking funds payable by the municipalities having been deferred under the terms of the Power Commission Act for a period of five years after the date when each municipal commission first commences operating, the province has to this point received about $535,000 in reduction of these advances. Based upon estimates of the commission and its engineers, upward of $29,000,000 will now be required from the province in cash within the next two years to complete works in course of construction and meet maturing liabilities, while a further $25,000,000 to $26,000,000 may require to be provided by the sale or issue of bonds of the commission—guaranteed by the province—for the purposes of hydro-electric railway lines. With present abnormal costs, it is stated that the commission may find it to be against the interests of the municipalities to proceed too rapidly with construction work on such hydro-electric railway lines, as to do otherwise may impose serious burdens for the future. In that event, the sale or issue of the $25,000,000 to $26,000,000 of bonds mentioned may be effected gradually and as conditions warrant. In any event, however, the total amount now in contemplation to be provided on the credit of the province (subject to the guarantee of the municipalities) is upward of $55,000,000, or an amount in excess of one-half of the present debt of the province. With such expenditures made, upward of $105,000,000 will stand invested in hydro-electric enterprises and the central Ontario system, and of this amount approximately $65,000,000 will be represented by undertakings the exact costs of construction and operation of which are still matters for the future to determine.

Money Markets Unfavorable

"At the present time Canadian securities cannot be sold in the United States, except at excessive rates, unless principal and interest be made payable there, which, of course, means that exchange would have to be paid on interest and principal payments as they fall due; the sale of new securities in England is out of the question. Accordingly, the probability is that a large proportion of the moneys now necessary for the purpose of the commission may have to be borrowed in Canada. There can be no objection to this course if the province is prepared to pay the rates of interest demanded. Money markets are not unlimited under present conditions, however, but they are more restricted than they have been in years. It is, therefore, necessary, so far as the province is concerned, that it does not put too great a strain upon them if its high present grade of credit is to remain unimpaired and it is to continue able to borrow money without payment of too high a rate of interest.

"Under the above conditions, and if the province is to be left in the position where it can support the commission in a proper manner and still provide for its other requirements at reasonable interest costs, it is essential, in my opinion, that there shall be the most complete confidence between the government and the commission to the end that new projects shall not be entered upon, or substantial additions—beyond those of immediate necessity—be made to existing undertakings, without a complete and frank understanding in respect to each of them. Before new projects be entered upon, also, the government should, in fairness to the province, the commission and the municipalities, fully satisfy itself that they are based upon such business principles as will insure that its guarantees are not likely to be called upon; at the same time moneys necessary for the purpose should be financed before construction of such work be commenced or their purchase undertaken."

Warns Against High Costs

The report states that when the scheme was started costs of construction were moderate and the interest rates four per cent. Now the costs are double and interest is six per cent. "It is believed that the present costs of construction are permanent and that they will not recede in the future; then attention need not be paid to these conditions. On the other hand, if it is believed that the cost of construction will be lower—as is generally expected—it would seem to be the part of wisdom not to enter upon construction of any new works at the present time, except those most pressing and of immediate necessity, unless the municipalities interested are willing to accept the burdens imposed and bear them for a period of from 30 to 40 years.

"It is apparent, however, that higher rates must now be paid by many of the municipalities, but with their payment most substantial advantage will still remain if such rates be compared with the present high costs of steam-generated power. With due regard to the above conditions, I can see no reason why full support of the commission should not be continued by the province."

BANK MUST KNOW AGENT'S AUTHORITY

Authority of Government Agent to Cash Government Cheque —Liability of Bank

On appeal from the trial judgment in the case of the King vs. The Royal Bank of Canada, it was recently held by the Manitoba Court of Appeal that the burden of proving the authority of a government agent to receive payment of a cheque drawn on a certain bank, payable to "Dominion Government Elevator Co.", rests upon that bank, and that the Crown is not liable for the negligence of its officers.

The action was brought on a cheque for $673.68, drawn by Woodward and Co., grain merchants, on the Grain Exchange branch of the Royal Bank of Canada, in favor of "Dominion Government Elevator Co.," The words, "Canadian Government Elevator," are stamped on the back of the cheque with a rubber stamp, and underneath these words there is written, "Per F. S. Burgess." The cheque in question was given in payment of charges due from Woodward and Co. to the Dominion government in connection with wheat received and stored at the terminal elevator, Port Arthur. It was claimed that the proceeds of the cheque were improperly paid by the bank to F. S. Burgess, who was in charge of the Dominion government elevator business at Winnipeg, and who kept the money for his own use.

Agent's Instructions were Specific

The facts of the case and the decisions thereon as set out in the written judgment on the case are as follows:: F. S. Burgess, a druggist's clerk, was, on October 14th, 1913, engaged as a clerk in the government elevator office at Port Arthur, at a salary of $85 per month. He was presently transferred to Winnipeg as clerk of the Board of Grain Commisisoners, and from October, 1913, until November, 1916, he carried on his duties as government elevator clerk at Winnipeg. In the latter month he became a fugitive from justice, and, as appears from the evidence, from cheques filed as exhibits and from statements of counsel, the sum of upwards of $140,000 is unaccounted for to the government of Canada. It was his business to deliver warehouse receipts for grain in storage at Port Arthur to the persons entitled to those documents upon payment of transportation charges disbursed by the government. The funds so received by him were to be deposited to the credit of the Receiver-General of Canada, in the Bank of Ottawa, at Winnipeg, and for that purpose he was supplied with a rubber stamp which bore the words, "Deposit to credit of Receiver-General, Dominion Government Elevator Account." The duty of Burgess to make deposit of all funds received by him was not only specifically set forth to him in written instructions, but was statutory. He had no authority to expend any money, either for office expenses or for any other purpose.

It was, therefore, necessary to determine the authority, both actual and ostensible, with which Burgess was clothed, and the negligence of the bank, if there were any, in making payment of the cheque in question in cash over the counter of the bank to bearer.

The court, in giving judgment against the bank, said:—

"The actual authority of Burgess is determined by the letters and oral instructions referred to. He was authorized to take cheques or money in exchange for warehouse receipts and to make deposits to the credit of the Receiver-General. He had no other general authority except to sign split warehouse receipts when necessary.

No Authority to Receive Cash

"I have no hesitation in stating that, having received a cheque payable to a government department in exchange for a warehouse receipt, Burgess had no actual authority to take that cheque to a bank and receive cash for it over the counter. When he did so, he violated his express instructions. While he was authorized to receive money when tendered for freight charges in the ordinary course of the business of the Grain Commission, in exchange for warehouse receipts, he had no authority to receive money for the government in any other way. He had no authority to endorse generally, but was limited to a special endorsement for deposit only.

"Without any express representation being made, the bank teller assumed that Burgess was the manager of a grain company, with full powers as such. In this the teller was clearly negligent.

"Moreover, the endorsement, 'Canadian Government Elevator, per F. S. Burgess,' was direct notice that the cheque was being negotiated, not by the owner, but by an agent 'per proc.' By Sec. 51 of the Bills of Exchange Act, R.S.C., 1906, ch. 119, a signature by procuration operates as notice that the agent has but limited authority to sign, and the principal is bound by such signature only if the agent in so signing was acting within the actual limits of his authority. In this case the endorsement 'per F. S. Burgess' was sufficient to put the bank upon enquiry as to the agent's authority.

"The law is well settled that a principal is not bound by a payment to, or settlement with, an agent unless such payment or settlement be made in the ordinary course of business, and in a manner actually or apparently authorized by the principal.

"Upon the whole case, I am of opinion that the plaintiff has established the negligence alleged in the statement of claim and is entitled to judgment; that the defendant bank has failed to establish the agency of Burgess, actual or ostensible, to receive this sum of money over their counter, and has failed to show that it acquired any title to the cheque in question by means of a valid endorsement."

SASKATCHEWAN FIRE AGENTS' ASSOCIATION

At their annual convention, held in Moose Jaw on March 26 the Saskatchewan Fire Insurance Agents' Association decided to appoint a paid secretary, who should devote a good part of his time to the work of the association. Increased commissions for agents were also discussed and the raising of the license fee with a view to eliminating the practise of merchants and others securing a license merely to write their own business, was suggested. About seventy agents were present at the meeting.

The officers elected for 1920 were: President, G. A. Buchan, Saskatoon; vice-president, Nate Andre, Regina; permanent secretary, J. R. Peverett, Regina; executive, W. H. Clare and W. A. Coulthart, Saskatoon; W. L. Wallace and G. H. Sneath, Regina; H. Hollingsworth and E. G. Cook, Moose Jaw; T. P. Sheffield and A. I. Wilkinson, Prince Albert; A. Norman and R. A. Stewart, North Battleford; W. W. Smith, Swift Current; F. McKinnon, Humboldt; N. J. McDonald, Eyebrow; A. C. S. Watch, Yorkton; J. R. Garden, Wolseley.

OBJECTS OF MANITOBA EMPLOYERS' ASSOCIATION

Organization of the Employers' Association of Manitoba was completed at a meeting held in Winnipeg on March 30th, a constitution was prepared, and fifty-one directors elected. The principal objects are:—

"To promote on a fair and equitable basis industrial peace and commerical prosperity in the community and steady employment of labor.

"To discourage lockouts, strikes and unfair demands by either employer or employee, and secure for employer and employee freedom of contract in the manner of employment."

It was declared in many of the speeches made that employers were not organized to combat unionized labor, but as long as laborers organized for the purpose of assisting their members by honest effort to improve conditions in general the association would work with it in every possible way.

News of Industrial Development in Canada

Another Large New Brunswick Timber Deal—Collingwood Shipbuilding Company May Make Extensions to Kingston Plant—Sidney Rubber Roofing Company to Operate at Victoria — New Industries for St. John, N.B.

A TIMBER deal of considerable importance to the lumber industry and possibly the pulp and paper industry in the province of New Brunswick, has been completed. E. B. Draper, of Bangor, N.B., becomes owner of the timber tracts in Washington County, on the St. Croix River, owned for many years by H. F. Eaton and Sons, of Calais, N.B., and in addition, valuable water privileges, mills, buildings, wharf and vessel property also pass into possession of Mr. Draper. The Eaton holdings on the St. Croix total 262,000 acres of wooded lands at the head of waters of that river, with saw mills at Milltown and valuable wharf property at Calais, also a fleet of five sailing vessels, which ply along the Atlantic coast.

In the early days of lumbering on the St. Croix the Eaton concern was one of the largest manufacturers and shippers of long and short lumber, but in recent years the manufacturing end of the business dwindled. The company still continued to operate its mills at Milltown, though on a smaller scale, and its holdings of timberlands steadily increased in value and the deal recently completed by which title to these lands and the other holdings of the company pass to Mr. Draper is said to involve the sum of $4,000,000. In addition to its holdings on the St. Croix, the Eaton company owns 93,000 acres of timberlands in Aroostook County, and it is understood, these will also be acquired by Mr. Draper at an early date, negotiations for the purchase now progressing favorably.

The property is recognized as one of the most valuable in the district and in addition to spruce, pine, hemlock and other woods there are large areas of hardwood suitable for the manufacture of furniture. It has long been the hope of St. Croix people that this latter would in time attract some of the big manufacturers of furniture now doing business in Michigan and other states when the supply there proved inadequate and that some day big furniture factories would be located either at Princeton or at Grand Lake Stream, the latter place being the more convenient by reason of its rail facilities and only 12 miles from the growing timber.

Shipbuilding at Kingston

The Collingwood Shipbuilding Co., is planning large extensions to its plant at Kingston, Ont., and negotiations are now being carried on between the civic officials and the company's representatives which may result in the establishment of a dry dock. *The Monetary Times* understands that the company plans to construct a 750-ft. dry dock, but in order to carry out the scheme, it will be necessary to have the city's waterworks pumping station removed to some other place, and this is a matter that has to be taken up. The dock will be so constructed to allow for the launching of a 600-ft. vessel, and thus be in a position to care for all the vessels going that way after deepening of the Welland Canal. An idea of the extent of the work which is planned is contained in the statement that it will require two years' time for completion.

The city of Victoria, B.C., has secured an important new industry in the Sidney Rubber Roofing Co., of Sidney, B.C., which has reached an agreement with the provincial government for a lease of about four acres of the former Songhees Reserve, as a site for a large new paper mill and roofing plant proposed for immediate erection. The site under consideration includes 1,000 ft. of waterfrontage from Hospital Point in the direction of the proposed Johnson Street bridge and the area between the waterfront and the property line of the E. & N. Railway on the reserve.

The first unit of the plant will include the erection of a machine building to house the process of making the paper, 50 ft. by 300 ft. in size; a saturating plant 50 x 300 ft., a raw material storage warehouse 50 x 150 ft., together with a boiler house, machine shop and office building. The product of the mill will not be made from pulp, but will be made from waste paper and rags. The company will be able to get considerable of this raw product in British Columbia. Ultimate plans provide for a much larger industry than will be immediately undertaken by the company. The securing of a site in the city will mean the abandonment of the company's present plant at Sidney, and the machinery and equipment at present located there will be moved to the new site. Contract for the erection of the plant has been let to the Co-operative Contract Co., of Victoria.

Miscellaneous Trade Notes

A new factory for the manufacture of automobiles at St. John, N.B., is about to be constructed by J. E. Arrowsmith.

Messrs. Barber-Ellis, Ltd., Brantford, Ont., paper and envelope manufacturers, have let the contract for a $75,000 addition to their plant in that city.

A saw-mill for the manufacture of long lumber, is to be erected at Kennedy Island, Upper St. John River, New Brunswick. In making this announcement, the St. John Board of Trade does not mention the name of the firm.

Following approval by the ratepayers of Peterboro, Ont., of the by-law affecting the Canadian General Electric Co., that organization's plant will be increased to the extent of 108,040 square feet, involving an expenditure of several hundred thousands of dollars.

The Corona Candy Co., St. John, N.B., has enlarged its chocolate manufacturing premises on Union St., by the addition of another story.

Machinery is now being installed in the new factory of the Northern Rubber Co., Guelph, Ont., manufacturers of rubber footwear, and the plant will soon be on a producing basis.

A meeting of Messrs. Whitman and Barnes, Mfg. Company's stockholders, and those of the J. H. Williams and Co., was held on April 2, for the purpose of merging the two concerns. The Whitman and Barnes Co. has a large factory at St. Catharines, Ont., and another in Chicago, while its main factory is in Akron, Ohio. The agreement was entered into by the respective presidents of the two companies and the plan provides for the operation by J. H. Williams and Co. of drop forging and drop-forged tool plants at St. Catharines, Chicago, Buffalo and Brooklyn. The Whitman and Barnes Company's new forge shop at Chicago, 500 x 100 ft. in size, has just been completed at a cost of $1,250,000. The Whitman and Barnes plant at Akron, will continue the manufacture of twist drills, reamers and collateral lines on an extended scale. It is likely the St. Catharines plant will be extended under the new arrangement. It is now one of the largest and most substantial in the city.

Enlargements are planned for the Welland, Ont., plant of the Canadian Mead-Morrison Co. of Welland, which proposes to manufacture a line of dredges, derricks, hoists, pumps, etc. Canadian rights have been secured from an American company holding the patents on the equipment in question. The Welland company proposes to manufactur for other parts of the British empire as well as for the home market.

The Dunlop Tire and Rubber Co. has secured a permit for the erection of a reinforced concrete structure at the north-west corner of Queen Street and Booth Avenue, Toronto, Ont. This new building will be used by the company as a factory to meet the growng business needs.

ST. MARY'S BOARD OF TRADE

The executive of the St. Mary's, Ont., Board of Trade for 1920 is composed of the following members: H. L. Rice, J. Lind, C. E. Richardson, J. Patterson, Rev. C. E. Evans, W. H. May, W. N. Harrison, W. H. Bartlett, W. R. Butcher, John Dunbar, W. J. Mills, W. A. McIntyre, F. G. Sanderson, Dr. Stanley.

MERCHANTS BANK SHAREHOLDERS' DIVIDEND

Another bank to declare a bonus in addition to the regular dividend is the Merchants Bank, which couples an extra 1 per cent. with the regular declaration for the current quarter. This will make a total of 4 per cent., which shareholders of record April 15th will receive on May 1st. The dividend was put on a 12 per cent. basis last year, and the present bonus would bring the total for this year to 13 per cent., if no further extras are declared. From 1912 to 1918 the rate was 10 per cent., which had been reached by a series of advances during the past twenty years.

CANADIAN INDUSTRIES EXHIBITION

As the time for holding of the Canadian Industries Exhibition in the Royal Agriculture Hall, London, England, approaches its success seems assured, inasmuch as it means a direct thrust on the part of the Canadian manufacturers to the very heart of the world's trade. The exhibition will be opened on June 3rd by Sir George Perley, the Canadian High Commissioner. Recent advices received in this city by O. C. Pease, sole Canadian representative, indicate that British importers are very much interested indeed in the forthcoming exhibition of Canadian industries as it will naturally give Canadian manufacturers the opportunity of meeting a large number of British buyers and it is hoped that as a result many new trade associations between Canada and England will be established which will be of lasting value for a good many years to come.

MAY INCREASE COMMUTATION RATES

On April 1, the Board of Railway Commissioners brought down judgment in the application of the Canadian railways for increasing commutation rates. The commissioners ruled to allow the railway companies to file a new tariff. The judgment was a bulky document of forty-seven pages, but copies have been prepared for the directly interested parties.

The judgment of the board provides as follows:—

The railway companies will be permitted to file new tariffs of fares for commutation passenger traffic, applicable between the points included in the now existing tariffs of commutation fares as follows: (a) 50-trip tickets, good for 30 days, on the basis of 8½ mills per mile of travel, subject to a minimum charge per ride of 7½ cents. (b) 40-trip tickets (scholars' tickets), good for 30 days, on the basis of 4¼ mills per mile of travel, subject to a minimum charge per ride of 7½ cents. (c) 10-trip tickets, good for three months, on the basis of 2½ cents per mile of travel, subject to a minimum charge per ride of 7½ cents.

No extensions of present commutation areas are provided for.

1870 —— OUR GOLDEN JUBILEE —— 1920

They Put On More Insurance!

Mutual Life Policyholders last year increased the amount of their protection taking out additional policies to the amount of more than ten million dollars. They were alert business men who realized the necessity for increasing their life insurance because of the increase in the value of the necessities of life. In proportion as money loses its purchasing power we require more and more of it to maintain the same protection. Have YOU increased YOUR insurance since prices went up? The smaller the value of the dollar the more dollars we need. As a company, the Mutual does not advocate an excessive amount of insurance. At the same time every reasonable effort should be made to increase the insurance in times of inflated prices. Follow the example of 3139 Mutualists who increased their insurance last year. Put on more insurance!

The Mutual Life Assurance Co. of Canada
Waterloo Ontario

IT DOES MAKE A DIFFERENCE

which company you insure in.

If making an investment in Real Estate or anything else care is—or should always be—taken to secure property that has a reasonable chance of increasing in value, and giving a good return for the investment.

This same care should be taken in placing Life Insurance to see that the premiums are invested in such a manner that they give the best possible return to the insured.

IT DOES MAKE A DIFFERENCE WHICH COMPANY YOU INSURE IN.

Enquire for information and rates at your own age.

News of Municipal Finance

Fort William, Moose Jaw and Stratford Tax Rates Increase—Medicine Hat Given Right to Institute Rental Tax—Kingston Bonded Debt Will be Increased Over $250,000—Greater Winnipeg Water District Assessment Reduced

Fort William, Ont.—The civic finance committee has struck a tax rate of 36 mills.

Stratford, Ont.—The tax rate for 1920 will be 39½ mills, an increase of 1 mill over 1919. The estimated expenditure amounts to $470,000.

Chatham, Ont.—The tax rate this year will be 31 mills, a decrease of 1 mill as compared with last year. Assessment will be increased $2,000,000.

Toronto, Ont.—The civic budget, which was reviewed in these columns last week, has been adopted without amendment by the Board of Control.

Regina, Sask.—The expenditures for the general government of the city for the year 1920, totalling $244,115, have been approved by the council. The actual expenditure last year was $249,215.

Edmonton, Alta.—Municipal taxes levied in 1919 amounted to $2,795,436, according to the report of the minister of municipalities. The municipal debenture debt amounts to $25,316,884, and the school debenture debt $3,374,230. Land values amount to $62,471,850, and values of buildings and improvements $16,834,470.

Calgary, Alta.—According to the report of the minister of municipalities for 1919, the municipal debenture debt is $22,875,967 and the school debenture debt $2,656,966. Land values are $57,239,421, and values of buildings and improvements are estimated at $20,359,836. Municipal taxes levied in 1919 amounted to $2,767,213.

Quebec, Que.—At a meeting of the school board on April 4th, the Quebec Catholic School Commission appropriations, totalling $391,059, were approved. The increase of $57,681, as compared with last year, will necessitate an advance in the school taxes from 55 to 60 cents per hundred dollars' valuation. It was pointed out that the value of taxable property for Catholic school purposes is $64,641,404.

London, Ont.—The council has framed its plans so that the first instalment of taxes will be paid on June 15th this year, the second on August 16 and the third on October 15. This will mean a big saving to the city on bank interest, as large sums will now be available when required to meet expenditures. The city this year will spend $2,062,000, including general expenditure and debt charges.

Medicine Hat, Alta.—The city has been given the right to institute a tax on rental value of all properties by the municipal law committee of the legislature, which considered amendments to the Medicine Hat charter. The tax will be 10 per cent. of the rental value of property, and will be collected from all occupiers of property, whether owners or tenants. Lethbridge is considering the same scheme, but the proposal is not meeting with approval.

Moose Jaw, Sask.—The tax rate for public school supporters for 1920 will be 41.6 mills, an increase of 6.9 mills over last year. Separate school supporters will have to pay 49.3 mills, an increase of 1.75. The total levy amounts to $946,577, or an increase of $210,266 over the 1919 levy, exclusive of the local improvement levy of $71,229, which brings the city's levy for the first time over the million dollar mark.

Moose Jaw, Sask.—The auditor's report for the year ended December 31st, 1919, shows that revenue exceeded expenditure by $18,436, the total being $1,173,161, against $1,154,724. The principal item on the revenue side was the municipal tax levy, amounting to $543,526. Electric light and waterworks systems brought in over $400,000. Under expenditures the principal items include: Sundry interest and sinking fund charges, $11,712; general interest, $192,855; electric light system, $284,436; waterworks system, $154,142.

The balance sheet shows total assets of $8,339,034, and current assets of $1,084,848. The liabilities side shows net bonded debt of $5,092,566. Current and accrued liabilities total $896,924, and excess levies, $4,630, bringing total liabilities up to $5,994,121. The surplus of $2,344,912 is composed of capital, including local improvements (deferred assessment per contra), $1,946,749, and revenue available as a reserve for possible uncollected taxes, $398,162.

Winnipeg, Man.—The total assessable value of the land contained in the Greater Winnipeg Water District is $173,734,838, according to the report of the Board of Equalization of Assessment on Taxable Lands. The assessable value is less by $7,500,000 than in 1919, due to the taking out of portions of municipalities from the district. The assessable value of land in the city of Winnipeg remains the same, $146,882,650; St. Boniface, $10,263,300, an increase of $760,245; Assiniboia, $5,807,600, an increase of $379,963; West Kildonan, $2,756,598, the same as last year; East Kildonan, $2,281,190, unchanged; Fort Garry, $2,024,000, an increase of $379,962; St. Vital, $1,876,370, an increase of $112,630; Transcona, $2,163,090, a decrease of $432,590. Winnipeg's share of taxable land for the upkeep of the district is increased from 81 to 85 per cent.

Kingston, Ont.—The civic budget, which was approved and passed by the city council on March 29, provides for a tax rate of 35½ mills, an increase of 7 mills over last year. Total controllable expenditure is estimated at $194,081, and uncontrollable expenditure at $350,500, a total of $544,582. Assets applicable against floating liabilities as on December 31, 1919, showed a deficiency of $14,305, the total being $151,081, against $165,387 liabilities. The bonded debt of the city at December 31, 1919, was $1,809,530, and this amount will be increased this year by authorized debentures amounting to $261,243. The amount of the sinking funds is $294,414, and of this amount $279,112 is invested in government and municipal debentures, and $15,302 is on special deposit in the bank. The amount to be levied for the sinking funds this year is $53,561, the parties specially benefited paying $24,326, and the city generally paying $29,234.

ONTARIO HYDRO ACQUIRES ANOTHER RAILWAY

The Sandwich, Windsor and Amherstburg Railway was acquired by the Ontario Hydro-Electric Power Commission on March 31st. Purchase of the railway by the border municipalities involves an investment of more than $2,000,000, of which Windsor's share is approximately $700,000. Payment of the purchase price, which is guaranteed by bonds issued by each interested municipality, will be spread over fifty years. The present rate of fares, six tickets for a quarter, will be continued, according to Sir Adam Beck, chairman of the commission.

RECOGNIZE HIGHER BUILDING COSTS

Authority has been given to the provincial governments to increase the maximum amounts of the loans which may be granted under class "A" of the federal housing project from $3,000 to $3,500 for four or five-roomed dwellings, and from $3,500 to $4,000 for six or seven-roomed dwellings.

The question was brought before the cabinet council in regard to houses of wooden construction. Thos. Adams, town planning adviser, reported that in some cities, especially in St. John, N.B., and in Winnipeg, preference was shown for such houses, and it was pointed out that the cost of the material and labor necessary for their erection had greatly increased during the past year.

Government and Municipal Bond Market

Ontario and Greater Winnipeg Water Bonds Meeting With Favorable Reception by Canadian Public—Manitoba Proposes to Sell Bonds Direct to Public—Paris Loan in Canada

SLACKNESS prevailed in the Canadian government and municipal bond market during the past week, due partly to the Easter holidays. More activity may be expected in the future, however, judging from the amount of new financing planned, as recorded in the list below, providing municipalities consider the market in fit condition for their securities.

The $2,000,000 6 per cent. 15-year bonds of the province of Ontario, purchased last week by a syndicate composed of the United Financial Corporation, Ltd., R. C. Matthews and Co., and Hanson Brothers, at 100.719, are being offered to the Canadian public at 102, yielding 5.80 per cent. Although the province has sold many millions of bonds during the past six months, this is the first offering made in Canada, and the underwriters state that the issue is meeting with a favorable reception.

The $1,000,000 6 per cent. 20-year bonds of the Greater Winnipeg Water District, purchased by Wood, Gundy and Co., and the Dominion Securities Corporation, are being offered in Canada and are also being taken up rapidly.

Home Finance by Manitoba

In addition to the $1,769,000 bonds which will be issued shortly to cover the items of capital expenditure voted by the Manitoba legislature, provincial treasury bonds bearing current interest rates, will be on sale for the people of the province who wish to purchase, according to a wire to *The Monetary Times* from our western correspondent. There would be no campaign or drive such as featured the sale of Victory bonds, said Hon. E. Brown, provincial treasurer, in an interview. He stated that the department would be very busy from now on, raising the necessary funds to finance the rural credits societies and the farm loans. For these organizations it might be necessary, he said, to launch something in the nature of a drive. No question as to the jurisdiction of the department to sell bonds in this matter arises, it is stated, as the treasury department is already authorized by the legislature to sell bonds to carry out the work of the government, approved by the legislature.

Regina's first effort at home finance by the sale of city bonds over the counter of the city treasury dragged a little at first. As soon, however, as a few organizations took hold and boosted sales, the bonds went well and at present almost three-quarters of the amount offered have been sold. The bonds bear 6 per cent. interest and are being sold at par.

Paris Loan in Canada

The budget committee of the Paris, France, council has approved a loan of $20,000,000 to be contracted in Canada. The loan, which will be repayable in ten years, is to be used to purchase foodstuffs and other merchandise in Canada. The matter is still being discussed, and the decision is not yet final, but it is urged that it is likely to be additionally advantageous as in years when the loan matured, it is anticipated that exchange will be more nearly normal.

Coming Offerings

The following is a list of debenture offerings, of which mention is made in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Prince Rupert, B.C.	$362,000	6	Various	Apr. 14
Prescott, Ont.	8,500	6	......	......
Vermilion, Alta.	26,000	6½ & 7	20-instal.	......
Toronto Tp., Ont.	74,675	6	......	Apr. 20
Levis, Que.	80,000	5½	20-years	Apr. 20
Alta School Districts	76,175	Various	Various	Apr. 20

Toronto Tp., Ont.—Tenders will be received until April 20, 1920, for the purchase of $74,675.85 6 per cent. debentures, maturing in equal instalments. J. K. Morley, acting clerk, Cooksville, Ont.

Levis, Que.—Tenders will be received until April 20, 1920, for the purchase of $80,000 debentures, dated the 1st April, 1920, with interest coupons, maturing in 20 years from their date, bearing interest at the rate of 5½ per cent. per annum, payable semi-annually on the 1st April and October of every year, at the offices of the treasurer of the city of Levis, at Levis, or of the Caisse Populaire de Lévis, at Levis. Such debentures to be redeemable by series.

Edmonton, Alta.—Tenders will be received until April 20, 1920, for the purchase of 6½ and 7 per cent. school district debentures, by the Debenture Branch of the Department of Education as follows: Consolidated, 20-years 7 per cent.—Wrentham, $11,000. Villages for assessment purposes, 10-years 7 per cent.—Bellevue, $14,000; Nacmine, $8,000. Rurals, 10-years 6½ per cent.—Mann Lake, $1,500; Northern Moose, $1,500; Siberian, $1,000; Lotus, $1,800; Capitol, $1,200. Rurals, 15-years 6½ per cent.—Blarney, $2,500; Lily Lake, $2,200; Smoky Lake, $5,000; Wellman, $4,000; Busby Park, $2,500; Champlain, $1,500; Pine Grove, $700. Rurals, 15-years 7 per cent.—Clinton, $3,200; Evergood, $2,500; Leader, $1,500; Wild Deer, $1,000. Rural, 12-years 7 per cent.—Berg, $1,200. Rurals, 10-years 7 per cent.—Advent, $2,000; Currie, $1,800; Rosebud Valley, $2,600. Rurals, 5-years 7 per cent.—Fertile Hills, $575; Ruby, $1,400.

The total amount to be issued in debentures is $76,175.

Debenture Notes

Winnipeg, Man.—The city will issue $500,000 debentures for school purposes.

Gilbert Plains, Man.—Ratepayers have passed a by-law authorizing the borrowing of $103,458.

Bridgeburg, Ont.—The council proposes a debenture issue of $28,000 to cover the cost of a new town hall.

West Kildonan, Man.—Ratepayers have defeated a by-law authorizing the raising of $20,000 for a new municipal hall.

Montreal, Que.—The Catholic School Commissioners have decided to float a loan of $2,000,000, the bonds to carry 5½ per cent. interest.

Glace Bay, N.S.—The town council has passed two borrowing bills, one for the raising of $155,000 for school purposes and $15,000 for street repairs.

Sherbrooke, Que.—Two money by-laws authorizing the raising of $577,000, $300,000 being for electrical purposes, and $277,000 for waterworks, have been carried by the ratepayers.

Outremont, Que.—The Board of Protestant School Trustees have passed a resolution authorizing the borrowing of $275,000 for the purpose of building a new school on De L'Eppe Avenue.

Hamilton, Ont.—The Board of Control has authorized the issue of $225,000 6 per cent. debentures for new waterworks equipment. It was also decided to sell $10,000 baby bonds over the counter.

Edmonton, Alta.—That no new capital expenditures shall be made in Edmonton until the debentures covering the work are sold and the money actually received, is the announced policy of the finance committee of the city council.

Hamilton, Ont.—The city proposes to establish a civic gas plant, and the council has decided to ask the legislature for permission to issue debentures to the amount of $2,600,000, for the purpose of financing the undertaking.

Point Grey, B.C.—Two school money by-laws have been carried, one authorizing the borrowing of $135,000 for new

schools, and the other for the borrowing of $32,350 for miscellaneous equipment required to complete schools already built.

Waterloo, Ont.—The town council has decided that the request of the Collegiate Institute Board for the sum of $90,000 as Waterloo's share of the cost of the proposed new Kitchener and Waterloo technical institute must be submitted to the ratepayers. The Kitchener council has already voted in favor of making the grant of $350,000 toward the new building.

Quebec, Que.—It has not been definitely decided yet what the city will do regarding the $800,000 which was refused by the Dominion Securities Corp., and Wood, Gundy and Co., who purchased the Quebec bond issue for $2,125,000 on the ground that it was a distinct loan that called for five-year bonds, while the remainder, $1,325,000 was for ten-year bonds in accordance with the call for tenders. At a meeting of the civic finance committee, a resolution was passed accepting the offer of the Wood, Gundy and Co. at 98.17, for the sum of $1,325,000, and tenders will probably be called in the month of May to float the $800,000 in five-year bonds on the local market.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from March 15 to 20, 1920:—

School Districts.—*Standard, $1,000 10-years 8 per cent. annuity; *Carlsbad, $2,500 10-years 8 per cent. instalment; Little Moose, $3,800 10-years 8 per cent. annuity; *Arran, $4,000 10-years 7 per cent. annuity; *Tarnapool, $1,000 10-years 7 per cent. instalment; *Aroma, $2,500 10-years 8 per cent. instalment; *Harpy Hollow, $3,900 10-years 8 per cent. instalment.

City.—Moose Jaw, $22,200 15-years, for cement sidewalks.

Bond Sales

Chatham, Ont.—The city treasurer has reported the disposal locally of all the issue of $130,000 debentures for school purposes, thus saving the city $6,500 in commissions. The debentures are for ten years and bear 5½ per cent. interest.

Simcoe, Ont.—It is reported that about $65,000 of the town's debentures have been taken up locally.

Walkerville, Ont.—The National City Co., Ltd., has been awarded the $75,000 5½ per cent. debentures at 93.01. The debentures are in two blocks of $50,000 public school 30-years, and $25,000 hydro-electric 20-years. Tenders were received as follows:—

National City Co., Ltd.	$69,757.50
United Financial Corp., Ltd.	69,432.75
Brent, Noxon and Co.	68,940.00
Wood, Gundy and Co.	68,827.50

Pictou County, N.S.—H. M. Bradford has purchased an issue of $40,500 of 5½ per cent. 20-year bonds, the price paid being 92.04 per cent. and interest. The other tenders were:—

W. F. Mahon and Co.	91.279
J. C. Mackintosh and Co.	90.52
The Eastern Securities	88.61

These bonds are part of an issue of $100,000 to build a county asylum, which is the only debt the county has. The balance was sold direct to private investors.

Saskatchewan.—The following is a list of debentures reported sold by the Local Government Board, from March 1 to 20, 1920:—

School Districts.—Little Six, $3,500, Lake Russell, $3,100; Great-West Life Assurance Co., Winnipeg. Flaxhill, $800, Viewfield, $465, Fairholme, $4,750; Canada Landed and National Investment Co., Winnipeg. St. Jude, $300, Ashmore, $800; C. M. Gripton, St. Catharines. Henrietta, $17,600; T. K. McCallum, Saskatoon. St. Boswells, $1,000; Regina Sinking Fund Trustees.

Rural Telephone Companies.—Grovenland, $1,550, Riceton, $1,800, Prairie Union, $2,000; W. L. McKinnon and Co., Regina. Smiley Western, $650; sold locally.

Villages.—Semans, $2,400, Loreburn, $2,000; W. L. McKinnon and Co., Regina.

Rural Municipalities.—Hazelwood, $12,000; sold locally. Estevan, $2,600; Regina Public School Sinking Fund Trustees.

PACIFIC MARINE INSURANCE CO.

In its annual report for 1919, the Pacific Marine Insurance Co. says: "The balance at the credit of Underwriting Account (which is in reality a reserve for all outstanding liabilities), on December 31st, 1918, amounted to $502,928. To this should be added an additional $250,424 premium pertaining to 1918, particulars of which were not received in time to permit its inclusion in the 1918 accounts. Therefore, the correct balance at credit of underwriting account at 31st December, 1918, was $753,353. During the year 1919, the net premium received was $383,800. If this sum is added to balance at credit of underwriting account, 31st December, 1918, as outlined above, after deducting claims paid in 1919, viz., $584,895, general expenses, viz., $32,526 and amounts transferred to capital and profit and loss accounts, viz., $161,760 and $7,878 respectively, you have a balance of $350,093 to provide for losses and other charge accruing on 1919 and previous years' business.

"The total premium received in thirteen years was $3,,417,315 out of which has been paid in claims, $2,724,042. The interest earned on the company's investments in 1919 was $23,689 against $22,459 in 1918. The profit and loss statement for the year shows a balance of $31,567 for distribution. Your directors recommended that this sum be appropriated as follows: $18,400 to the payment of a dividend on the 1st April, 1920, at the rate of 7 per cent. on the paid-in capital as at 31st December, 1919; $12,132 to reserve account; $1,035 to mortgage investment account."

Norman B. Bell and R. W. Gouinlock, formerly of the Canada Bond Corporation, Toronto, have left that firm and entered the bond business for themselves. They have opened offices in the Confederation Life Building, Toronto.

Bell Telephone Issue Meeting with Good Reception in the United States—Acadian Sugar Financing Arranged—United Grain Growers' Loan

THERE does not appear to be any material improvement in the market for industrial bonds this week, although there is renewed activity in trading outstanding issues. The announcement has been made of the sale of $5,500,000 bonds of the Bell Telephone Co. of Canada to a syndicate of Canadian and United States investment houses, comprising the Royal Securities Corporation of Montreal; Lee Higginson and Co., of Boston, and Harris Forbes, Inc., of New York. The new bond issue bears interest at the rate of 7 per cent. per annum, and will be dated April 1st, maturing five years hence. It is secured by a first charge on the lines and works and plants of the company. It is the first made since 1913 by the company.

The syndicate is now offering the bonds in the United States at 98 and accrued interest, to yield about 7½ per cent., and reports that the issue is meeting with a favorable reception. No offering is contemplated in Canada.

Shareholders of the Bell company have approved of the increase in capitalization from $30,000,000 to $75,000,000.

Acadia Sugar Financing

In the annual report of the Acadia Sugar Refining Co., just made public, the directors make the following announcement: "Arrangements are now about completed with the banking house of Imbrie and Co., New York, for the flotation of our bonds and increased capitalization of the company in accordance with resolutions passed November 25th, 1919, confirmed December 10th, 1919."

The resolutions passed in November last year, and confirmed by the shareholders in December, provide for the issue of debentures to the amount of $3,000,000 and a corresponding amount of preferred and ordinary shares. Interest on the debentures will be at the rate of 7 per cent., and the securities will be issued at about 90 per cent. of par, with a substantial bonus of preferred and ordinary shares. It is the intention to issue only $2,000,000 of the authorized debentures in the meantime.

United Grain Growers' Loan

Mr. E. A. Macnutt, treasurer of the Sun Life Assurance Co. of Canada, has announced the completion of an agreement between his company and the United Grain Growers.

The remarkable growth of the United Grain Growers, and their measures of co-operation in the marketing of grain for the farming community of Western Canada are well
known. The board of directors of the United Grain Growers intend to branch out on a still larger scale, and has just authorized an issue of $2,000,000 of 5½ per and 6 per cent. first mortgage twenty-year gold bonds. Three-quarters of a million of this issue has just been purchased by the Sun Life of ·52)

STOCKS ACTIVE ON LOCAL EXCHANGES

Notwithstanding Easter Recess, Trading was Heavy for the Week—Steel of Canada and Spanish River Display Considerable Strength—New York Market Strong

THE close of business on the New York exchange on April 7th was attended by a demonstration of strength and a wide range of activity. The factors which were responsible for a strong market for the greater part of the week were: Easier money conditions, call money continuing to rule at 6 per cent.; advance in starting; encouraging commercial and industrial advices, and the news of more gold shipments.

Trading on the Montreal exchange was heavy, taking into consideration the Easter recess. Stocks that registered the most activity were Atlantic Sugar, with sales of 7,645; Brompton, 5,530; Spanish River, common, 8,636, preferred, 8,538; Laurentide, 4,471; National Breweries, 3,580, and Brazilian, 2,650. Atlantic Sugar showed a gain for the week of 1¼ points, closing at 85. Brompton also made a good advance from 81 to 86. Both stocks of Spanish River, like on the Toronto exchange, displayed considerable strength, common gaining 4¾ points and preferred 9¼ points. The strength of Spanish River is due to various reports concerning the company that have been in circulation. It is said that a new company is to be formed to take over the undertakings of the present company on a basis that would provide for all arrears of dividends on the preferred stock, and also for equitable treatment of the holders of the common stock.

Laurentide advanced 3¼ points for the week, closing at 100¼. National Breweries also showed a gain of 2 points at 53, while Brazilian gained fractionally at 47½. Detroit Railway showed a decline of 7¼ points, due to the result of the vote at Detroit against municipally-operated public utilities. Steel of Canada showed considerable strength, gaining 3 points, at 85, with sales for the week of 6,178.

Toronto Market Active

Activity on the Toronto exchange centred chiefly around Brazilian, Steel of Canada and Atlantic Sugar. Brazilian furnished sales for the week of 1,201, the bulk of the transactions being made around 48⅜ and 48. The price dropped, however, to 47 bid with the close of the market on April 7th. Steel of Canada, which was inactive the greater part of the week at 81¾, rose to 86 bid at the morning session on April 7th, but fell off ¾ of a point at the close. The turnover for the week amounted to 955 shares. Atlantic Sugar experienced an advance of from 2½ to 3 points during the week, the bulk of the sales being transacted around 85 and 85½, as compared with 82½ in the previous week. Spanish River common gained 6 points, the closing price being 98, as compared with 92 at the close of the previous week. Preferred gained 7½ points at 137 bid. Trading in both stocks was not very heavy. Bank stocks were quiet, with the exception of Imperial, which advanced 4 points, with sales of 243. Bank of Montreal showed a falling off of 6 points and Royal of ½ point, while Union advanced 1 point.

Marwick, Mitchell and Co., chartered accountants, of Vancouver, Montreal, Toronto, Winnipeg, Moose Jaw and Calgary, has taken over the business previously carried on by the firm of Marwick, Mitchell, Peat and Co. The new firm will continue to act for Messrs. W. B. Peat and Co., of London, England, as their representatives in Canada.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

Investments and the Market

Good Year For Goodwins' Limited—Canadian Pacific Railway Progress—Port Hope Sanitary Company Made Steady Strides Last Year—Canadian Westinghouse Back to Pre-War Activity

Cape Breton Electric Co.—The company has filed application before the Public Utilities Commission at Halifax for an increase in tram fares in Sydney, N.S. A 7½ cent fare is being asked for.

British Columbia Fishing and Packing Co.—The annual meeting of the company was held in Vancouver last week. W. H. Barker, who has been occupying the positions of president and general manager, resigned the latter, and J. M. Whitehead was elected general manager. The other officers elected were: Vice-president, Æmilius Jarvis; secretary-treasurer, L. Doucet, and board of directors, W. H. Barker, Vancouver; Æmilius Jarvis, Toronto; C. Sweeny, Vancouver; Wm. Braid, Vancouver; Robt. Kelly, Vancouver; J. M. Whitehead, Vancouver; E. E. Evans, Vancouver; F. W. Rollins, Boston; Sir Henry M. Pellatt, Toronto; Mark Workman, Montreal; Geo. H. Smithers, Montreal; A. C. Flumerfelt, Victoria.

Beaver Consolidated Mines, Ltd.—For the year ended February 29, 1920, profits from mining operations were $158,215, as compared with $168,642 in the preceding year. No dividends were paid, and after small allowances for depreciation the balance at credit of profit and loss at the end of the fiscal year was $1,049,080, compared with $901,644. Earnings on mining account were practically unchanged at $391,299, the two principal items being ore sales, $284,578, and ore on hand, $73,892. Total assets stand at $3,232,556, as against $3,072,686 for the previous year. Current assets are $1,043,330, compared with $888,642.

Acadia Sugar Refining Co.—The annual statement of the company shows that the trading profit for the year was $266,918, but that after the deduction of interest on loan, $251,461, and in the directors' remuneration, $7,300, the net balance was $8,156 for the year. The debit balance of $221,584 a year ago has now been reduced to $213,427. The loans against bonds of the company are $1,076,597, and from the bank (current) $2,056,410, a total of $3,133,088. The property and assets statement shows stock of sugar on hand at the end of the year to the value of $1,364,696 and trade debts due the company amounting to $215,305.

Ames-Holden-McCready, Ltd.—The annual report of the directors of the company which has been previously reviewed in these columns and which is given in detail on another page of this issue, reflects good conditions in the tire, felt and footwear trades. President T. H. Rieder remarks:—

"Inventories of manufactured goods, as well as materials and work in process, are much greater than at April 30th, because the units in quantity are always heavier at the close of the calendar year, and also because of the greatly increased cost of labor and all materials entering into the manufacture of your company's product. All inventories are taken at cost. Bank loans are higher than at May 1st, due partly to larger inventories and to larger accounts receivable resulting from increased business and partly to new plant extensions.

"Your factories, both at St. Hyacinthe and Montreal, were operated continuously during the period and have given us a steadily increased pairage. Their daily output during the late fall exceeded any previous records. Because of this increased production, causing greater wear and tear, a larger amount than usual has been charged to depreciation of plant."

Goodwins, Ltd.—The annual statement of the company for the year ended January 28 last, shows gross profits of $444,942, an increase of $107,995 over the level of the previous year, representing a gain of over 32 per cent., and one of $142,059, or 47 per cent. over 1917. After the payment of bond and other interest charges, etc., there remained a surplus of $274,614, compared with $164,894 in 1918 and $150,406 at the end of 1917. With the balance carried forward from the previous year, the total amount standing at credit of profit and loss account was $959,730.

Allowing for all deductions, the year's surplus earnings were equivalent to 15.7 per cent. on the outstanding preferred stock issue of the company, amounting to $1,750,000. This compares with 9.4 per cent. in 1918 and 8.6 per cent. in 1917. Equally satisfactory is the position revealed in the balance sheet for the year, working capital showing an increase of $258,182 over that at the end of the previous year, and standing at $1,205,427, with the 1919 total also in excess of that of 1917 to the amount of $402,657. Inventories shown in the statement are lower by some $270,000 than at the end of the previous year, standing at $931,030. The year's sales were the largest in the company's history.

Canadian Pacific Railway.—The annual report of the company which is now in circulation, shows many interesting facts which were not available for publication previously. New construction is planned for the year in the case of several short branches in the west, and equipment costing approximately $13,162,000 will be secured, consisting of three dining cars, 45 sleeping cars, 67 air-dump cars, 2,500 sixty-ton box cars, and 500 refrigerator cars.

The company holds land amounting to 5,804,852 acres, upon which a value is placed at $95,211,438. Total assets amount to $1,078,777,358, as compared with $1,055,273,513 a year ago, of which $548,458,756 comprises railway, rolling stock equipment, and lake and river steamers, $29,894,172 ocean and coastal steamships and $124,329,836 acquired securities. Working assets amount to $91,691,447, of which cash in hand is $53,519,420. Total mileage of the Canadian Pacific is 14,006 miles, of the Minneapolis, St. Paul and Sault Ste. Marie line 4,227 miles, and of the Duluth, South Shore and Atlantic 625 miles, making a total mileage for the system of 18,859 miles.

The following are comparisons contained in the balance sheet:—

	1919.	1918.
Property investments .	$ 548,458,756	$ 542,656,975
Ocean and coast ships	29,894,172	27,509,420
Acquired securities ..	124,329,836	123,195,564
Investments	276,337,571	278,907,859
Inventories	21,990,869	22,135,952
Cash in hand	53,519,421	39,548,417
Total assets	1,078,777,359	1,055,273,514
Reserves	65,268,802	44,539,116
Oper. surplus revenue	127,275,370	127,275,370
Total working assets .	91,691,447	76,342,949
Total current liabilities	27,344,834	23,365,289

Canada North-West Land Co.—Sales of the company for 1919, amounted to 48,352.17 acres, for the sum of $773,765, as compared with 54,635.33 acres in 1918 for $835,637. The average price obtained in 1919 was $16.02 per acre, as compared with $15.29 per acre in both 1918 and 1917. Sales in townsites showed a decrease as compared with the preceding year. Sir Edmund B. Osler told the shareholders at the annual meeting held in Toronto last week, and he pointed out, in addition, that the liquidation of the company's townsite holdings was fast nearing completion. Following the custom adopted by the directors, the total amount of the past year's farm lands sales has been transferred to profit and loss account, which now stands at $3,043,113. A distribution on realization of assets, No. 13, of $5.00 per share was paid to the shareholders on 19th January, 1920.

Frederick T. Griffin, the land commissioner at Winnipeg, says that the amount of the original purchase by the English company was 2,200,000 acres; of this there was

taken over by the Canadian company as at the 31st December, 1893, 1,928,318.84 acres. On the 31st December, 1919, the unsold lands amounted to 201,877.36 acres. The balance of principal outstanding on contracts for farm lands at 31st December last, amounted to $2,456,235, all bearing interest at 6 per cent. per annum.

Port Hope Sanitary Co.—The annual statement of the company for the fiscal year to January 31, 1919, indicates that the company has made steady strides during the past year. The improved conditions have warranted the directors in paying the dividends on the preferred stock and they submitted a proposal that the arrears of dividends for the past year, amounting to $56,000, should be paid to shareholders by the issue of a like amount of preferred stock. During the past few years the company has been improving its method of manufacturing processes and on this account was able to take immediate advantage of the restoration of business activity. This is reflected by a very considerably larger amount of business and by a substantial gain in both gross and net profits.

The profits for the year, before providing for depreciation and federal income tax, amounted to $132,015, as compared with $46,285 in the previous year. A sum of $36,229 has been set up as a reserve for depreciation on buildings, plant and equipment, and $8,823 for federal income tax, leaving a balance of $79,411 as net profits for the year.

The general statement of assets and liabilities reflects the stronger position in which the company has now placed itself. Total current assets amount to $302,823, as against current liabilities of $83,688. This compares with current assets of last year of $59,151 and current liabilities of $158,332. In current assets, inventory of raw materials and supplies, etc., amounts to $167,538, bills and accounts receivable $125,861, and cash on deposit in bank and on hand $9,433. In the current liabilities trade accounts payable and accrued charges amount to $55,402, bills payable $3,861, and wages and salaries accrued $11,853. Total assets have gained to $1,401,412, up from $1,275,664.

Canadian Westinghouse Co., Ltd.—The annual statement of the company for 1919, shows gross profits of $776,936, from which the sum of $176,000 was written off for general depreciation, leaving net profits of $600,936. During the year quarterly dividends at the rate of 7 per cent. per annum and an extra dividend of 1 per cent. were paid, amounting to $498,352, leaving a balance of $102,584 carried forward to profit and loss, which account showed as of December 31st, 1919, a total surplus of $1,814,272.

In his report to shareholders, H. H. Westinghouse, chairman of the board of directors, said:—

"In place of imperative requirement for production of all agencies of destruction and their application to the point of contact between the huge contending armies—heedless of cost so long as time, quantity and effectiveness were served—the effort became one of seeking to re-establish production of the necessities and comforts of life and their distribution, both under the requirements and the limitations of the ordinary operations of commerce so long and so severely interrupted. For the first few months there was a feeling of hesitancy and a slackening of operations, but with a growing realization that shelves were bare of supplies the world over, expansion followed curtailment, so that before the end of the year manufacture was equalling and in many lines exceeding its pre-war activity.

"This company, whose products are of the prime requisites of the industrial and transportation life of the community, reflected in its operations these changes in the general situation. With an average amount of business offering during the early months, the year closed with such an increasing volume of orders as to assure that the plants will be taxed to capacity for some time to come.

"Shipments of products have corresponded closely in amount with those of the preceding year, while higher cost of materials and increased salaries and wages of employees, both universally prevalent, have operated to decrease somewhat the margin of profit."

RECENT FIRES

Synagogue in Montreal Destroyed with Loss to Insurance Companies—Heavy Losses Also at Westmount, Toronto, Kingston and Banff

Banff, Alta.—April 4—Elevator belonging to the Quaker Oats Co. was destroyed. Twenty thousand bushels of oats, valued at $35,000, were also destroyed.

Woodstock, N.B.—April 2—McDade's lath mill, only recently erected, was destroyed.

Winnipeg, Man.—April 7—Car barns owned by the Winnipeg Street Railway, situated at Main Street and Assiniboia Avenue, together with thirty-five cars, were destroyed. Estimated loss, $500,000.

CORPORATION SECURITIES MARKET

(Continued from page 46)

Canada, and the remainder of the issue, when needed by the Grain Growers, will be offered to the Sun Life.

The bonds are secured on the elevators and real estate of the Grain Growers spread over the provinces of Alberta, Saskatchewan and Manitoba, and the company is composed of more than 30,000 shareholders, who reside in these western provinces, and are farmers and grain growers.

Stock Offerings

Public offering is now being made by Messrs. Nesbitt, Thomson and Co. of the unsold balance of $600,000 8 per cent. cumulative preferred stock of the Canadian Manhasset Cotton Co., Ltd., at 100 and accrued dividends, carrying a bonus of 15 per cent. of common stock. The other stock was sold privately at 98, with a bonus of 20 per cent. common stock.

The Winnipeg Electric Railway Co. is contemplating the issue of $3,000,000 preferred stock at par, with a bonus of 20 per cent common stock. The proceeds will be devoted to clearing up floating indebtedness, the result of extensions, amounting to approximately $3,000,000.

Shareholders of the Provincial Paper Mills voted on April 3rd last in favor of the by-law as put forth by the directors, which was reviewed in these columns last week. The by-law involves an amalgamation of the Provincial Paper Mills and the Port Arthur Pulp and Paper Co., the Provincial company holding a large percentage of the stock of the Port Arthur company, so that the shareholders will now receive directly what they have been getting in the past in indirect dividends of the Port Arthur Pulp and Paper Co. The preferred shares of the Provincial Paper Mills Co. will be transferred on the basis of share for share in the new organization. The by-law also provides for an issue of 1,500 fully-paid shares in Provincial Paper Mills, Ltd., to Isaac H. Weldon, president, and a like number to S. F. Duncan, secretary, as trustees.

ADDITIONAL INFORMATION CONCERNING FIRES

Alvinston, Ont.—March 26—Two barns belonging to Alex. Meikle were destroyed. Cause, spark from chimney on to straw stack. Estimated loss, $5,500. Insurance carried in Lambton Mutual Co., $2,510.

Cannifton, Ont.—March 24—Public school was destroyed. Cause unknown. Estimated loss, $10,000. Insurance carried in the London, Liverpool and Globe Co., $4,000.

Hamilton, Ont.—March 18—Building occupied by the Empire Wool Stock Co. and the Wode House Invigorator Co. was damaged. Cause unknown. Estimated loss to former, $14,000. Insurance carried, $2,000. Estimated loss to latter, $1,000, with no insurance.

London, Ont.—March 20—Dome and skylight of auditorium belonging to the Y.M.C.A. were damaged. Cause, spark from chimney. Estimated loss, $3,689. Insurance carried in the following companies: Gore Mutual, $5,000; Economic, $5,000; Merchants Fire, $5,000; Alliance, $10,000; British Empire, $10,000; Fidelity Phœnix, $10,000; British America, $10,000. Total, $55,000.

London, Ont.—March 29—Dairy barn and straw barn belonging to the Ontario Hospital for Insane was destroyed. Cause unknown. Estimated loss, $10,000, with no insurance.

Quebec, Que.—March 24—Tannery premises of Oscar Clement, situated at 24 St. Helene Street, were damaged. Estimated loss, $20,200. Insurance carried, $27,000.

Toronto, Ont.—The estimated fire damage in Toronto for the month of March was $159,196, of which $120,290 was on buildings. Four persons lost their lives in a fire. The number of alarms turned in was 207, of which 25 were false and 37 for unknown reasons. Fires caused by incendiaries numbered only two; by lamp and gasoline explosions, nine; stoves and furnaces, 12, and children with matches, 18.

Treasurer Estimates Large Deficit For Ontario

Revenue of $20,211,378 and Expenditure of $22,051,401 Estimated for Year Ending October 31, 1920—Hon. Peter Smith's First Budget Speech is Brief and Clear—Capital Expenditure to be $17,932,830—Heavier Taxation to be Levied—Government Committed to Generous Support of Education and Public Health Measures

EXPENDITURE and revenue of the Ontario government will continue to increase, according to the estimates for the fiscal year ending October 31st, 1920, submitted to the legislature on Tuesday. This is the first budget brought down by the farmer-labor coalition, which assumed office last October, and has been awaited with a great deal of interest. The estimated receipts and expenditures on ordinary account are as follows:—

RECEIPTS

Subsidiary	$ 2,396,378
Interest on common school funds by the Dominion	75,000
Interest on investment	225,000
Lands and Forests Department	1,750,000
Mines Department	850,000
Public institutions	600,000
Education Department	70,000
Provincial Secretary's Department	370,000
Motor vehicles licenses	1,850,000
Agriculture	175,000
Casual revenue	500,000
Insurance Department	90,000
The Amusement Tax Act	1,000,000
Succession duties	4,000,000
Corporation Tax Act	2,500,000
The Ontario Temperance Act	300,000
Law stamps	150,000
Game and Fisheries	700,000
Hydro-Electric Power Commission, interest, etc.	2,600,000
Total estimated receipts	$20,211,378

EXPENDITURES

Civil government	$ 1,544,988
Legislation	333,616
Administration of justice	832,796
Education	4,299,672
Public institutions	3,223,886
Agriculture	1,303,395
Colonization and immigration	211,271
Hospitals and charities	770,252
Maintenance and repairs of government buildings	343,541
Public buildings	502,506
Public works	207,400
Colonization roads	90,000
Highways Department	169,111
Game and fisheries	307,200
Attorney-General's Department, miscellaneous	117,150
Treasury Department, miscellaneous	404,701
Provincial Secretary's Department, miscellaneous	393,102
Lands, forests and mines	1,417,569
Department of Labor	274,406
Refund account	164,571
Miscellaneous expenditure	133,689
Total	$17,044,830

Capital expenditures, not included above, are estimated as follows: Parliament Buildings, for additional accommodation, $150,000; Ontario Hospital, Kingston, nurses' home, $25,000; Ontario Hospital, Whitby, additional buildings, $250,000; Industrial Farm, Burwash, $95,000; educational buildings, $150,000; agricultural buildings, $93,000; court houses in districts, $125,000. These items total $888,000, making a total estimated expenditure of $17,932,830.

First supplementary estimates, also presented to the House on Tuesday, total $4,118,571, the larger items being civil government, $243,338; education, $875,125; public institutions, $856,146. This makes a total ordinary expenditure of $21,163,401, apart from the capital expenditure of $888,000, or a total of $22,051,401. The supplementary estimates provide $3,575 for Normal and Model schools in Toronto; $20,500 for technical education; $100,000 to Royal College of Dental Surgeons; $55,000 for Ontario Hospital at Mimico; $1,500 for Ontario Hospital, Toronto; $3,055 to Ontario Veterinary College; government House, $9,891; Osgoode Hall, $3,050; Parliament Buildings, $21,554; Ontario Hospital at Mimico, $25,215; Normal and Model schools, Toronto, $10,673; decorating government building and grounds for His Royal Highness' visit, $18,196. In an item of $700,183 for public and separate school education, the supplementary estimates include $250,000 for rural public and separate schools, counties, and an additional $100,000 for rural public and separate school districts. A sum of $44,500 is set aside for agricultural and horticultural grants to school boards, public and separate schools, and $40,000 for continuation schools. Subventions to publishers as supplementing retail price of text books account for $50,000, and departmental examinations, $60,000. To provide for payment of per diem allowance and expenses of returned soldiers attending academic and professional course as teachers, $65,000 is set aside.

Some Recent Changes

Hon. Peter Smith, provincial treasurer, referred briefly to the province's financial position. Considerable change had been made in the method of presenting the accounts, and if the previous methods had been pursued a deficit of only $632,813 for the present year would have been shown. Loans to a total of $28,462,899 had been made during 1919. The whole of the war tax of 1 per cent. on municipal assessments had been placed in ordinary revenue. Since its inception this had yielded $8,186,964, and war expenditures had been $10,210,000, leaving a war deficit of $1,813,225. Mr. Smith thought that this tax, instead of being repealed by the late government at the last session, might very well have been retained.

Regarding the policy of the present government, Mr. Smith said: "We made some changes in the revenue for this year by which we hoped to be able to offset some of these items of expenditure. But it would be impossible for us to entirely offset them for the reason that the Succession Duty Act, which was expected to bring in a good deal of extra money, cannot show full and correct returns until eighteen months after it is placed on the statute books. Estates have that length of time in which to pay.

"We anticipate increased revenues from the corporation tax. We have increased the amount on the insurance companies and the banks." An Act was to be brought down, he said, which would give explanations of the amounts of this corporation tax. The government also intends to levy a tax of $10,000 per day on one-mile race tracks and of $5,000 per day on half-mile race tracks, which will, it is estimated, bring in about $750,000 additional.

In conclusion, Hon. Mr. Smith declared that the government had cut down capital expenditure in every possible instance. It was not building any new buildings where it could possibly avoid it. "We cannot cut down very much on the institutions, nor can we cut down on education," he said. "If anything, we have to increase expenditures on education. It is one of the things that we cannot possibly make any change in, save to increase it as the years go by. Any money that is spent on the education or the health of this province, if wisely spent, is money extremely well spent."

MORE REVENUE FOR RAILWAYS

Increased costs of providing sleeping car accommodation have made it necessary for the railways to increase their charges for these services by 20 per cent. This increase, which will take effect on May 1, on both American and Canadian roads, was explained as follows in a circular issued on April 10:—

"The rates paid for sleeping car berths and parlor car seats, except for the war tax, are to-day practically the same as twenty years ago. In 1911, sleeping and parlor car rates were adjusted to a standard basis per mile, involving certain slight advances and certain slight decreases, but no general advance was made.

"During the war material for new cars could not be provided. To-day, there is a marked shortage of sleeping and parlor car equipment, and the railways must provide many new cars. A sleeping car which could be obtained in prewar days for twenty thousand now costs forty-five to fifty thousand dollars. The linen, of which there must be a big supply, now costs more than four times what it did in prewar days. All the incidentals that enter into the cost of upkeep have doubled or trebled. The cost of operation is three times what it was ten years ago.

"By the new tariffs the minimum charge for a lower berth in standard (or first-class) sleeping car is set at $2, for an upper at $1.60, for a drawing room at $7 and for a compartment at $6, and the existing fares are raised about 20 per cent. The minimum charge for a parlor car seat is fixed also at 50 cents, which is felt to be a reasonable charge for the accommodation offered, but no other advances are proposed in the parlor car fares."

The Winnipeg Mercantile Trust Co. and the Canadian Finance and Securities Co., Ltd., will on May 1st next, move to new offices at 409 Merchants Bank Building, Winnipeg, Man.

The Saskatchewan Department of Public Works intends to call for tenders for the construction of a new normal school at Saskatoon in about a couple of weeks' time. The estimated cost of the building is in the neighborhood of $300,000.

WESTERNERS ARE NOT PESSIMISTIC

Good Crops Sometimes Follow Late Spring—Demand for Seed is Unusually Great—Wholesalers and Retailers Get Together in Regina

(Special to *The Monetary Times.*)

Regina, April 15, 1920.

THE backward spring in Western Canada need not cause any alarm. Late seedings have many times produced the best crops.

In the Brandon district conditions were found to be quite satisfactory and if seeding is general any time before the end of April, a good crop can be looked for, as there is abundant moisture in the ground. In discussing the outlook with *The Monetary Times*, P. A. Kennedy, president of the board of trade, was quite enthusiastic about the outlook around Brandon, which is a very important distributing centre for an area of seventeen thousand square miles. It held first place for percentage of cash collections in the international harvester organization in western Canada last year. A new wholesale grocery firm under the name of Vivian and Windle has started business in Brandon. There is a marked increase in demand for rental properties in the past six months and houses are at a premium. There is a good demand for farm lands at prices from thirty to sixty dollars an acre.

Collections are Good

One wholesale house in Brandon informed *The Monetary Times* that business was in a good healthy condition. They pointed out that collections were good; ten thousand dollars more having been collected last month than previous month. A. E. McKenzie and Co. report the seed business away ahead of last year. In the Regina district the season also is backward but a good feeling prevails. In discussing the outlook, H. W. Givins, of the Huron and Erie Mortgage Corporation, said:—

"After more than six months of winter, there is, perhaps, some justification, or at least some excuse, for the somewhat pessimistic views expressed regarding the lateness of spring in Saskatchewan and the fact that up to this date, April 14th, 1920, our farmers have not been able to start seeding operations. Varying opinions are expressed upon the advantages or disadvantages of early or late seeding, but those who are best qualified to judge, the men who have successfully carried on their farming operations in Saskatchewan for over a period of some years, are not exhibiting any anxiety over existing conditions. These men generally hold that if seeding operations are in full swing in this province during the last ten days in April, the good farmer will have little cause for complaint or anxiety, and a few days of warm weather will see a great many men on the land with their seed drills. The heavy snowfall of the past winter has provided considerable moisture, and summer fallows have been well prepared, so that the land is in good condition for seeding as soon as warmer weather prevails.

"There are many evidences that our long winter has had a serious effect upon cattle and horses in many parts of the province, particularly those districts where feed has been scarce. The winter has been so steady and so long, that it has taxed the fodder supplies even in districts where feed was plentiful last fall, so that it is quite probable that in other districts, many cattle and horses have died through lack of proper feed. Full reports upon these conditions will not be available for some time, but that heavy losses have occurred is generally admitted."

Regina Business Men's Association

A Regina business men's association was formed this week with forty-three charter members. The purpose, objects and aims of the new association is to bring all problems between retailers and wholesalers under healthy discussions once a month at one of the regular meetings. F. M. Still was elected president, F. G. England vice-president, E. B. Stevens secretary-treasurer.

Budget Speech Expected Early In May

Financial Policy Already Decided—Business Profits Tax Will Likely be Retained, but Slight Downward Revisions in the Tariff may be Made—Two War-Time Departments Remain—Handling the Wheat Crop is Still a Problem

(Special to *The Monetary Times*)

Ottawa, April 15th, 1920.

THE present session, contrary to all predictions of the best political prophets, is proving exceedingly tame. There are not only no signs of a disintegration of the cabinet, but the government is holding its following without difficulty. The two breakers which were anticipated this session were the Franchise Act and the budget. The Franchise Act reefer is already nearly successfully passed, and ministers who should know predict that the budget will not wreck the ministry.

The budget is anticipated now about the first of May. It is understood that the government has already decided on its policy and ministers optimistically claim that the budget will be well received by all except extremists. The contents of the budget will, of course, be maintained a close secret until announced. There will not be many tariff changes, but what they are will be downwards rather than upwards. I have good reason to believe that it has been decided to continue the Business Profits Tax. This is for two reasons; first the government needs the money and second the ministers have come to the conclusion that it is the only way to get after the profiteer.

Board of Commerce Shaky

There are but two war organizations of the government still functioning, the Board of Commerce and the Canada Wheat Board. The former, indeed, is not strictly a war body, although an outgrowth of the old Canada Food Board. Both of these organizations have been very much under fire lately and it is a question whether they will be continued. The Board of Commerce has been attacked from all sides. The farmers are bitter against it for its atempts to control the price of milk and other farm produce; the retailer rails against it and the consumer is not particularly enthusiastic because despite the board the price of living keeps on mounting. The fact that it is abused from all sides is, perhaps, a fairly good argument that it has been accomplishing something.

However, governments are not in the habit of long pulling against the tide and if the agitation against it keeps on it may be legislated out of existence. Its authority to control the price of newsprint has already been successfully challenged by Price Bros., in the Supreme Court and the board has asked the Supreme Court for a ruling as to its authority to control other commodities. If the Supreme Court holds that it has not the authority of a judicial body to issue orders, then the board will have to go out of existence until the government passes fresh legislation. With the body apparently so unpopular this the administration may hesitate to do.

Wheat Board to Cease Work

As for the Canada Wheat Board, Sir George Foster, has already told the House that "it is not the present intention of the government to continue the services of the Wheat Board." This means that the present board will go out of existence this summer. However, there is already being strong pressure brought to bear to continue some form of national marketing owing to the difficult international credit system by which it is almost impossible for individual firms no matter how strong to deal directly with European countries.

A serious situation has apparently risen, both in connection with the milling industry and the packers industry, which will require some form of national direction. The export market for the time being is at somewhat of a standstill owing to the lack of international credits. There can be no export market without credit and the government is loathe with its large financial undertakings and national indebtedness to continue a system of European credits. Since January 1 credits have been suspended. Under these circumstances, western members are urging the government that either the Wheat Board should be re-appointed or some other form of national marketing adopted. With such marketing and the national credit behind it, there is some hope that some considerable part of the surplus of this coming year's crop will be absorbed. Otherwise, it is claimed, if left to individual effort the situation may be serious. Some government announcement in regard to exports of meat and food products is expected shortly. Certainly if credits are extended it will only be for agricultural products; there will be none for manufacturers. They will have to shift for themselves.

West Anticipates Good Crop

The chief anxiety over the export of our surplus wheat and flour is naturally in the west. The west with its usual optimism is figuring on a big crop this year. There have been several slim seasons—the last bumper crop in the dry belt of Alberta was 1915—and it is figured that it is the turn of a big crop again. Conditions, it is claimed, are favorable. There were good rains last fall throughout most of the west. This soaked in and was frozen in. The heavy snowfall and hard winter is regarded as the forerunner of big crops. Even the dry areas are predicting large yields this season.

The federal department of agriculture and the interior department have been giving particular attention to the dry areas. Irrigation is being encouraged and assisted wherever feasible. The difficulty is that there are large districts where there is no water available. The department of agriculture after long experiments is urging the use of a species of Durum wheat for the dry areas. It is claimed that good crop of Durum wheat can be raised on a rainfall of eight or nine inches, where it would take fifteen or sixteen inches of Marquis wheat. The department has purchased several thousands of bushels of this wheat which it is selling below cost. One difficulty is, that there is no market in Canada as the Canadian flour mills are not equipped to grind this hard flinty wheat. Arrangements have had to be made for separate elevator storage, which is being supplied by the Saskatchewan Co-operative Elevator Co. and the railways are endeavoring to arrange for as good a freight rate to Minneapolis, where there is a market, as to Fort William. The experiment will be watched with keen interest by the agricultural experts at the capital.

SEEDING COMMENCED IN WEST

(Special to *The Monetary Times.*)

Winnipeg, April 15th, 1920.

Fine weather, with higher temperatures, has witnessed commencement of seeding operations in various parts of western provinces. Ploughs have already been doing their bit, and expectation is that work will be well under way by beginning of next week. As far as the calendar is concerned, this compares well with program of other seasons. Little indication can be given as yet of areas likely to be seeded. But there is no reason to expect diminution of acreage for the west at large. Land is reported to be in excellent condition. Long, steady winter, with abundance of snow, has ensured supply of moisture for a month at least, and rains will be doing business before that reserve is used up.

DOMINION SUPERVISION OF AGENTS PROPOSED

Amendment Prepared Providing for Inspection of Each Agent's Business—Underwriters' Associations Oppose Dual Control and Prefer Provincial Jurisdiction, but Want No More Blanket Licenses

LAXITY in supervision of insurance agents has been one cause of the excessive fire loss in Canada, and rebating and other evils in connection with all lines has not been entirely eliminated. With a view to bringing about a better condition, the Department of Insurance, Ottawa, has prepared an amendment to the Insurance Act, 1917, aiming at the inspection of each agent's business. The views of the companies and of the agents are being secured before the amendment is introduced into parliament. As now drafted it is in the form of an addition to section 78, and reads as follows:—

Company Must See Agent Has License

"78A. (1) It shall be a condition of the license issued to any company under this Act, whether such condition be expressed in the license or not, and for the breach of which the said license may be cancelled, that no compensation or remuneration by way of commission shall be paid to any person, partnership, association or corporation, for soliciting for, or obtaining applications or proposals for, insurance, or for collecting premiums from policyholders, unless such person, partnership, association or corporation shall have obtained from the superintendent a license to act as an agent of the company or as a broker.

"(2) Before any such license is issued the applicant therefor shall file an application on a form to be supplied by the superintendent and shall furnish such information as the superintendent deems necessary to satisfy him that the applicant is competent to discharge the duties of an agent of the company or of a broker as the case may be.

"(3) Every agent and broker to whom a license is issued under this section shall keep a record of the insurance business transacted by him under such license, in such form and with such detail as the superintendent may require and such record shall be open to the inspection of the superintendent.

"(4) Every such agent or broker shall when requested by the superintendent file with the superintendent a statement in such form and with such detail as the superintendent may require.

"(5) The license of every such agent or broker shall expire on the thirty-first day of March in each year and shall, subject to the provisions of this section, be renewable from year to year.

Agent May Appeal from Cancellation

"(6) The superintendent may cancel the license of any agent or broker licensed under this section for violation of any provision of this Act, or if it is established to the satisfaction of the superintendent that he has been guilty of misrepresentation or of fraudulent practices or if in the opinion of the superintendent he has become incompetent or incapable of acting as agent or broker, but no such cancellation shall become effective until a hearing has been given to the agent or broker whose license is proposed to be cancelled.

"(7) Any agent or broker whose license has been cancelled by the superintendent, shall have the right of appeal to the Treasury Board by giving notice of his intention to so appeal within ten days of his receiving notice of the cancellation of his license, and, pending the decision of the Treasury Board, the cancellation of the license shall have no effect."

Agents Object to Proposal

This proposal is being objected to by the agents through the Life Underwriters' Association. The local associations at Vancouver, Regina, Brandon, Toronto, Ottawa, Quebec and St. John, and in other places as well, have passed resolutions against it. The amendment requires every agent doing business for a Dominion company to secure a Dominion license, and, while no fee is attached, it would mean that they would be under the control of the Dominion as well as of the provincial governments. To this they strongly object. They are, however, quite willing to have separate licenses for life, fire and casualty insurance, in place of the present blanket licenses covering all three, and the Toronto association, at a meeting held on April 15th, passed a resolution unanimously supporting this suggestion.

INSURANCE MEN WILL OPPOSE STATE INSURANCE

State Fire Insurance Not to be Introduced This Session in B.C., but Legislation May be Passed on Health Insurance and Mothers' Pensions—Automobile Rating Due for Change

(Special to *The Monetary Times.*)

Vancouver, April 12, 1920.

INSURANCE men in Victoria took advantage of the big Rotary Club convention to arrange for a round table talk on state insurance by all the insurance men present. G. I. Warren, convener of the meeting, reports that a resolution was passed that each insurance man present, on his return to his own city, in the United States or Canada, urge the insurance association of the district, to organize a sound opposition against the introduction of state insurance in any form, particularly state health insurance. It was also informally decided that the best cure for the effects arising from state health insurance propaganda, was the system of group insurance.

Amend Fire Insurance Act

Mr. Bell, member of the provincial legislature, of state fire insurance fame, is down on the provincial legislature agenda as asking permission to introduce an amendment to the Fire Insurance Act. At this writing it is not definitely known what shape this amendment is to take, but it is believed it has to do with matters of detail regarding the conduct of fire insurance companies, arising out of long-term insurance, and other matters. As far as can be learned, state fire insurance is not to be introduced this session.

It has been definitely announced by several members of the legislature that state health insurance is to be introduced at this session. It is announced, however, that the movement for the inauguration of mothers' pensions in this province will shortly crystallize into definite legislative proposals. In fact, the passing of this measure seems to be already assured. It was one of the questions which was practically unopposed during the session of the state health insurance commission. The life insurance interests did not appear to concern themselves in the matter, although it would appear on the surface that a certain class of men, earning small incomes, would be tempted to allow the government to provide for their widow in case of their decease, rather than pay an annual premium for an insurance policy during their life. The bill will provide that adequate means of support will be allowed to widows to enable them to bring up their families themselves instead of being compelled to place their children in charge of institutions. The same consideration will be given to mothers who are not wives, who for any reason, lack the support of a bread-winner.

Road Rules Cause Motor Accidents

Insurance men are somewhat concerned over the proposed change by the government in the rule of the road for British Columbia. In the United States, just acoss the border, autos turn to the right, in British Columbia, they turn to the left, and because the rule of the road is different in the two countries, many accidents have occurred. Most of the problem, of course, centres around the question of how to bring about the change, as the B.C. Electric Railway Co., besides being a heavy loser, would be compelled to per-

1919 A GREAT INSURANCE YEAR

THERE has probably never been a greater year for the insurance business in Canada than 1919. This was true not only of the volume of business but also of the financial results, for in all branches except a few casualty lines there was a satisfactory margin between the premiums received and the losses incurred. In the case of some lines, notably fire insurance, the loss ratio was so low as to warrant the consideration of lower rates. While it would be unwise to establish new rates on the basis of an unusually favorable year, yet insurance companies must assume the responsibility of keeping the ratio of expense and profits as low as possible. If this public duty is not carried out, there is no alternative excepting a rigid government control, or complete state insurance.

In comparing the figures for 1919, which are given in detail elsewhere in this issue, with those for previous years, the decreased purchasing power of the dollar must be borne in mind. A one thousand dollar life insurance policy, five years ago was as much protection, measured in terms of what it would provide, as is a two thousand dollar life insurance policy to-day. Judged by this standard insurance has not kept pace with the changing economic conditions; in fact many of the figures usually quoted in illustration of Canada's financial progress, such as bank deposits and trade returns, show a nominal rather than a real growth. It is also probable that fire insurance has not been increased in proportion to the increase in property values.

But the insurance returns, nevertheless, demonstrate the fact that the companies have been putting forth every effort to meet the new situation. The increase in new business put in force proves that the necessity for more insurance is at least recognized. Protection against emergencies can scarcely be too great during these times of business uncertainty, and as institutions which stand first of all for the distribution of wealth into those hands where it is most needed the insurance companies have found increasing opportunity and respect.

PUBLIC EXPENDITURE A POLITICAL SUPPORT

WHEN the farmers' government assumed office in Ontario last October it pledged itself to a policy of strict economy. The budget brought down on Tuesday is, however, the largest ever presented to the Ontario legislature, and this with other evidence warrants the conclusion that the new administration has found that the reduction of public expenditures is a reform which can be accomplished only with great difficulty. From the negative position taken up last fall the government has switched to a constructive policy, In the words of the provincial treasurer, Hon. Peter Smith, "it doesn't make any difference whether the province of Ontario has a deficit this year or not. We show a deficit of a million and a half dollars. But what difference does it make if the government goes on? We have got to go on and do our duty by the province of Ontario, and it is utterly impossible for anybody to estimate what the expenditures are going to be. They are increasing every day."

The administration of the affairs of a Canadian province is now a very complicated undertaking, and it is only from within the cabinet offices that the most comprehensive view of its extent is obtained. Continuous public expenditure on some line of development creates vested interests in the persons of the employees and others who benefit by the expenditures, and sets up new ways of doing business in the industry to which it relates. The question of finance must, however, set a limit to the activity of any government department, and the treasury office is, therefore, one which exercises a measure of control over the whole administration. The annual expenditure is a fair measure of the scope of government activity; whether the benefits created are comparable with the expenditure is another question.

Public pressure on a government is almost always in the direction of further expenditures. Plausible arguments in support of any new expenditure are easily supplied by the few whose special interest lies in that direction, while the general taxpayers are weak-voiced and many. The economy platform at first presented by the Ontario government was, however, the germ of a wise and possibly successfully administration, for the real problems of the present day are fundamental and cannot be solved by government action. Public sentiment no longer expects a political solution for difficulties which lie outside the sphere of government control, and the state can render the most assistance by reducing the financial strain to the minimum.

LOST FOUR MILLION WORKING DAYS

Canada's strike record for 1919 shows an immense wastage, but it probably compares favorably with that of other countries, although their figures are not available. The time lost in Canada last year was greater, however, than in any previous year, according to a report just issued by the Labor Department. Including eight carried over from 1918, there was a total of 298 strikes and lockouts in Canada during 1919. The number of employees involved was 138,988, and the number of employers 1,913. The total number of working days lost was 3,942,189. The previous record in working days lost was in 1911, when the record stood at 2,046,650 days lost.

There were several outstanding strikes which contributed largely to the total time lost. Among these were the general sympathetic strike in Winnipeg from May 15 to June 26, involving (according to Labor Department figures) 22,360 employees and a time loss of 924,562 working days; the strike of coal miners in district 18 from May 24 to the end of August, involving 6,266 employees and a time loss of 462,879 working days; the general sympathetic strike at Amherst, N.S., from May 19 to June 16, involving 771 employees and a time loss of 17,466 working days; the strike of miners at Kirkland Lake, Ont., from June 12 to October 16, involving 625 employees and a loss of 56,176 working days, and the strike of the building trades in Montreal, from September 2 to November 24, involving 2,000 employees and a time loss of 113,000 working days. The Winnipeg strike also resulted in considerable time loss through sympathetic strikes outside of the city.

Classified by clauses, 223 of the 298 strikes recorded involved wages. Twelve strikes involved union recognition. Altogether there were fifteen sympathetic strikes. The record shows that 157 strikes terminated in favor of the employees and 85 in favor of the employers. Twenty-three were compromise settlements and 30 indefinite.

CANADA'S INTANGIBLE ASSETS

In the fact that confidence in Canadian paper money has never been shaken, a contributor to the March number of the "Home Bank Monthly" seeks to find an asset which which cannot be included in a national balance sheet but which is none the less deserving of consideration. Going back as far as 1685, he finds that "our present day confidence in Canadian national and bank paper money was established with card money in 1685," in which year the governor of New France established the custom of issuing "fiat" money to circulate until such time as the annual supply of currency should arrive from France. Although the practice was abused, and in 1760 there were about 80,000,000 livres, or about $13,000,000 of such currency outstanding, it was all redeemed in accordance with the treaty with Great Britain, and confidence in paper money was thereby maintained. Army bills which helped to finance the war with the United States in 1812-14 were also repaid by 1823.

About this time chartered banks began to be organized in Canada, and as they were institutions purely for the assistance of business, they escaped the disasters which commonly fall to the lot of banks which are mixed up with politics. Bank currency has been sound in Canada, whereas the United States has had its "wild cat" bank issues, as well as its "continental money" and "confederate money." Even during the depression following 1866 there were no panics nor calamitous failures.

With this record in mind, therefore, the contributor assails those who audit our national finances without taking into account the "intangible assets" of the Dominion. "Mathematically we are again an insolvent nation," he says:—"Canada is again bankrupt—on paper. We say 'again' advisedly, because it is within the recollection of some thousands of Canadians, who are still comparatively young, that this country has been weighed in the economic balance and found wanting on at least several occasions during the span of their years. We were utterly bankrupt—that is statistically—in 1913, the year before the outbreak of the world war, and now those astrologers in the higher economics, who can trace the orbit of a deficit through a nebulae of economic data, tell us that our horoscope is most unpropitious. If we were any sort of a private or corporate business, run on the elemental lines of debit and credit, a balance sheet of our affairs, they tell us, would show that we are again practically bankrupt. As a going concern we are going from bad to worse.

"If we would only read statistics as a tale told in plain type, we would visualize the international bailiff in possession at Ottawa, with his feet on our national mahogany, while Miss Canada rattles off letters of condolence to our numerious creditors advising them that we haven't got enough change on hand to make a rattle in a tin pail. But somehow we refuse to conjure up this moving picture. It may be that we have become acclimatized to living in an atmosphere of frigid statistics, or we may have inherited from our ancestors the habit of complacently accepting alarming reports regarding our national finances. Taking our history all through, first as a French colony, next as a group of British possessions, and finally as a Nation, there never has been a period of a single full decade when any competent economist in some distant observatory, could not detect, with the naked eye, the cloud of a deficit resting upon our economic horizon."

The work of the Canadian Trade Commission at Ottawa is being gradually taken over by the Department of Trade and Commerce, says an announcement from Ottawa. Multiplicity in government organizations has caused inconvenience and duplication, and activities relating to trade should be centred under the control of the one department.

* * * * *

Higher office rentals will be charged in Ontario, owners having decided to take concerted action through the Building Owners' and Managers' Association. The interest return on property of this kind is usually insignificant, and in some cases the expenses of maintenance are barely met; one of the reasons for this condition is the advertising value to the owner of a large office building, which tends towards an oversupply.

* * * * *

If the Dominion government does not grant a bonus of $20 a ton for fifteen years for steel shipbuilding in Canada, $50,000,000 now invested in shipyards will become a total loss, says H. H. Blanchet, of Toronto, who has been visiting shipyards throughout the Dominion. Difficulties are already being experienced, however, in supporting industries built up by bounties and by protection, and any further burden on the national finances will be unwelcome.

* * * * *

In refusing to guarantee the bonds of irrigation districts in Alberta, Premier Stewart pointed out in the legislature on April 8 that there were only two states across the line which gave such a guarantee, and in these cases it was for five years only. The effect of enormous railway guarantees extended by the western provinces years ago has been to destroy public confidence in the ability of the governments to judge accurately the merits of industrial enterprises, and safe financing requires that the provinces refuse to force such enterprises until such time as their own merits enable them to borrow without provincial guarantee.

Exports

A special Department of this Bank is devoted to the interests of the foreign business of its customers.

Exporters and others having business relations with foreign countries are invited to avail themselves of the very complete information which has been gathered by the Bank's Foreign Department. This may be done through any one of the Bank's many branches.

Deposits of $1 and upwards received.

Advances made for Manufacturing and Farming purposes.

Collections effected in all parts of Canada promptly and cheaply.

Correspondence solicited

J. P. BELL - - General Manager

PERSONAL NOTES

Lt.-Col. J. H. Rorke has been appointed manager of the sales division of Hew R. Wood Company, bond dealers, Montreal.

Mr. A. McGowan, formerly manager of the Vancouver branch of the Alfred W. McLeod, Limited, has associated himself with A. E. Short and Company, Limited, Winch Building, Vancouver, as manager of the insurance department.

Mr. Edward E. Reid, formerly assistant manager and secretary of the London Life Assurance Company, has been appointed manager of the company. He succeeds Mr. J. G. Richter, who has been elected vice-president. Mr. J. Stanley Lovell, formerly assistant secretary, becomes secretary in place of Mr. Ed. Reid.

Hon. Peter Smith, provincial treasurer of Ontario, has proved himself a capable financier. In bringing down the budget speech on Tuesday he referred to the fact that he had held office for only six months, and during that period had had to go over the whole financial position of the province. Many of the expenditures included in the estimates for the current financial year had been undertaken by the former administration, and responsibility for the figures is, therefore, divided. Several large loans have been made by the province since Mr. Smith became treasurer, and he has succeeded in each case in securing the best possible terms in the face of a difficult financial situation. Mr. Smith is member for South Perth.

Mr. F. Urry, who was recently elected president of the Port Arthur, Ont., Board of Trade, resigned on April 8. Mr. Urry states that as president he has tried to carry out the policy laid down in a resolution passed at the first executive council meeting, but that other members of the board were advocating a different policy.

Mr. E. H. Adamson, who has been connected with the Canadian Bank of Commerce for over 14 years, the last eight which he spent as manager at various branches in the province of Saskatchewan, and more recently at Carleton Place, Ont., has severed his connection with the bank to enter the firm of W. H. Adamson and Sons, fire insurance adjustors, Toronto.

Mr. Thomas Bradshaw, finance commissioner of the city of Toronto, has handed in his resignation to take effect just as soon as the council can find a successor. Mr. Bradshaw will become treasurer and financial director of the Massey-Harris Company, Toronto. He was born in Manchester, England, in 1871, and commenced work as a printer's apprentice. After coming to Canada he made rapid progress in the insurance business, and became actuary and manager of the Imperial Life. From 1911 to 1916 he was a member of the firm of A. E. Ames and Company.

Hon. Edward Brown, provincial treasurer of Manitoba, has accepted an invitation from Le Pas constituency to be nominated for the coming provincial election, says a wire from our Winnipeg correspondent. Mr. Brown was not a candidate at the last general election, and a seat was found for him at Le Pas after he had been chosen as treasurer by the newly formed Norris cabinet. It was his intention to retire for personal and family reasons, but he has decided to stand again on condition that he will retire if the present government is defeated at the July elections and that he may withdraw at any time after that if personal considerations demand it. Our correspondent states that the nomination invitation comes from a non-partisan group in the community, and Mr. Brown intimates that the government may appeal to electors on a non-partisan platform, asking for support because of its record without regard to political considerations.

OBITUARIES

Mr. W. A. Matley, 233 Metcalfe Avenue, Westmount, Que., died at the Montreal General Hospital, on April 10. The late Mr. Matley was born in Manchester, England, and came to Montreal fifty years ago. Up to four years ago, he was secretary-treasurer of the Ames-Holden-McCready Company, when he retired from active business life.

Mr. James V. Russell, of St. John, N.B., died on April 11. The late Mr. Russell was born in 1862, the son of the late John Russell. He was in the shoe business for several years. He had been a member of the board of aldermen, and under commission government he was commissioner of harbors, ferries and public lands for some time. He had been a member of the school board for many years.

Mr. C. A. B. Brown, manager for western Canada of Bradstreet's, Limited, Toronto, died on April 10, as the result of being struck by an automobile on April 9. The late Mr. Brown was born and educated in Toronto, and entered the service of Bradstreet's, Limited, at an early age. He served as a member of the Toronto Board of Education continuously from 1882, and was president of the board in 1905-6. He was an active member of the Royal Canadian Yacht Club, of the Canadian Club, of the Ontario Hockey Association, and was a few weeks ago elected president of the Canadian National Exhibition, on the board of which he had served since 1905, holding the offices of second vice-president and of first vice-president in recent years.

Mr. William J. McMartin, 283 Kingsway, Winnipeg, died at his home on April 11, after a brief illness. The late Mr. McMartin was born at Martintown, Glengarry County, Ont., in 1870. Early in life he went west and entered the commercial field, when he founded the Winnipeg Ceiling and Roofing Company, Limited. He had wide interests in various commercial enterprises in western Canada and the United States. He was president and general manager of the Winnipeg Ceiling and Roofing Company, Limited; president of the Edmonton Metal Works, Limited, Edmonton; treasurer of the Sheet Metal Manufacturing Company, Calgary; president of the Duluth Corrugating and Roofing Company, Duluth, Minn.; and president of the Economy Foundry Company, Portage la Prairie, Man.

Mr. Elias Rogers, one of the most widely known coal merchants in eastern Canada, died on Saturday, April 10, at his residence, in Toronto. The late Mr. Rogers was born at Newmarket, Ont., in 1850. In 1871 he entered the lumber and coal business in Toronto and in 1897 founded the firm of Elias Rogers Company Limited. His business interests were wide and varied. He was president and treasurer of the Crow's Nest Pass Coal Company. In addition to his association with the coal industry, the late Mr. Rogers was president of the National Life Assurance Company, president and treasurer of the M. F. and M. Railway, president and treasurer of the Electric Light and Power Company, British Columbia, vice-president of the Imperial Bank of Canada, and a director of the National Trust Company, the Imperial Accident and Guarantee Company, the Dominion Iron and Steel Company, and the Carrington Air Brake Company.

CANADIAN BUSINESS FAILURES FEWER

Figures for First Quarter of 1920 Indicate General Improvement in Conditions

FAILURES in Canada for the first quarter of 1920 were fewer than for the same period in 1919, the number being 209, as compared with 217. Total liabilities also showed a reduction, the obligations of the failing companies amounting to $4,327,184, compared with $4,769,637 in 1919. Assets were $3,027,068, as compared with $3,183,893 last year. The following table compiled by R. G. Dun and Co., indicates the general improvement in business conditions, and the adjustment from the early days of the war when failures were at their apex:—

	Total Commercial.			Manufacturing.		Trading.		Other Com'l.		Banking.	
Provinces	No.	Assets	Liabilities	No.	Liabilities	No.	Liabilities	No.	Liabilities	No.	Liabilities

NORTHWESTERN LIFE AND TRUST ASSOCIATED

The charter of the Northwestern Trust Co. has now received formal assent and the company will be starting into active operation about July of this year in association with the Northwestern Life Assurance Co. Over $100,000 in preliminary requests for stock have already been received, and it is expected that the association of the two companies will be of advantage to both. The president, J. F. C. Menlove, who has been in the general agency and investment business for a number of years has carried his large connection into the company's office, bringing further business that could not be handled under the life company's charter, but which will be of benefit to the associated companies.

STANDARD RELIANCE CREDITORS SAFE

Debenture holders and depositors of the Standard Reliance Mortgage Corporation will eventually receive their money back with interest at not less than 5 per cent., according to a statement made by Official Referee J. A. C. Cameron at a meeting of shareholders and creditors of the defunct company in Toronto on April 12. Mr. Cameron stated that a number of assets, formerly considered valueless, were now worth thousands of dollars, and if real estate values kept increasing, it would likely be possible to pay off the debenture holders and depositors in about two years.

To the shareholders the referee held out only slight hopes. Unless large sums of money were recovered from the directors it would be impossible to settle with them in full, he declared. He intimated, however, that steps were now being taken to get money back from the directors, but added that it was a matter for speculation as to just how much money could be recovered.

The following were the shipments of ore, in pounds, from Cobalt Station for the week ended April 9:—

La Rose Mine, 65,673; Dominion Reduction Co., 65,000; Temiskaming Mine, 156,663; Coniagas Mine, 148,000; Nor. Customs Con., 130,400; total, 565,736. The total since January 1st is 4,109,983 pounds, or 2,054.99 tons.

BANK BRANCH NOTES

Seven New Branches Opened This Week—Home Bank and Sterling Bank Announce New Appointments

The following is a list of branches of Canadian banks which have been recently opened:—

Toronto (Dupont and Bathurst)	Standard Bank
Eganville, Ont.	Bank of Nova Scotia
Sharbot Lake, Ont.	Bank of Nova Scotia
Stratton, Ont. (sub-agency to Rainy River)	Canadian Bank of Commerce
Barwick, Ont. (sub-agency to Emo)	Canadian Bank of Commerce
Roblin, Ont.	Dominion Bank
Norwood, Ont.	Sterling Bank
Yorkton, Sask.	Dominion Bank

The Bank of Toronto has secured the site of the Marsh Hotel, Markdale, Ont., which was destroyed by fire, and will erect thereon an up-to-date building for the local branch.

Personal Appointments

Mr. E. L. Williams has been appointed manager of the Standard Bank's new branch at Dupont and Bathurst Streets, Toronto.

Mr. C. E. Blosdale has been transferred from the Home Bank, Ilderton, Ont., to be accountant at Shelburne, Ont. Mr. C. E. Clendenan has been transferred from the Calgary office to Welwyn, Sask., as accountant. Mr. J. F. Drew is a new member of chief accountant's department at the head office of the Home Bank. The West Toronto office has a new accountant in Mr. E. Glenn Maloney. Mr. A. A. Rollitt goes from the West Toronto branch to Windsor, as accountant.

Mr. C. L. Wise is now manager of the Church Street, Toronto, branch of the Sterling Bank. Mr. Galbraith, former manager of this branch, has been appointed manager at the Yonge and Carlton Streets, Toronto, branch. Mr. R. C. Cameron, formerly accountant at Cornwall, Ont., for the Sterling Bank, has been appointed manager of the bank's new branch at Golden Lake, Ont. Mr. J. H. Hartle, accountant of the St. Catharines branch of the Sterling Bank, has been appointed manager of the Sterling Bank's new branch at Norwood, Ont.

Mr. J. H. Neeve, manager of the King and Victoria Streets, Toronto, branch of the Bank of Nova Scotia, has retired on pension, and is succeeded by Mr. F. V. Massey, formerly inspector.

INSURANCE MEN WILL OPPOSE STATE INSURANCE

(Continued from page 8.)

form a prodigous task while continuing their service to the public in an efficient manner.

Automobile insurance rates, having been amended all along the line in Ontario, Manitoba and other provinces, are due for some changes in British Columbia. The new basic system of rating is to be adopted in this province, and although premiums must not necessarily be identically the same as Manitoba and the east, the basis of rating will be the same, that is, liability will be based on the list price instead of the insurable horse power, and in fire, the construction of the car itself is to be taken into consideration, as well as its age, etc.

Word has been received on the coast that an agitation is on foot both in Winnipeg and Toronto, to establish insurance federations for Manitoba and Ontario, respectively, patterned after the Insurance Federation of British Columbia, which has done so much good in educating the public, their own members and perhaps in some measure, the members of the British Columbia legislature as to insurance matters and in placing before the authorities, accurate statistics to govern them in insurance legislation.

WEEKLY BANK CLEARINGS

The following are the Bank Clearings for the week ended April 15, 1920, compared with the corresponding week last year:—

	Week ended Apr. 15, '20.	Week ended Apr. 17, '20.		Changes.
Montreal	$140,051,521	$125,279,524	+$	14,771,997
Toronto	117,991,244	74,910,709	+	43,080,535
Winnipeg	46,371,686	36,791,056	+	9,580,630
Vancouver	18,298,086	11,285,756	+	7,012,330
Ottawa	9,868,244	7,218,039	+	2,650,205
Calgary	8,894,906	5,589,665	+	3,305,241
Hamilton	8,254,767	5,630,163	+	2,624,604
Quebec	8,909,432	5,233,325	+	3,676,107

EXCHANGE QUOTATIONS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. funds	9 3-32	9 5-32	....
Mont. funds	Par.	Par.	⅛ to ¼
Sterling—			
Demand	$4.32	$4.33	....
Cable transfers	4.33	4.34	....

New York quotations of exchange on European countries, as at April 15th, 1920, supplied by the National City Co., are as follows: Cable, London, 397¼, cheque, London, 396½; cable, Paris, 18.38, cheque, Paris, 18.40; cable, Italy, 23.25, cheque, Italy, 23.27; cheque, Belgium, 15.25; cheque, Swiss, 5.55; cheque, Spain, 17.95; cheque, Holland, 37¼; cheque, Norway, 18.45; cheque, Denmark, 20.40; cheque, Sweden, 22.10; cheque, Greece, 11.25; cheque, Finland, 5.50; cheque, Roumania, 1.80.

CANADIAN AND GENERAL SECURITIES, LIMITED

A new company, under the name of the Canadian and General Securities, Ltd., has been organized to conduct the business of general investment bankers, and to deal in the bonds, debentures and securities of western cities, towns and municipalities. A marketing arrangement for the sale of securities in the United States has been made with W. L. Ross and Co., Inc., of Chicago. Industrial securities and the reorganization of industrial and general business concerns will also occupy the firm's attention.

The following are the directors: President, A. R. Davidson; vice-president, J. C. McGavin; vice-president and general manager, W. W. Evans; directors, R. T. Evans, Andrew Kelly, H. B. Lyall and W. L. Ross. The head office is at Winnipeg, Man., and the company is capitalized at $1,000,000.

Insurance Companies Had Exceptional Year

Life Premiums Reached Net Amount of $517,863,639 in 1919, with Total of $2,187,833,396 in Force on December 31—Increase in Premium Income and Reduction in Losses Made Results Favourable for Fire Companies—Casualty Lines also Expand, Although Results in Some Places are not so Good

PRELIMINARY figures just issued by the Department of Insurance, Ottawa, show a total of life insurance business in force of $2,187,833,396 at the end of 1919. This is the Canadian business of all companies operating under Dominion license, and does not include the foreign business of Canadian companies. The totals for Canadian, British and foreign companies, in comparison with 1918, are as follows:—

NET PREMIUM INCOME

	1918.	1919.
Canadian companies	$ 38,728,815	$ 47,127,406
British companies	1,935,219	2,201,462
Foreign companies	20,977,013	25,378,376
Total (in Canada only)	$ 61,641,047	$ 74,707,244

NEW BUSINESS (NET)

	1918.	1919.
Canadian companies	$174,000,018	$314,489,448
British companies	5,781,513	10,724,872
Foreign companies	127,498,228	192,649,319
Total (in Canada only)	$307,279,759	$517,863,639

DEATH CLAIMS, MATURED ENDOWMENTS AND DISABILITY CLAIMS

	1918.	1919.
Canadian companies	$ 16,063,901	$ 17,440,764
British companies	1,466,069	1,895,928
Foreign companies	8,717,631	8,722,110
	$ 26,247,601	$ 28,058,802

NET INSURANCE IN FORCE

	1918.	1919.
Canadian companies	$1,105,503,447	$1,362,626,562
British companies	60,296,113	66,909,143
Foreign companies	619,261,713	758,297,691
Total (in Canada only)	$1,785,061,273	$2,187,833,396

The business of Canadian companies outside of Canada showed corresponding growth. Some of the totals, compared with 1918, are as follows: Net premium income, 1918, $14,459,445, 1919, $17,307,075; new business, 1918, $46,893,922, 1919, $74,749,182; insurance in force, 1918, $289,319,861, 1919, $349,430,461; claims paid, 1918, $3,728,770, 1919, $5,744,164.

Fire insurance to a net amount of $4,904,396,461 was in force in Canada at the end of 1919, compared with $4,523,514,841 at the end of 1918. The insurance is distributed among Canadian, British and foreign countries as follows:—

	1918.	1919.
Canadian	$ 757,301,291	$ 865,120,232
British	2,414,696,483	2,559,021,814
Foreign	1,351,517,067	1,480,254,415
Total	$4,523,514,841	$4,904,396,461

As previously forecasted in these columns, the results for the year were much better than those for the year 1918. The net cash received for premiums and the net amount paid for losses during the year, with the ratio between them, in comparison with 1918, may be summarized as follows:—

		1918.	
	Premiums.	Losses.	Ratio.
Canadian	$ 5,570,095	$ 2,741,904	49.2
British	18,658,710	9,907,999	53.1
Foreign	11,725,600	6,709,349	57.2
Total	$35,954,405	$19,359,252	53.9

		1919.	
	Premiums.	Losses.	Ratio.
Canadian	$ 6,398,098	$ 2,690,576	42.1
British	20,385,117	8,397,483	41.2
Foreign	13,131,183	5,554,113	42.3
Total	$39,914,398	$16,642,172	41.7

The net losses paid do not, of course, correspond exactly to the net amount of losses incurred during the year, which are in some cases greater and in others less. Reserves for the unsettled losses are, of course, provided by the companies, these being included in the detailed results for the year shown on the following pages of this issue.

The results by provinces, summarized below, shows that the four western provinces were distinctly the best from the point of view of profits. Ontario comes next, the results in Quebec and the maritime provinces being less favorable. The figures for the Yukon are not shown separately, but are included in the totals.

It Was Once Customary

—to name a personal friend or a business associate as executor of one's will. Experience has proved it to be an injustice to the friend—and frequently a source of loss to the estate.

THE TRUST COMPANY IS THE IDEAL EXECUTOR

Your heirs should have the benefit of the specialized service of a modern TRUST COMPANY in handling your estate; and this can be obtained by naming it as the executor of your will.

It has the necessary experience and makes a business of that very work. Its financial responsibility and perpetual existence guarantee the perfect fulfillment of the trust.

7

THE
TRUSTS AND GUARANTEE
COMPANY LIMITED
BRANTFORD **TORONTO** CALGARY
JAMES J. WARREN, PRESIDENT
E. B. STOCKDALE, GENERAL MANAGER

When to Make a Will

The time to make your Will is when you are sound in body and mind, and with your faculties unimpaired. A Will does not necessarily bind the Testator; it can be changed at any time to suit altered circumstances. Illness or suffering may prevent you from making a Will, so the best advice as to when to make a Will is DO IT AT ONCE.

To ensure careful and competent management for your estate appoint as your Executor and Trustee

My Will!

You did not forget to insure your house or your motor last year, but did you make your Will and thus provide for a proper administration of your affairs in case of your death?

See us at once and make good the omission of 1919. Make your Will now.

INSURANCE COMPANIES HAD EXCEPTIONAL YEAR

(Continued from page 18)

A summary of the results for the casualty lines is shown below. Hail insurance premiums, it will be noticed, were $2,745,642, and claims paid $1,790,215, a ratio of about 65 per cent. Other lines in which the results were not very favorable were inland transportation, with premiums of $288,011 and losses of $238,337; liability, with premiums of $2,552,053 and losses of $1,558,070; plate glass, with premiums of $375,152 and losses of $226,132, and tornado, with premiums of $75,647 and losses of $87,746.

MONTREAL AND QUEBEC SAVINGS INSTITUTIONS

Returns of the Montreal City and District Savings Bank and of La Caisse d'Economie Notre-Dame de Quebec, submitted to the department of finance as at February 29, 1920, show a further reduction in Dominion government demand deposits, the figure being $844,418, as compared with $1,329,977 in the previous month. Other notice deposits show an increase of over $1,000,000. Under assets the changes were not very significant, cash on hand advancing about $150,000, and Canadian municipal securities about $200,000. Total assets of the two institutions are now over $59,000,000. Amounts owing to the Dominion government by the chartered banks are also being reduced, it will be recalled. The further increase in savings deposits also corresponds to the experience of the Canadian chartered banks. The following is the statement:—

	CAPITAL		LIABILITIES								
	Capital Stock.	Capital paid up.	Dominion Govt. demand deposits.	Provincial Govt. demand deposits.	Other demand deposits.	Dominion Govt. notice, etc., deposits.	Provincial Govt. notice, etc., deposits.	Other notice, etc., deposits.	Poor Fund or Charity Fund.	Other Liabilities.	Total Liabilities.

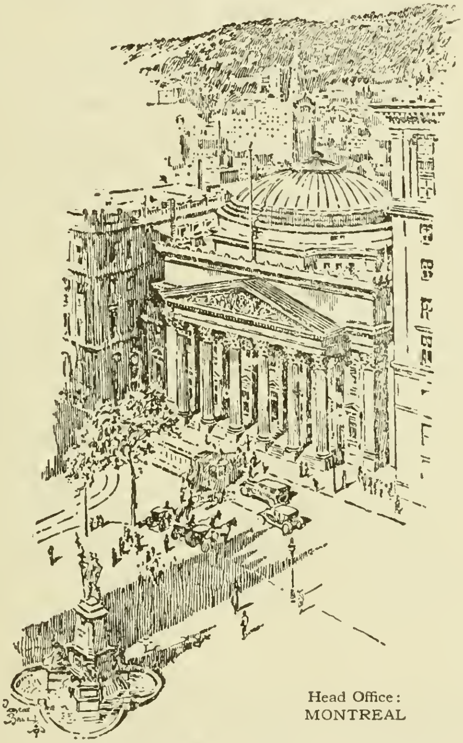
WORLD WIDE TRADE



Head Office:
MONTREAL

MORE than a century of experience and established foreign connections enable this bank to handle all banking details of trade throughout the world.

To our already unusually complete facilities we have just added those of the

Colonial Bank

by acquiring an interest in that old-established English bank now owned and controlled by

Barclay's Bank
LONDON

This new connection will afford additional banking service to our customers who are particularly engaged in British Guianan, South American, African and

West Indian Trade

ANY BRANCH OR THE FOREIGN DEPARTMENT
at the Head Office, Montreal, will be glad to answer inquiries regarding banking connected with trade anywhere in the world

BANK OF MONTREAL

INSURANCE LICENSES ISSUED

During Past Month Many Companies Obtain Provincial Charters—Fire, Automobile and Marine Insurance Popular

DURING the month of March many licenses were issued to insurance companies for the transaction of the various classes of insurance in the different provinces. Judging from the list below the most popular kinds of insurance are fire, automobile and marine. Practically all of the companies mentioned below are registered under Dominion charter, but have secured separate provincial licenses to enable them to write other kinds of insurance.

Quebec Licenses

The Dominion of Canada Guarantee and Accident Co., of Toronto, which is registered to transact in the province of Quebec the business of guarantee, sickness, accident, burglary, plate-glass and fire insurance, has had its charter extended to include steam boiler insurance. The chief agent for the province is E. Roberts, 17 St. John St., Montreal.

The General Animals Insurance Co. of Canada, of Montreal, which transacts the business of animal insurance in the province of Quebec, has been licensed to transact plate glass insurance. The chief agent is R. A. Leduc, 71a St. James St., Montreal.

The Royal Indemnity Co., of New York, N.Y., has been registered to transact, within the province of Quebec, the business of accident, automobile, guarantee, burglary, sickness and steam boiler insurance. The chief agent for the province is J. H. Labelle, 2 Place d'Armes, Montreal.

The Essex and Suffolk Equitable Insurance Society, Ltd., of Colchester, Eng., has been registered to transact within the province of Quebec, the business of fire insurance. M. C. Hinshaw. 260 St James St., Montreal, is chief agent.

License has been granted to the Supreme Council of the Royal Arcanum, Boston, Mass., to transact the business of life insurance within the province of Quebec. H. J. Elliot, Canada Life Building, is chief agent.

In addition to fire insurance which is already being written, the Queensland Insurance Co., Ltd., of Sydney, N. S.W., will write inland and ocean marine insurance in the province of Quebec. The chief agent is F. L. Donaldson, Montreal Trust Building, Montreal.

Inland marine and ocean marine insurance will be written in the province of Quebec by the Scottish Metropolitan Assurance Co., Ltd., of Edinburgh, Scotland, under license just issued.

The Preferred Accident Insurance Co., of New York, has been registered to transact in the province of Quebec, the business of automobile, accident and sickness insurance. Arthur McBean, Lewis Building, Montreal, is chief agent.

British Columbia Licenses

The Preferred Accident Insurance Co., of New York, has been granted a license to transact in the province of British Columbia, the business of accident, sickness and automobile insurance. The head office is to be at Vancouver, and J. S. Gall is chief agent.

Under recent license, the Fidelity Phenix Insurance Co. of New York is now writing in the province of British Columbia, the business of automobile (excluding insurance against loss by reason of bodily injury to the person) insurance in addition to tornado and explosion (including riot and civil commotion) insurance, for which it has already been licensed.

The National Surety Co. has been licensed to transact in British Columbia the business of burglary and forgery insurance, in addition to guarantee insurance for which it has already been licensed.

Notice is given that the Essex and Suffolk Equitable Insurance Society, Ltd., has been licensed to transact in British Columbia the business of fire insurance. The head office of the company in British Columbia is situated at Victoria, and John George Elliott is chief agent.

In addition to accident, sickness, guarantee and automobile insurance, for which it is already licensed, the Scottish Metropolitan Assurance Co., Ltd., has been registered to transact the business of marine and inland marine insurance in the province of British Columbia.

The Globe and Rutgers Fire Insurance Co. has been licensed to transact in British Columbia the business of marine insurance in addition to inland transportation, automobile (excluding insurance against loss by reason of bodily injury to the person) and explosion (expect upon steam-boilers, pipes, fly-wheels, engines, and machinery connected therewith or operated thereby) insurance, for which it has already been licensed.

Notice is given that the Continental Insurance Co. has been licensed to transact in British Columbia the business of automobile insurance (excluding insurance against loss by reason of bodily injury to the person), in addition to tornado and explosion insurance (including riot and civil commotion), for which it has already been licensed.

Other Licenses

Under certificate No. 1859, the Essex and Suffolk Equitable Insurance Society, Ltd., will transact in the province of Manitoba, the business of fire insurance.

The Standard Mutual Fire Insurance Co., of Winnipeg, has been granted license to transact the business of mutual fire insurance in the province of Manitoba.

The Canada and Security Assurance Co. of Calgary, Alberta, has secured a Dominion license to do fire and automobile business and have been licensed by the superintendent of insurance, Victoria, to do the same class of business in British Columbia. This company is owned by the Norwich-Union Insurance Co., which guarantees the policies. Messrs. Banfield, Gunther and Black, Vancouver, are the general agents for British Columbia.

The American Equitable Assurance Co. of New York has been licensed to transact fire insurance in Saskatchewan during 1920.

Agency Appointments

H. A. H. Baker, for the past two years agency superintendent for Manitoba of the Equitable Life Assurance Society, has been appointed assistant general agent, and C. W. Nash becomes agency superintendent.

L. Hughey and W. L. McGillivray have formed a partnership and will conduct a general hail and fire insurance business in Regina, Sask. They have been appointed provincial agents for the Phoenix Insurance Co., hail department, and will have agents throughout the province of Saskatchewan.

Messrs. Bishop and Worthington, 618 Broughton Street, Victoria, B.C., have succeeded to the business of the late E. M. Johnson. They will continue to represent the Union Assurance Society, Ltd., of London, England, as general agents for Vancouver Island.

A. McL. Fraser, formerly of the Royal Financial Corp., has associated himself with the firm of Whitney, Morton and Co., Ltd., Canada Life Building, Vancouver, B.C., which conducts a general financial and insurance business.

PROGRAM FOR WESTERN TRADE BOARDS

Final arrangements for the holding of the convention of western boards of trade at Calgary on May 19 were made at an executive meeting in that city on April 8. This convention has for its object the unification of the aims of the various western boards of trade for fostering trade and developing the natural resources of the west. Addresses will be delivered by R. B. Bennett; Dr. Rutherford on "A Development Policy"; G. E. Carpenter, secretary of the Canadian Manufacturers' Association, on "Railway Service"; J. S. Dennis, on "Colonization"; Sir George Bury, on "The Development of the Pulp Industry"; T. B. Macaulay, on "The Problem of the British West Indies"; and Hon. Sam Latta, on "National Highways." Discussions will follow each address in which the delegates of the various boards of trade will take part.

News of Industrial Development in Canada

Organization of Large Maritime Pulp and Paper Company Reported—Northern Ontario Timber Deal — Canada Iron Foundries Extending Plant — Million Bushel Grain Elevator for Portage la Prairie—Shipbuilding in British Columbia

MANY important announcements have been made during the past week in connection with Canadian industry. It is reported that a group of New York and Montreal capitalists are organizing a company to develop a series of important pulp and paper making enterprises for the maritime provinces, with New Brunswick as their principal field of operations. The new company will apparently be independent of the International Pulp and Paper Co., though it is believed that some of the interests identified with that concern which recently acquired the interests of the Van Horne estate in the Grand Falls, and 122 square miles of timber land in hat neighborhood, are connected with the new project.

E. C. Barre, manager of the Cleveland-Sarnia Saw Mills Co., has arranged for the purchase of 115 miles of new timber limits in Northern Ontario, tributary to the Spanish River limits, according to reports from Sarnia. It is expected that the new limits will be opened this year.

Iron and Steel

The Canada Iron Foundries Co., is spending more than $250,000 on extensive alterations to its Fort William plant, according to an announcement by C. L. Jobb, vice-president. A large addition is being put on to the pipe shop, and two pipe casting turn tables are being installed. In addition to the pipe shop extensions, there will be additions to other buildings. When all the work is completed, the total output of the plant, including all products, pipe, wheels and castings, will be about 175 tons a day.

At a meeting of the directors of the Canada Foundries and Forgings Co., in New York, on April 12, it was decided to extend the Welland plants of the company. A battery of large steam drop-hammers, supplemented by hydraulic presses, continuous heating furnaces of most modern type and upsetting machinery, are to be installed. These operations are primarily being carried out to meet the rapidly increasing demand for automatic drop-forgings, but perhaps most important of all, this will round out the company's plants so that they will occupy a commanding position in Canada in the forgings industry in all its branches. The company's plans further contemplate a sustained program of expansion to largely meet the ever-growing demands of Canadian automotive industries for forgings.

The Montcrief Furnace and Mfg. Co., a branch of the Henry Miller Foundry Co. of Cleveland, Ohio, have established themselves in Guelph, Ont., and they are building a modern foundry on the York Road. The city has also just secured the Commerce Motor Trucks Ltd., the Canadian branch of the Commerce Motor Car Co. of Detroit. This company, capitalized at $1,500,000, is to erect in Guelph a plant that will employ 1,200 men. The Guelph Stove Co. have announced their intention of building a large addition to their present foundry building, and it is understood contracts have been let with this end in view. It will mean the doubling up of their plant there, and the employment of perhaps another 140 men.

Shipbuilding in British Columbia

Messrs. Haley and Christian, it is announced, will take over the Poplar island shipbuilding plant in New Westminster. They have practically taken over the plant already and are employing at present about 25 men on the rehabilitating of the old steamer Comox. Final arrangements and the execution of the necessary documents for the turning over of the property to the shipyards await only the return to the city of H. M. Fullerton, manager of the New Westminster Construction and Engineering Co., who for several years operated the yards.

It is probable that the Board of Harbor Commissioners at Vancouver may take immediate steps to expropriate property on Burrard Inlet for the construction of a proposed new pier. The site selected by the commissioners is that lying immediately west of the Great Northern Railway's dock, and a portion of the property required is owned by a company subsidiary to the Great Northern. Major MacKenzie, one of the Vancouver Harbor commissioners, has been in Ottawa negotiating with the Minister of Marine and Fisheries, with a view to definitely conducting arrangements for the purchase of the site.

The case of the Prince Rupert Drydock Co., is now under way, and the court is to decide whether Newman Erb, the New York railway magnate, and persons nominated by him, or John L. Mullen, Pittsburg contractor, and his associates are to control the Canadian government shipbuilding contracts now being carried on by the Prince Rupert Drydock and Engineering Co. at Prince Rupert, B.C. Mullen and Erb, the real principals in the suit became associated when Erb agreed to finance certain shipbuilding contracts obtained by Mullen from the Dominion government. A company was organized with Erb at the head of it, but Mullen later became dissatisfied.

Large Elevator for Saskatchewan Company

The Saskatchewan Co-operative Elevator Co., has secured twenty acres of land in Portage la Prairie, Man., and will shortly erect a million bushel elevator. The new elevator will be equipped with thirty-six concrete storage tanks, and will be most up-to-date in every respect. It is understood that the company will spend a million dollars in Portage la Prairie and that they also have under consideration the erection of a big flour mill.

Other Notes of Industry

V. O. Phillips and Sons, Kitchener, Ont., manufacturers of gasoline pumps, will erect additions to their present plant.

The Canada Bread Co., is planning the erection of a new bakery on Danforth Ave., Toronto, Ont., at the cost of $500,000.

Mr. J. A. Dow, representing the Amerline Flax Co., has authorized an extension of 180 feet to the flax factory building at Petrolea, Ont.

The Kennedy Car Liner and Bag Co., of Shelbyville, Indiana, have made definite arrangements for the location of their Canadian factory in Woodstock, Ont., and have purchased a vacant factory building there. This company manufactures the Kennedy car-liner, a device used in shipment of grain and other bulk material for protection against leakage in transit or damage on account of dirty cars. They also manufacture paper bags and covers for the packing of manufactured articles, these bags being used instead of sheet paper. They already have quite an extensive trade in Canada. They expect to commence manufacturing operations about June 1st. They will employ from 50 to 100 hands at the commencement of operations. They are asking for no tax exemptions or concessions of any sort from the city. This industry was located by the Industrial Department of Heaton's Agency, Toronto, who specialize in an advisory service to United States manufacturers seeking locations in Canada.

At a general meeting of the St. Hyacinthe, Que., Chamber of Commerce held on April 6, the president, M. W. Girouard, reviewed the work accomplished during the past year. The Chamber has taken up housing, good roads, advertising envelopes, publicity material at the railway station, and gas supply. A resolution was passed requesting the editors of the three local papers to refrain from polemics

against local interests, which had the effect of damaging the reputation of the city. A letter was also read from M. C. Holmes, of Montreal, regarding the establishment of a new auto-truck factory in St. Hyacinthe.

The Canadian General Electric Co., plans the erection at the corner of Wallace and Ward Avenues, West Toronto, Ont., a new factory at the cost of from $250,000 to $300,000. The building will be completed this summer and will be used for the manufacture of lamp bases.

Large Office Building for Toronto

Childs Restaurant Co., of New York, have purchased the property at 9 King St. W., Toronto, Ont., and will build a $1,000,000 sky-scraper there.

A by-law to loan $20,000 to the Elliott and Whitehall Machine Tool Co., one of the baby industries of Galt, Ont., with which to erect a new building on the site obtained in Jackson Park, has been endorsed by the electorate by a vote of 525 to 121.

The Glasscoat Sewer Pipe and Conduits, Ltd., Orillia, Ont., have been granted a free site and ten years' fixed assessment. The company expects to have its factory in operation by next August.

An expansion and reorganization campaign of the Hamilton, Ont., Board of Trade is now being conducted under the chairmanship of G. C. Coppley, and through the efforts of Lewis Buddy, H. F. Sherwood and D. S. Carter, of the Canadian City Bureau, Toronto.

Mr. Rafael de la Cova, representative of the British Manufacturers' Association, of London, Eng., is in Canada for the purpose of bringing about an improvement in trade relations between Canada and Great Britain, both import and export.

The Meaford, Ont., wheelbarrow factory, the largest of its kind in Canada, which has been closed down ever since the latter part of 1916 owing to conditions brought about by the war, has resumed operations. The new company will be known as the Meaford Steel Products, Ltd.

INCREASE IN VOLUME OF EMPLOYMENT

Reports from employers to the Dominion headquarters of the Employment Service of Canada, Department of Labor, indicate that, disregarding loss of time due to strikes, there was a slight increase in the volume of employment during the week ending March 13 as compared with figures from identical firms for the preceding week. A large increase in the volume of employment had been anticipated, but only part of this was realized. For the week ending March 20, a nominal decline was expected. In comparison with the figures for the base week, January 17, a pronounced increase was registered. When analysed by provinces the returns indicated reductions in New Brunswick, Prince Edward Island, Manitoba and Saskatchewan. Nova Scotia, Quebec, Ontario and British Columbia showed increases. No change was noted in Alberta. For the week ending March 20, New Brunswick, Saskatchewan and British Columbia anticipated having additions. The remaining provinces expected to show reductions.

Reports for the week ending March 13 were received from 1,922 firms. These firms reported 688,729 persons on their payrolls, as compared with 688,134 persons on their payrolls for the week ending March 6 and with 680,300 persons for the base week. An increase, therefore, of 595 persons, or one-tenth of 1 per cent., was reported during the week ending March 13, as compared with the returns for the preceding week. These same firms, however, anticipated having a reduction of 651 persons, or one-tenth of 1 per cent., for the week of March 20. An increase for the week ending March 13 had been anticipated, since the returns for the week of March 6, indicated an estimated increase of 1,135 persons, or two-tenths of 1 per cent., for the succeeding week. The returns for the week of March 13, as shown above, indicated that only part of this proposed increase materialized. When the returns are compared with the base figures, a marked increase of 8,429 persons, or one and two-tenths of 1 per cent., is indicated.

NEW INCORPORATIONS

Ontario National Pavements, Ltd.—The Deep Rock Gold Mines, Ltd.—Canadian Pulp and Paper Investments, Ltd.

The following is a list of companies recently incorporated under Dominion or provincial charter, with the head office and the authorized capital:—

Charlottetown, P.E.I.—Cumberland Silver Black Fox Co., Ltd., $5,000.

1870 —— OUR GOLDEN JUBILEE —— 1920

They Put On More Insurance!

Mutual Life Policyholders last year increased the amount of their protection taking out additional policies to the amount of more than ten million dollars. They were alert business men who realized the necessity for increasing their life insurance because of the increase in the value of the necessities of life. In proportion as money loses its purchasing power we require more and more of it to maintain the same protection. Have YOU increased YOUR insurance since prices went up? The smaller the value of the dollar the more dollars we need. As a company, the Mutual does not advocate an excessive amount of insurance. At the same time every reasonable effort should be made to increase the insurance in times of inflated prices. Follow the example of 3139 Mutualists who increased their insurance last year. Put on more insurance!

The Mutual Life Assurance Co. of Canada

Waterloo Ontario

TO SPEND THE BEST YEARS

of one's life in acquiring property and leave it all in jeopardy when it might be secured by Life Insurance is, to say the least, unbusiness-like.

A sufficient Life Policy has kept intact many an estate which would otherwise have gone to ruin for want of ready cash at the right time.

The Great-West Life issues insurance on most attractive terms.

News of Municipal Finance

Alberta Legislature Refuses Tax on Rents—Swift Current Tax Arrears Heavy—Belleville Assessment Increased Nearly $2,000,000—Regina Assets Over $16,500,000—Oak Bay Finances Show Improvement

Owen Sound, Ont.—A bill is now before the legislature providing for the incorporation of the town as a city.

Hespeler, Ont.—The town council has decided to set the tax rate for 1920 at 37 mills. The assessment for the year is $1,513,202, and the estimated expenditure $58,515.

Windsor, Ont.—Estimates for the year amount to $1,670,005, compared with $1,087,663 in 1919, an increase of $582,341. The tax rate is 34 mills, compared with 26 mills last year.

Edmonton, Alta.—The legislature has killed the rental tax clause in the Medicine Hat charter, the town act and the village act, and it is certain that the same action will be taken in regard to the same clause in the Lethbridge charter.

Belleville, Ont.—The city's assessment has been increased nearly $2,000,000. The assessment liable for all taxes is $8,358,620, which means an increase of $1,770,005. The real property value is assessed at $7,302,380, liable for all taxes. The total assessment of all real property, including exemption, is $8,954,175.

Cory, Sask.—Assets of the municipality exceed the liabilities by $135,000, according to the annual report. Statements of the annual estimates are not yet available, as they have not yet been issued, but expenditures for the year will be governed largely by the existing conditions, and the council will conserve whatever possible.

Edmonton, Alta.—The tax rate will be around 46 mills for 1920. The amount required for current expenditures is $1,267,000, as compared with $958,000 in 1919. The provision for general debenture and interest charges is the same as last year at $926,000. Money needed for the school board amounts to $1,112,000 as compared with $800,000 in 1919.

Biggar, Sask.—The financial statement of the town for the year ended December 31st, 1919, shows excess assets over liabilities of $35,961. The principal items in the balance sheet are: Tax arrears, $8,677; tax sale certificates purchased by town, $35,772; sinking fund, $11,847 capital; assets, $78,597. Outstanding debentures, $83,008; oans unpaid, $4,100. Taxes collected during the year amounted to $27,430. Cash on hand and in the bank amounts to $5,278.

Lethbridge, Alta.—The tax rate this year, subject to the court of revision, and exclusive of the government supplementary tax of 2 mills, has been struck at 41.16 for public supporters, and 47.098 for separate school supporters. This is an increase of 3.35 mills over 1919.

The estimated expenditure for 1920 is $524,820, compared with the $453,613 in 1919. The estimated assessable value for public school taxpayers is $12,391,505, and for separate school taxpayers, $758,490.

Swift Current, Sask.—At a recent meeting of the council, Alderman Bellinger introduced a motion urging vigorous action in regard to the collection of tax arrears. He showed that over $500,000 was outstanding at the present moment in arrears and nothing whatever done to collect this amount or any part of it. This state of things had been going on for years. Something was radically wrong when less than an average of 50 per cent. of the tax levy had been collected during the past six years. Had even one-half of outstanding arrears been collected the bank loan would have been wiped out.

Montreal, Que.—The city's budget for the year 1920 calls for the expenditure of $20,942,292, and the Administrative Commission has divided this amount in to the following sources of revenue:—Tax levy, $14,220,804; water rates, $1,719,182; business tax, $1,351,497; Montreal Tramways Company, $500,000; amusement tax, $229,126; licenses, permits and miscellaneous, $2,972,683. The total debt of the city is recorded as $121,901,622, and the valuation of taxable properties, in 1919, as $630,000,000. As the city is entitled to borrow only 12 per cent. of its total valuation of properties, the debt of the city is $46,301,622 greater than it is entitled to be.

Toronto, Ont.—In presenting his resignation to the city council, to take effect as soon as convenient to the city, Finance Commissioner Bradshaw said:—

"The financial position of the corporation is to-day thoroughly sound; its credit is unimpeachable, and the municipality is in a favorable position to finance the large obligations which must be assumed in connection with the acquisition of the Toronto Railway system, and the prosecution of other important projects. Having regard to this, it appears to me that the time has arrived when I might consistently consider relinquishing the office, and be at liberty to devote myself to other interests."

North Toronto, Ont.—A bill has been introduced into the legislature providing for the incorporation of the city of North Toronto. The bill provides that on and after the date of the passing of the act that part of the city of Toronto which before annexation was comprised within the limits of the town of North Toronto, shall be separated from the city, and shall be constituted a corporation and body politic under the name of the corporation of the city of North Toronto. and shall have and enjoy all the rights, powers and privileges which could have been exercised by the said city if the same had been incorporated as a city under the provisions of the Municipal Act, but shall be separated for municipal purposes from the corporation of the county of York.

Montreal, Que.—Judgment was rendered about a month ago by the Supreme Court that it had no jurisdiction in an appeal case by which Montreal endeavored to have the privilege confirmed of taxing federal property when leased to tenants. In this connection, acting on the decision of the law department ofthe city, the Amdinistrative Commission has adopted the following resolution:—

Resolved: That an appeal be made to the Privy Council from the judgment rendered by the Supreme Court in the case of the city of Montreal vs. Andrew Bailie and the Attorney General.

That this eased property is a revenue producer of sufficient amount to warrant the corporation of Montreal doing what it can to retain the authority to tax it, which has, by the way, been authorized by the legislature, is evident from the fact that it is estimated the city collects about $50,000 a year on this leased property from tenants, and probably another $10,000 from property leased to tenants by the provincial authorities. Furthermore as the city has been collecting this revenue since 1907, the total represents a considerable sum, not to speak of the future revenue to be derived from the same source.

Regina, Sask.—The city's gross capital assets totalled $16,567,862 at the end of 1919, according to the report of the civic auditors. The above figure includes saleable property to the value of $1,794,649, capital improvements to a net valuation of $12,164,554, and a sinking fund credit of $2,509,913.

After making provision for the city's bonded indebtedness and allowing for the value of the city's property on the debit side, there remains to the credit of Regina a capital surplus totalling $3,762,390.73.

The city's gross bonded debt at the end of the year amounted to $10.893,857. Of this sum $8,005,008 represents debentures and consolidated stock chargeable to the city at large. Another $1,872,449 represents debentures and consolidated stock for which the properties directly benefited

are responsible. The remaining $1,016,400 is in coupon bonds which have been floated on the security of unsold debentures issues, part of which will be borne by the city at large and part by the property owners. Of the total credit of $2,509,913 in the sinking fund trustees' account, cash and investments represent $2,004,583.

The tax rate for 1920 has been set at 36½ mills.

Oak Bay, B.C.—The financial report of the corporation for the year 1919, shows several improvements. Bank loans were reduced to $53,122 from $79,129. Of all taxes levied during the year 80 per cent. was collected, and of all arrears 60 per cent. was collected. A further sum of $60,000 of the sinking funds was invested in Dominion government bonds at 5½ per cent., and Victory bonds exempt from the payment of income tax, to the par value of $45,000, were sold and the proceeds re-invested in the purchase of $47,000 of British Columbia bonds paying 5½ per cent. interest. The profit on this transaction, together with the increased earnings of the sinking funds invested in government bonds, resulted in the sinking funds showing a surplus at the end of the year of $31,658. Sinking funds now on hand or invested amount to $374,970. Other items contained in the balance sheet are: Arrears of taxes and rates, $89,981; interest on taxes and tax sale purchases, $30,194; unsold debentures, $10,000; debenture debt, $1,266,224; sinking funds required to be on hand, $343,312.

The statement of revenue and expenditure shows excess expenditure over revenue of $8,355, the figures being $177,933 and $169,577. Some of the principal items of the account are: General taxes, $96,173; local improvement rate, $56,101; school rate, $35,060; interest on taxes, $16,031; debenture interest, $53,414; sinking funds, $42,171.

Montreal, Que.—The Administrative Commission decided on April 9th to purchase the following city of Montreal bonds for its sinking funds: $8,900 4½ per cent., at a 6.35 per cent. basis, from J. M. Hanley and Co.; $500, 4 per cent,, from Wood, Gundy and Co., at a 6.35 per cent. basis.; $12,900, 4 per cent., due 1932, at a 6.35 per cent. basis; 25 4½ per cent. debentures, due 1951, at a 6.35 per cent. basis; £10,000, 4½ per cent. debentures, due 1951-52-53, from Henry J. Murphy.

Government and Municipal Bond Market

With Greatly Improved Conditions Embargo May Soon be Lifted—Manitoba Offer $500,000 Three-Year Bonds—Some Large Financial Programs Ahead of Canadian Provinces and Municipalities

ALTHOUGH the Canadian government and municipal bond market is not yet very strong, with sterling and foreign exchange and general money conditions continually improving, it is gradually feeling its way back to normal. Several rumors have been floating around regarding the lifting of the embargo on foreign securities, but nothing really definite has been reported yet. It is the opinion, however, that with market conditions improving materially every day, the embargo will automatically lift itself.

Canadian government and municipal bonds are now being offered to investors with attractive rates of interest from 5.24 to 7 per cent. It is realized that these levels cannot always be upheld, and that, sooner or later, the returns on such bonds will be lower. Commenting on this, Messrs. Wood, Gundy and Co., in a pamphlet just issued, say:—

"The high commodity prices of to-day are due primarily to the fact that demand exceeds supply. When conditions become more nearly normal, it is not to be expected that present high prices will prevail. While the purchasing power of a dollar, in so far as commodities are concerned, is about 50 per cent. of what it was in pre-war days, the earning power is very much greater. It is to be expected that, sooner or later, commodity prices will go back to almost their previous levels, in which case it would be reasonable to look for lower interest rates, but investors purchasing now may buy bonds of substantial Canadian municipalities yielding as high as 7 per cent., thereby assuring themselves of this earning power during the life of the bonds they buy."

Coming Offerings

The following is a list of debenture offerings, of which mention is made in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Prescott, Ont.	$ 8,500	6	......	......
Vermilion, Alta. ...	26,000	6½ & 7	20-instal.	......
Toronto Tp., Ont. ...	74,675	6	......	Apr. 20
Levis, Que.	80,000	5½	20-years	Apr. 20
Alta. School Districts	76,175	Various	Various	Apr. 20
Manitoba	500,000	5	3-years	Apr. 20
Orillia, Ont.	90,795	5	15 & 30-instal.	Apr. 21
Chatham, Ont.	90,000	5½	30-years	Apr. 22
Hawkesbury, Ont.	95,000	6	20-years	Apr. 27

Hawkesbury, Ont.—Tenders will be received until April 27th, 1920, for the purchase of $95,000 6 per cent. 20-year road debentures. E. Paquette, treasurer.

Manitoba Province.—Tenders will be received until April 20th, 1920, *The Monetary Times* understands, for the purchase of $500,000 5 per cent. 3-year bonds, payable in New York.

Chatham, Ont.—Tenders will be received until April 22nd, 1920, for the purchase of $90,000 5½ per cent. 30-year Hydro-Electric instalment bonds. (See advertisement elsewhere in this issue.)

Toronto, Ont.—Tenders will be received to-day for the purchase of $1,905,000 5½ per cent. bonds, issued under several by-laws, and maturing from 1920-50, the approximate average maturity of the whole being sixteen years.

Orillia, Ont.—Tenders will be received until April 21st, 1920, for the purchase of the following debentures: Waterworks debentures, $70,795.71, payable 15 instalments, last July 8th, 1934, interest half-yearly, coupons at 5 per cent. Local improvement sewer, $20,000, payable 30 instalments, interest 5 per cent., half-yearly, coupons attached, dated July 1st, 1919. First six months' coupons not issued. Both issues guaranteed by county of Simcoe. C. E. Grant, town clerk.

Bond Sales

Assiniboia, Man.—Messrs. W. A. Mackenzie and Co. have purchased two blocks of bonds as follows: $129,262 6 per cent. 20 instalments, $6,192 6 per cent. 10 instalments. Tenders received were:—

W. A. Mackenzie and Co.	91.295
Wood, Gundy and Co.	91.28

Stamford Township, Ont.—The Imperial Bank of Canada has been awarded an issue of $20,000 6 per cent. 20-instalment debentures at 98.28, although the bank's tender was not the highest. The following tenders were submitted:—

C. H. Burgess and Co.	98.76
Brent, Noxon and Co.	98.685
Imperial Bank of Canada	98.28
R. C. Matthews and Co.	98.17
Turner, Spragge and Co.	98.075
A. E. Ames and Co.	97.83
United Financial Corporation, Ltd.	97.83
W. L. McKinnon and Co..................	97.252
Wood, Gundy and Co.	96.67

"Render Unto Caesar"

It is right and just to "Render unto Caesar the things which be Caesar's"—but that is no reason for paying taxes on non-taxable income.

If you want to know what exemptions and deductions you are entitled to under the Income Tax Law, or the exact portion of your income you should pay taxes on, send for our booklet entitled: *"The Income Tax and The Average Man."*

It is worth reading.

You may have a copy for the asking. A letter or postal will bring it.

G. A. STIMSON & CO., LTD.
UNION BANK BLDG. - - TORONTO
Write for Complete Bond List.

East Kildonan, Man.—The Bond and Debenture Corporation, Winnipeg, has purchased $97,000 6 per cent. 20-year bonds of the municipality at 89.06, which is on a 7.02 basis. Tenders received were as follows:—

Bond and Debenture Corporation	89.06
A. E. Ames and Co.	88.547
Housser, Wood and Co.	88.41
W. A. Mackenzie and Co.	87.50

Penticton, B.C.—The following certificates have been issued by the municipal department of the province of British Columbia:—

Irrigation loan, $97,000 6 per cent., payable February 1st, 1950.

Domestic water loan, $35,000 6 per cent., payable February 1st, 1945.

School loan, $85,000 6 per cent., payable February 1st, 1960.

Debenture Notes

Sydney Mines, N.S.—Ratepayers have adopted a by-law to borrow $75,000 for school purposes.

Calgary, Alta.—The city will issue debentures to the amount of $218,091 for educational purposes.

Woodstock, N.B.—Bonds will be issued to the amount of $30,000 for the purpose of building permanent sidewalks.

Peterboro, Ont.—The city council will issue debentures up to $200,000 for the use of the local housing commission.

Chatham, Ont.—Ratepayers have defeated a money by-law authorizing the raising of $370,000 for a new waterworks system.

Nova Scotia.—A bill authorizing a provincial loan of $15,000,000 for roads, extending over five years, has been introduced in the legislature and has passed its first reading.

Scarboro, Ont.—The township at its next meeting will discuss the issue of $800,000 debentures as its share of the liability for the Toronto and Eastern Townships Hydro Radial.

Kitchener, Ont.—Ratepayers of Kitchenern and Waterloo will soon be requested to vote on the raising of $440,000 for a proposed new collegiate. The sum of $40,000 is also required by the hospital board.

Edmonton, Alta.—The city needs $1,250,000 this year for incinerator plant, power plant and telephone extensions. It is pointed out that debentures to the amount of not more than $450,000 will have to be sold, debentures sold last year providing for a large part of the actual expenditures to be made this year.

Alberta.—Unless money can be borrowed at reasonable rates the government will not proceed to borrow largely on the $4,000,000 bond issue, to be floated for the purpose of telephone extensions in the province, according to Premier Charles Stewart.

"If our bonds will have to carry an exorbitant rate of interest," said the premier, "there is nothing for us to do but to curtail the work that has been laid out."

British Columbia.—Provision for a loan of $2,000,000 is made in a bill brought down in the legislature by Hon. John Hart. Of this, $1,000,000 is for land settlement purposes, $300,000 for expenditure under the Soldiers' Land Act and $700,000 for the conservation fund created two years ago to permit the government to deal with irrigation projects. The bill was given its first reading. With this bill the total borrowings called for under legislation already tabled this session aggregate $10,800,000.

The government is also planning for a loan of $3,000,000 for the construction of the university buildings, and it will repay the loan by the development of the government lands adjoining the university site and by placing them on the market as a real estate subdivision.

Refuses Guarantee of Irrigation Bonds

At the morning session of the Alberta legislature on April 8th, Premier Charles Stewart stated that the provincial government absolutely refuses to give a direct guarantee of irrigation bonds for the Lethbridge Northern District. The irrigation bill provides for the setting up of a fund under which an amount equal to two years' interest on the debentures as in arrears. Mr. Stewart told the House that in the United States there were only two states that guaranteed irrigation bonds, and these for five years only. He said that, as the Lethbridge Northern scheme, in addition to the assistance Act, provides $4,000,000 for construction works and $1,000,000 for three years' interest, the result is that five years' interest is provided for on the bonds, which is equal to any guarantees ever given in the States.

The bill advancing assistance to the Lethbridge Northern Irrigation District to the extent of $600,000 to guarantee interest for two years was finally given second reading in the House at the afternoon session on April 8th and sent into committee. This virtually means approval of the principle of the bill, leaving details to be thrashed out in committee.

YIELDS ON INVESTMENTS

The following table of investment yields of stocks and bonds has been compiled for *The Monetary Times* by Messrs. Morrow & Jellett, Members Toronto Stock Exchange, 103 Bay Street Toronto:—

CORPORATION SECURITIES MARKET

Acadia Sugar Bonds Offered in New York—Two More Stock Issues

THE Canadian industrial security market is practically bare of attractive issues. An offering of $500,000 bonds of the Consumers Glass Co., Ltd., a subsidiary of the Canada Cement Co., will shortly be made here, it is understood, although the details are not yet available. Outside of this, however, nothing is in sight.

The demand for high-grade corporation bonds in the United States is particularly large, all the issues offered there recently having been rapidly absorbed, including the new Bell Telephone issue. Imbrie and Co. are now offering in New York $2,000,000 first mortgage 7 per cent. serial bonds of Acadia Sugar Refining Co., Ltd., together with a bonus of common stock.

Two New Stock Offerings

While industrial bonds are scarce, new stock issues continue to be plentiful. Messrs. Anderson, Robinson and Co., are offering $500,000 7 per cent. cumulative preferred shares of the Bankers' Financial Corp., Ltd., at par, with a bonus of 25 per cent. common stock.

The Bankers' Financial Corporation is capitalized at $2,000,000, of which $1,250,000 is preferred and $750,000 common stock. The company proposes to specialize in the purchase of conditional sales agreements from dealers in automobiles and trucks, a form of business which has developed extensively in the United States. The purpose is to facilitate the sale of automobiles and trucks by purchasing conditional sales agreements bearing the endorsation of the dealer for an amount the equivalent of 50, 60, 66 2-3, or 75 per cent. of the value of the car or truck. Payment is then made in equal monthly instalments over a period of from four to twelve months, and a lien on the car or truck is taken as additional security.

An offering of the unsold balance of $600,000 Canadian-Mead-Morrison Co., Ltd., 7 per cent. cumulative redeemable sinking fund preferred shares, is being made by Hanson Bros., at 100 and accrued dividend, with a bonus of four common shares of no par value for each purchase of ten shares of preferred stock, and proportionally for larger and smaller subscriptions.

The Mead-Morrison Mfg. Co., of Boston, New York and Chicago, was formed in 1904 to take over the coal-handling machinery businesss of the John A. Mead Mfg. Co., and in 1906 they took over the Rawson and Morrison Mfg. Co., of Boston, and have since acquired other interests. Realizing the great expansion possibilities of their already considerable Canadian business, the company determined to open a manufacturing plant in Canada, and acquired all the capital shares of the firm of M. Beatty and Sons, Ltd., of Welland, Ont., manufacturers of hoisting engines, material handling grabs, dredging machinery, pumps and other machinery.

The Royal Securities Corp., Ltd., is offering the unsold balance of the $4,000,000 8 per cent. cumulative first preferred shares of the Famous Players Canadian Corp., Ltd., to the Canadian public at par and accrued dividends, with a bonus of 25 per cent. common stock.

At a special general meeting called for April 26 next, holders of Abitibi Power and Paper Company's present securities will be asked to approve of the capital reorganization of the company, involving the splitting up of the common stock on the basis of five shares of new stock for each one of old. Interim certificates, it is understood, are ready for issuing immediately after the proposal of the board is ratified.

BROMPTON LEADS ON MONTREAL EXCHANGE

Sales of 18,026 for the Week—Other Issues Showed Strength —Trading in New York Broader and More Active

TRADING on the New York market at the close on April 14 was broader and more active than in the preceding days of the week, and most stocks displayed considerable strength, notwithstanding the fact that call money rose to 12 per cent. Many disturbing influences, such as the railroad strike, transfer of gold from the sub-treasury and rising money rates, did not seem to materially affect the market. Reasons for optimism in view of these influences were further gold shipments from London and anticipation of stock dividends from many corporations.

Strength and activity were prevalent on the Montreal Stock Exchange for the week ending April 14. Leading issues were: Brompton, with sales of 18,026; Atlantic Sugar, 9,095; Spanish River, common, 7,637, preferred, 9,938; National Breweries, 3,056; Laurentide, 2,672; Steel of Canada, 2,177; Dominion Steel Corporation, 1,720. During the week Brompton, which lead the market, advanced from 85¾ bid, to 90 at the close. The talk on the street of the new capital developments of the company, involving the doubling of the common stock, was the cause of this strength and activity. Spanish River, common, was strong at 95⅜ bid, rising to 96⅞, but falling away to 94 at the close. Preferred was likewise strong, advancing to 143, but weakened to 141 at the close. National Breweries showed a sign of weakening, falling away from 52¼ to 51¼. A fractional gain was made, however, at the close. Atlantic Sugar was very strong, gaining 2¼ points at 87¾. Steel of Canada, common, lost 3¼ points at 81¼. Abitibi weakened considerably, losing ten points, but gained 2 points at the close at 327.

Brazilian again lead the Toronto market, with sales of 2,376, but showed a sign of weakness at 46⅛ bid. Spanish River, preferred, was fairly active with sales of 465, declining 1½ points at 141 bid. Dominion Steel, with sales of 400, gained 1 point at 71½, but lost again at the close of 70½. In mining, La Rose and Nipissing experienced turnovers of 450 and 605 shares, respectively, both stocks neither losing nor gaining during the week. Sawyer-Massey attracted attention with a gain of 4 points to 20, later closing at 19, rumour that the Steel Company of Canada would investigate the company's plant, being the cause of the activity. Bank stocks were not very active, most issues showing a decline for the week. In the loan and trust section, Canada Permanent lost fractionally at 175.

RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the week ending April 7th:—

	1920.	1919.	Inc. or dec.
Canadian Pacific Railway.			
April 7	$3,617,000	$2,921,000	+ $696,000
Grand Trunk Railway.			
April 7	$1,469,333	$1,274,553	+ $194,780
Canadian National Railways.			
April 7	$1,834,118	$1,457,144	+ $376,974

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

Investments and the Market

Abitibi Paper Had Good Year—Riordon Company's Position Strengthened — Strike Affected Crow's Nest Pass Coal Output—Canadian Fairbanks-Morse Earnings Lower—Increase in Winnipeg Railway Fares Supported—Nipissing Mines in Strong Position

Polsons Iron Works, Ltd.—Pursuant to a judgment by the Supreme Court of Ontario, dated March 19th, 1919, tenders are being invited by the Toronto General Trusts Corporation until May 1st, 1920, for the purchase of the properties and assets of the company at Toronto. The buildings on the property are valued at $160,000.

Nova Scotia Tramways and Power Co.—The annual statement of the company for the year 1919, shows net earnings of $211,510. During the year car mileage was increased 432,227 miles, or 40 per cent., while the per mile car earnings were 33.2 cents, as compared with 39.3 cents in 1918, because of the increased number of miles operated. The average fare in Halifax is 4.3 cents per passenger, and the legislature will be asked to authorize an increase. The gross earnings of the system were $309,813, made up as follows: Railway, $70,018; light and power, $214,450; gas (deficit), $11,985; steam heat, $18,377; miscellaneous earnings, $2,559; revenue interest, $16,392. Taxes amounted to $98,303.

Canadian Fairbanks Morse Co.—The financial statement of the company for the year ended December 31, 1919, shows earnings for the year of $625,150, as compared with $1,310,597 in 1918. Balance of profits, before dividends, was $532,069, as against $800,098 for the preceding year. Total profit and loss surplus is $2,076,607, compared with $2,651,037 in 1918.

In his report, President Fuller says: "The volume of business in our sales department shows a decrease of approximately 15 per cent. from the preceding year, business being extremely quiet in the first few months of the year, but it improved rapidly as the year went on, and the amount of unfilled orders on our books at the end of the year was greater than ever before in the history of the company. All of our government contracts were completed and settled for during the year, and the accounts and bills receivable appearing on our books are all of the usual character reflecting our current business."

Black Lake Asbestos Co.—A special meeting of the company was held on April 7, and shareholders decided not to move the office of the company from Toronto to Montreal. The proposed change had hinged entirely on the expectation that J. A. Jacobs, of Montreal, would be able to complete his agreement to buy 10,000 shares of stock and $200,000 of bonds, but as the courts have declared invalid the agreement with him to that effect there was no option for the shareholders but to drop the proposal for the time being.

Future developments in connection with the company are uncertain, except that the shareholders present were informed that there are at present no other negotiations in progress. That something of that kind may develop, however is inferred from the action taken at the meeting, when a committee was appointed to represent the shareholders and bondholders and co-operate with the directors in connection with any future negotiations for possible sale of control of the company. This committee is as follows: John B. Kay, C. E. A. Goldman and D. J. McDougald.

Winnipeg Street Railway Co.—Evidence in support of the company's application for permanently increased fares, was given on April 9 last, by Prof. George Eberle, consulting economist of Wisconsin, before the Public Utilities Commission. He contended that present street car fares are insufficient to provide an adequate return on the investment in the Winnipeg Electric Railway Co., and that any further wage increases will make a material difference in the street car fares. He showed that in 1919 58,000,000 passengers were carried on the street railway. For 1920 it is estimated that the company will carry 65,000,000 passengers, and accepting the figures of the commission as to the value of the street railway, said that the average cost per passenger in 1920, in order to pay all operating costs and provide a fair return of 8 per cent. on the investment, would be 6.14 cents. That would have to be the fare if a fair return was provided for. The present average fare, it was stated, was 5.45 cents.

Prof. Eberle added that the average cost per passenger of 6.14 cents did not take into account any further increase in wages to employees. If further increases are granted, he said, the average cost would be higher and that in return would bring the fare higher.

Consolidating Mining and Smelting Co., Ltd.—The financial statement of the company, covering a period of 15 months from September 30, 1918, to December 31, 1919, shows a deficit of $489,789, as compared with a deficit of $212,152 in the previous twelve months. This further reduces profit and loss balance, and at December 31 last it stood at $1,658,334, as compared with $2,143,148 at September 30, 1918. Sales during the period amounted to $9,761,005, as against $9,780,565 in the preceding year, while total revenue in the fiscal period under review amounted to $13,002,498, as compared with $12,784,985, as shown in the preceding report. The balance sheet reveals total current assets amounting to $5,216,144, compared with $4,625,751 in the previous statement, while total current liabilities were $4,674,704, compared with $4,474,350. This leaves surplus current assets over current liabilities (net working capital) of $541,440, as compared with only $151,401 at the end of the 1918 accounting period. Among the liabilities a bond debt is included for the first time, this being $3,000,000 of bonds issued about a year ago. This also resulted in a charge of bond interest of $105,000. Bank loans rose, while reserves are higher.

Riordon Pulp and Paper Co.—The annual statement of the company for the year ended December 31, 1919, shows profits of $2,591,796, as compared with $2,218,376 at the end of the previous year. Earnings from operation, after deduction of all expenses of manufacturing and administration and selling, less provision for exhaustion of timber limits, amounted to $950,586, as compared with $1,017,383 in 1918. After adding $859,540 for income from investments and interest, the amount was $1,810,126, as compared with $1,443,046 for the previous year. Dividends were paid during the year to the amount of $534,073. A comparison of the balance sheet shows the increased strength of the company since the 1918 statement was issued. Some of the principal items are:—

Properties	$ 7,569,405	$ 7,363,787
Investments	5,104,676	635,475
Inventories	2,016,834	2,416,061
Cash	257,148	16,038
Total assets	18,262,029	12,779,354
Current assets	4,824,520	2,819,379
Current liabilities	3,248,425	2,563,965
Mortgages over properties purchased	153,000	208,000

London Street Railway.—The decision of the late Chief Justice Falconbridge declaring the increased by-law invalid, has been reversed by the decision given in the Appellate Division at Osgoode Hall, Toronto, declaring that the London City Council had the power to pass a by-law to permit the company to increase its fares. The by-law, which allowed the company to sell six and eight tickets for 25 cents instead or seven and nine as at present, was quashed and an injunction restraining the company was issued last fall.

Two actions were brought against the city in connection with the case, one by C. H. Joyce and one by William Service. Both were defended by the railway company's solicitors. While the decision of the Appellate Court says the by-law is legal, the increased fares cannot be put into effect now, as the by-law expired on March 1. Thus, unless the city council passes another by-law the company cannot increase the fares.

Three grounds on which the quashing of the by-law was asked, and on which the appeal was made, were that the consent of the legislature, the consent of the citizens of London and the consent of the Hydro-Electric Power Commission of Ontario, was necessary before the council could pass the by-law and make it effective. It is stated that the appeal was allowed on all three counts, and that the injunction against the railway company is also annulled by the decision.

Crow's Nest Pass Coal Co., Ltd.—The annual meeting of the company was held in Toronto on April 9, and the financial statement was approved by the shareholders. In his formal report President Elias Rogers said:—

"The balance at the credit of the profit and loss account brought forward from 1918 was $318,497. To this has been added the sum of $122,785, being the company's net profits from all sources of the operations for the year 1919, making a total of $441,282. From this amount your directors have paid four dividends of 1½ per cent. each, making a total of 6 per cent. for the year, and amounting in all to $372,669, leaving a balance at credit of profit and loss account to be carried forward to 1920 of $68,613. The profits of the Crow's Nest Pass Electric Light and Power Co., Ltd., for the year were $1,720, and the Morrissey, Fernie and Michel Railway Co. $1,572, and in each case the amount has been carried to reserve for depreciation. During the year the coal company spent $22,414 on improvements and development work, and the Morrissey, Fernie and Michel Railway Co., $29,647. The coal mined during the year amounted to 536,543 tons, as against 681,942 tons mined in 1918, and the coke produced was 63,915 tons, as against 183,771 tons in 1918. The decrease in tonnage and consequent reduction in profits, is owing to a three-months' strike during the summer months."

Robert Simpson Co., Ltd.—Total net earnings for the year ending January 28, 1920, were $1,986,343, compared with $1,282,304 in the previous year. With the balance brought forward of $822,620, there was available for distribution $2,808,963, out of which a 6 per cent. dividend on preference stock was paid amounting to $201,000; dividends on common, $368,500; there was reserved for war tax $300,000; and for bonuses and employees' savings and profit-sharing plan $250,000, leaving a balance to be carried forward of $1,689,463.

Total assets show a large increase during the year, being now $13,755,016, as against $11,529,958 a year ago. There is an increase in current assets, which now stand at $6,120,069, as against $5,975,947, in addition to which there is now an investment of $943,177 in Canada Victory bonds, compared with $260,000 last year. Current liabilities stand at $2,518,055, compared with $1,271,440.

President H. H. Fudger announced that more than 75 per cent. of the eligible employees had joined the employees' savings and profit-sharing fund. The balance carried forward in profit and loss, $1,689,463, is over 50 per cent. of the outstanding common stock, $3,350,000.

Nipissing Mining Co., Ltd.—The surplus of the company for the year ended December 31st, 1919, was increased by nearly $1,000,000 to the sum of $4,372,952. Dividends aggregating $1,800,000 were paid to shareholders, and reserves were increased by about 350,000 ounces. In his report to shareholders, R. B. Watson, general manager, said:—

"The year 1919 was a remarkable one in the silver industry. The official price of $1.01½ per ounce, set by the United States government, remained in force for the first four months of the year. Early in May, however, both the United States and British governments removed all restrictions on the price and on the exportation of silver. Due mainly to the strong demand from China, the price thereafter gradually rose to the maximum of $1.37½ quoted in New York on November 25th. The New York official average for the year was $1.112 per ounce. Nipissing received $1.1371 United States currency, f.o.b. Cobalt for 1919 shipments.

"The miners of the Cobalt camp went out on strike July 23rd, and returned to work on September 8th, but the mill

DIVIDENDS AND NOTICES

THE MERCHANTS BANK OF CANADA

QUARTERLY DIVIDEND

A Dividend of **Three Per Cent.** for the Current Quarter, being at the rate of **Twelve Per Cent.** per annum, and a Bonus of **One Per Cent.**, upon the Paid-up Capital Stock of the Bank, were declared, payable on 1st May next to shareholders of record on the evening of 15th April, stock not fully paid up on 31st January to participate in both dividend and bonus on the amounts paid up on that date and upon later payments from the date thereof.

By Order of the Board.
D. C. MACAROW,
General Manager.
Montreal, 30th March, 1920. 117

DETROIT RIVER TUNNEL COMPANY

Detroit, Mich., April 6th, 1920.

Notice is hereby given that the Annual Meeting of the stockholders of the Detroit River Tunnel Company, for the election of Directors and the transaction of such other business as may be brought before the meeting, will be held at the Head Office of the Company, in the City of Detroit, Mich., on the First Thursday after the First Wednesday (being the 6th day) of May, 1920, at 10 o'clock a.m.

E. F. STEPHENSON,
116 Assistant Secretary.

THE STEEL COMPANY OF CANADA, LIMITED

ORDINARY DIVIDEND No. 13.

Notice is hereby given that a dividend of one and three-quarters per cent. on the issued and fully paid Ordinary Shares of the Company has been declared for the quarter ending March 31st, 1920.

PREFERENCE DIVIDEND No. 35.

Notice is hereby also given that a dividend of one and three-quarters per cent. on the issued and fully paid Preference Shares of the Company has been declared for the quarter ending March 31st, 1920.

The above dividends are payable May 1st, 1920, to Shareholders of record at close of business, April 10th, 1920.

By order of the Board.
H. H. CHAMP,
Treasurer.
Hamilton, Ontario, March 30th, 1920. 119

could not be started until September 24th. This two months' shutdown was mainly responsible for the drop in the year's production to 2,905,475 ounces, which is the lowest production since 1908.

"The net operating profit, however, was the largest in the history of the company, amounting to $2,717,312. The cost of production was 35.6 cents per ounce compared with 39.02 cents in 1918. The company received for the silver produced during the year, including the inventory sold since January 1st, 1920, an average of $1.2077 per ounce."

Abitibi Power and Paper Co.—Net earnings of the company for the year ended December 31, 1919, amounted to $2,125,717, compared with $1,643,653 for the previous year. After deductions were made for interest on bank loans, bonds, debentures and notes outstanding and making allowance for depreciation of plant, limits and townsite investments, as well as for bad and doubtful debts and the business profits tax for the year 1917, there remained applied to dividends, a balance of $1,064,230, or more than double that at the end of the 1918 period. During the year the obligations in the way of arrears on preferred dividends were liquidated, necessitating the disbursement of $262,500 among holders of the senior securities of the company, against the payment of $70,000 in the two former years. These disbursements allowed for there remained for application to the common shares the sum of $801,730, compared with $441,202 in 1918 and $271,122 in 1917.

Working capital was strengthened by the reduction of current liabilities to the extent of $800,000, resulting in excess of current assets over current liabilities of $1,516,890. This improvement was effected chiefly through the reduction of bank indebtedness from $1,068,000 at the end of 1918 to $250,000. In his report President F. H. Anson said:—

"The earnings cover the operation of the full capacity of the paper mill for the entire year. The ground wood and sulphite mills, owing to unfacorable market conditions in the early part of the year, were not operated to full capacity. For the ensuing year the company sold its entire output of paper, at materially higher prices than during 1919. The excess pulp production for the first five months has been contracted for, and indications now are that the full capacity of the entire ground wood and sulphite production will be advantageously placed during the balance of 1920. Contracts have been let and arrangements perfected for the installation of three additional newsprint machines and one wrapping machine, which will bring the capacity of the plant up to approximately 500 tons a day. Completion of the new power plant at Twin Falls, which will furnish an additional 25,000 h.p., has been arranged for; it is expected that all of this construction will be completed by December 31, 1920, and the additional product available for sale during the entire year 1921."

RECENT FIRES

Montreal, Montebello and Notre Dame du Lois, Que., Have Heavy Losses this Week—Large Cannery Destroyed at Inverness, B.C.

Amherstburg, Ont.—March 30—Residence of Wallace Gibb, Murray Street, was damaged. Cause, defective wiring in attic. Property covered by insurance.

Fielding, Sask.—April 7—Business section, including premises of the Imperial Bank, was damaged by fire. Estimated loss, $10,000.

Kingston, Ont.—April 11—Residence of Lieut.-Col. Geo. H. Gillespie, 495 Princess Street, was damaged. Loss estimated at $1,500; insurance carried in the Yorkshire Insurance Co., $3.500.

Montebello, Que.—April 14—The convent and its contents, owned by the Corporation of Montebello, was totally destroyed. Estimated loss, between $25,000 and $30,000. Convent was partly insured.

Montreal, Que.—April 9—Regent Shoe Store, at the corner of St. Catherine Street and St. Lawrence Boulevard, was damaged. Stock, valued at $40,000, damaged to the extent of $2,000.

April 12—Diamond Laundry, 84 Mullin Street, was damaged.

Notre Dame du Lois, Que.—April 11—Several houses and stores damaged. Estimated loss, $150,000.

Outremont, Que.—April 10—Auto in garage at 457 St. Catherine Road, owned by William C. O'Brien, was destroyed. Cause, backfire of an exhaust pipe in an auto.

Peterboro, Ont.—April 11—The Lakefield power plant destroyed. Estimated loss on building, $2,000; plant, $5,000. Loss, partly covered by insurance.

Inverness, B.C.—April 11—The Inverness cannery plant was destroyed. Estimated loss, $150,000.

Toronto, Ont.—April 9—Baldwin Steel Co. was damaged. Loss estimated at $2,500.

April 10—Garage, 53 Indian Road, owned by Mrs. M. Tuckett, was damaged. Estimated loss, $2,500.

April 12—The A. E. Long paper box factory, Gerrard Street East, was damaged. Estimated loss, $50,000. Stable at 670 Dupont Street, owned by the E. G. Smith Coal Co., was damaged. Estimated loss on building, $1,500; contents, $800.

Vancouver, B.C.—April 13—The White Lunch, 126 Hastings Street East, and the British Columbia Tailoring Store adjoining were destroyed. Many stores in the vicinity damaged. Damage estimated at between $50,000 and $60,000.

Westport, Ont.—April 11—The Theatre Grand, owned by Steele Brothers, was totally destroyed. Loss covered by insurance.

Winnipeg, Man.—April 12—Grocery and feed store, 74 and 76 Derby Street, occupied by Nicholas Skolneski, was damaged.

April 13—Residence occupied by Nick Komerski, 622 Talbot Avenue, was damaged. No insurance carried.

ADDITIONAL INFORMATION CONCERNING FIRES

Chatham, Ont.—April 3—Dwelling-house of Joseph E. Gore, situated on Concession 3, Lot 14, Chatham township, was destroyed. Estimated damage, $1,500 on contents and $2,000 on building. Insurance carried in the Gore District Mutual Fire Insurance Co., Galt, $275 on contents and $500 on building.

Kingston, Ont.—April 5—McMahon Block, at the corner of Bagot and Brock Streets, was damaged. Fire started in the paint shop occupied by Wm. Savage at 131 Brock Street. The total amount of insurance carried is $45,750 on building and contents, and the loss on the insured portions will be $11,147, with about $1,000 on contents, not insured. This loss and insurance includes the building and contents of the brick garage, owned by F. Bibby and occupied by Geo. Boyd, immediately to the east of the Savage store on Brock Street, and the garage, owned and occupied by Geo. Boyd, immediately to the north of the White office on Bagot Street, where some slight loss was sustained in both cases.

Montreal, Que.—March 18—Buildings, machinery and stock belonging to the Barrett Co., Ltd., were damaged. Estimated loss, $76,000. Insurance carried in the following companies: Alliance, $10,000; Atlas, $5,000; Fidelity-Phœnix, $5,000; Fidelity Underwriters, $2,500; General of Scotland, $4,000; Guardian, $10,000; London and Lancashire, $10,000; Niagara, $3,500; North British Mercantile, $5,000; Northern, $7,500; Occidental, $2,500; Yorkshire, $10,000; Union of Canton, $5,000; British Crown, $5,000. Total, $85,000.

Winnipeg, Man.—April 7—Central car barns of the Winnipeg Electric Railway Co., at Main Street and Assiniboine Avenue, were destroyed, together with some equipment. Loss estimated at $400,000, made up as follows: Building, $50,000; twenty cars, $300,000; four sweepers, $32,000; two work cars, $1,000. Cause, supposed to have been an explosion. Property fully covered by insurance.

Parliament Has Made Little Progress Thus Far

Grand Trunk Bill Held Up—No Important Bill Yet Passed—Senator Lynch Staunton Wants Sellers of German Goods Identified—Preparations for Canada-West Indies Conference — Settlement of Debts With Germany

(Special to *The Monetary Times*)

Ottawa, April 22nd, 1920.

UNLESS parliament moves faster than it has during the past few weeks, it will be in session all summer instead of proroguing May 24th, as has been the general talk. Not one of the important measures of the session has received third reading. The Franchise Bill is still in the committee stage, while the new Grand Trunk bill has developed considerable opposition and so far no progress has been made. There have been rumors that the forces which nearly defeated the measure last session in the upper house, will again be rallied, but it is doubtful if there will be much more than a protest from the senators, who are opposed to the whole principle of government ownership. The chief weakness of those antagonistic to the government's policy is that they have no reasonable alternative. There are still no signs of the budget. It is expected, though, that it will be delivered about May 1st. There is lots of talk, but no real information as to the nature of the budget. Ministers, though, seem confident that it will meet with the approval of the house and the country outside of extremists.

The senate, indeed, has been stirring up more excitement than the commons. The senators have tackled that ancient problem, divorce, and have already given second reading to a bill to provide for divorce courts for Ontario and Prince Edward Island. This would leave courts for every province except Quebec, which it is proposed to exempt.

Sale of German Goods

Senator Lynch-Staunton stirred up a real storm in the senate, with a bill which proposes to compel all merchants who sell German goods to put up signs to this effect. Before the debate was finished it ran far from the original subject, Senator Fowler, who was the centre in his day of many an acrimonious debate in the commons, clashing with Senator Beaubien over the war record of France and England and over the merits of Lloyd-George as a statesman.

The bill of Lynch-Staunton proposes to amend the Criminal Code so that "every person who knowingly deals in goods, wares or merchandise, which are, in whole or in part the growth, product or manufacture of Germany or Austria-Hungary, shall keep posted in letters easily legible over every outside entrance to his premises the words, 'Dealer in German Goods' and shall print the words prominently in all his advertisements and stationery." The penalties proposed are six months imprisonment or five hundred dollars fine or both. The law is not to apply to goods in stock at the time of the passing of the act. The bill did not meet with much encouragement on the grounds that it was impractical of enforcement even if desirable, which was questionable.

Plans are being completed at the present time for the coming conference between Canada and the British West Indies, which will be held in Ottawa shortly, it is hoped before the house adjourns. The Imperial government will be represented and Canada and the West Indian governments are conferring with the Mother Country as to the date and as to other particulars. The conference is an outgrowth of a meeting in February at the Barbadoes of the Associated Chambers of Commerce of the West Indies. All of the British West Indies, British Honduras and British Guiana were represented. At this meeting a resolution was passed suggesting that questions of mutual interest to Canada and the West Indies be taken up as soon as possible. The Canadian government was consulted and was in hearty accord with the suggestion. An order-in-council was passed recommending the calling of the conference.

Connections with West Indies

The questions of an increase in the preferential tariff and better steamship accommodation will be the chief ones discussed. The British West Indies favor an extension of the preference passed in 1912. There is a strong sentiment in the Islands, since the war, in favor of dealing within the Empire and they want to see an extension of the commerce between the West Indies and Canada. Wrapped up with extension of the preference is the question of steamship service. Increased business is useless without accommodation. There is a strong feeling that there is no reason why some of the government owned steamers could not be put regularly on these lines to serve this trade and develop Canadian commerce. They have been running irregularly with much success for the past year. In addition to freight service the Islands would like to see better passenger accommodation. They want the Canadian tourist trade, but tourists want high class accommodation. F. C. Keefer, M.P., under secretary of external affairs, recently returned from a trip to the Islands an enthusiastic booster for them as a winter resort for Canadians. He pointed out that Canadians spent $20,000,000 annually at American resorts. He advocated keeping this money within the empire. This question will be discussed. Another question will be better cable service. At present the cable between Jamaica to the Leeward Islands, Trinidad and British Guiana is out of commission. The question of political union is also likely to arise, but there is no strong sentiment at Ottawa in favor of annexation. Commercial annexation is about as much as can be accomplished at the present.

Liquidating German Debts

Methods for settling debts with Germany have been prescribed by an Order-in-Council just passed. A system of clearing offices has been established. The Canadian clearing office will settle all transactions through a central office in Great Britain. Canadians are compelled to resort to the above machinery for settlement of debts on pain of a fine up to $5,000, or imprisonment for five years. All Canadian creditors must file their claims with the public custodian within six months of April 14th. Canadians who may have German claims against them must, if they admit the debt, pay the amount to the custodian within three months of the date of the Order-in-Council. If a Canadian debtor disputes a claim he must within a month of notification submit documentary evidence for disputing the claim.

Interest on debts is calculated at five per cent. dating from August 4th, 1914, till date of final payment.

By agreement with any of the allied or associated powers, the provisions of the order may be made applicable to debts owing to, or by their nationals resident in Canada.

By part two of the order the custodian shall take over all German assets in Canada, including all property, rights and interests belonging to enemies before January 10th last. Corporations must notify the custodian within three months of all shares, stocks, debentures, or other obligations held for or by enemies. All such assets will be credited to Germany through the clearing office.

NORTHERN ALBERTA IS VERY BACKWARD

Sowing Commenced in Few Localities—Acreage Will Probably be Decreased—Business Not Affected Seriously—Boards of Trade to Meet in Calgary

(Special to *The Monetary Times.*)

Calgary, April 22nd, 1920.

SEEDING has started in Alberta in a few localities, but up to this date conditions are very backward, and seeding will be not at all general under the most favorable circumstances until May 1st and after. Northern Alberta is considerably more backward than the southern part of the province. There is ample moisture in the ground to insure the seed getting a good start when warm weather comes. The acreage will in all probability be considerably decreased.

No one is feeling at all pessimistic in Alberta. Business men in Calgary are well satisfied at the outlook. Business in retail and wholesale lines is better than in any past spring season. The manager of one large implement firm in Calgary told *The Monetary Times* that their sales this spring were considerably in advance of any past year, and that their cash receipts showed a marked increase.

The loss of live stock in Alberta has been a serious matter for many farmers on account of the greatly prolonged winter and heavy snow and the shortage of feed. However, the losses, when compared with the number of head of cattle in the province, is comparatively small. The census in December gives the number of head as 1,691,582. The government is doing all possible to provide relief.

Boards of Trade Conference

An important conference of western Boards of Trade is to be held in Calgary on May 18th, 19th and 20th, when many matters of importance will be discussed, among them the following: Policy of railway development in Western Canada; colonization; development of pulp industry; iron developments; the National Highway; development of interprovincial trade; development of foreign trade, via Pacific routes; Canadian deep waterways.

Conditions in Medicine Hat were found in a healthy condition. All of the large plants there are working to full capacity.

The Alberta Foundry and Machine Co., Ltd., who, during the past several months, have been making extensive additions to their plant in the way of tools and equipment, and have undertaken the manufacture of the "Canadian tractor," recently delivered the first machine of this kind made in Western Canada. The demand for the tractor is already exceeding the supply. With the exception of mechanical oiler, magneto, carburretor and radiator, all of which are patented, the tractor is entirely manufactured here, which marks a new epoch in the kerosene tractor industry, this being the only firm actually making the tractor west of the Great Lakes. They expect by the end of the year to be turning out ten tractors daily. The plant now represents an outlay of one quarter of a million dollars.

SEEDING IN WEST WILL BEGIN WITH RUSH

Backward Spring Will Mean Quick Work for Farmers—Livestock Situation in West is Serious—Spring Outlook Favorable

Moose Jaw, April 17th, 1920.

THE backward spring season in western Canada is over at last, as the weather is bright and warm in this district at the time of writing. Seeding should be general by the end of April, and no apprehension need be felt as to getting the crop sown. There will, probably, be some decrease in acreage, but considering land that was blown out the previous year and was under summer fallow last year there may not be much difference.

A serious aspect of the situation is the large loss of livestock. A government representative buying hay informed *The Monetary Times* that a conservative estimate would place the loss at 100,000 head of cattle and horses lying dead in the fields in Alberta alone at the present time. Usually, he said, when the farmers turned their stock loose in the fall they would find them in the spring quite fat, but this winter being so long and severe has entailed great loss and hardship to the stock. The governments are doing everything possible to rush relief to the area without feed, but in many cases it is too late. This week hay was reported selling in Edmonton for $70 a ton.

The spring outlook is now looked on as favorable, and old timers predict a good crop in western Canada. Business in Moose Jaw and district is good and there seems to be plenty of money in this important railway and distributing centre.

Losses Probably Exaggerated

The Calgary Board of Trade is more moderate in its estimate of the loss of livestock. In a statement just issued it points out that most reports about losses sustained or gains made in Alberta are exaggerated, or at any rate random estimates, and no doubt the statement about the number of cattle shot is no exception. It must be kept in mind that there has been quite a serious shortage of feed in the province this year, due not only to a backward growing season in 1919, but also to the prolonged snow season, which has exceeded anything experienced since settlement was developed here. Statement says:—

"The livestock situation of Alberta at the end of December last year gave the number of cattle in the province at that time as 1,691,582 head. The loss of 7,000 head, while serious for those actually sustaining the loss, is such a small percentage of the total holdings as to be scarcely worth notice. We would be inclined to place the percentage of loss on cattle in Alberta during this past season considerably higher, and would still feel that no serious concern need be felt for the future of the industry."

The Saskatchewan Department of Agriculture issued its first report on 1920 crop conditions on April 19. Seeding operations, it says, will be considerably delayed owing to the late spring opening and general fall of snow experienced around the 15th instant. In many places, especially in the north, snow is still lying on the level to a considerable depth. With good weather from now on, seeding operations should be general in about ten to fifteen days. From the reports received there appears to be a sufficiency of seed grain throughout the province, but the feed question is causing some anxiety and will be a big factor in determing the prospective acreage. Estimates given on the acreage to be sown to wheat show that a decrease of from twenty to twenty-five per cent. is likely; weather conditions will, however, affect this to some extent.

MANITOBA FARMERS IMPATIENT OVER DELAY

Wet Weather Now Retards Spring Work—Province's Fire Loss Greatly Increased—One Big Union Out of Favor, but Other Labor Problems Arise

(Special to *The Monetary Times.*)

Winnipeg, April 22nd, 1920.

INDICATIONS point to great increases in the amounts loaned under the rural credits plan of provincial government this year. The number of societies is now forty-nine, and additions are being made every month.

Wet weather during the past two days has interfered seriously with work on the land. Fair progress has been made all over the west, but farmers are becoming impatient over further delays. Predictions of heavy decrease in grain acreage are premature, because plenty of time is still available for satisfactory results in sowing.

Labor Difficulties are Acute

The Winnipeg Electric Railway Co. has definitely rejected the request of motormen, conductors and gas-house employees for big increases in wages. The amount involved is about $1,500,000, and the company will not even consider the proposals advanced. The matter may come before the Joint Council of Industry for Manitoba, now being organized.

Wage increases of 20 to 25 per cent. have been announced by Provincial Fair Wage Board to govern all contracts for government work this season.

The visit of Tom Moore, president of the Trades and Labor Congress of Canada, was a feature in labor circles this week. Plans for rehabilitating labor unionism in the eyes of the law are being devised, and plain intimation is given that the One Big Union element will be denied any measure of support or recognition. Meanwhile, the One Big Union refuses to recognize the Joint Council of Industry, with which the Trades and Labor Council is prepared to co-operate actively.

Manitoba Fire Loss Increased

Manitoba government reports show 122 fires in March, with estimated damage of $175,996. For three months the total is 360 fires, with loss of $449,000, compared with 312 fires and loss of $258,900 for the same period last year.

BANK LOANS TO MUNICIPALITIES

Bank credits to municipalities are steadily increasing, the total at the end of February showing an increase of nearly $16,000,000, as compared with the previous year, and an advance of over $6,000,000 over the previous month. It is usual at this time of the year for these loans to increase, and more so this year in view of the fact that municipalities which, during he war, cut down their expenditures to the minimum, and refrained from making improvements, are now compelled to make large outlays. As the Canadian bond market is not in a position to take care of its usual part in this new financing, banks are called upon to undertake more than their usual share. The following table, compiled by *The Monetary Times*, shows bank loans to municipalities since 1917:—

	1917.	1918.	1919.	1920.
January	$24,487,272	$40,015,466	$32,640,198	$46,147,388
February	26,121,324	43,535,628	36,830,183	52,690,790
March	29,877,911	50,652,061	41,993,305	....
April	35,931,996	55,685,350	47,911,199	....
May	39,700,191	57,728,226	50,356,227	....
June	42,757,673	58,000,424	52,349,353	....
July	43,989,207	56,589,173	54,455,738	....
August	43,940,176	56,662,931	57,536,867	......
September	42,721,563	47,977,472	57,033,309	....
October	41,204,781	46,275,106	56,116,897	....
November	36,459,598	40,865,358	52,703,363	......
December	36,353,039	30,684,052	42,635,290	....

PRINCE EDWARD ISLAND PUBLIC ACCOUNTS

Deficit of $139,228 on Ordinary Account for Year 1919—Capital Expenditure Totalled $68,477

RECEIPTS and expenditures of Prince Edward Island for the year ended December 31st, 1919, were submitted to the provincial legislature last week. The figures are as follows:—

RECEIPTS.

	Ordinary receipts.	War and health tax.	Total receipts.
Dominion subsidy	$372,181	......	$372,181
Public lands	802	......	802
Provincial secretary's fees	1,623	......	1,623
Prethonotary's fees	1,048	......	1,048
Registrar of deeds, Charlottetown	5,147	......	5,147
Registrar of deeds, S'Side	2,408	......	2,408
County court fees	293	......	293
Fines and penalties	35	......	35
Falconwood hospital fees	7,130	......	7,130
Private bills	400	......	400
Peddlers' licenses	560	......	560
Casual revenue	499	......	499
Fire insurance co.'s	5,100	$ 1,700	6,800
Life insurance co.'s	2,193	731	2,925
Accident and guarantee co.'s	320	106	426
Loan and trust co.'s	337	112	450
Banks	6,273	2,091	8,364
Telegraph co.	375	125	500
Express co.'s	300	100	400
Electric light co.	100	33	133
Miscellaneous co.'s	1,212	404	1,616
Income tax	5,280	1,745	7,025
Land tax	37,808	13,985	51,794
Fox tax	4,954	1,485	6,439
Succession duties	3,038	962	4,001
Motor vehicles, etc.	13,369	2,904	16,274
Refund	42	......	42
Prohibition commission	13,448	......	13,448
Total ordinary receipts	$486,284	$26,488	$512,772
Less motor vehicle tax (net transferred to public works department)	11,343	2,904	14,247
Ordinary receipts	$474,941	$23,584	$498,525
Interest, etc., on sinking fund investments			8,333
			$506,858

Expenditures

The expenditures were as follows: Administration of justice, $29,473; boards of health, $4,304; coroners' inquests, $158; department of agriculture, $28,804; department of education, $187,699; department of public works, $163,353; department of provincial secretary-treasurer, $6,204; elections, $5,623; executive council, $3,714; Falconwood hospital and infirmary, $119,684; interest, $50,801; legislation, $11,233; library, $1,402; miscellaneous grants, $14,646; motor vehicles, $2,026; paupers, $3,884; postage, $1,392; Prince of Wales' visit, $2,770; provincial auditor's department, $1,907; provincial building, $5,804; public lands, $420; registry office, $6,106 telegrams, $64; telephone extensions, $518.

This makes a total ordinary expenditure of $652,000. In addition, there was an aprpopriation of $10,470 for sinking fund. Capital expenditure was $62,698, and war expenditure, $5,778.

COBALT ORE SHIPMENTS

The following were the shipments of ore, in pounds, from Cobalt Station for the week ended April 16th:—

O'Brien Mine, 64,595; La Rose Mine, 60,000; Mining Corporation of Canada, 260,860. Total, 385,455. The total since January 1st is 4,495,438 pounds, or 2,247.72 tons.

PROBLEM OF SILVER CURRENCY

With Increase in Value of Silver, Silver Content in Coins Worth as Much as Coins—United States Makes a Profit

IN view of the action of the Dominion government decreasing the silver content of Canadian coins, some comments in a recent issue of the "Home Bank Monthly," are instructive. "Before the war," says the article, "when silver could be bought by the government for 60 to 65 cents the ounce there was a big profit in minting, since an ounce of silver could be stamped into coins to the face value of approximately $1.38. Ottawa states that with silver costing $1.34 an ounce, coins as at present struck, contain silver to the amount of their face value. In the United States, however, in the fiscal year for 1912, the American government made a profit of $4,500,000 by buying silver at the market price, around 60 cents the ounce, and minting it at a face value of $1.38 cents the ounce. The profits in Canada for the same period, under a similar formula, would likely be in the same proportion, or around 125 per cent. But Canadian coins are minted with 92½ per cent. pure silver, as against 90 per cent. fine for United States coinage, the profits of the Canadian mint may, therefore, be estimated as smaller. Ottawa says 'in the neighborhood of one-half the face value,' which would be 100 per cent. when silver could be bought at 60 to 65 cents the ounce.

Disappearing from Circulation

"With the rate of exchange standing 10 per cent. against us there is money to be made in buying up Canadian silver coins, a dollar's worth for 90 cents in American money, and melting them down for the pure silver when the metal has a ready market value of $1.34 the ounce, as quoted during the first two weeks of the present month. Silver coins have been disappearing most unaccountably from circulation, so the government must either make melting unprofitable or continue to mint at a loss, with the impossibility of keeping an adequate supply of small money in circulation to meet the demands of domestic trading.

"The Treasury Department of the United States had a difficulty of this nature to contend with, some years ago, in the disappearance of gold coins from the sphere of circulation. Gold, being a standard of value, is minted at a loss. The face value of gold coins represent the intrinsic value of the metal, and when gold coins begin to disappear from circulation, it is an indication that the metal is at a premium for some purpose other than its monetary value. It was discovered that some manufacturing jewelers were melting down eagles and double eagles to be made into carved and designed brooches, rings, chains and similar highly fashionable notions. Without a word being made public in the matter, the authorities added a few particles of a very hard, non-fusible metal to the gold formula, and the first jeweler who got one of these pieces in his laboratory found that the metal would not work up for his purpose—the foreign, harder particles resisting the tools of the engravers and giving a broken surface that would not polish smoothly. Thereafter there was a notable decline in the volume of American gold pieces that went into the industrial melting pot.

Our High Standard

"Just what Ottawa will do for the conservation of Canadian silver in circulation is not indicated in current reports. Our standard is at present 12½ per cent. above Straits Settlement coins, but these never did pass at their face value in Canada. In the past there has been a varying and arbitrary discount on these coins, and if we lower Canadian silver coins to the same basis of fineness, our international exchange will go to a lower figure, for silver money, than under the present circumstances.

"If the price of silver advances, or continues high, all nations will have to consider readjusting their minting formulas to a newer and lower standard. In the meantime, owing to the adverse rate of exchange, the Canadian authorities are faced with an exceptional difficulty in the situation, since they cannot cheapen the intrinsic value of silver coinage to meet conditions which are not permanent. The suggestion occurred to a prominent merchant on Yonge Street, interviewed on the subject, that our 5-cent pieces might be coined of nickel-silver and our copper coins made smaller—we could get along nicely with a two-cent piece, it appeared to him, of about the size of our present 'copper.' Our present cent piece is much above the American weight of metal. But we have to consider that any change in the size or weight of our circulating coins will put the owners of stamp and other vending machines to a heavy expenditure in altering mechanism gauged to the present standards.

The "Shinplaster"

"A return of the historic 'shinplaster,' which was first put into circulation in 1870, under general authority of the Act of 1868, with the object of supplying the deficiency caused by the withdrawal of American silver, of which there had been a great quantity put into circulation during the preceding ten years, may be an advisable expedient. The main objection to paper money, under the dollar denominations, is that it must be made in a thoroughly distinct design and size to keep it from being confused with the notes of regular issue in the course of handling and counting. The authority we quote declared that, apart from the inconvenience of becoming accustomed to a new kind of money, silver might be withdrawn from circulation, except for silver-nickel 5 and 10-cent pieces, and paper money issued for 25 and 50-cent values against a reserve, to cover the amount of issue held at Ottawa. Our authority held that it would be a better plan, in the present circumstances, to take up small paper money, on demand, with silver bullion, than to coin silver, for circulation, at a loss.

"Metallurgists may possibly invent a method of preventing the melting down of our silver coins, for the illicit profit to be made from re-selling the pure silver they contain by introducing into the present alloy some metal that will make the process of melting more expensive and the profit, therefore, smaller and less certain. But in the meantime, pending a solution of the problem, our government is in the business of making up raw material at a loss, and buying it back again, in its original form as raw material, at a higher price than it receives for the same commodity in its manufactured form.

"Severe penalties are fixed by the Criminal Code for melting coins of the government mint. The punishment of any guilty party would have a salutary effect."

NORTH BRITISH AND MERCANTILE INSURANCE

Established in 1809, the North British and Mercantile Insurance Co., of Edinburgh, Scotland, is one of the oldest insurance organizations in the world. It was also one of the first to enter Canada, having started here in 1862. As the figures shown elsewhere in this issue indicate, its Canadian investments now exceed $5,000,000, those west of the great lakes being over $1,000,000. According to preliminary figures of business in Canada, the company's gross premium income for fire insurance in 1919 was $1,308,421, compared with $1,279,296 for 1918. The net premium income was $1,079,632. The net amount of business in force is $144,575,764, approximately the same as at the end of 1918. Losses paid during the year totalled $481,484, a ratio of 45 per cent.

The head office for Canada is in Montreal, Randall Davidson being the manager for Canada. A northwestern branch is also maintained in Winnipeg, C. A. Richardson being the branch manager.

The statement of the Occidental Fire Insurance Co., which is controlled by the North British and Mercantile, has already been reviewed in these columns. This is a Canadian company, with head office in Winnipeg, and has been making good progress in the west. As it is a young company, a conservative policy is being pursued, the profits for 1919 being entirely transferred to profit and loss account.

GOVERNMENT FINANCE AND BUSINESS ACTIVITY

DEMOBILIZATION of the Canadian army is now completed, and other war activities are ceasing, with highly desirable effects upon our national budget. For demobilization alone $350,000,000 was required in the fiscal year ended March 31, 1920, whereas, for the fiscal year now commenced only $38,000,000 is required. The contraction in government expenditures from $900,000,000 last year to $537,000,000 for the current year will have far reaching effects upon business. Any supplementary provision for further expenditure is not likely to be on a generous scale, if the evident paring of ordinary appropriations may be taken as evidence of parliament's determination to keep as far as possible within the limits of the revenue from taxation and other ordinary resources. Discussing the effects of these reductions upon general business, the April letter of the Canadian Bank of Commerce says:—

"Further public borrowing for purposes that do not actually increase the nation's capacity for effective production will add to the burden of the annual tax-bill, which must be substantially increased if ordinary expenditure is to be met by current revenue. The estimated expenditures for the current year, amounting to $537,000,000, include fixed charges of $159,743,511, of which $142,281,000 is required for charges on the public debt, as compared with $14,000,000 for the fiscal year ending in 1914. Last years' borrowings added $35,000,000 to fixed charges, in the form of interest. For government services $281,000,000 is required and for capital expenditures $97,000,000. Excluding capital expenditures, the sum of $440,000,000 will be required, or $82,000,000 more than the estimated revenue for the current year, and to meet capital expenditures the government will again have to resort to borrowing on a considerable scale.

"During this year and next it is quite obvious that the distribution of government moneys within the Dominion will be on a rapidly diminishing scale. During the war and since its close, in order to meet the resulting obligations, it was necessary that the government should make large demands on the public in the form of loans and taxes, and the distribution of these moneys has created and sustained a phenomenal demand for goods, which cannot be expected to continue unless the resulting purchasing power is replaced by funds derived from trade and production. Perforce the large borrowings of the government had to be made in Canada and this is a fortunate circumstance, as the major portion of the present year's interest bill will be paid to Canadians, and this will add to the funds available for reinvestment. The advancing rates of interest which capital now commands will not only encourage re-investment, but will tend to restrict borrowing to sound commercial purposes and to necessary public ones. This latter tendency is now evident and provinces, municipalities and industries are all wholesomely cautious in entering upon capital expenditures.

"The effect upon business, of the cessation of the government's war outlay, lends unusual interest to the forthcoming budget statement, which is expected to disclose the nature of the new taxation which will be necessary, and also the policy of the government in connection with such capital expenditure as may be deemed requisite. In anticipation of changes which may affect them adversely, traders who sell directly to the consumer are manifesting more than ordinary caution, and their purchases are being more and more limited to immediate requirements. Distributors are requiring that their bills be met promptly, and retailers are striving to get their business on to a cash basis. These facts indicate growing apprehension of a contraction of credit, but as yet there are no signs of serious price declines, or of slackening demand. The market is barer of dry-goods to-day than a year ago, although in the meantime the stocks accumulated for the armies have been absorbed. Textile prices, except for linens, receded in the early months of last year, but since May the advance has been steady and is still uninterrupted. Canadian textile manufacturers find in the Dominion an adequate market for their output, and have not striven to sell abroad where prices are more attractive than in the domestic field."

GAS AND OIL FIELDS IN THE WEST

INCREASING difficulty in securing fuel supplies for domestic and industrial use makes a report on investigations in the gas and oil fields of Alberta, Saskatchewan and Manitoba, just issued by the Geological Survey of the Department of Mines, valuable at the present time. These fields are already extensively utilized in Alberta, and the distance of Manitoba and Saskatchewan from any coal mining area makes the investigation of local possibilities very desirable. Power, or fuel to produce it, has always been necessary for the upbuilding of great manufacturing industries and in late years has become necessary also to the industries connected with the production of food. By the introduction of internal combustion engines and the rapid development of their use in transportation and traction as a substitute for animal power, the tilling of large areas on the plains has been made possible without a corresponding increase of man-power. The increase in the use of these engines in agriculture and for war purposes has made great demands on the store of light oils and has made the search for new oil fields a matter of national importance. The presence of natural gas in Alberta led to the exploration of that field for oil reserves and numerous exploratory wells were drilled. Unfortunately, many of these were located on badly selected sites; but a few were so placed that they have demonstrated large extensions to the known gas fields of the plains.

In the early history of the plains little value was attached to the presence of gas unless it was so situated that it could be piped to centres of large population to be used as fuel to replace coal; but the importance of these gas reserves and, therefore, of the areas in which they may be found is now constantly increasing as new ways are discovered of utilizing the gas at the wells.

Natural gas was accidently discovered more than twenty years ago in a well drilled for water at Alderson (Langevin) on the Canadian Pacific railway and another well was bored at Cassils; but the flow at these wells was not important. Small seepages of gas in the bed of the Saskatchewan River led to the putting down of shallow wells near Medicine Hat and in the report of the Geological Survey for 1900 it is stated that the gas from two wells with a pressure of 115 pounds was being used for lime-burning. These wells were comparatively shallow, with small flows. Deeper drilling was undertaken and a better supply of gas was obtained at a depth of 1,000 feet. By 1904 there were six wells producing gas and the industrial development of the town began. Two wells were bored at Langham and three at Edmonton about 1905, but these proved unproductive. Wells in which a little gas was found were also bored at Calgary. Greater success attended boring on the anticline south of Langevin and Cassils, where the Bow Island well gave an enormous flow. This well was completed in the latter part of 1908 and interest was again aroused in the Calgary field, but the Geological Survey advised against drilling at the city, recommending rather that the western edge of the syncline be tried. The next well, unfortunately, was not located near the edge of the syncline, but very near Calgary, and was unsuccessful. In 1913, an anticline was located at the western edge of the syncline, on the south branch of Sheep Creek, and in accordance with advice previously given, wells were bored on it by Calgary interests. Oil of high grade was struck over the small area which constitutes the present Sheep Creek oil field.

The oil boom of 1914 will long be remembered on account of the indiscriminate locating of oil leases without reference to the structure of the underlying rocks and the consequent very large useless expenditure in drilling. The general absence of favorable structure areas in the disturbed belt of the foothills has directed attention to the plains, where the formations are only gently folded, and a little oil has been obtained in the Peace and Athabaska valleys and the presence of gas proved at various places. A more extended study of the general structure, than has yet been made, is necessary before the extent of the new fields can be predicted.

In the general geological study of this very large area, dependence has had to be placed very largely on information gained from the beds out-cropping at the surface; and existing geological maps have been prepared with the view, mainly, of showing the possibilities of the occurrence of coal within reach of the ordinary mining operations. It is true that, from careful observation of the attitude of the beds at the surface, the attitude of the beds beneath can be inferred, since a great thickness of apparently quite conformable strata underlies the plains; but, as perfectly evenly deposited beds are rare, variations in thickness must be looked for and the only absolute check on the thickness must be got from drilling records. Consequently the aid of the drillers was sought, who, although at first reluctant to furnish the information, have now come to realize the benefit that follows the collection and correlation of these records and are more readily responding. Although the records contain details of a large number of wells, the deep wells are too few to permit of deductions being made with certainty in regard to the structure of the lower horizons.

TAXATION OF PUBLIC PROPERTY

RADICAL changes in industrial life make radical legislation necessary to conform to the new conditions. During the past ten years utilities have been acquired wholesale by the provinces and municipalities of Canada, with substantial loss to municipal revenue. To cease exempting such public property from municipal taxation would be a reform fully justified by this new situation. In the case of a municipal utility such taxation would merely mean crediting the municipal treasury at the expense of the utility department, and would, therefore, be a simple matter of accounting, where the property was owned by the federal or provincial government it would be new revenue for the municipality. In either case it would mean that the publicly owned utilities would have to be self-supporting, as they are intended to be, and services would not be rendered partly at the expense of the general taxpayer.

Such a reform has been proposed by C. F. Swayze, M. P.P., labor member for Niagara Falls, of the Ontario legislature. The main clause of the bill presented by Mr. Swayze, and now before the House, provides: "Notwithstanding anything in the Assessment Act, the Power Commission Act, or any Act contained, all the real or personal property owned or leased or controlled by or vested in the crown in a municipal corporation or commission or in trustees or in any person or body acting for or on behalf of a municipal corporation or on behalf of the Crown and operated as or used, controlled or held in connection with the operation of a public utility shall be liable to assessment and taxation for municipal and school purposes including local improvement purposes in the municipality in which it is situated as if the said property belonged to a private person."

"With the public ownership principle being more widely applied, as it should be," says Mr. Swayze, in support of his measure, "it is desirable that the principle that municipal taxes should be paid, be adopted. The federal Government is taking over the C.N.R., and the G.T.R., and may lease some of the lines to the Hydro, but full taxation should be paid, as now. The Associated Chambers of Commerce have recommended this change in the law. A number of members on the Opposition side have promised me their support."

* * * * *

Compensation to injured workmen, payable under the Ontario Workmen's Compensation Board, is to be increased from 55 per cent. to 75 per cent., with a minimum of $12.50 per week, according to plans of the provincial government. Increased burial expenses are also to be allowed, and provision made for supplying artificial limbs and eyes to disabled workmen. A pension of $40 per month for widows and $10 for each child is also planned.

FOREIGN BUSINESS

Much attention is being directed at the present time to export business. This Bank has a number of foreign branches as well as close working arrangements with banks of the highest standing in many other countries which enable it to offer special facilities in the financing of trade with foreign points.

J. P. BELL - - General Manager

PERSONAL NOTES

Mr. W. H. Davis has been appointed treasurer of the city of Hamilton. He was formerly Dominion Income Tax officer for the city.

Mr. Ralph Pearson, a Winnipeg barrister, has been appointed deputy provincial treasurer of Manitoba, succeeding Mr. W. J. Ptolmey.

Mr. John Wilson, vice-president of the firm of Thomas Robertson and Company, Limited, was appointed a director of the Bankers' Trust Company, Montreal, at a special meeting of the board of directors of that institution.

Mr. J. M. Campbell will act as industrial commissioner for Kingston. Mr. Campbell is president of the board of trade, manager of the power plant at Gananoque which helps to supply Kingston with power, and is also manager of a flour mill at Kingston.

Mr. Robert Fleming has been elected president of the Canadian National Exhibition in succession to the late Mr. C. A. B. Brown. Mr. Robert Miller was elected first vice-president, Mr. T. C. Irving second vice-president, and Mr. S. McBride was added to the directorate.

Mr. J. G. Hay has been appointed assessment commissioner of the city of Winnipeg, succeeding L. W. Donley, who now heads the new provincial assessment commission. Mr. Hay came from Scotland to Winnipeg about fifteen years ago, and has been connected with the city assessment department practically since his arrival. With Mr. Donley on the Manitoba Assessment and Taxation Commission will be Professor A. B. Clark and Mr. Robert Forke. Professor Clark is head of the political economy department of Manitoba University, and has carefully studied the finances of the western provinces and municipalities; the Manitoba government has already consulted him frequently on questions of this kind. Mr. Forke is secretary of the union of Manitoba Municipalities, and has served on commissions to equalize provincial assessments.

Mr. H. C. Grout, general superintendent of the Atlantic division of the Canadian Pacific Railway, St. John, N.B., has been notified of his transfer to the Toronto office, where he will become general superintendent of the Ontario district. He will be succeeded in St. John by Mr. J. M. Woodman, Montreal, general superintendant of the Quebec division of the company.

Mr. A. G. T. Maclean has been appointed manager of the burglary department of the General Accident Assurance Company of Canada, Toronto. Before enlisting in 1915 for overseas' service, Mr. Maclean was in charge of the metropolitan section of the workmens' compensation and liability department of the Royal Indemnity in New York, previous to which he was in the Edinburgh offices, first of the General of Perth, and then for several years of the Guardian Assurance.

Mr. A. R. Lyle has been appointed manager of the automobile department of the General Accident of Canada, and the General of Perth, at their Toronto head office to succeed Mr. H. C. Strachan who has resigned. For the past ten years Mr. Lyle has been employed in the Toronto office of the Norwich Union Fire Insurance Society, Limited, of whose Canadian automobile department he was latterly in charge.

Mr. William Phillips has been appointed European manager for Canadian National Railways and Canadian Government Merchant Marine Limited, with headquarters in London, England. Mr. Phillips is a Canadian, having been born in Toronto, January 31st, 1870. He entered transportation service at an early age, and has had a wide and varied experience in railway and steamship work, which makes him particularly well qualified to fill the important position to which he has been appointed. Mr. Phillips was the first traffic official of the Canadian Northern in eastern Canada, having entered the service of the company in 1902 as general eastern agent. When the James Bay Railway began operating over the C.N.O. line, Mr. Phillips became general freight and passenger agent, and was in 1910 appointed acting traffic manager, Canadian Northern Steamships Limited. From November, 1914, to September, 1916, Mr. Phillips was European traffic manager for C. N. Railways and Steamships in London, England. When the Cunard Company acquired the Canadian Northern Ocean steamers, he returned to Canada and was appointed freight traffic manager of eastern lines, but left the service at the end of the year to become executive agent in Canada of the Cunard Company.

OBITUARIES

Mr. Frederick M. Gray, Coldwater, Ont., died in Toronto, on April 15. The late Mr. Gray had been lumber manager of the Chemical Company for years.

Mr. George H. Milne, of Hamilton, died on April 9. The late Mr. Milne was born in Aberdeenshire, Scotland, in 1845. He was for many years a building contractor in Hamilton, and was well known through his interest in civic affairs. He was a member of the city council for three terms, and had later served as a member of the Board of Education.

Mr. James Livingston, Baden, Ont., died on April 14. The late Mr. Livingston was born in Scotland, in 1838, and engaged in the flax industry after coming to Canada. For many years they carried on flaxseed and oil manufacturing at Baden. In addition to being president of the Dominion Linseed Oil Company, Mr. Livingston was interested in the Yale Flax Company. He was one of the pioneers of the flax industries in Canada, and the plant at Baden is widely known.

Investments and the Market

Liquid Assets of Sawyer-Massey Company Reduced by Over $200,000—Progress of Associated Gold Fields — St. Maurice Paper Company Current Assets Now $3,332,898 — Monarch Knitting Profits Increased — Satisfactory Year for Canada Machinery Corporation

Goodwin's, Ltd.—At the annual meeting of the company on April 15, in Montreal, the following officers and directors were re-elected: J. W. McConnell (president), W. H. Goodwin and Hon. Lorne C. Webster (vice-presidents), Dr. Milton L. Hersey, Lt.-Col. Clarence, F. Smith, John W. Ross, Lt.-Col. C. W. MacLean—all of Montreal, and G. S. Mays, of St. John, N.B.

Monarch Knitting Co., Ltd.—The report of the company for the year ended December 31, 1919, shows net profits of $386,686, compared with $351,654 in 1918. The balance sheet shows that while cash on hand has been reduced from $139,847 to $1,559, Victory bond holdings have been increased from $30,000 to $330,000. Real estate, plant, machinery and equipment, less $247,149 for reserve for depreciation, are valued at $715,155, against $700,089 last year. Liabilities to the shareholders include dividend of 4 per cent. on common shares, amounting to $51,000, and bonus of 2 per cent., amounting to $25,500.

Associated Gold Fields Mining Co.—The annual statement of the company for the year ended December 31, 1919, shows that current assets were $1,087,395, including $504,788 for cash on hand and in bank; Victory bonds, $93,833; notes receivable, $450,000; Goldfields, Ltd., current account, $35,818; sundry debtors, $2,965. It is estimated that current assets at the end of March would be over $1,100,000. Current liabilities at the end of 1919 amounted to $679,938, including accounts payable, $6,897; wages accrued and unpaid, $4,266; received on account of stock not issued, $688,774. Development expenses during the year were $273,069, while organization expenses amounted to $1,217,724. Fixed assets including all properties, etc., now total $1,032,809.

Lake Superior Corporation.—In a circular to stockholders, the corporation has announced full terms of the proposed settlement, discharge and release of all defaults upon the Algoma Central and Hudson Bay Railway, and Algoma Central Terminal bonds, details of which were contained in these columns on March 26. The share capital of the Algoma Steel Corporation, one of the subsidiaries, will be re-organized as follows: 125,000 shares 7 per cent. cumulative preferred stock, par $100—$12,500,000; 165,000 shares 5 per cent. cumulative 2nd preferred stock "A," par $100—$16,500,000; $65,000 shares 5 per cent. cumulative 2nd preferred stock "B," par $100—$6,500,000; 400,000 shares common stock, par $25—$10,000,000.

Ottawa Street Railway.—After considerable discussion on the street railway purchase bill, the private bills committee of the Ontario legislature, has decided that the question be resubmitted to the Ottawa electorate before the railway acquisition is consummated by the city.

The railway commission has issued judgment authorizing increased fares on the Britannia line of the railway. An extra fare of five cents is authorized from Holland Ave., clear through to Britannia, a summer resort situated three and a half miles from Ottawa, and an extra fare of five cents on the easterly extension from Cloverdale Ave. to Rockliffe rifle range. Holland Ave. is approximately the city limits on the west and Cloverdale Ave. the boundary on the east side of Ottawa.

St. Maurice Paper Co.—For the year ended December 31, 1919, operating profits after deduction of all expenses of manufacturing, administration and selling, amounted to $1,329,622, as against $1,168,489 in 1918 and $1,060,853 in 1917. After adding other incomes, the total income amounted to $1,418,805. After the usual deductions for depreciation at $426,029, up from $332,185 in 1918, and other charges unchanged from the previous year, a balance of $855,342 remained, out of which interest charges were paid, leaving earnings for the year at $716,924, as compared with $562,300 in 1918, and $595,148 in 1917. When increased dividends at $187,500 were paid, and care taken of a balance of discount on securities written off of $153,000, surplus remaining was $376,424, against $499,800 in 1918, and $595,148 in 1917, and after adding in balance from the previous year profit and loss balance amounted to $1,779,139 against $1,401,715 in 1918, and $901,915 in 1917.

The balance sheet reveals an increase in current assets of $3,332,898, compared with $2,757,680 the previous year, and current liabilities of $877,537, comparing with $1,040,080. This left net working capital at $2,455,361, as against $1,717,600 in the previous year, an increase of $737,761.

Canada Machinery Corporation.—For the year ended January 31, 1920, net profits, after payment of bond interest, amounted to $128,144, compared with $277,101 in the previous year. With $100,880 carried forward from the previous fiscal year, there was available for distribution $229,025, from which was taken $42,175 for preferred dividends at 7 per cent., $58,875 for common dividends at 5 per cent., compared with 2 per cent. in previous year, and $24,778 for depreciation of buildings, plant, etc. The balance carried forward shows little change at $103,197. New equipment added to plant during the year called for a capital expenditure of $63,300, while the Hamilton property was sold for $50,000. Current assets are slightly larger at $547,445, compared with $526,000, while current liabilities are slightly less at $36,377, as against $41,612. The reserve for depreciation now stands at $225,053, and total assets are $2,446,328, as against $2,424,467. The annual report says:—

"In view of the large volume of secondhand machinery which has been offered for sale at sacrifice prices, the results of the year are better than we anticipated, and we think will be entirely satisfactory to the shareholders. As to prospects for the current year, it is very difficult to make any forecast, although sales to date show a marked improvement over the same period last year."

Tretheway Silver-Cobalt Mine, Ltd.—Total assets of the company now stand at $1,414,506, as against $1,224,143 a year ago. Total revenue on operating account of $169,294, compared with $254,038 in the previous year, but profit on operating account was only $31,814, compared with $106,872 in the previous year.

President Wickeld in his report said: "The company's financial position has been strengthened since the first of the year by the sale of the Trethewey Mine at Cobalt for $100,000, which should give ample funds, if required, for the development of the various Castle properties. The fact that work at Gowganda is now practically on a self-sustaining basis gives added interest to these operations and their results during 1920."

Manager I. S. McReavy added: "No developments were done during the year, all underground work being confined to extending the old stopes and taking out remaining pillars. The high price of silver made possible the extraction of this ore at a small profit. A total of 21,676 tons of ore was broken in stopes, and 29,416 tons treated, from which 137,334 ounces were extracted, including a recovery of 26,634 ounces from tailings. The fall in the assay value of the mine run of ore was so marked during 1919 that little more than the cost of operating could be obtained during the last two months of the year. The sale of the company's assets at

BANK BRANCH NOTES

Seven New Branches Announced This Week—Merchants Bank Will Erect Modern Building in Montreal

The following is a list of branches of Canadian banks which have been recently opened:—

Toronto (Danforth and Main)	Bank of Toronto
Calgary, Alta.	Dominion Bank
Abbotsford, B.C.	Bank of Montreal
Vancouver Heights, B.C.	Canadian Bank of Commerce
Toronto (Dawes Rd. and Danforth)	Union Bank of Canada
Newtonbrook, Ont.	Sterling Bank of Canada
Rimouski, Que.	Banque d'Hochelaga

The Standard Bank of Canada will open a branch in London, Ont., in May.

The Canadian Bank of Commerce will open a branch at the north-west corner of Queen St. and University Ave., Toronto, as soon as the existing leases expire.

Merchants Bank New Head Office

The Merchants Bank of Canada will erect a new head office in Montreal next year. The new building will occupy the site of the present bank premises, together with that of the adjoining Fraser-Nordheimer Building. The frontage on St. James Street will be rather more than double the frontage of the existing bank building. The structure externally, and the arrangements internally, will be of the most modern type in every way.

The growth of the business of the bank has been such during the past three or four years that the staff have found their quarters decidedly cramped, and as the leases of tenants of the building have expired, the space thus surrendered has been taken over by different departments of the bank, so that at the present time, the building is largely occupied by the latter. Offices that are now occupied by tenants will all be taken over by the bank for their own uses on May 1st, after which date the whole building will be used by the bank only. The new building will be used exclusively as a bank office, none of it being leased to tenants. The new premises are expected not only to supply the existing needs of the institution, but to meet requirements for many years to come.

With the construction of this building and that of the Royal Bank of Canada, opposite, together with the present Canada Life and Molsons Bank Buildings, St. James Street will have a four-cornered quartette of financial buildings that will be quite notable.

Personal Appointments

Mr. J. A. Brillant has been appointed manager of the new branch of the Banque d'Hochelaga at Rimouski, Que.

Mr. W. Hastie, formerly assistant inspector at Winnipeg, has been appointed assistant manager of the Canadan Bank of Commerce, Montreal, in place of Mr. E. L. Beck, who has retired from the service. Mr. F. M. Gibson, formerly manager of the Canadian Bank of Commerce, Kingston, has been appointed manager at Havana, Cuba. Mr. R. T. Brymner, formerly manager of the Canadian Bank of Commerce, Lethbridge, has been appointed manager at Kingston, Ont. Mr. S. H. Bray, formerly manager of the Canadian Bank of Commerce, Star City, Sask., has been transferred to Swan River, Sask. Mr. A. D. Harris has been appointed manager of the bank's new branch at Vancouver Heights, B.C.

Mr. B. E. Elmore, formerly of the Dominion Bank, Moose Jaw, Sask., has been appointed manager of the Dominion Bank's livestock business, Calgary, Alta. Mr. Murray Burger, formerly manager of the Dominion branch, Moose Jaw, Sask., has assumed the management of the main Calgary branch, succeeding Mr. A. M. Cowie, who has been transferred to Windsor, Ont. Mr. Norman Evans, formerly manager of the Dominion Bank, Windsor, is taking up a position with the head office of the bank of Toronto.

Mr. H. A. Flemming, formerly manager of the Bank of Nova Scotia, Halifax, N.S., has retired from active branch management, but will continue to act as secretary to the board of directors. Mr. E. F. Macneill, formerly manager of the Bank of Nova Scotia, Regina, has been appointed manager to succeed Mr. H. A. Flemming. Mr. D. A. Y. Merrick, formerly manager at Saskatoon, Sask., has been appointed manager to succeed Mr. E. F. Macneill, Regina. Mr. O. L. Ferriss has been appointed to succeed Mr. D. A. Y. Merrick at Saskatoon.

WEEKLY BANK CLEARINGS

The following are the Bank Clearings for the week ended April 22, 1920, compared with the corresponding week last year:—

	Week ended Apr. 22, '20.	Week ended Apr. 24, '19.	Changes.
Montreal	$121,204,311	$ 87,730,725	+$ 33,473,586
Toronto	110,539,556	54,774,638	+ 55,764,918
Winnipeg	46,053,795	31,910,240	+ 14,143,555
Vancouver	17,386,905	9,909,900	+ 7,477,005
Ottawa	9,328,800	5,229,601	+ 4,099,199
Calgary	8,321,838	4,655,804	+ 3,666,034

Canadian Railways and Railway Expenses*

Comparison of Costs and Revenue Over Fifty Year Period—Ton-Mile Statistics Since 1907—Increased Costs Met by Increased Efficiency—Recent Jumps Too Great, However, and More Revenue Necessary

By D. B. HANNA

IN trying to establish when the high cost of living began to affect the operation of Canadian railways, I came across the interesting fact that away back in 1875 the railways of Canada, on the average, got more for each ton of freight transported than they have received in any year since then, up to and including the year ended June 30th, 1918, which is the last year for which the government statistics for all Canadian lines are available.

Beyond any doubt, the average distance the freight was hauled in 1875 was less than in 1918, as in 1875 there was no transcontinental line. The Grand Trunk was in operation from Sarnia to Rivière du Loup. The Intercolonial was nearing completion between the latter point and Halifax; a considerable part of the through I.C.R. line, which was opened in 1876, was already in operation. Canada, in all, had 4,804 miles in 1875. The cost of running a train one mile was about 90 cents, and as this subsequently declined, and was not exceeded until 1901, it would appear that the period between 1890 and 1899, which has been taken by the Department of Labor as a basing period, would be suitable also for a starting-point measuring the rise in the railways' cost of living.

Operating Methods Improved

Unfortunately, the recognized basic statistical units, the ton mile (i.e., moving one ton of freight one mile) and the passenger mile (moving one passenger one mile) were not incorporated into Canadian railway statistics until 1907, when the government adopted new forms of report, based on those in use in the United States, so that for the period from 1875 to 1906 we cannot measure the efficiency of railway operation in Canada with any great accuracy. We find, however, that in 1875, on the average, a locomotive moved only 5,786 tons of freight and 5,296 passengers, whereas in 1906 the average locomotive moved 19,773 tons and 9,549 passengers. When this information is coupled with the facts that the average earnings per ton carried showed a decline, whereas the earnings per freight train mile showed a steady move upwards, a pretty good indication is obtained that the advances in methods of operating, which more reliable bases of comparison now enable us to measure relatively accurately, were also being carried on during this period, and, of course, this we know to be the case.

By 1907 the cost of running a train one mile had advanced to $1.249, or an increase of 57 per cent. over the average cost for the years 1890 to 1899, inclusive.

Increased Costs Offset by Improvements

On account of proper statistical data not being available prior to 1907, that year must be the starting-point for a more careful analysis of the rising cost of operation. From 1907 to 1918, for a period of eleven years, the operating record is one of which the management and employees of Canadian railways may well feel proud. In the face of the increases in the cost of labor and every known commodity, the fact that the railways, year by year, up to and including 1917, were able to practically offset increases in expenses by economies of operation, and with an average revenue per ton per mile that declined, were able to generally increase the net earnings per mile is remarkable. When the magnitude of the increases that have taken place, pertaining particularly to the railways' expenses, is considered, it is evident that the work which has enabled this to be done must be ranked as one of the greatest achievements of the age.

Perhaps it is appreciation of the price at which the freight transportation service of this country has been performed by Canadian railways during the last decade that makes me less pessimistic than some economists as to whether the lines constructed and on which this wonderful record has in part been made are an asset or a liability to the country.

Average Return Low

The following table shows the very low average return the railways got for moving a ton of freight one mile during the period. This unit is generally regarded as the mean of all freight rates:—

Rate in decimals of 1 cent.

1907	.815	1911	.777	1915	.751
1908	.723	1912	.757	1916	.653
1909	.727	1913	.758	1917	.690
1910	.739	1914	.742	1918	.736

While individual groups, of course, paid higher class rates, yet when all the tonnage handled is considered, this is the return the railways got, and represents the cost to the public of the freight movement in Canada per ton per mile.

How Railways' Expenses Went Up

During this period (1907-1918) Canada absorbed 16,427 miles of main track mileage. I say "absorbed," because the records show that the average utility of all the lines (which is in a sense a measure of absorption) has increased. The freight density, which is the term used for the number of tons hauled one mile per mile of line, increased from 518,485 tons in 1907 to 798,093 tons in 1918; and, while passenger density fell off a little, it is well known that passenger travel was not encouraged during the war. The travel in 1919 was heavy, and, no doubt, the utility of the lines in respect to passenger business on the average has now been restored.

While a general idea of the magnitude of the railway development may be obtained from noting that the operating expenses of the railways increased from a total of $146,738,214 in 1907 to a total of $273,955,436 in 1918, yet, to make a fair comparison, it is necessary to get down to suitable unit bases.

Total operating expenses per mile of line increased by $2.425, viz., from $4.621 to $7.046, or 52½ per cent. The The average compensation of the individual railway employee increased from $473.50 in 1907 to $1,061.46 in 1918, or 124 per cent. The cost of fuel, which is the largest single item of material, increased from $2.69 to $5.17 per ton, or 92 per cent.

It should here be pointed out that these increases in expenses do not include the very much heavier expenses which were laid on the railways in Canada in the latter half of 1918 and in the year 1919 by reason of adopting the McAdoo scale of wage increases. To a certain extent these expenses will be reflected in the statistics for the year ended June 30th, 1919; these are not yet available, but later on in the article I shall deal with these expenses.

---

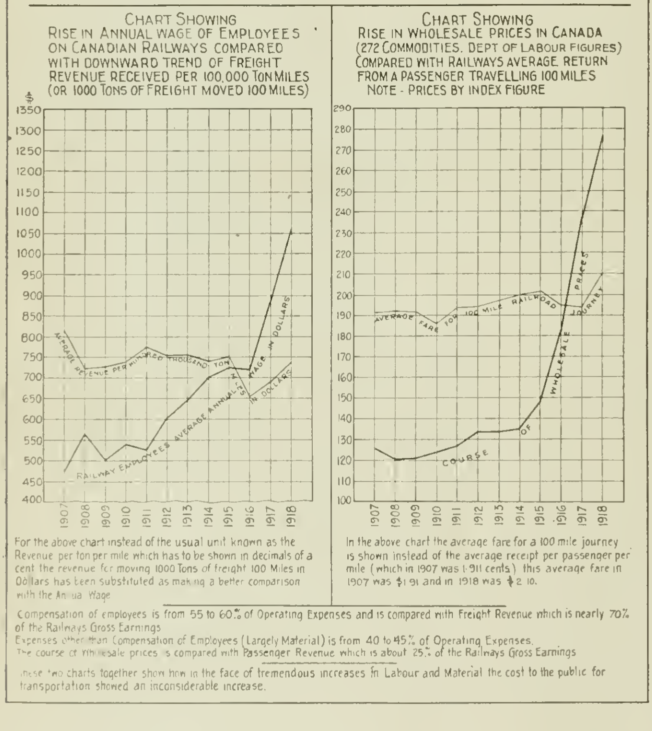
18-22 KING STREET EAST - - TORONTO

The following table shows how both maintenance and transportation expenses have increased per mile of line between 1907 and 1918:—

Operating Expenses.	1907 Expenses per Mile of Line.	1918 Expenses per Mile of Line.	Increase per Mile.	Increase %
Maintenance of way and structures.	$ 930.30	$1,327.58	$ 397.28	42.70
Maintenance of equipment	965.01	1,473.91	608.90	34.53
Transportation and other expenses	2,725.60	4,244.87	1,519.27	55.74
Total operating expenses...	$4,620.91	$7,046.36	$2,425.46	52.49

The managements of the railways were, of course, watching their individual performances, for which purpose they were not dependent on government statistics. The receipts per ton per mile and per passenger mile being basic, were compiled by all the important lines, together with other statistical data not required for the return to the government. The upward trend of expenses was carefully noted and plans were made to meet the situation.

COST OF RAILWAY LABOUR AND MATERIAL COMPARED WITH REVENUE



For the above chart instead of the usual unit known as the Revenue per ton per mile which has to be shown in decimals of a cent the revenue for moving 1000 Tons of freight 100 Miles in Dollars has been substituted as making a better comparison with the Annual Wage

In the above chart the average fare for a 100 mile journey is shown instead of the average receipt per passenger per mile (which in 1907 was 1·911 cents) this average fare in 1907 was $1 91 and in 1918 was $2 10.

Compensation of employees is from 55 to 60% of Operating Expenses and is compared with Freight Revenue which is nearly 70% of the Railways Gross Earnings
Expenses other than Compensation of Employees (Largely Material) is from 40 to 45% of Operating Expenses.
The course of wholesale prices is compared with Passenger Revenue which is about 25% of the Railways Gross Earnings

These two charts together show how in the face of tremendous increases in Labour and Material the cost to the public for transportation showed an inconsiderable increase.

Capacity and Costs

Into the cost of moving a train one mile enter practically all the elements of railway expenses. While the two men on the engine get paid more for operating a large locomotive as compared with a small one, the wage does not rise proportionately, and the trainmen's wages (a conductor and two others) are not affected by the size of the train. When operators have to come on duty at extra expense to deliver a train order outside their regular hours, the cost is the same for a twenty-five or fifty-car train. The unit for supervision, for meeting or passing on the road by other trains, involving delays and attendant overtime for dispatching from engine-house, for coaling and watering, is not considerably affected by the size of the train. In the maintenance of the locomotive, while the cost is, of course, affected by the size, it is not relatively increased, and largely on account of the heavier locomotives being of more recent design, the supplies used do not increase in direct relation to the size of the locomotive. All this was known to railway offiicals, and their energies have, therefore, been devoted to increasing the size of the unit of operation—the train.

The capacity of the freight cars was increased, and earnest efforts were made to educate the railways' employees to properly load the cars, and to get shippers to do so. "First load your cars, then load your engines," was a well-known maxim of good railroading. The average capacity of Canadian freight cars was increased from 27.3 tons in 1907 to 34.3 tons in 1918, or by 25.6 per cent. The average load in the cars was increased from 15.37 tons in 1907 to 23.09 tons in 1918, or by 50 per cent., and the average train loading increased from 260 tons in 1907 to 457 tons in 1918, or more than 75 per cent.

How this movement for the heavier train load was followed up by efficiency in motive power designing and by fuel-saving campaigns is well shown by the consumption-of-fuel records of the Canadian railways, which show a great improvement in the ton miles moved per ton of coal consumed.

Other Operating Improvements

Contributing factors to this have been the adoption of locomotives of greater hauling power, the application of superheaters to locomotives and improvements in the design of locomotives, particularly of valves and valve motion, also the use of mechanical stokers and coal-passers, and many other mechanical devices and attachments for engines and cars, including air-brake improvements, which have lightened the work of employees in engine and train service, and which have largely removed the element of personal fatigue, which was once such a limiting factor in engine and train operation. Roads that had heavy grades reduced them, and crooked lines had their curvature reduced.

While the result of improved operating methods is reflected in the greater car capacity, the heavier freight train load and fuel economy, yet attendant with these improvements came others that cannot be gauged by the government statistics. There are the heavier rail section, bridge structure of heavier loading standards, improved rail fastenings, without which the heavier locomotives and trains could not have been operated. The long train has made it necessary to enlarge passing tracks and terminal yards—the larger engine has required a new engine roundhouse.

In the interests of safety many railway crossings have been protected, and some eliminated. Large passenger terminals have been erected. All this improvement to the plant has been provided by the railways, by which travel has been made much safer and more comfortable. At the same time the cost to the public on a ton mile basis actually declined until 1918. In 1916 and 1917 the ton mile rate in Canada was lower than even in the United States, who claim to have the most efficient railways in the world; and, while due to a change in the fiscal year, a comparison for 1918 cannot yet be made, it is altogether likely that the Canadian rate is still below that of United States lines.

I have not made as much reference to passenger business, as it represents only about 25 per cent. of the gross revenue, and in a country so thinly populated, the problem of the service is largely one of providing a reasonable train service at a not too extravagant cost, as, except in a few

Will She Be Protected or Helpless?

Your wife will need protection against a host of influences when she faces the problem of investing the estate you leave behind.

See to it that she will have the proper advice and protection.

The Trust Company makes a business of investing funds and caring for estates. It would be of untold assistance to your wife in counselling her as to the safest investment channels, and in helping her choose the proper securities.

If you give her the advantage of this protection by naming a strong Trust Company as EXECUTOR and TRUSTEE of your will, she will one day be grateful for your forethought and prudence.

THE SECRET

Trust Companies started to do business in Canada with the formation of this Corporation in 1882. By the end of 1919, the total assets under administration by all the Canadian Trust Companies amounted to approximately Six Hundred Million Dollars, whilst the total assets of this Corporation exceeded One Hundred Millions. What is the secret of this wonderful growth? This—people everywhere are becoming alive to the fact that, for efficiency and economy, Trust Companies make the best Executors and Trustees. Write to-day for Booklet,

"Making Your Will."

cases, the volume of the traffic has not been such as to enable the same economic principles to be applied to it as in the handling of freight. The public are demanding steel cars, or at least steel-framed cars, for passenger service. Large numbers of these cars are being put into service, increasing the dead weight load, but forming part of the general progress being made in providing improved transportation.

Tonnage Hauled

In addition to the great advantages which the public have obtained from improved railway service, consider also the part the railways have played in the national development. Look at the new towns and villages placed on the map of Canada. Look at the industries which cheap transportation has built up; look at the increased production of all commodities. Here are the figures of the total tonnage handled by Canadian railways:—

	1907. Tons.	1918. Tons.
Products of agriculture	9,521,661	23,877,670
Products of animals	2,469,266	4,249,332
Products of mines	18,460,172	47,189,491
Products of forests	10,229,635	20,851,454
Manufactures	7,974,641	22,362,807
Merchandise	2,309,084	5,047,616
Miscellaneous	5,533,426	3,952,372
	56,497,885	127,543,687

N.B.—It is not likely that the decrease in miscellaneous tonnage indicates any loss of traffic, but rather a looser classification in the returns for 1907, which was the first year that this information was called for.

This tonnage is made up as follows:—

	1907.	1918.
Originating in Canada	42,381,731	68,385,790
Received from connecting roads	13,848,240	59,157,897

In 1918, of the traffic received from connecting lines, 34,039,620 tons was received from United States lines, steam coal for railways and industries, and hard coal for heating forming a large percentage of the tonnage.

Value of the Service

While the increase in tonnage shows a large development, an increase of 61 per cent. in tonnage originating in Canada, consider, if you will, the increase in the value of the commodities transported. This increase in value, of course, was made possible only by transportation; therefore, the value of the service performed by the railways in 1918 was surely very much more than in 1907.

It has been estimated that the value of the commodities transported by United States railroads in 1914 was $56 per ton, and that the value towards the end of 1919 was $119, or an increase of 112 per cent. The proportional relation of the various commodities making up the total tonnage of United States and Canadian railways is close enough to allow these values to be accepted for use in Canada. The Canadian government Department of Labor price statistics show the increase in wholesale prices between October, 1914, and October, 1919, to be 116 per cent., and between the years 1907 and 1913 to be 120 per cent.

The Present Situation

As previously mentioned, the 1918 railway statistics are for the fiscal year ended June 30th, and, therefore, do not materially reflect the benefit of the rate increases which took effect in 1918, as, in general, the increases were not effective until March 15th, 1918, and the increases on grain rates were not effective until June 1st, or for three and a half months and one month, respectively, of the fiscal year. Neither do the 1918 statistics include much of the large wage increases due to the adoption of the McAdoo award, which, initially and generally, became effective on August 1st, 1918, although the shopmen's increase dated from May 1st. Some other increases were retroactive to earlier dates. Designed to offset these wage increases, but—as it has turned out—entirely inadequate for the purpose, an additional increase in freight rates was authorized, effective August 15th, which was commonly known as a 25 per cent. increase, but which was coupled up with the previous increase, and therewith, to some extent, was utilized to equalize the freight rates in western Canada as compared with those in eastern Canada. So that, according to the best estimates we have been able to make, the total increase in freight tariffs generally was just under 30 per cent.

The McAdoo award was found to be a serial story instead of a complete novel—supplement has followed supplement, and the end is not yet; it may or may not be completed by March 1st, when the United States railroads are expected to go back to their owners.

Expenses Caught Up in 1918

From 1907 to 1917 Canadian railways collectively were able generally to increase their net earnings per mile of line, even though absorbing 14,982 miles of railway, but expenses mounted too rapidly to enable this to be done in 1918. For the year ended June 30th, 1918, the total net earnings, as compared with the previous year, fell from $87,880,842 to $56,264,714, decreasing the net per mile from $2,276.46 to $1,447.17, due to an increase in operating expenses over 1917 of more than $51,000,000. Had the estimated value of the first freight (and passenger) increase for an entire year been added to the gross of 1917, it would have produced an increase of only about $28,000,000, showing how inadequate was the relief granted to the railways at that time. The estimates of the McAdoo award increases and attendant expenses are in the neighborhood of $77,000,000, and against this the railways have been allowed the additional freight increase which was estimated to produce approximately $43,000,000, so that the two increases together fall short by about $57,000,000 of re-estabilshing the relation between gross and expenses that existed in the year ended June 30th, 1917, and it must be remembered that, due to the falling off in traffic, the increased rates have not produced as much additional revenue as was estimated.

Cure for Present Situation

An increase in freight rates is, therefore, the only solution of the present difficulty. Progress in advancing transportation methods to offset higher expenses will go on again in the future, but for the time being, with the traffic available, all known avenues of economy have been put into effect. The low rates enjoyed all these years should be appreciated. When the railways ask, as they must, for an increase in rates, the value of the service perfromed should be considered in the light of present-day values. The public should realize that the railways must be kept prosperous to give efficient service. Business must be developed and improved facilities must be provided, so that, when additional traffic permits, the progress which has been shown to have been made in operating methods may be continued, and the cost of producing transportation thereby reduced. In the end, the public will get the benefit, for experience has shown that, as the railways get more business, they take on additional business at lower rates.

With 52 per cent. of the railways owned by the people of Canada, there should be no hesitation in arriving at the decision that the railways should receive a return that will enable operating expenses and proper interest charges to be paid out of revenue received from transportation, provided, of course, that the country's railway properties are operated on an efficient basis. Comparative statistics will show whether this is the case or not.

The London and Western Trusts Co. will this year erect a new building on Richmond St., London, Ont.

DOMINION DEBT NEARING TWO BILLIONS

Gross Debt Over $3,000,000,000—Capital Expenditures Increased Largely by Advance of Over $27,000,000 in Public Works Account

THE total gross debt of the Dominion at the end of March, 1920, according to returns from the Department of Finance, was $3,014,483,774, as compared with $2,682,256,674 a year ago. The net debt at the end of the month was $1,935,946,312, as compared with $1,438,377,293 at the end of March, 1919, and $1,915,995,923 at the end of the previous month.

Ordinary revenue at the end of March amounted to $380,832,507, and ordinary expenditure, $340,880,668, compared with $305,230,808 and $196,073,805, respectively.

Expenditure on capital account for the twelve months amounted to $388,213,018, against $364,724,083 last year. The principal increase was in public works, including railways and canals, which account amounted to $44,547,271, compared with $16,873,913 a year ago, an increase of over $27,000,000. War expenditure shows a drop of nearly $4,000,000. The following is the official summary:—

A New York Banking Connection

MANY manufacturers and merchants outside of New York City find it advantageous, when consistent with their local banking connections, to maintain an account with this Company.

New York is the financial center of America; it is the center of America's foreign exchange business; it is the country's chief commercial market; it is the greatest port for foreign trade. A fully-equipped New York banking institution, working for your interests, can be of substantial assistance to you in many directions.

An account with this Company enables you to make settlements *direct* with New York funds. It puts you in close and immediate contact with the foreign banking facilities of the financial centers of the world. It opens to you the facilities for information and business service afforded by the forty departments of this Company, covering every domestic and foreign banking, investment, and trust function.

If it would not conflict with your present banking arrangements, we should be glad to discuss with you personally or by correspondence the advantages of a banking relation with us.

Booklets describing our various services will be sent on request

LETTER TO THE EDITOR

PROPERTY LOSS PER CAPITA IN ONTARIO CITIES

Sir,—In your issue of March 26th, 1920, on page 22, you summarize the address given by James White at the annual meeting of the Commission of Conservation held shortly before in Montreal.

No one will, I imagine, be found willing to dispute Mr. White's conclusion that to the control of fires in large manufacturing and mercantile establishments we must look for any appreciable reduction in the fire waste of the Dominion. Undoubtedly, this is the "solar plexus" of the system and the best thought of the most seriously minded and energetic fire preventionists should be turned to its careful consideration.

Figures Do Not Agree

But when Mr. White furnishes a table of statistics giving the property loss and the per-capita loss of the chief cities and towns of Canada for the year 1919, there is room for question, for the obvious reason that the reports upon which the statement is based are of necessity only estimates, not determined and actual figures.

Further, so glaring an error crept into the quotation of the figures for the city of Toronto that I can only conclude something has gone awry. Mr. White's figures for Toronto are: Loss, $401,155; per-capita loss, $0.80. Our figures for Toronto are: Loss, $1,156,995, or $755,840, more than his, and the per-capita $2.15 against his $0.80.

Comparison for Ontario Cities

We should have preferred delaying any effort to correct Mr. White's figures until we had actually closed our registers for the year, a task we expect to conclude within the next thirty days; but in view of the discrepancy in the Toronto figures I have thought it better to prepare an analysis from our books as they now stand, and the following statement applying to the chief cities and towns of Ontario will, I trust, be helpful in determining the actual results for 1919:—

FIRE LOSS IN ONTARIO FOR 1919

		Our Figures		Mr. White's Figures	
City or Town.	Population.	Total Property Loss.	Property Loss per Capita.	Total Property Loss.	Property Loss per Capita.
Belleville	12,000	$ 25,178	$ 2.09	$ 10,024	$ 0.81
Brantford	26,601	58,260	2.19	33,552	1.10
Fort William	20,000	481,780	24.09	461,623	23.08
Galt	13,000	85,277	6.56	41,231	3.38
Guelph	18,974	14,527	0.76	9,321	0.53
Hamilton	110,137	258,837	2.35	251,632	2.33
Kingston	23,023	67,025	2.95	55,425	2.41
Kitchener	19,380	34,098	1.76	33,461	1.06
London	60,000	102,202	1.70	92,897	1.54
Niagara Falls	11,715	65,036	5.55	31,730	2.64
North Bay	9,413	34,468	3.66	16,019	1.58
Ottawa	110,000	211,121	1.92	175,380	1.37
Owen Sound	12,612	5,786	0.46	3,939	0.30
Peterborough	20,904	42,411	2.02	35,977	1.62
Port Arthur	17,000	165,616	9.74	140,842	9.38
St. Catharines	19,189	70,356	3.66	71,906	3.68
St. Thomas	17,200	33,657	1.95	7,434	0.43
Sault Ste. Marie	23,000	94,069	4.09	65,053	2.95
Stratford	17,373	37,875	2.18	33,247	1.75
Toronto	539,000	1,156,995	2.15	401,155	0.80
Windsor	30,000	172,294	5.74	84,885	2.23
Woodstock	10,090	48,068	4.76	39,237	3.91

This statement is not given or offered in any spirit of criticism, but solely because the system of reporting fires and actual loss settlements to us enables us to maintain a fairly complete and accurate record.

Each month we publish the month's results by counties, and four of the largest cities, but many losses are only "estimated" and differences will be found between the actual figures of the settlement and the estimated figures. Once a year we prepare and publish a full revised statement which will not for this reason agree with the summary of the twelve monthly statements. We are now busy in closing our registers before compiling our annual statement, and as I have already said, I should have preferred waiting the conclusion of this work before correcting Mr. White's figures, but lest our "queen city" should rest under a misapprehended too favorable showing, we give the statement now with the remark that slight differences may, and doubtless will, be found when the definite figures are given out.

The population, based upon the latest available figures, is given in our statement as a matter of interest as showing the basis upon which our per capita calculation is made.

E. P. HEATON,
Fire Marshal for Ontario.

AN INDUSTRIAL RELATIONS' ASSOCIATION

The Massey-Harris Company's plan of annuities, benefits and industrial representation was described by Superintendent Gifford, of the company's Toronto works, at a meeting of the Employment Managers' Association, in Toronto, on April 10.

At an executive meeting of the association held the same day it was decided to adopt the name "Industrial Relations' Association of Toronto." Some of the members will attend the annual convention of the Industrial Relations' Association of America, to be held in Chicago in May.

GOOD DIVIDENDS ANTICIPATED

"It is becoming more and more evident that the spring will see a continuance of the contest between two opposing forces—on the one hand relatively high money rates and scarcity of capital; on the other hand, a keen demand for goods, large production and excellent profits for many companies." The present industrial situation is thus summed up by "The Income Builder," for April, a new monthly, issued by Graham, Sanson and Co., Toronto. "As affecting market conditions," continues the article, "these two factors work in exactly opposite directions. A scarcity of capital means high interest rates with resultant lower prices for securities and the limitation of speculation. But prosperous business conditons will tend towards good profits, and, therefore, liberal earnings for the various companies, with high prices for such stocks.

"The investor has thus the opportunity of apportioning his funds among two classes of securities—viz., high-grade bonds and certain preferred and common stock issues. Various conditions have been responsible for bonds selling at almost the lowest level they have ever touched. With the feeling, however, that these unfavorable conditions are fairly well discounted, it would seem that now is the time to hold down living expenses and put savings into long-term bonds at the prevailing high interest rate of 6 to 7 per cent.

"Bond prices cannot be expected to advance much until after commodity prices begin to drift downward. So far, there is little or no evidence of any such tendency. Increased production with accumulation of capital will bring about a slow decline in commodity prices; increased economy will result in larger savings, but unless these savings are judiciously used, we are not much better off. The great desirability of well-secured bonds, backed by satisfactory earnings, cannot now be too strongly emphasized. They are very cheap and their broad tendency over a period of years must certainly be upward. And the same is true of preferred stocks. The prosperous business man, who, instead of enlarging his operations or adding to his stock of goods, uses the money to buy bonds, will be making a wise move."

FAVOR PROVINCIAL CONTROL OF AGENTS' LICENSES

Saskatchewan Association Oppose Move to Have Dominion Issue all Agents' Licenses—Will Watch Legislation Carefully

LIFE insurance agents of Saskatchewan, now organized into the Saskatchewan Life Underwriters' Association, held their first annual convention in Regina on April 8. Over 60 agents were present, and T. F. Conrad, managing director of the Saskatchewan Life Assurance Co., occupied the chair. The gathering opposed the movement to have the licensing of agents placed exclusively under federal jurisdiction, and the following resolution was unanimously adopted:—

"Resolved that this meeting is of the opinion that the question of the licensing of agents should be left entirely in the hands of the provinces and that a copy of this resolution be sent to the superintendent of insurance for the Dominion, the superintendent for insurance for the province of Saskatchewan, J. A. Tory, chairman of the Dominion Life Underwriters' Association legislative committee, and every western underwriters' association and through the local associations to their federal member."

Special License for Life Agents

The following resolution, submitted by the Saskatoon association, was endorsed: "That the Saskatoon association recommend that the time has now arrived that blanket licenses shall not include authority to write life insurance, and that in future life insurance agents shall be specifically authorized as such. That it is further resolved, that every agent applying for authority to write life insurance shall be required to produce the endorsation of the company which he proposes to represent; that this resolution be submitted to all other Saskatchewan associations and to the superintendent of insurance at Regina; and we would further recommend that when an agent ceases to represent a company, his existing license terminates; and, further, that in the event of a company cancelling an agent's contract, the said company shall immediately advise the superintendent of insurance, and that before a new license is granted the said agent, the superntendent of insurance shall have in his possession evidence from the former company as to the said agent's conduct and standing."

Another resolution submitted by the Saskatoon branch, and approved by the convention, dealt with the constitution of the provincial association recommending that the provincial vice-president of the Life Underwriters' Association of Canada should be president of the Saskatchewan association, and that each local association should appoint a committee of three to be called together by the president of the provincial association.

Guard Against Unfair Legislation

E. S. Miller, of Regina, president of the Life Underwriters' Association of Canada, dealt with the progress of the business during the past few years and the factors contributing thereto. He declared that the life insurance business ranked among the three greatest businesses in Canada and the world, and from the point of view of service to humanity it ranked second to none. The association, he said, should be vigilant in watching legislation. Legislation which threatened insurance interests could be fought much more effectively by the association than by individuals. Especially should the association keep an eye on the tendency of provincial governments to look upon insurance premiums as legitimate prey for taxation.

Addresses were given by P. M. Anderson, on "Laws Governing Beneficiaries and Estates"; by M. D. Grant, actuary of the Sovereign Life Assurance Co., of Winnipeg, on "Policy Reserves and Dividends"; and by J. W. W. Stewart, managing director of the Monarch Life Assurance Co., of Winnipeg, on "Service." Discussions on "Fitting the Plan to the Individual," and on "Objections Met and How to Overrule Them," were led by George Sales, of Weyburn, Sask., and by Mr. Lerue, of Weyburn, respectively.

WE OFFER

$500,000

(Being part of an Authorized Issue of $1,250,000)

7% Cumulative Preferred Shares

Bankers Financial Corporation

LIMITED

Incorporated under the laws of the Province of Ontario

CAPITALIZATION

	Authorized.	To be Issued.
Preference Stock (Par Value $100)	$1,250,000	$1,250,000
Common Stock (Par Value $100)	750,000	750,000

General Purpose of the Organization

This Corporation has been organized to specialize in the purchase of conditional sales agreements from dealers in Automobiles and Trucks.

Due to the enormous expansion in the Automobile business, this Financial Service is as necessary to the industry as that of the Chartered Banks to the manufacturers.

This form of business was adopted some fifteen years ago in the United States, and has developed from an experiment into an acknowledged and proven success, having attained an outstanding and permanent position in the financial world. American Companies of the highest standing specialize in this class of commercial paper.

The demand for this financial service in Canada is, relatively speaking, the same as in the United States, and has attracted American Companies, enabling them to secure a large amount of Canadian business. The Bankers' Financial Corporation, Limited, is essentially an all-Canadian Corporation, and is already assured of practically all the business that it can take care of.

Prospects for Business

Government statistics show the number of licenses issued in Canada for the years:

1915.....87,675 1918....267,408 1919....334,190 1920 (Estimated)....395,000

If the above figures are considered in conjunction with the fact that the automobile industry now represents an investment of over $50,000,000 in the Dominion of Canada, and that in 1919 over 94,000 cars were manufactured, with sales amounting to over $100,000,000, the source from which this Corporation expects to derive its business can be determined very readily.

Security

The Preferred Stock of the Corporation carries a 7% Cumulative dividend and is preferred, both as to assets and dividends. The money is loaned to dealers to the extent of not more than 75% of the value of the car or truck purchased, and in many cases to only 50% of the value.

The Corporation has practically absolute security; i.e.:—

1. THE PURCHASER'S CONDITIONAL SALES AGREEMENTS.—Each purchaser is very corefully investigated before any money is advanced.

2. THE DEALER'S ENDORSATION.—The endorsation of only recognized and well rated dealers is acceptable.

3. LIEN ON THE CAR OR TRUCK.—The Corporation holds a lien on each car or truck until payment in full has been completed.

4. INSURANCE IN FAVOR OF THE CORPORATION.—The Corporation holds a policy covering each car or truck, protecting them against Fire, Theft, Transportation and Collision until payments are complete.

5. SPECIAL INSURANCE.—Covering all possible contingencies, wrongful conversion, etc.

The Corporation's funds are always in the most liquid state, no portion being invested in Real Estate, buildings, plant, equipment, etc.

Management

Mr. W. J. Hill, the Managing Director, has been connected with Canadian Banks for over 20 years. Mr. Stephen Haas and Mr. W. D. Ross, who will form the Management Committee with Mr. Hill, are well known in banking and industrial circles. Under their jurisdiction efficient and conservative management is assured.

Earnings

Judging from the earnings being made by American Companies doing this class of financial business, there is a sound basis for believing this Corporation's earnings will prove exceptionally gratifying to the shareholders.

It is estimated that the revenue derived from insurance sources alone will cover the overhead expenses of the Corporation.

THE DETAILS IN THIS ANNOUNCEMENT NEED CAREFUL THOUGHT BEFORE THE UNDERLYING POSSIBILITIES BECOME APPARENT.

After thorough investigation we recommend this offering as an investment combining security with a splendid opportunity for profits.

PRICE: PAR $100 PER SHARE, Carrying a 40% Bonus of Common Stock

A substantial portion of the offering has already been subscribed for; allotment of the balance will be made in the order subscriptions are received.

FULL DEPOSIT WITH DOMINION GOVERNMENT

WATER POWER DEVELOPMENT IN CANADA

2,418,000 Horse-Power Installed, of which 2,215,000 is Actually in Use—Ontario Leads in Developed Water Power, but Quebec Has More Unutilized

THE Dominion Water Power Branch, Department of the Interior, and the Dominion Bureau of Statistics, Department of Trade and Commerce, have through co-operation just completed an exhaustive census and analysis of the developed water power in Canada. The figures, which are complete to January 1st, 1920, are exceptionally interesting and are indicative of the marked manner in which the water-power resources of the Dominion are being put to advantageous use. Practically every great industrial centre in Canada is now served with hydro-electrical energy and has within easy transmission distance ample reserves of water power. Active construction in hydro-electrical enterprise is fast linking up the few centres which are still unserved, and which have water-power resources in their vicinity. In those localities where water power is not available, nature has bountifully supplied fuel reserves of coal, gas or oil.

TABLE 1—DISTRIBUTION OF DEVELOPED WATER POWER IN CANADA BY PROVINCES AND BY USE OF POWER (JAN. 1ST, 1920)

	DEVELOPED WATER POWER							
		Total Water-Wheel and Turbine H.P. Installed for Use in						
	Total Water-Wheel and Turbine Horse-Power Installed	Central Electric Stations	Pulp and Paper Industry	Other Manufacturing Industries	Total Horse-Power Actually Employed	Ultimate Designed Capacity of Plants now operating or under Construction, in H.P.	Installed H.P. per 1,000 Population	UNDEVELOPED WATER POWER
1	2	3	4	5	6	7	8	9
Yukon	13,199	10,000	......	......	11,349	13,199	1,467	100,000
British Columbia	308,167	211,043	46,962	46,094	276,795	350,832	429	3,000,000
Alberta	32,992	32,580	......	17	31,754	33,070	56	466,000
Saskatchewan	......	......	......	......	......	......	...	567,000
Manitoba	83,447	71,790	......	......	75,100	297,047	135	3,218,000
Ontario	1,015,726	794,621	158,095	99,230	934,015	1,460,920	360	5,800,000
Quebec	910,029	623,088	249,332	270,961	838,071	1,146,465	391	6,000,000
New Brunswick	18,080	9,378	2,693	6,009	16,657	29,115	49	300,000
Nova Scotia	34,323	4,064	16,183	12,276	29,359	52,202	66	100,000
Prince Edward Island	1,933	227	......	1,789	1,621	1,958	21	3,000
Totals	2,417,896	1,756,791	473,265	436,376	2,214,721	3,384,808	274	19,554,000

According to a recent computation, the water-power resources of the British empire have been placed at from 50 to 70 million horse power. This does not include such territories formerly under control of the Central Powers, as will fall in future under British influence. To this total Canada contributes in the neighborhood of 20 million horse power. This figure represents the power available at sites at which more or less definite information is to hand. Continued investigation will undoubtedly add to this figure.

According to the statistics just compiled there is installed throughout the Dominion some 2,418,000 turbine or waterwheel horse power (see Table 1) of which 2,215,000 h.p. is actually and regularly employed in useful work. The larger figure includes the total installed capacity at full gate, including reserve units. It does not, however, include hydraulic exciter units. A large number of the plants now operating are designed for the addition of further units as the market demands. The ultimate capacity of such plants, together with that of new plants now under construction, total some 3,385,000 h.p.

Of the total power installed, 1,756,791 h.p., or 72.7%, is installed in central electric stations. By central electric stations are meant stations which are engaged in the development of electrical energy for sale and distribution. Central station power is sold for lighting, mining, electro-chemical and electro-metallurgical industry, milling and general manufacturing. It is apparent, therefore, that the central station total listed in Column 3 (Table 1), includes a portion of the totals listed in Columns 4 and 5 as used in other industries. In the pulp and paper industry, 473,265 h.p. is utilized, of which 381,631 h.p. is generated directly from water in pulp and paper establishments, while 91,634 h.p. is purchased from hydro central electric stations.

Hydro power used for other purposes and other industries may be listed as follows: For lighting purposes, 434,613 h.p.; in mining industry, 177,728 h.p.; in flour and grist mills, 42,736 h.p.; in lumber and saw mills, 37,918 h.p.; in other manufacturing industries, 172,955 h.p. These figures are evidence of the widespread manner in which the Dominion's water power resources are being applied to the

The Cost of Smoking

Do you know that the cost of your two or three cigars—say a quarter a day---will maintain about $4,000 of life assurance for a man between 25 and 30?

You can afford to smoke, sure! But you can also afford an Imperial Life Policy to provide for your wife and little ones should death call you suddenly. For particulars write to

Totals	1,756,791	117,198	1,873,989	1,449,160	$369,464,961	$210

furtherance of its industrial development. In further reference to the foregoing total of water power developed in Canada, it might be noted that during the fiscal year ending March 31st, 1919, there were exported from plants included in tabulation, 175,000 h.p. years.

Tendency Toward Large Units

Table 2, analysing the number and capacity of the water wheels and turbines installed, is of considerable interest. The total installation of 2,417,896 h.p. is comprised of 3,370 units of an average capacity of 715 h.p. While 2,244 of these units are of 100 h.p. or under, they contribute only 82,204 h.p., or 3.4%, to the total. A total of 1,845,427, or 76.3% of the whole, is contributed by units of 2,000 h.p. and over; 1,391,025 h.p., or 57.6%, by units of 5,000 h.p. and over; 1,029,900 h.p., or 42.6%, by units of 10,000 h.p. and over; and 160,000 h.p., or 6.6%, by units of 20,000 h.p. and over. This table is illustrative of the modern tendency towards the installation of large units. Reference might be made in this connection to the 50,000 h.p. turbines which are contemplated for the new development of the Hydro-Electric Power Commission at Queenston.

The statistics in Table 3 refer to the developed water power used in connection with the central electric station industry. The central station industry has made great strides in Canada in recent years. A network of transmission systems, which are being rapidly extended from year to year, covers central and southwestern Ontario and southern Quebec. Other systems established in numerous centres from coast to coast are likewise rapidly extending their scope. Of the primary power used in the central stations throughout the Dominion, 91.4% is derived from water, evidencing in a striking manner the advantageous location of the water-power resources to industrial centres.

LIFE UNDERWRITERS OF MANITOBA MEET

A gathering of life insurance agents from all parts of Manitoba was held in Winnipeg, April 13 to 15. Walter T. Hart, of the Policy Holders Mutual Life, and former president of the Winnipeg Life Underwriters' Association, was chairman of the committee in charge, and J. E. S. Buchanan, now president of the association, occupied the chair. Mr. Buchanan is superintendent of agencies for the Monarch Life.

Among the speakers were Darby A. Day, Chicago representative of the Mutual Life of New York; Dr. E. S. Popham, medical referee of the Monarch Life; J. G. Stephenson, western manager of the London Life, who spoke on industrial insurance; E. S. Miller, of the Imperial Life, Regina, and president of the Life Underwriters' Association of Canada; D. J. Scott, of the Sun Life Assurance Co., Professor Warren, of Manitoba University; S. E. Richards, K.C.

PETROLEA CHAMBER OF COMMERCE

The twelve directors of the Petrolea, Ont., and district chamber of commerce, have chosen from their members the following officers for the current year: President, John McRobie; first vice-president, C. G. Walker; second vice-president, Fred Stonehouse; secretary, W. P. McDonald.

LENNOX ESTATE SUES FOR INSURANCE

Legal action is being taken by the Lennox estate, Hamilton, against accident companies, in which the late Mr. M. G. Lennox had policies to a total of $103,500. The companies claim that Mr. Lennox's death was not accidental. The evidence is not clear, as his body was not found in Burlington Bay until some months after he had disappeared. The companies opposing the claim are the Canada Accident Assurance Co., the Dominion of Canada Guarantee and Accident Co., the Employers' Liability Assurance Corp., Fidelity and Casualty Co., of New York, Imperial Guarantee and Accident Co., of Canada, Law Union and Rock Insurance Co., North American Accident Insurance Co., and the Travellers' Insurance Co.

HEAVIER TAXES ON BANKS AND CORPORATIONS

In the New Brunswick legislature on April 14, Hon. A. Byrne introduced a bill for further taxation of banks and corporations. Under this measure it is proposed to levy a tax on all corporations doing a fire insurance business in the province a tax amounting to 2 per cent. of the net premium, also a tax of $100 on each life insurance company, with an additional tax of 1½ per cent. on net premium; on other insurance companies a tax of 2 per cent. on net premium. Net premium was to be the gross premium received in the province during the year preceding May 1st, less reinsurance within the province and other deductions. As far as the banks were concerned, it was proposed to impose a tax upon their business. Each bank would have to make a return to the provincial secretary-treasurer on the last day of each month of the business done. The rate would be one-thirtieth of 1 per cent.

The minister estimated that the total amount to be received under the Act would be $30,000 or $40,000, or probably more. Telegraph companies would be required to pay 1 per cent. on total gross revenue on business arising within the province, and express companies ½ per cent. on gross revenue. Both telegraph and express companies pay provincial taxes under the present arrangements. Telephone companies would be required to pay 1½ per cent. on gross earnings, with an additional tax of 25 cents for each telephone under rental. The bill also contained provisions for collecting and making returns.

Associated Goldfields Mining Co., Limited

HEAD OFFICE - - - TORONTO
MINES - - LARDER LAKE, ONT.
CAPITAL - - - $5,000,000

Annual Meeting, April 16th, 1920

President's Address to the Shareholders:

To the Shareholders:—

Your Directors have much pleasure in submitting their report of the operation of the Associated Goldfields Mining Company, Limited, for the year ending December 31st, 1919. Accompanying the report are statements as to the physical condition of our mining properties at the time of this annual meeting, and reference to the company's development and construction policies.

It is with considerable pride that your Directors call attention to the enviable financial position of the company. At December 31, 1919, the company's liquid assets were:—

Cash on hand and in the banks	$ 504,778.44
Victory bonds	93,883.96
Notes receivable	450,000.00
Total	$1,048,662.40

Total liabilities were:—

Trade accounts payable	$ 6,897.32
Wages accrued	4,266.75
Total	$ 11,164.07

Of the authorized capital of 5,000,000 shares of a par value of $1., there remained in the treasury at the end of 1919, 1,073,588 shares.

To bring these figures closer to the date of this meeting, we have certificates from the banks, showing cash on hand at March 31, 1920, $737,580.55; Victory bonds, $87,821.84, and notes receivable, $275,000. Therefore, after large expenditures for labor, supplies, materials and equipment during the past three months, we had at March 31, approximately, $1,100,000 in liquid assets.

Mining Expenditures.

During the year 1919 more money was spent on developing the properties than in all previous years combined. The sum of $169,258.62 was expended, the chief expenses being wages, supplies, diamond drilling and freight. A large portion of this sum has been considered a capital expenditure and has been transferred to assets as capital development.

Mining Results Obtained.

Splendid results were obtained during the year, and the physical condition of our three main mining properties was greatly improved.

At Block "B" mining work has been carried on vigorously, and highly satisfactory results are being secured on the three hundred, four hundred and five hundred-foot levels. It is felt that development and exploratory operations should be carried on further before engineers draw conclusions as to the character and extent of the ore bodies and the type of mining and milling operations most suitable for their treatment.

High-grade Ore Bodies.

On Block "C" and "D," our endeavors to develop a large body of ore, approximating $5 a ton in value, have been very successful, and these endeavors have been unexpectedly satisfactory in that we have located and partially bounded two wide lenses of considerably higher grade ore.

Underground workings and diamond drilling have shown these high-grade lenses to have a known length of 2,000 feet each, and each averages from 50 feet to 150 feet in width. Diamond drilling shows these bodies to exist at least 500 feet below surface. The average value of these high-grade lenses, over the areas covered by these dimensions, is $11.15 a ton.

As development and exploration of these two high-grade lenses is still proceeding, and the boundaries have yet to be exactly fixed, it is not deemed advisable to present at this date an estimate of the total tonnage of high-grade ore here existing, but there is unquestionably sufficient high-grade ore to supply for years a mill of 2,000 tons daily capacity.

Low-grade Ore Bodies.

These high-grade lenses are enclosed in an exceptionally extensive body of low-grade ore, with a width of from 400 to 500 feet. The removal by selective mining of the high-grade material will not interfere with the later mining and milling of the low-grade material on the large scale originally planned.

The company now finds itself in the enviable possession of high-grade ore sufficiently proven and developed as to fully warrant the immediate commencement of a mill of at least 1,000 tons daily capacity. We possess enough ore of high value to assure profits from milling operations of this size, comparing well with the probable profits from the treatment of a much larger tonnage of lower grade material. Therefore, returns will result earlier than anticipated.

First 1,000 Tons Milling Unit.

The ground for the first milling unit of 1,000 tons daily capacity has been broken at Block "D," and actual construction begins at once.

A decision as to the building of an additional and adjoining unit of 1,000 tons depends on a study now being made as to probable labor conditions of the near future, and as to how far delivery of mine and mill equipment will be affected by the transportation facilities existing. Your directors desire to emphasize that the construction of first units is in the nature of steps toward the ultimate aim of gold mining plants of an aggregate daily capacity of 10,000 tons.

Railway Facilities.

The company's consulting engineer, in advising the construction immediately of the first milling plant, also advises that the most complete development of the properties and the largest production of gold of which our mines are capable, depends on the building of a branch line from the T. & N. O. Railway to Larder Lake, a distance of twelve to sixteen miles, according to which route is chosen. This question of railway facilities is under the consideration of your Directors.

To Develop Additional Power.

To provide sufficient energy for enlarged mining and milling requirments, as well as other demands, the Directors have decided to proceed immediately with the development of further hydro-electric power.

New 500-foot Shaft.

Work at Block "C" on the sinking of a three-compartment shaft has been commenced. The first objective is 500 feet. Stations, stoping-levels. electric tramming levels, ore pockets, etc., will be established at intervals. From this shaft will be developed and drawn a large part of the high-grade ore referred to above. As these bodies to a considerable extent have been opened and prepared for stoping in our existing underground workings, there seems every reason to expect that with the workings from the new shaft producing ore, a large tonnage will be accumulated when milling operations commence, and that a constant supply of ore will be maintained.

When weather permits the diamond drills will be brought from underground, and further exploration of ore bodies will be resumed from surface, the immediate object being to learn the total length of the high-grade lenses.

Accommodation for 500 Men.

During the past year the company constructed accommodation for 200 men, and these living quarters and dining-halls will compare favorably with the best in the mining districts of northern Ontario. As the scope of our operations is increasing rapidly, the company is proceeding with the construction of further quarters, so that, by summer, 500 men may be accommodated. Among the new buildings will be a private hospital, under the company's resident physician, and a number of cottages for the married men of the staff.

Appreciation of Staff.

The Directors desire to express their appreciation of the loyal and able services of all members of Associated Goldfields forces. The company is very fortunate in its possession of the services of Mr. A. J. Moore, the consulting engineer. He brought to his work with us the benefits of a long and thorough technical education and the experience gained in thirty years of managing some of the largest mining and metallurgical operations on this continent.

Dr. H. C. Cooke Engaged.

To its staff of mining engineers the company, your Directors are pleased to announce, has been able to add Dr. H. C. Cooke, who for many years was with the Geological Survey, Dominion of Canada. Dr. Cooke is now engaged in his duties as the company's geologist. Two other graduate mining engineers are also on our technical staff.

In conclusion, your Directors wish to assert that since our last meeting they have accomplished all that they set out to do, and much more than they anticipated doing. At the properties the discovery and development of gold-bearing bodies has exceeded their most optimistic expectations. In the important matter of financing the company to the stage where its mines are adding to the country's production of gold the Directors desire to say that their work is already completed. No further stock need be offered for subscription. On November 11th, 1918, the day of the armistice, the company had $5,000 on hand above the liabilities. At the time of our last annual meeting, on April 10th, 1919, the company had on hand $160,000. Since this last date approximately $260,000 has been expended at the properties, and to-day the company possesses cash, bonds and similar resources of $1,100,000.

With gold-bearing bodies of large dimensions, and profitable values proven, there remains the task of bringing the company's mines to the broadest stages of production and fullest return on investment. Now that ample financial resources have been secured, we have complete confidence that our mine management and forces will successfully accomplish this task.

G. A. MacKAY,
President.

For the Directors:

The Board of Directors was re-elected.

Geo. A. MacKay, President; A. A. McFall, Vice-President; A. Singer, J. Dinwoody, D. H. McCartney.

The following were elected members of the Advisory Board: James Langskill, Geo. H. Smith, A. N. Burns, Senator V. Ratz, G. M. Hendry, Capt. J. J. Walters, Jas. Dohson, Samuel Harrop, F. W. Fisher, Robert Smith, W. T. Taylor, Chas. D. McGregor, Walter Page, Orrin Kolb, Simon Sinclair, W. T. McClain, Alfred Singer, John H. Taylor, Dr. R. K. Anderson, M.P., Scott L. Cowley, B. Stone, W. H. Smith, W. H. Despard, J. Robinson, A. B. Rose, Henry Goldwater, J. A. Wilson, M.D., W. A. Johnson, William Schneider, C. W. Schiedel, F. Powell, A. J. Gough, Jos. Bamford, F. Gundy, .F Jacobi, A. Butler, S. W. Jenckes, H. H. Stevenson.

Associated Goldfield's Mining Co., Ltd.

ORGANIZED ACCIDENT PREVENTION IN CANADA

Organization Has Reached Advanced Stage — Automobile Accidents Too Numerous—Hazard of Dust Explosions in Mills and Elevators

THE first annual meeting of the Canadian National Safety League and the sixth annual meeting of the Ontario Safety League were held in Toronto on April 13th, 14th and 15th. After a business session, at which reports of committees, financial reports and the annual report were read, the convention entered upon an extensive program of addresses and discussions. The chairmen for the various sessions were: Tuesday afternoon, W. H. Shapley, Toronto; Wednesday morning, W. C. Coulter, Toronto; Wednesday afternoon, G. C. Martin, Hamilton; Thursday morning, Hon. W. R. Rollo, Hamilton; Thursday afternoon, Controller J. Gibbons, Toronto.

Addresses were given as follows: "Industrial Hygiene," by Dr. J. W. S. McCullough, Toronto; "Accident Prevention in the Steel Industry," by Thomas Fraser, Sault Ste. Marie, Ont.; "Elevators," by W. D. Black, Toronto; "Grinding Wheels," by A. Rousseau, Chippawa, Ont.; "Hazards in Grain Elevators and Cereal Mills," by B. H. Kepner, Port Colborne, Ont.; "Our Safety Week in the Border Cities and Its Success," by a representative from Windsor, Ont.; "Accident Prevention in the Rubber Industry," by H. S. Poole, Kitchener, Ont.; "Accident Prevention in the Automobile Industry," by Frederick W. Moody, Oshawa, Ont.; "Industrial Dust," by A. S. Leitch, Toronto; "Shop Lighting," by Kenneth A. McIntyre, Toronto; "Resuscitation" (Prone Pressure Method), by Wills Maclachlin, Toronto; "Accident Prevention in the Pulp and Paper Industry," by A. P. Costigane, Toronto; "Shop Safety Committees and Industrial Relations," by F. J. Gernandt, Hamilton; "Steam Railroad Hazards," by G. C. Martin, Hamilton; "Fire Prevention," by A. J. Mylrea, Toronto. Motion picture films, illustrating accident and fire prevention, were also shown.

Work in Ontario

The work carried on during the year was reviewed in the annual report, read by R. B. Morley, the general manager of the league. About $20,000 was spent in distributing bulletins to factories, car companies, schools, municipal officers, fire chiefs, etc. Among the manufacturers there are paid subscribers from sixty-three towns. School competitions have been held, and $200 distributed for essays; 150,000 letters to parents, asking for their co-operation, were issued; motion pictures were shown, demonstrating the prevention of accidents; nearly 200,000 pay envelopes slips on fire prevention have been issued; 135,000 cards to motorists; 101,000 industrial bulletins; 34,000 health bulletins; 140,000 electric railway bulletins and other letters and leaflets.

An outstanding feature of the convention was the address given at a luncheon on Wednesday by R. M. Little, director of the Safety Institute of America. Accidents always have causes, he said, which can be discovered and the accidents prevented. The safety movement, Mr. Little stated, first sprang up in the minds of enlightened employers, who considered that such work could be applied to save money and in the interests of humanity. They found that it paid in dollars and cents to prevent loss of life and limb. "I do not come here to propound a theory nor to advance a fad," he stated, "but to give you the benefit of our experience to help your work."

Of 20,000,000 workers in the United States previous to the war, Mr. Little stated that it had been found that 2,000,000 lost time through accidents every year, 750,000 lost four weeks or more, and 22,500 were killed. There were 18,000 who suffered permanent injuries. In addition, the losses paid out in compensation claims amounted to over $200,000,000, or nearly as much as the fire losses for a year. During the war the American losses in battle were 50,300, while 126,000 were killed in industrial accidents during the same period. In speaking of this toll, Mr. Little dwelt upon the need for production in basic industries, stating that the United States needed 5,000,000 new homes, and urged the need of conserving the most important item in production, the lives and limbs of the producers. He gave instances where industrial concerns had been able to show a big increase in production and a saving of money as well as of life by installing safety appliances. In his opinion, it would pay many manufacturers to scrap their antiquated plants and install safer and more modern factories.

Grain Elevators and Cereal Mills

In his address on the "Hazards of Grain Elevators and Cereal Mills," B. H. Kepner, chemist of the Maple Leaf Milling Co., of Port Colborne, Ont., divided hazards into two general classes. First, there were those, like unprotected machines, which cause injury, and even death, to the operator; and second, there were those which result in the total or partial destruction of the building, with or without injury to the operator. "The first class," he said, "has been quite fully protected, as far as elevators and cereal mills are concerned, and any accidents or loss of life from these causes could, in most cases, be classed as fully accidental. In the second class is included the fire hazard, which may come from an almost endless chain of causes."

The following officers of the Ontario Safety League were elected: Honorary president, Lieutenant-Governor Clarke; honorary vice-presidents, Mayor Church, Premier Drury, H. H. Dewart, Charles Booker, of Hamilton; Hon. G. Howard Ferguson; Mayor Fisher, of Ottawa; Mayor Little, of London; Tom Moore, Trades and Labor Congress of Canada; Sir Edmund Osler and Hon. W. R. Rollo; president, Sir John Eaton; vice-presidents, A. B. Ingram, Ontario Railway Board; S. Price, Workmen's Compensation Board; H. C. Cox, Dr. P. E. Doolittle.

Executive committee—A. H. Abbott, T. J. Burke, Chief Inspector of Factories; F. D. Burpee, Ottawa; C. A. Campbell, C. E. Chambers, H. H. Champ; Hamilton; A. P. Costigane, Ontario Pulp Association; W. C. Coulter, H. H. Couzens, S. J. Dickson, Deputy Chief Constable; Thos. Findley, J. H. Forrest, Toronto Railway Co.; G. H. Gooderham, H. Hayman, Board of Education, London; E. P. Heaton, fire marshal; E. F. Henderson, Separate School Board, Toronto; Arthur Hewitt, G. A. Hodgson, F. L. Hubbard, C. B. King, London Street Railway; A. W. Mance, R. B. Morley, G. C. Martin, T., H. and B. Railway; H. Macdonald, C.M.A.; Wills Maclachlan, electrical engineer; Dr. McCullough, Provincial Health Officer; W. A. McLean, Deputy Minister of Highways; W. R. McRae, Toronto Railway Co.; Dr. John Noble; Walter Parke, Board of Education, Hamilton; W. A. Riddell, M.A., Ph.D.; A. M. Ross, chief constable, Ottawa; W. Russell, chief Toronto Fire Department; T. A. Stevenon, Ottawa; W. R. Whatley, chief constable, Hamilton; W. T. T. Williams, chief constable, London; J. F. H. Wyse, organizer and engineer.

The following board of trustees was elected for the Canadian National Safety League, which is really an extension of the Ontario League: C. A. Campbell, W. C. Coulter, A. Hewitt, L. B. Howland, W. J. L. Mackay, R. B. Morley and J. F. Wyse.

LIFE INSURANCE OF MINORS

Second reading was given in the British Columbia legislature on April 10, to a bill entitled: "An Act to Amend the Life Insurance Policies Act," introduced by Attorney-General Farris. He explained that there had been a tendency to widen the power to grant insurance. The bill provides that a minor over sixteen years of age may effect contracts of insurance on his life as a person of full age may do. While providing for the insurance of children, no child under one year of age could be insured, but beyond that age there was a graded scale of fees under which children might be insured, and since the amount was limited, there would be no possible inducement for foul practices such as might have happened a generation or two ago.

STOCK ISSUES TOTAL OVER TWENTY MILLIONS

New Preferred Offerings Make Up For Lack of Industrial Bonds—Many Attractive Features

ALTHOUGH the Canadian security market has been practically bare of new industrial bond issues this year, many attractive preferred stock offerings have been made. Since the beginning of the year new financing of this kind has been completed to the extent of over $20,000,000. Classified according to industries, this amount may be divided as follows: Film distribution, $4,000,000; textiles, $3,600,000; sugar refining, $3,000,000; theatres, $2,110,000; oil refining, $1,500,000; meat packing, etc., $1,500,000; pulp and paper, $1,500,000; miscellaneous, $2,110,000.

As can be seen from the list below, with one or two exceptions all the offerings were made at par. Dividends were at the rate of 7 per cent. for some stocks and 8 per cent., for others. In most cases bonuses of common stock were given, ranging from 10 to 50 per cent.

Issue	Amount	Div. Rate %	Underwriters	Offering Price	Bonus of Common

TESTATOR'S INTENTION OVER-RIDES WORDING

Decision of Nova Scotia Court on a Will—Gives Effect to Intention Rather than to Construction

WHATEVER the wording of a will may be, it is the intention of the testator which must be considered, according to the Nova Scotia Supreme Court's decision in the case of Mills vs. Biden, announced recently. The part of the will in question was that making a bequest to his wife, reading as follows: "All my real and personal estate of which I shall die seized and possessed, or to which I shall be entitled, and all debts which may be due to me at the time of my decease, with full power and authority for her to dispose of the same at her discretion by absolute deed or deeds of conveyance executed by her, or by her last will and testament among my children, or any one of them; and should she die without executing such deed or deeds or last will and testament, then the same to be divided among my children surviving, or their legal representatives if dead, share and share alike."

Widow Considered Title Clear

The plaintiffs were children of W. N. Mills, and the children of the deceased children are their representatives. After the death of W. N. Mills the widow seems to have thought she was the absolute owner of the real estate, and accordingly made a deed of a portion of it to one William Hamilton. This deed was dated May 6th, 1873, and the defendant Biden claimed under conveyances from Hamilton or his grantees. The widow of W. N. Wills died on March 12th, 1902, without having disposed of the property by deed or will among the children of the deceased, and the action was brought to recover possession of the land so sold to Hamilton, and subsequently transferred to Biden. The widow transferred all the real estate of the deceased to various persons, and buildings have been erected on some of the lots, and the property has very largely increased in value.

The main contention was as to whether the will of W. N. Mills on the true construction to be put on it gave his widow absolute ownership or only possession for the duration of her own life in the real estate. If she took it in absolute ownership, then it is admitted that her deed to Hamilton and the subsequent deeds vested a good title in Biden. On the other hand, if the will only gave the widow a life estate in the real estate of the deceased, it would seem to follow that she could convey a life estate only.

Intention Was Obvious

Harris, C.J., in his written judgment, decides the questions as follows: "His intention that his children should benefit is perfectly obvious, as is also his intention that they should at least take on the death of his wife. They are to take before her death if she, in her discretion, should so decide, and should convey it to them otherwise on her death, either by her will in their favor or otherwise under the testator's will equally. I do not see how a plainer intention to benefit the children could have been manifested."

FIFTY-EIGHT MILLIONS LOANED TO SOLDIERS

The latest available figures of the operation of the soldier settlement board show that a total of $58,007,373 has been approved in loans. These figures constitute the work of the board up to March 13. These loans were for the following purposes:—

Land Purchase:—Amount of purchase, $31,821,703; amount of improvements, $4,212,787; amount for S. and E., $12,403,952; total, $48,438,442.

Charges on Dominion Lands:—Amount for improvements, $1,506,637; amount for stock and equipment, $4,226,175; total, $5,732,812.

Mortgages on Privately Owned Lands:—Amount for removal of encumbrances, $1,823,560; amount for improvements, $664,041; amount for S. and E., $1,348,545; total, $3,836,119. Number of loans approved, 21,138; average loan, $2,745.

Qualification Certificates:—Up to March 7 the agricultural branch received 49,260 applications for qualification certificates, and of these 35,846 were approved from the following provinces:—

British Columbia, 1,464; Alberta, 9,804; Saskatchewan, 9,052; Manitoba, 6,106; Ontario, 3,287; Quebec, 1,038; New Brunswick, 944; Nova Scotia, 735; Prince Edward Island, 416; total 35,846.

News of Industrial Development in Canada

Fraser Company Plans Large Expenditure in New Brunswick—Plant of Canadian Steel Corporation at Ojibway Well Under Way—Baldwin's to be in Operation by July

THE New Brunswick legislature is now discussing a bill which is not only important to the industrial development of the province, but to the pulp and paper industry in the Dominion. The bill in question is that of the Fraser Paper Co., Ltd., asking for authority to build a dam on the Tobique River. This plan is opposed, however, by various fishing interests, who claim that the building of the dam will interfere with the free passage of salmon, and it appears that this is the chief obstacle in the passage of the bill The Fraser Paper Co.'s plans as revealed before the Corporations Committee of the legislature, call for an expenditure of $4,000,000 annnually in the province of New Brunswick for labor and raw material by that company. Of this amount $1,000,000 would be paid in wages at their new pulp and paper plant at the Tobique Narrows and the pulp wood to keep that plant in operation would cost another $1,500,000. The plant at Edmundston when enlarged as proposed, would pay out more than $500,000 annually in wages and it would cost $1,000,000 to supply that mill with raw material.

It is possible, however, that the interests of both the paper and the fishing parties may be upheld. Intimation is given by the provincial government that the Grand Falls power on the St. John River, the most potential water power in the maritime provinces, will be expropriated unless the present holders, the International Paper Co. interests, are prepared to proceed without delay with its immediate and complete development. In this way, it might be possible for the Fraser company to get its electric power for its pulp and paper mill on the Tobique, thus doing away with the necessity of building dams of sufficient size at the Tobique Narrows which interfere with the free passage of salmon.

Other Pulp and Paper Announcements

Many other announcements have been made within the past week of importance to the pulp and paper industry. G. R. Hall Caine, son of the famous English novelist, representing seven of the largest newspaper publishers in England, is in Canada at present negotiating for the purchase of pulpwood limits and pulp. The syndicate he represents is prepared to spend $40,000,000 in insuring that their newspapers will secure an adequate and continuous supply of newsprint paper, and to this end propose to buy the pulpwood areas here and erect pulp mills. Already they have a line of freight steamers to carry the pulp across the ocean, and, also own paper mills in England. Briefly, the scheme of the Canadian purchase is to get out the pulpwood on their own lands, manufacture the pulp in their own mills in this country, transport it to England on their own steamers and there convert it into paper in their own paper mills and sell it to their own newspapers. Mr. Caine is a director of several English paper mill companies and also of the Saguenay Pulp and Power Co. in Canada. While he has not yet closed for the purchase of any land, he is in close negotiation for an area of 1,000 square miles, which he says is suitable for his purposes, and which will yield sufficient wood to keep his mills in operation for several years.

The Riordon Pulp and Paper Co. is planning extensions on a large scale to meet the acute shortage of bleached sulphite pulp. There are possibly only two other companies in Canada producing bleached sulphite pulp, being the Whalen Co. in British Columbia and the Fraser Co. in New Brunswick.

Another new paper company has been established in the province of Quebec in the Murray Bay Power and Pulp Co., which company has been granted letters patent with a capital of $750,000 and head office at Murray Bay, Charlevoix, Quebec.

The Brompton Pulp and Paper Co. has announced that the construction of a new 18,000 ton pulp mill at East Angus, Que., would be proceeded with without delay, and it is hoped that the new installation will be in full operation before the end of the year.

Steel Industry

The United States Steel Corp., through its subsidiary, the Canadian Steel Corp., Ltd., is now well under way with its plant at Ojibway, Ont., on the Detriot River, opposite Detroit. The initial capitalization for this purpose was $20,000,000, since raised to $25,000,000. The plant will be provided with blast furnaces, open hearth steel works, rail mill, wire mill, structural and bar mills, sheet mill and, perhaps, some other mills, together with all necessary plant auxiliaries such as docks, by-product coke plant, power stations, pumping plant, machine shops, foundries, etc.

After months of preliminary work, the plants of the corporation are reaching the stage where hundreds of employees will be required for the construction work. Thousands more will be required when the plant is in operation.

Baldwin's Canadian Steel Corporation, Ltd., have continued their appeal from the decision of the Court of Revision that their property in Ashbridges Bay, Toronto, should not continue to be exempt from taxation. The city council is now taking up the matter and might grant exemption by by-law. In the meantime, however, the company is proceeding rapidly with its plans, and operations are expected to commence at the beginning of July next.

Charlottetown Companies Expand

The Charlottetown Board of Trade advises *The Monetary Times* of the expansion of industries located there. One of the largest industries, Bruce Stewart and Co., boiler makers and machinists, who manufacture the Imperial Gasoline Engine, have so far outgrown their present premises that they are now erecting a modern machine shop which will more than double their previous capacity.

The meat packing plant formerly operated by J. M. Roop and Co., has been amalgamated with the Canadian Packing Co., and large additions and improvements are being carried on this season.

One of the flour mills which had not been operating for some time past was remodelled and will shortly be operating again, making flour and grinding corn, etc.

There is also another flour mill with a capacity of from one hundred to two hundred barrels per day in the course of construction.

There are good openings in the city and province for manufacturers who wish to establish businesses which utilize natural products, such as tanning, and boot and shoe factories; the canning of fruits, vegetables, meats and fish, and any others who can utilize products of an agricultural community.

Miscellaneous Trade Notes

Firstbrook Bros., Ltd., of Toronto, box manufacturers, have under construction at Thessalon, Ont., a large box factory, which is expected to be in operation some time in July, and will employ from 75 to 100 hands. The Thessalon Wood Products Co., have bought a large factory which has been idle for a number of years, and they are going to manufacture lath and box boards to start, and will eventually be turning out a number of different lines.

The Galt Brass Co., Galt, Ont., has been forced to enlarge its plant in order to accommodate its increasing business, and work has been started on two additions, which will cost $50,000—a vitro building, 40 by 50 feet, and a new foundry, 60 by 140 feet.

An American firm that is contemplating the location of a branch plant in Ontario is Victory Motors, Ltd., of Detroit, manufacturers of air-cooled and water-cooled automobile and airplane engines.

1870 —— OUR GOLDEN JUBILEE —— 1920

They Put On More Insurance!

Mutual Life Policyholders last year increased the amount of their protection taking out additional policies to the amount of more than ten million dollars. They were alert business men who realized the necessity for increasing their life insurance because of the increase in the value of the necessities of life. In proportion as money loses its purchasing power we require more and more of it to maintain the same protection. Have YOU increased YOUR insurance since prices went up? The smaller the value of the dollar the more dollars we need. As a company, the Mutual does not advocate an excessive amount of insurance. At the same time every reasonable effort should be made to increase the insurance in times of inflated prices. Follow the example of 3139 Mutualists who increased their insurance last year. Put on more insurance!

News of Municipal Finance

Montreal's Per Capita Assessment—Low Compared with Other Large Cities—Toronto's Figure Not So Favorable—Calgary Has a Surplus—Edmonton Estimates Show $500,000 Increase—Quebec Needs More Revenue

THE per capita assessment of Montreal comes low in a comparative statement submitted to the Administrative Commission of that city recently. Toronto's showing is less favorable, coming sixth on the list in that connection. The following is the comparison, which includes figures of the leading cities in the United States:—

City.	Population.	Per Capita Assessment.	Tax Rate.	Revenue.	Per Capita Tax.
Boston	800,000	$1,910	$23.60	$36,013,600	$45.00
Cleveland	800,000	1,747	17.75	24,814,500	31.02
New York	6,000,000	1,400	23.50	196,930,000	32.80
Detroit	1,048,000	1,310	24.00	33,000,000	31.50
Toronto	500,000	1,280	28.50	18,297,000	36.60
Pittsburg	610,000	1,160	26.20	18,523,400	30.36
Baltimore	600,000	1.130	22.67	15,438,000	25.73
Chicago	3,000,000	1,110	25.70	15,438,000	25.73
Milwaukee	525,000	1,090	26.40	15,100,800	28.75
San Francisco	561,000	1,010	30.80	17,402,000	31.02
Philadelphia	2,000,000	970	23.50	45,660,500	22.83
Montreal	750,000	913	19.94	13,658,000	18.21
St. Louis	900,000	850	23.50	18,954,000	21.06

These figures have only general value. Aggregate assessments in some cases are a year behind assessment in others. The population factor is extremely important, liable to affect per capita data 25 to 50 per cent. The tax burden in some cities covers more or less of the county and state burden. Pittsburg, for instance, does not assess personal property, but the county does. In most of the other cities, the given tax rate and assessments produce funds to defray county, and in some cases, state expenses. It should also be borne in mind that some cities, like New York and Detroit, realize funds from special taxes, such as investment and recording taxes, which are not herein considered. It must, therefore, be evident, that the data has value from the standpoint of tendency rather than accuracy.

In arriving at the personal property assessment of the city of Baltimore, the aggregate revenue derived from tangible and intangible property was divided by the average real estate rate. Neither Montreal nor Toronto levy a personal property tax. The Montreal tax was arrived at by dividing the realizable revenue by the real estate rate. Chicago, 1919, assessments were made on a 50 per cent. basis and are the ones used above. For comparable purposes the assessment has been multiplied and the rate divided by two. The treatment of public utility real estate as personal property in Ohio increases the per capita of personal and reduces the real estate per capita in Cleveland.

Sandwich, Ont.—The tax rate for 1920 is 39 mills, an increase as compared with last year.

New Westminster, B.C.—The tax rate for 1920 has been struck at 36 mills, as compared with 32 mills last year.

Woodstock, Ont.—The tax rate for 1920 has been struck at 37.70 mills. This is considerably higher than last year's rate, which was within a fraction of 30 mills.

Brantford, Ont.—According to the report of the street railway commissioners, the street and Grand Valley electric lines in 1919, had a net surplus of $2,342, without any allowance for depreciation. The net earnings of both lines were $143,903.

Fredericton, N.B.—A motion is before the Nova Scotia legislature to the effect that no industry be allowed exemption from school assessment, and that the principal be retroactive. Non-exemption from school assessment is being supported, but a retroactive application is not favored.

Walkerville, Ont.—The municipality is now revising its assessment roll, and in consequence the tax rate will not be struck until August, instead of May as usually. The present assessment is $7,681,000, and it is expected that the new rolls will show an increase of about $1,400,000. Under an order-in-council all breweries and distilleries are included in the business tax, and these alone will add over $1,000,000.

Calgary, Alta.—For the first time since pre-war days the city has finished a financial year with a comfortable surplus in the treasury. According to an official letter, written to Mayor R. C. Marshall by City Treasurer J. H. Mercer, there is a surplus for the year 1919 of $47,543. This is contrasted with a deficit of more than $90,000 at the end of the year 1918. The city finished the year 1919 also with all its temporary obligations to the banks cleared off and with something like $200,000 on deposit in the banks.

Edmonton, Alta.—The statement of revenue and expenditure for 1920 shows increases in nearly every department. Total estimated revenue, including $3,445,000 for general tax levy, is $4,090,000, in comparison with $3,475,000 in 1919. Total controllable expenditure is $2,340,000, compared with $1,796,000, and total uncontrollable, $1,750,000, compared with $1,679,000, making a grand total of $4,090,000, against $3,475,000 a year ago. The general debenture interest and redemption account is $2,000 lower than last year.

Greater Winnipeg Water District, Man.—Estimates of necessary funds to meet the obligations for interest and the sinking fund and to supplement the funds of the Greater Winnipeg Water District for the year 1920, furnished to the regular meeting of the board last week by the commissioners, totalled $959,955, divided as follows: For interest, $818,135; for sinking fund, $141,820. On the basis of the equalized assessment reported, the levy will, if approved, be distributed as follows: Winnipeg, $811,586; St. Boniface, $56,708; Assiniboia, $32,089; St. Vital, $10,990; Fort Garry, $11,183; West Kildonan, $15,231; Transcona, $9,561; East Kildonan, $12,604.

London, Ont.—The city council is as yet undecided as to what action to take in connection with the rebate of taxes on soldiers' homes assessed for $3,000 or less. City Treasurer Bell states that the amounts to be paid by such soldiers are now on the roll of the tax collector, and the bills have been sent out. If the council should instruct Mr. Bell to hand back the taxes to the soldiers the rebates would have to come out of the general funds, but this can be done only when provision has been made to provide such funds in the estimates. This was not done when the estimates were struck, and, in the opinion of Mr. Bell, the city cannot legally return any taxes to the soldiers.

Quebec, Que.—The city council is considering various plans of taxation, in an effort to find more revenues to foot all the growing expenditures. It is proposed to levy a 15 per cent. tax on all business enterprises and also to increase the property valuation by $2,000,000, which would add to the revenues of the administration.

The Quebec Protestant school board has notified the city council that it will require a sum of $52,000 for school purposes this year, which will not necessitate any increase in the rate of taxation. The Protestant school tax is now 80 cents per $100 valuation. The Catholic school tax, will, however, be increased from 55 to 60 cents, as the sum required for Catholic school purposes is $391,059.17.

"Fire Prevention Instruction for Boy Scouts," is another publication just issued by the Ontario Fire Prevention League, of which George F. Lewis, deputy fire marshal, is secretary. It is an educational pamphlet for the encouragement of fire prevention.

New Winnipeg premises of the Huron and Erie Mortgage Corporation were opened on April 12. As mentioned in these columns some time ago, the Huron and Erie purchased the Northern Crown Bank Building, remodelled it, and have now transferred their offices from the Oldfield, Kirby and Gardener premises. The local manager is W. Whyte, and the building will now be known as the Huron and Erie Building.

Government and Municipal Bonds

14 King Street East - - Toronto

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

Ontario Rebonding Issue Disposed of—Manitoba and Winnipeg Bonds Sold—Saskatchewan and Sherbrooke Require About $1,000,000 Each—Option on $5,000,000 Irrigation Bonds Taken By Calgary Firm.

DURING the past week many important bond issues have been placed including Ontario $6,800,000, Manitoba $500,000 and Winnipeg $500,000. It is expected that the above, with the excepion of Winnipeg, will be sold in the United States. Other large issues are offered, including Sherbrooke for over $1,000,000 and Saskatoon for nearly $1,000,000. These issues it is expected will be sold here.

Just in what position the Canadian bond market stands will be clearly ascertained when these and other issues have been disposed of, and its absorption powers tested.

The Toronto issue of $1,905,000 5½ per cent. serial gold bonds, due from 1920-39 and from 1940-50, purchased last week by a syndicate comprising Harris, Forbes and Co., National City Co., Ltd., and W. A. Mackenzie and Co., at 94.177, which were offered to yield 6 per cent. for the short maturities and 5.90 per cent., for the longer maturities, has met with a very favorable reception, the bulk of the bonds having been sold.

Coming Offerings.

The following is a list of debenture offerings, of which mention is made in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Prescott, Ont.	$ 8,500	6	......	......
Vermilion, Alta.	26,000	6½ & 7	20-instal.	......
Melfort, Sask.	16,300	6½	10 & 20-instal.	......
Sherbrooke, Que.	1,019,500	Various	Various	Apr. 26
Hawkesbury, Ont.	95,000	6	20-years	Apr. 27
Fort Garry R.M., Man.	221,000	6	25 & 30-years	Apr. 30
Saskatoon, Sask.	988,900	Various	Various	May 10
Gilbert Plains, Man.	22,000	5½	30-years	May 18

Gilbert Plains, Man.—Tenders will be received until May 18, 1920, for the purchase of $22,000 5½ per cent. 30-year electric light debentures, maturing in equal annual instalments. (See announcement elsewhere in this issue.)

Melfort, Sask.—The town will receive tenders for the following debentures: $12,000 6½ per cent. 10-years; $3,600 6½ per cent. 20-years; $700 6½ per cent. 20-years, all payable in annual instalments. (See announcement elsewhere in this issue.)

Fort Garry R.M., Man.—Tenders will be received until April 30, 1920, for the purchase of $200,000 6 per cent. 30-year sewer and water main debentures, and $21,000 6 per cent. 25-year bridge and road debentures. (See advertisement elsewhere in this issue.)

Saskatoon, Sask.—The city has for sale debentures amounting to $988,900, and tenders for the same will be received until May 10. Debentures will be issued as follows: $87,700 6 per cent. 30-years; $620,000 6 per cent. 30-years; $263,000 6 per cent. 20-years; $18,000 5 per cent. 30-years. (Tenders are to be submitted as requested elsewhere in this issue.)

Sherbrooke, Que.—Tenders will be received until Apr. 26, 1920, for the following debentures totalling $1,019,500: $50,000 3½ per cent., due October 1, 1940; $577,000 6 per cent., due in 15 series annually, commencing Apr. 1, 1921; $150,000 5 per cent., due August 1, 1947; $142,500 5 per cent., due June 1, 1939; $100,000 5 per cent., due June 1, 1940. In all cases bonds are payable in Canada, with the exception of the last one, which is payable in New York.

Debenture Notes

Dominion, C.B.—The town desires to borrow $40,000 for school, fire and sidewalk purposes.

Regina, Sask.—The city will expend approximate $530,000 for capital improvements this summer.

Drummondville, Que.—The council has decided to borrow $80,000 for waterworks and street works.

Moncton, N.B.—A bill has been introduced in the provincial legislature to authorize the city to issue debentures.

Port Dalhousie, Ont.—Ratepayers have voted for the raising of $120,000 for the construction of a waterworks system.

Assinboia R.M., Man.—Ratepayers will vote on the borrowing of $225,000 for school purposes in the school district of St. James No. 7.

Belleville, Ont.—The board of education requires $100,000 for the erection of a public school and $250,000 for a collegiate institute.

Township of Schreiber, Ont.—A by-law will be submitted to voters on April 29 next, to authorize the issuance of debentures to the amount of $22,000.

Woodstock, N.B.—A bill authorizing the raising of debentures not exceeding $35,000 by the Agricultural Society No. 41, and that the town guarantee the same, has been passed in the legislature.

Flowery Plains, Alta.—The council has authorized the borrowing of $20,000 on the promissory note or notes of the municipal district, for aid to farmers who have suffered through bad crops or other adverse conditions.

Moose Jaw, Sask.—The city has applied to the Local Government Board for permission to issue another $100,000 of debentures for the purpose of developing the auxiliary water supply for the city. A by-law to this effect will be voted on May 15 next.

Quebec Province.—The tenders received by the province on its issue of $5,000,000 5½ per cent. 5 and 10-year bonds on April 20, were not considered to be satisfactory, although it is understood some of the bids were quite favorable, in view of present conditions. Negotiations are believed to be proceeding with a view of placng the issue.

Edmonton, Alta.—Ratepayers have defeated by-laws calling for the raising of $1,306,000 for power plant extensions, new telephone equipment and other local improvements. The amount of $106,000, which is for paving, etc., will be included in the general tax levy, as a result of this, but the two by-laws for $1,200,000 for power and telephone extensions will be resubmitted to ratepayers, probably before the end of next month.

Peterboro, Ont.—Debentures will be offered for sale in May or June, says City Treasurer Adams in a letter to *The Monetary Times.* There are two issues that must be disposed of soon, as follows: $260,000 6 per cent. 30-year for high level bridge; $240,000 6 per cent. 30-year for public school building. These debentures will be straight term, will have coupons attached for half-yearly interest and be payable in Peterborough, Toronto and Montreal. In addition, the city council is considering the issue of $200,000 6 per cent. 20-year debentures for housing purposes. A housing commission has been appointed and it is expected, that at the next meeting of the council, some definite action may be taken.

St. John, N.B.—At a special meeting of the council, authority for the issue of debentures to meet the cost of work approved last year for water and sewerage departments, was passed. A recommendation was read that debentures totalling $206,000 be issued in denominations of not less than $500, for a term of forty years, at the rate of 5½ per cent., for this purpose. Commissioner Fisher said he would not hold up the issue, but that he favored shorter term bonds. The mayor explained that the term was fixed by legislation, but that the city, on the recommendation of the controller, has requested that the Act be amended to permit of the issue of shorter term bonds. He also advised that the

The Highest Interest Return

compatible with unquestioned security is the underlying principle of judicious bond investment. Government and Municipal Bonds, yielding from 5.24% to 7%, are undoubtedly best suited to answer this requirement. We have just prepared a descriptive list of such offerings which we will gladly mail upon request.

controller had stated the city would be able to take up practically the whole issue. Commissioner Fisher said he was not opposed to long-term bonds, except at present when rates are high.

Manitoba.—An order-in-council has been passed by the provincial government, authorizing the expenditure of $516,000 for Hydro-Electric extensions.

Point Grey, B.C.—The British Columbia government has decided on Point Grey as the site for the provincial university. The undertaking will be financed by means of $300,000 loan, and construction work to the extent of at least $500,000, is to be proceeded with this year.

Sarnia, Ont.—Ratepayers in the near future will be asked to vote on the expenditure of $300,000 on water works improvements.

Bond Sales

Renfrew, Ont.—The town has sold to W. L. McKinnon and Co., $8,205 6 per cent. 30-instalment debentures.

Chatham, Ont.—Brent, Noxon and Co. have been awarded the $90,000 5½ 30-year Hydro-Electric debentures at 92.065. Other tenders were: Wood, Gundy and Co., 90.06; R. C. Matthews and Co., 89.72.

Toronto Township, Ont.—Messrs. C. H. Burgess and Co., have purchased $74,675 6 per cent. 20-instalment debentures at 98.38. Other tenders were:—

Macneill, Graham and Co.	97.53
Dominion Securities Corporation	97.213
W. L. McKinnon and Co.	96.90
Brent, Noxon and Co.	96.71
R. C. Matthews and Co.	96.15

Winnipeg, Man.—Messrs. A. E. Ames and Co., and the Dominion Securities Corporation, have purchased $500,000 6 per cent. 20-year bonds of the city at price on a basis of about 6⅛. The bonds will be offered in the Canadian market.

Quebec, Que.—The city has disposed of its $800,000 6 per cent. 5-year bonds to Versailles, Vidricaire and Boulais at par. It is understood that two offers were received, one for 99.75 and the other for 98.98, but both were refused and negotiations entered into with the above-mentioned company.

Manitoba Province.—Messrs. A. E. Ames and Co., were the highest bidders on the $500,000 5 per cent. 3-year bonds, offering 99.314, and were, consequently, awarded the issue. The bonds are offered in New York to yield about 7 per cent. Other tenders received were:—

R. A. Daly and Co.	99.04
Wood, Gundy and Co.	98.677
R. C. Matthews and Co.	98.27
A. Jarvis and Co.	97.571

Province of Ontario.—A syndicate comprising Canadian and American bond houses, secured this week the $6,800,000 6 per cent. 5-year bonds of the province at a price of 91.633. The syndicate was composed of the following companies: Wood, Gundy and Co., Dominion Securities Corporation, A. E. Ames and Co., all of Toronto; National Co., Detroit; E. H. Rollins and Sons, Boston; Clarke, Dodge and Co., New York; Wm. R. Compton and Co., St. Louis. Another syndicate comprised of the following companies bid 91.03: Harris, Forbes and Co., A. Jarvis and Co., National City Co., Ltd., Toronto; Continental and Commercial Trust Co., Chicago; Halsey, Stuart and Co., Chicago. At the present rate of exchange the province pays about 6.05 for its money, but on the other hand, including charges, the basis is on about an 8 per cent. level.

Commenting on the issue Wood, Gundy and Co., say:—

"This bond issue was made for the purpose of refunding a portion of the outstanding debt of the province in England, which the province has been able to purchase on very attractive terms, in view of the existing sterling exchange rate. Bonds having a face value of about £1,750,000 (equal to $8,515,000 at par of exchange) have been retired by this issue of $6,800,000, so that the province has reduced its capital debt by approximately $1,715,000 as a result of this operation."

Sale of Irrigation Bonds

The statement to the effect that the Alberta government has refused to sanction the granting of a thirty-day option on $5,000,000 of Lethbridge Northern irrigation bonds, as decided by the trustees of the district last week, is liable to be misleading. According to a statement issued by Premier Stewart, the province has not refused to sanction the action as taken by the irrigation board, although the general custom is to call for bids, and he supposed that was the way the irrigation board would handle them. The premier says that the board has full power to handle the bonds as they see fit.

L. M. Roberts, representing Lougheed and Bennett, Calgary, made the proposition to the trustees of the Lethbridge Northern district which resulted in their consenting to an option. According to the deal thus proposed, Mr. Roberts was to acquire the $5,000,000 debenture issue for $4,500,000 in Canadian money, provided that no one else offered more than that during the lifetime of the option. It was understood that the Calgary law firm intended to offer the debentures for sale on the New York market as soon as they were ready.

LISTED STOCKS REGISTER SOME DECLINES

Demoralization of New York Market Responsible—Most Issues Were Weak at the Close

FOLLOWING a period of weakness and irregularity, in which the chief influence was the money situation, the New York market at the close on April 21st experienced practically demoralization, extreme losses of from 5 to 42½ being made. Apart from the increasing scarcity of time funds, there were no developments in the money market to explain such extremities, which far exceeded in volume and in scope any similar movement since the early weeks of the year. Call money was at 7 per cent. at the close, in comparison with 8, 9 and 12 per cent. for the previous days. Reasons for such a break are not altogether known, although over-speculation was partly responsible.

Canadian Market Affected

The demoralization of the New York market affected the Canadian exchanges to no small extent, most stocks showing weakness at the close on April 21st. During the week, however, some stocks displayed considerable strength, in which cases trading was brisk. Brompton led the market with sales of 13,334, its strongest point being 89½ and its weakest 85⅞. The last sale was made at 86½. Canada Steamships was strong, advancing to 79, but weakened to 77 at the close. Sales for the week were 4,465. Atlantic Sugar was active, with a turnover of 6,701 shares, and was strong at 89¼ bid, but, like the other stocks, weakened at the close. In the paper issues Spanish River common experienced a falling off of 6¾ points, the last sales being made at 86, while preferred declined to 132 from its strongest point of 139⅜. Laurentide was weak at 93¼, and was less active than in the previous weeks. Both steel issues were weak, Dominion Steel closing at 67½, with total sales of 2,005, and Steel of Canada at 77¾, sales for the week amounting to 1,895.

Trading on the Toronto exchange for the week ended April 21st, with one or two exceptions, was dull, and most stocks showed weakness. Canada Steamships was the most active issue, and for the most part was very strong, being bid as high as 79, although it fell away three points and closed at 76 bid, sales for the week amounting to 2,330. Brazilian fell away about ¾ of a point during the week, closing at 45⅝ bid, with total sales of 1,634. Atlantic Sugar, which was for the most part strong around 88 and 87½, weakened to 87 at the close, the turnover for the week amounting to 840 shares. Steel of Canada fell away nearly four points to 77 bid on sales of 520, while Spanish River experienced a decline of nine points to 132, sales amounting to 363. Bank stocks were steady, Commerce and Dominion being the most active.

CORPORATION SECURITIES MARKET

Trading in Outstanding Bonds Brisk—Riordon Stock Selling Ex-Rights—Bank of Montreal Issue

TRADING on the Canadian exchanges in outstanding industrial bonds was brisk during the past week, the most active issues being Quebec Railway, Canada Steamships, Dominion Iron and Steel and Wayagamack. All issues were steady and displayed considerable strength at the close on April 21.

An offering of $375,000 Ames Holden Felt Co., Ltd., 7 per cent. 20-year first mortgage sinking fund gold bonds is being made by Thornton, Davidson and Co., Ltd., Fairbanks, Gosselin and Co., Ltd., and Ryan, Grier and Hastings, Ltd., of Montreal, at 100 and accrued interest, with a bonus of 20 per cent. of common stock. The bonds are guaranteed unconditionally, principal and interest, by endorsement by Ames, Holden, McCready, Ltd., the parent concern, and are part of a total authorized issue of $500,000.

Public offering is being made by Anderson, Robinson and Co., of the $500,000 7 per cent., cumulative preferred shares of the Bankers Financial Corporation, at 100, with a bonus of 40 per cent., of common stock.

The corporation was formed to assist in financing the sale of automobiles, by purchasing from dealers, conditional sale agreements entered into by the purchasers. A strong directorate has been secured, including Hume Blake, a director of the Canada Trust Co.; Noel Marshall, director of the Sterling Bank and of the Imperial Guarantee and Accident Co.; and Stephen Haas, vice-president of the Union Bank. The managing director will be W. J. Hill, now an inspector of the Home Bank.

Spanish River Preferred

At the meeting of the directors of the Spanish River Pulp and Paper Co. in New York on April 15, nothing of an official character was announced. It is understood, however, that the reorganization plan was fully discussed at the meeting, and approved of along the lines already set forth. The next meeting of the board will take place on April 29 next, until which time nothing in the way of an authoritative announcement is looked for. It may be assumed that the original proposal of liquidating the deferred dividends on the preferred stock through the issuing of 40 per cent. in new securities of the senior class, the payment of two per cent. in cash and a bonus of 15 per cent. in common stock will be made. Concurrently with the action, it is expected, the common shares will be placed on a seven per cent. dividend basis, and the privilege of converting their holdings into common extended to holders of the preferred.

Bank of Montreal Issue

The directors of the Bank of Montreal announce the issue of $2,000,000, new capital stock to be offered to shareholders of record as at the close of business on the 20th of May, 1920, at 150 per share in the ratio of one in ten.

It is understood that the Bank of Montreal, in view of Canada's large trade development with foreign countries since the war, recently purchased a substantial interest in the Colonial Bank, an old established English bank that has operated for many years in the West Indies, British Guiana and West Africa and has allied itself with other banks doing business abroad, thus adhering to its policy of forming connections with institutions already established rather than itself open branches in foreign countries.

Riordon New Stock Allotted

The stock of the Riordon Pulp and Paper Co. is selling ex-rights on the new $1,500,000 issue, which, added to the present issue of $4,500,000 will bring the new common capital up to $6,000,000. In a letter to the holders of common shares, Carl Riordon, the president says:—

"The subscription price of the new shares will be payable to the order of the company at the treasurer's office, Montreal, in Canadian currency, as follows: Fifty per cent. (or $62.50) per share upon subscription on or before May 5, 1920; fifty per cent. (or $62.50) per share on or before June 5th, 1920. Right to subscribe will expire at three p.m. on the 5th day of May, 1920, on or before which date payment of the first instalment must be made to the company. Warrants to subscribe must at the same time be surrendered. All shares paid up in full on or before June 5 will receive the full dividend for the quarter ending on June 30.

"Subscriptions will be accepted for full shares only. Holdings that are not multiples of three can be adjusted by the purchase or sale of 'rights' but the company will neither buy, sell nor adjust 'rights.' Upon surrender of the fully paid certificates of subscriptions there will be issued in exchange certificates of common capital stock for full shares by the transfer agents, Montreal Trust Co., at their office in Montreal, on and after June 5."

Dominion Bridge Extends Scope

A special meeting of the shareholders of the Dominion Bridge Co., Ltd., is called for May 3rd next to ratify the proposal of the directors to form a new company, which will take over the existing subsidiary, the Dominion Engineering and Machinery Co., Ltd., which concern is at present engaged chiefly in the manufacture of paper-making machinery, but which is to extend its scope by branching out into the manufacture of hydraulic machinery, as well as the general heavy foundry and machine shop business.

In consequence, a new company, to be known as the "Dominion Engineering Works, Ltd.", is to be incorporated, with an authorized capital of $5,000,000 of 8 per cent. cumulative redeemable preferred shares and $5,000,000 of common shares, of which $4,000,000 of each class is now to be issued. It is proposed that the Dominion Engineering and Machinery, Ltd., will sell its undertaking, receiving in payment therefor a majority of both preferred and common stocks now to be issued of the Dominion Engineering Works, Ltd., which will give the company a stock controlling interest therein. The balance of the $4,000,000 preferred and the $4,000,000 common will be issued on such terms as will provide the company with sufficient working capital for its requirements and to cover the cost of installation of such additional plant and machinery as may be necessary for the extended operations of the company.

DEBENTURES FOR SALE

CITY OF SASKATOON, SASK.

DEBENTURE ISSUE, $988,900

Sealed tenders, endorsed "Tender for City of Saskatoon Debentures," addressed to the undersigned, will be received on or before 12 o'clock noon, Monday, the 10th day of May, 1920, for the purchase of a part or the whole of an issue of $988,900 debentures issued for various purposes under several by-laws.

A summary of the issue is as follows:—

No. 1—Thirty-year debentures, bearing interest at the rate of 6 per cent.	$ 87.700
No. 2—Thirty-year debentures, bearing interest at the rate of 6 per cent.	620,000
No. 3—Twenty-year debentures, bearing interest at the rate of 6 per cent.	263,200
No. 4—Thirty-year debentures, dated July 1st, 1915, bearing interest at 5 per cent.	18,000
Total	$988,900

The debentures are an obligation of the City at large, are issued in coupon form, with provision for registration of principal, and are of the denomination of $1,000. Interest payable half-yearly on the 1st day of May and the 1st day of November, with the exception of the 30-year debentures, dated July 1st, 1915, amounting to $18,000, under By-law 616, the interest on which will be payable 1st January and 1st July. Full details as to the purposes for which the bonds are issued, together with financial statement of the City, will be furnished on application.

Tenders are requested on the basis of the following alternatives:—

A—If delivery of debentures be made in two instalments, i.e., 50 per cent. as soon as the purchasers' solicitors have passed a favorable opinion on the legality of the issue, and the remaining 50 per cent. six months later. Principal and interest payable in Canada and the United States.

B—If delivery of debentures be made in two instalments, i.e., 50 per cent. as soon as the purchasers' solicitors have passed a favorable opinion on the legality of the issue, and the remaining 50 per cent. six months later. Principal and interest payable in Canada only.

C—If delivery of the whole of the debentures is made as soon as the purchasers' solicitors have approved of the issue, principal and interest payable in Canada and the United States.

D—If delivery of the whole of the debentures is made as soon as the purchasers' solicitors have approved of the issue, principal and interest payable in Canada only.

If upon the receipt of tenders the City Council decides not to accept a tender on the $620,000 thirty-year 6 per cent. debentures (item No. 2), and if the Council agrees not to make an issue of these debentures during 1920, those submitting tenders are requested to state what effect, if any, this decision will have upon the tender submitted on the balance of the debentures.

Every tender must be accompanied by a certified cheque, payable to the City of Saskatoon, for one per cent. of the total amount of the tender, as an evidence of good faith, and all tenders must contain complete information and requirements as set out in the Form of Tender.

The highest or any tender not necessarily accepted.

C. J. YORATH,
City Commissioner.

City Hall, Saskatoon, April 20th, 1920. 127

TENDERS ON DEBENTURES

THE RURAL MUNICIPALITY OF FORT GARRY

Sealed tenders will be received by the undersigned up to 12 o'clock, noon, on the 30th day of April, A.D. 1920, for the purchase of the following debentures of the Rural Municipality of Fort Garry:—

1. Construction of sewer and water main, $200,000.00, dated 1st March, 1920, 30-years, interest 6%, payable half-yearly.
2. Reinforced concrete bridge, grading and gravelling, $21,000.00, dated 1st March, 1920, 25-years, interest 6%, payable half-yearly.

The highest or any tender not necessarily accepted.

Dated at the Municipal Hall this fifteenth day of April, A.D. 1920.

H. D. DE MOISSAC,
Secretary-Treasurer.
Fort Garry P.O., Man. 122

TOWN OF MELFORT, SASK.

Tenders are invited for debentures as follows:—

Electric Light and Power, $12,000.00, 10-years, 6½%.
Sewer, $3,600.00, 20-years, 6½%.
Waterworks, $700.00, 20-years, 6½%.

Debentures repayable in equal annual instalments of principal and interest.

A. H. WILLIAMS,
121 Town Clerk.

GILBERT PLAINS, MAN.

Tenders for Electric Light Debentures, Village of Gilbert Plains, calls for sealed tenders on issue of $22,000.00, 30-years, at 5½ per cent., payable equal yearly instalments of principal and interest.

Tenders to be opened May 18th, 1920.

Highest or any tender not necessarily accepted.

JAS. C. TURNER,
Secretary-Treasurer,
126 Village Gilbert Plains, Man.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first two weeks in April:—

Canadian Pacific Railway.

	1920.	1919.	Inc. or dec.
April 7	$3,617,000	$2,921,000	+ $ 696,000
April 14	3,635,000	2,868,000	+ 767,000
	$7,252,000	$5,789,000	+ $1,463,000

Grand Trunk Railway.

	1920.	1919.	Inc. or dec.
April 7	$1,469,333	$1,274,553	+ $ 194,780
April 14	1,120,792	1,263,483	— 142,691
	$2,590,125	$2,538,036	+ $ 52,089

Canadian National Railways.

April 7	$1,834,118	$1,457,144	+ $ 376,974
April 14	1,818,934	1,590,159	+ 228,775
	$3,653,052	$3,047,303	+ $ 605,749

INVESTMENTS AND THE MARKET

(Continued from page 14)

Cobalt, which was ratified by the shareholders at a special general meeting for that purpose on January 30 of the present year, was duly consummated. The company received $100,000."

Sawyer-Massey Co., Ltd.—The annual statement of the company for the year ended November 30, 1919, shows net profits of $63,573, as compared with a loss of $77,236 in 1918, and a profit of $117,423 in 1917. In his report to shareholders President R. Harmer says:—

"In the report for the fiscal year ended November 30, 1918, your attention was drawn to the fact that it had been found necessary to make price adjustments in the inventory. Since that time a very careful scrutiny of all the company's liquid assets has been made by your vice-president, who is acting manager, with the result that the reductions therein amounting to $206,446 have been made upon his recommendations, who has reported that in his opinion the amounts written off cover the shrinkage in liquid assets and the figures as they now appear in the statement under assets. reflect the realizable value thereof. Inventories show a marked decrease and are cleaner and better balanced than any inventory since 1915. The basis of pricing same was actual cost or market value, whichever was the lower."

A comparison of the principal items of the balance sheet, shows the following results:—

	1919.	1918.
Notes and accounts receivable	$1,446,776	$1,559,343
Inventory	1,153,869	1,454,210
Total assets	5,309,585	5,520,682
Current assets	2,652,940	2,859,380
Bank advances, notes and accounts payable	1,716,278	1,877,905
Reserves	106,243	105,403

Barcelona Traction, Light and Power Co.—The company for the year ended December 31, 1918, reports an increase of 4,037,874 pesetas in the gross earnings of the combined enterprises of the companies in Spain over those for the year 1917, and in the net earnings there was an increase of 729,480 pesetas. Underlying bond interest chargeable to revenue, however, was greater than in the previous year, consequently, surplus earnings, after providing for underlying bond issues, redemption funds and taxes, were 497,027 pesetas less than in 1917. The increase in the bond interest was due to the payment in cash after June 1, 1918, of the interest on one of the bond issues of the Barcelona Co., the interest on which had been previously satisfied in notes, and to 300,000 pesetas interest on the bonds of the Ferrocarriles de Cataluna, charged to capital during construction in 1917, being debited to operation in 1918. The continued extension of the company's works is shown by the consolidated balance sheet, which indicates total assets of $117,851,688, as compared with $100,947,511 the previous year. Floating assets amount to $6,867,505, as against floating liabilities of $5,569,747.

Announcement is made that T. B. Macaulay, of Montreal, and Captain Alfred Loewenstein, C.B., of Brussels, have joined the board of directors, and Messrs. Lemarquis, Marechal and Nivard, of Paris and Captain Loewenstein have been added to the bondholders' committee. Early in 1918, 10,000,000 pesetas par value of the prior lien "A" bonds of the company were sold to a group of Spanish bankers for the purpose of making advances on current account to the companies operating in Spain in connection with work for construction.

At the annual meeting of the company in Toronto on April 16, Mr.F. Fraser Lawton, managing director, points out that owing to low water, a considerable quantity of coal was burned in the first two months of 1918. By an arrangement with the chief consumers a large part of the cost of this coal was refunded, so that comparison with the figures of the previous year is somewhat misleading. The old board of directors was re-elected.

DIVIDENDS AND NOTICES

CANADA CEMENT COMPANY, LIMITED

PREFERENCE SHAREHOLDERS

RECENT FIRES

Grande Prairie, Alta., Sydney, N.S., Windsor, Ont., and Winnipeg Suffer Heavy Losses—Large Number of Small Fires

Burlington, Ont.—April 20—Barn and equipment belonging to R. W. Dingle was destroyed. Cause, incendiarism.

Crediton, Ont.—April 18—Residence of W. B. Gaiser, near village, was damaged.

Cross Lake, Ont.—April 17—Residence of Xavier Perron was destroyed. Cause, paper igniting with overheated stovepipe.

Denholm, Sask.—April 10—Fire destroyed the Saskatchewan Co-operative Elevator, with about 9,000 bushels of wheat.

Fredericton, N.B.—April 18—Four houses, occupied by Angus Campbell, Mrs. A. Tweedwell, William McDonald and O. Brewer, on the Woodstock Road, were destroyed. Loss is estimated at $15,000.

Grande Prairie, Alta.—April 14—The Spencer, Donald, Patterson and Morsion buildings were damaged. The loss to the tenants of the destroyed buidings is estimated as follows: Hook and Leonard, jewellers, $10,000; City Drug Co., $8,000; S. E. Higgins, milliner, $2,000; H. Mattinson, photographer, $1,000; Grande Prairie Land Co., $600; North Land Developers, Ltd., $600; Grande Prairie Hotel annex, $1,000; Eager and Corbett, barristers, $1,500; A. P. Turner, men's furnisher, $1,000; N. O. Brown, auto accessories, $500. The loss to buildings was approximately as follows: Spencer, $15,000, about 25 per cent. covered by insurance; Donald Paterson, $8,000; K. Morrison, $3,000; A. L. Thompson, partially damaged only, $1,000; Malcolm Campbell, $2,000.

Kingston, Ont.—April 16—The dry goods store of Newman and Shaw, Princess Street, was damaged. Caused from electric wires.

Lakefield, Ont.—April 12—Power plant of frame construction was destroyed. Valued at $5,000, and partially insured. The fire followed an explosion in the power-house, believed to have been caused by a short circuit.

Moncton, N.B.—April 13—American Hotel, owned by Mrs. Margaret Wallace and under lease to A. B. Pugsley, was damaged. Covered by insurance.

April 19—Livery stable, owned by D. A. McBeath and conducted by Fred. Wilbur, was destroyed. Estimated property loss, between $4,000 and $5,000, with insurance of $2,000.

Moose Jaw, Sask.—April 15—The "XL" Garage on High Street West was damaged. Estimated loss on building, $3,000, partially covered by insurance; loss on cars in garage for repairs, $2,500; and the loss on one car and the stock of T. Smallwood, S. Cooper and W. Stiles, proprietors, amounted to $1,000.

Regina, Sask.—April 14—Grassick Block, Scarth Street, was damaged. Property loss is estimated at $5,000, covered by insurance.

Renfrew, Ont.—April 16—Sugar camps owned by Alex. Jamieson, of Horton township, Hiram McCreary and Daniel McEwen were damaged from fires of mysterious origin.

St. John, N.B.—April 17—Grocery store of Mrs. Helen Lacey, 311 Germain Street, was damaged. William P. Lacey, who has been ill mentally at various times, scattered the contents of an oil tank in the store and set the place on fire.

Strathroy, Ont.—April 14—Residence of P. A. Gahan was destroyed. Estimated loss, $3,000, with small insurance on building.

Sydney, N.S.—April 17—Harshman's drug store, at the corner of Charlotte and Wentworth Streets, was damaged. Estimated loss, $25,000, partially covered by insurance.

April 20—Plant of the Sydney Milling Co. was damaged to the extent of $40,000.

Toronto, Ont.—April 16—Building at 70 Bay Street, owned by the Wellington estate, was damaged. The fire originated in the second story, occupied by Marcus and Co., furriers, in a fur bin. Their loss is estimated at $5,000.

Watrous, Sask.—April 17—Several buildings were damaged and the business section of the town threatened. Estimated loss, $30,000.

Winnipeg, Man.—April 9—Edward Building, 325 Portage Avenue, occupied by the Phonograph Shop, Cross, Goulding and Skinner Piano Co. and the Portage Avenue branch of the Standard Bank on first floor; Drs. Moore and Carmichael, dentists, Sample Shoe Store, Cooks' and Waiters' Union, Roberts' photo studio and Dr. J. W. Pemberton on second floor, and suites on the third floor were damaged. Estimated loss on basement stock of pianos of Cross, Goulding and Skinner, $10,000, covered by insurance.

April 14—Shed and contents of the Dyson Pickle Co., Higgins Avenue, was damaged. Loss estimated at $1,000, fully covered by insurance.

Windsor, Ont.—April 18—Summer home of Fitz Bridges, president of the Bell Ice Co., was destroyed, due to an overheated furnace. Total loss is estimated at $18,000, and insurance totals $4,000.

ADDITIONAL INFORMATION CONCERNING FIRES

Montreal, Que.—March 24—The following losses were incurred by insurance companies as a result of the fire which took place on this date in Molsons Brewery, corner of Craig and Delorimier Avenue.:—

On J. C. Whitney and Co. (teas)—Palatine, $5,000; North Britisb and Mercantile, $5,000. Total, $10,000. Loss about 40 per cent.

On Messrs. Cardinal (Flour)—Union of London, $17,500; Union of Paris, $7,500. Total, $25,000. Loss about 50 per cent.

On J. D. Arsenault (general provisions)—Continental, $11,800. Loss about 5 per cent.

On A. Racine (flour)—Continental, $4,000. Loss about 50 per cent.

On H. Daoust (flour)—New York Underwriters, $2,500. Loss total.

On A. Benoit—London Assurance, $2,000. Loss total.

On Aird and Sons (leather board)—Commercial Union, $20,500; Queensland, $10,000. Total, $30,500. Loss 10 per cent.

On D. W. Raphael (grain and feed)—London Assurance, $11,000. Loss about 50 per cent.

On Renfrew Flour Mills—Home, $5,200. Loss about 50 per cent.

On Robin Hood Flour Mills—North Empire, $68,000; Palatine, $7,000; North America, $35,000; Employers, $45,000; St. Paul, $35,000. Total, $190,000. Loss about 8 per cent.

On Russell Murray—Phœnix of London, $7,680. Loss about 30 per cent.

On J. L. Viau—North America, $4,920. Loss total.

On Wolfe Sayer and Heller—Guardian, $1,800. Loss total.

On Warde and Co.—Home, $15,000; London Mutual, $10,000; Imperial Underwriters, $5,000; Palatine, $10,000; British Dominions, $10,000; London Assurance, $5,000. Total, $55,000. Loss about 60 per cent.

On Molsons Brewery Grain—United States, $15,000; Globe Indemnity, $25,000; National of Hartford, $25,000; Phenix of Hartford, $10,000; Palatine, $15,000; Canada Security, $10,000; Guardian, $5,000; Employers, $5,000; Yorkshire, $5,000; Springfield, $10,000; Hartford, $5,000; Westchester, $5,000; New York Underwriters, $5,000; Niagara, $10,000. Total, $150,000. Loss about 90 per cent.

On Malt House and Kiln—North America, $10,000; United States, $4,000. Loss about 5 per cent.

On Mile End Milling Co.—Home, $3,000. Loss total.

On Montreal Preserving Co.—Royal, $2,400. Loss total.

On Morrow Milling Co.—Royal, $4,000. Loss about 25 per cent.

On National Licorice—Guardian, $10,000. Loss about 25 per cent.

On Peerless Cereal—Equitable, $3,000. Loss about 80 per cent.

On Petrie—Provincial of England, $6,000. Loss about 80 per cent.

On Dominion Sugar Co., Ltd.—British Dominions, $50,000; London Guarantee, $25,000. Loss about 30 per cent.

On Dominion Tobacco Co.—North River, $12,000; North America, $5,000. Total, $17,000. Loss total.

On A. Durivage—Home, $1,500. Loss total.

On Genest and Genest—Liverpool and London and Globe, $9,800. Loss total.

On Gagnon, Lachapelle and Hebert—North America, $5,000. Loss about 80 per cent.

On J. Grenier—North River, $3,000. Loss total.

On Harrison Crossfield—Atlas, $5,000. Loss about 25 per cent.

On Kearney Bros. (teas)—Firemens Underwriters, $27,000; Alliance of Philadelphia, $15,000. Total, $42,000. Loss total.

On A. J. Ayer—Guardian, $14,500; London and Lancashire, $13,000. Total, $27,500. Loss about 90 per cent.

On Bryson Import Co., Ltd.—Provincial of England, $3,000; London Mutual, $3,000. Loss about 50 per cent.

On Bruneau Currie and Co.—Westchester, $6,000; British Empire, $3,100; British Traders, $4,000. Total, $13,100. Loss total.

On Berliner Gramophone—London and Lancashire, $6,000; British Crown, $10,000; British Colonial, $5,000; Rochester, $20,000; Yorkshire, $20,000; Caledonian, $20,000; Guardian, $80,000; Globe and Rutgers, $25,000; General of Paris, $25,000; Union of Canton, $25,000; Northern, $20,000; Queen, $20,000. Total, $306,000. Loss about 75 per cent.

On Chaput Fils and Cie—Guardian, $10,000; North West, $15,000; Hudson Bay, $10,000; Employers, $10,000; Globe and Rutgers, $10,000; Fire Insurance Co., of Canada, $5,000; Royal, $25,000; National of Paris, $10,000; British Colonial, $5,000; Scottish Union, $5,000. Total, $105,000. Loss about 75 per cent.

On Tropical Products Co. (tobacco)—Eagle Star, $35,000.

On Laberge and Fils (flour)—Mount Royal, $6,000.

On J. E. Cloutier (flour)—Mount Royal, $8,750.

On S. Christin (canned goods)—Mount Royal, $8,000.

On A. W. Harris—British Dominions, $4,000.

From the Great Lakes to the Sea

Some Economic Advantages that will Accrue to the Producers Through the Inauguration of the Deep Waterways Scheme—Now Dealt With by International Commission—Power Development Would Pay Cost

By C. BIRKETT
Secretary, Fort William and Port Arthur Grain Exchange

AN organization has been formed called the "Canadian Deep Waterways and Power Association" to further the project for the deepening of the St. Lawrence River, so as to permit ocean steamers to sail right up the Great Lakes to Fort William and Port Arthur, Duluth and Superior, Chicago, Detroit, Toronto, etc. This Canadian organization will work in conjunction with the "Great Lakes-St. Lawrence Tidewater Association," which has to do with the American end of the project.

A scheme of this nature must, of necessity, be an economic advantage to the producers of grain in the Canadian northwest before money is spent thereon. There is no doubt in my mind as to these advantages. This association and that association in the City of New York and surrounding country are already passing strong resolutions against the scheme, and are even going so far as to state that the scheme will not benefit the American manufacturing cities and that it will only be of benefit to the farmers in the Canadian northwest. Therefore, *per se*, abandon the scheme.

It is not my purpose in this article to outline for the benefit of the readers the engineering side of the question. Just so long as the scheme is feasible, and is projected, just so long are we interested. Always providing, of course, that the most feasible and economic scheme is adopted.

An Outline of the Plan

A few salient facts might be given for the benefit of readers, and to give them some idea as to the proposed development and cost.

The plan: To remove obstructions in the St. Lawrence River between Lake Ontario and Montreal by joint action of the United States and Canada.

What are the present limits of navigation? Through the lakes, 20 feet in all main channels. At Niagara and down the St. Lawrence 14 feet.

What is being done to raise the limit? At the Soo new locks 24 feet; projected locks 30 feet. At Niagara the new Welland 25-foot channel with 30-foot locks; projected channel 30 feet.

What remains to be done? Only to overcome a series of rapids in the St. Lawrence.

How formidable a job is it? Total fall to be overcome 221 feet, strung over a hundred miles or more, forty odd miles of artificial channel, compared with 326 feet in 25 miles at the Welland.

How serious is the cost? The United States spent about $50,000,000 to get from the upper to the lower lakes. Canada is spending more than $65,000,000 to get from Lake Erie to Lake Ontario. Both countries are to spend something over $100,000,000 to link the great lakes with the ocean. Compare with $450,000,000 for Panama project.

What dividends are promised? It will save its cost in three years in transportation bills. It will take the crushing load off railroads and terminals. It will develop coastwise traffic along the new coastline. Finally, it costs nothing, the power it develops will pay for it.

What will the channel carry? All lake vessels can deliver their cargoes at an ocean port. Any lake carrier may continue its voyage coastwise or overseas. Two-thirds of the ocean going fleet can make the lake ports at will. Any coasting vessel can come up the lakes as they choose.

What traffic will develop? Free movement of western products to the seaboard by all-water. Lake cargoes delivered at any Atlantic port wherever convenient. Lake cargoes delivered at destination overseas whenever profitable. Direct imports to the heart of the continent whenever conditions favor.

The St. Lawrence improvements fall in two sections: 1st. International—113 miles long the boundary between the United States and Canada from Lake Ontario to St. Regis. 2nd. Canadian—67 miles from St. Regis where the river leaves the boundary line to deep water in Montreal.

Advantages to West

Leaving the more general scheme alone and coming down to the economic advantages to the western producers of grain, we find there will be eight outstanding advantages through the establishment of this route: (1) Reduction of freight rates; (2) elimination of transfers in Bay port elevators; (3) elimination of shortages in eastern elevators; (4) rentention of identity of grain shipped; (5) elimination of shrinkage and resultant reduction in quality on account of the numerous transfers now necessary in eastern elevators; (6) elimination of delays to shipments, on account of waiting for ocean space; (7) Fort William and Port Arthur are final points for inspection of western grain, and should be so treated; (8) improvement of car supply.

We will go into each of these advantages fully for the benefit of the readers who are not fully conversant with the grain handling facilities of eastern Canada.

Reduction of Freight Rates

It is an established fact that water transportation is much cheaper than rail. At the present time grain can be shipped to the Atlantic seaboard, during the period of open navigation, in three distinct ways: (a) By boat direct but not exceeding a maximum cargo of 110,000 bushels, on account of water draft; (b) by boat to the Bay ports and then transferred to canal steamers or barges for transhipment to Montreal, etc.; (c) by boat to the Bay ports and then transferred by cars to the seaboard.

Saving in Freight Charges

It does not require any stretch of imagination to figure a saving in freight rates if large steamers could load at the head of the lakes and then proceed, without interruption to the Atlantic. The quantity of grain taken, at the present time, by small steamers by this method, is negligible. The saving in freight rates is problematical at the present time on account of the freight rates not being stabilized through war conditions. Sufficient to say, that a large saving would be effected.

This scheme will permit some of our lake boats, which are too large at the present time to sail through the existing channels to participate in short trips on the coast during the winter months, rather than being tied up in the lakes all winter. If these steamers can operate twelve months in the year it will be probable that the freight rates on grain during the navigation season on the great lakes will be reduced. At the present time they have to make sufficient money in six or seven months to cover overhead expenses, etc., for twelve months. Competition will also have a tendency to reduce the freight rates. Particularly will this develop if two-thirds of the ocean going fleet decides to sail the great lakes.

Elimination of Transfers

At the present time the bulk of our export grain is handled as outlinded in paragraphs (b) and (c). This means that a bushel of grain is loaded into a steamer at Fort William, is carried by the steamer, say to Port Colbourne and then unloaded. It is then loaded either into canal barges or cars and shipped, say to Montreal, where the grain is again unloaded, as a rule, into the elevator. It is then finally transferred into the ocean steamers. This means that a bushel of grain is handled once at Fort William or Port Arthur, twice at the Bay port and twice at the Atlantic seaboard.

If a steamer could load at the head of the lakes and proceed direct to Europe, four transfers would be eliminated, four transfer charges would be saved and the grain would be delivered in better condition than at present. Transferring grain does not improve the quality of grain but has a tendency to break the kernels and reduce the quality thereof. In addition to the transfer charges, insurance charges would also be saved at these eastern elevators.

Shortages in Eastern Elevators

At the present time the majority of steamers discharging cargoes at the Bay ports have shortages. Irrespective as to who pays for these shortages they occur, and are a tax on the grain. If the steamer pays for them the steamer takes care of the shortage in the freight rate quoted. If the shipper pays for them the shipper must, of necessity, take care of them in the charges he assesses.

The weighing facilities at Fort William and Port Arthur are conceded to be the best on the North American continent. The chief weighmaster at these points, with his staff of assistants all of whom are under the Board of Grain Commissioners for Canada, have exercised such a strong supervision over the scales and the loading-equipment in the elevators, that the grain trade acknowledges, in general, the correctness of weights at the head of the lakes.

No such supervision is attempted in the eastern elevators. In fact it has been substantiated, time and time again, that the equipment and weighing facilities in the eastern elevators, are far below the standard of the weighing facilities at the head of the lakes. The result? Shortages.

If the steamers, taking on grain at the head of the lakes were permitted to proceed direct to Europe with the grain most of these shortages would be eliminated, and the exporter would be sure of receiving as correct weights as it is humanly possible to give. The saving in this regard alone would amount to an enormous sum during the crop year.

Retention of Identity

It has been the desire of many English importers, in fact their ideal, to be able to ship grain from western Canada, store in special bins at the head of the lakes, and ship direct to England, without losing the identity of the original grain purchased in western Canada or at Fort William or Port Arthur. At the present time this is impossible. Eastern elevators receive grain for transfer, and under the Canada Grain Act have the right to bin grain of the same grade together.

Grain transferred through the American elevators at Buffalo, etc., is entirely outside the jurisdiction of Canadian authority. The result is, that in ninety-nine cases out of a hundred the identity of the grain is lost. It is not necessary to point out the merits or demerits of keeping certain parcels of grain intact. Sufficient to say that farmers in the Canadian northwest have the right to special bin their grain and ship the same without contamination. The deep waterways scheme would give the exporters the same privilege.

Elimination of Shrinkage

Grain cannot be transferred without invisible waste, and a resultant reduction in the quality of grain as pointed out in No. 2. The invisible waste is, of course, problematical but expert elevator superintendents state, that on every thousand bushels of grain you transfer from a boat to an elevator or from an elevator to a car you lose thirty pounds on an average. Thirty pounds does not seem such a large amount, but when you take into consideration the enormous quantity of grain handled it amounts up to a considerable figure, when wheat is worth around $3 per bushel. Transferring grain also breaks the kernels and reduces the quality.

Elimination of Delays to Shipments

It is a well known fact that grain is often held up in the eastern elevators waiting for ocean steamers to arrive. Delays of this kind have not only been felt at the head of the lakes but at points in western Canada. Congestion in eastern elevators soon makes itself felt in the grain business of western Canada.

The storage capacity of the head of the lakes, at the present time, is ample to take care of large quantities of grain.

Inspection at Head of Lakes

The final inspection on our western grain is made when the grain is shipped from Fort William and Port Arthur. The grade certificate issued by the Dominion government, at the head of the lakes follows the grain to its final destination.

Irrespective of the number of elevators a given parcel of grain may have been in, irrespective of the number of steamers and cars the same parcel of grain may have been in, and irrespective of the probable mixing of the said grain in transfer and in transit in eastern Canada, the inspection certificate issued at Fort William follows the grain and finds its way to the European market.

Oftentimes the inspection certificate does not coincide with the sample of grain received, and the result is a disgruntled English importer with a resultant injury to the grain trade of western Canada. Everything that can be done to improve the value of the Canadian certificate of grain on the European markets is worth while because the results would be transferred back to Canada in higher prices being offered for our grain.

Improvement of Car Supply

At the present time large numbers of cars are required to transfer grain from the Bay ports to Montreal during the period of navigation. Very few canal-sized boats load grain and carry it direct to the seaboard. The largest percentage of grain is shipped by steamers to the Bay ports and then transferred to barges or cars, for shipment to the Atlantic seaboards. The deepening of the St. Lawrence will permit these cars to be released for work elsewhere, and it is safe to assume that the releasing of these cars will result in a better supply out west.

For the above reasons it is the duty of the producers of western Canada particularly, to take an active and sympathetic interest in this large undertaking. You can rest assured that the creation of this route will: (a) Reduce the freight rates; (b) Eliminate the tax on grain caused by shortages, etc. The total saving affected is problematical at this juncture but there is no doubt a substantial saving will be effected.

The final scheme, however, cannot have the approval of the western producers until more is known regarding the development, cost, etc. For this purpose the International Waterways Commission has been requested by the respective governments to make a thorough examinatin of the scheme, and also collect data from the different interests of the two countries.

Administration of Railways Debated in House

Government Having Difficulty in Keeping System Clear of Parliamentary Interference — Merchant Marine Policy also Involved — Results of Operation will be Placed Before Public Accounts or Special Committees

(Special to *The Monetary Times.*)

Ottawa, April 29th, 1920.

THE pioneer problem of Canada was transportation, and it continues to be the greatest problem before parliament. It creeps up continually in some form or other nearly every day of this session. With a national railway system representing the widest experiment in public ownership ever undertaken anywhere under fire; with a mercantile marine, partly under construction and partly on the seas; with western members demanding a completion of the Hudson Bay Railway and urging new branch lines; with parliament called upon to vote mililons to make up deficits, to increase harbor and shipping facilities, and with the question of possible increased freight rates to the fore, the House has given most of the present session to consideration of these issues.

House Wanted Information

This has been an exceedingly peaceful session so far, and the first storm on the horizon was stirred up over the question of the method of operation of the Canadian Northern System. Hon. Dr. Reid determinedly refused to give the House certain information in regard to railroad contracts, claiming that it was not in the interest of the system. It was being sought by unsuccessful contractors, who had been refused the information in the regular channels. Dr. Reid has a blunt and not very diplomatic way, and he, perhaps, stirred up unnecessary antagonism, but he made, at least, plain his refusal to answer unreasonable questions and as to the aims, in his mind, of the questioners.

The opposition challenged the right of the minister to refuse on the floor of the House any information in regard to the public-owned system. The issue raised is an interesting one, and in it is involved the whole question as to the method of operation of the government-owned system. The opposition claimed a constitutional question was at stake as to the rights of parliament to control expenditure. The government insisted, on the other hand, that there was no attempt to conceal information, but that if the government system was to be a success, it must be completely divested from politics and from petty interference by members of parilament, and must be given the advantages of corporate control. The government claimed that if the opposition had its way, it would mean a return to the old methods by which the Intercolonial was managed; these could hardly be claimed to have been successful. "Who would suggest," asked Hon. Arthur Meighen, "that this system could be run in competition with the C.P.R. if it were to be manacled, day by day, by parliament; if its business affairs were to be constantly exposed to its competitors, and if it were to be made a mark, subject to all the handicaps that departmental management of the Intercolonial involved for so many years?" Mr. Meighen pointed out that, if the minister of railways was to answer daily questions as to the management of the road, then the board of directors would have to be under him and subject to him. If the minister is put back in control, then they were right back to the old system of departmental management, the old patronage system.

Full Statement Later

While the government refused to answer daily questions in regard to the management of the road, it was claimed that there would be an opportunity to probe its operation to the full later. There would be an annual report, with a fully audited statement. When this is brought down it could be subject to investigation, either by the Public Accounts Committee or a Special Committee of the House.

There promises to be more heard of this whole question before the session is over, as the opposition is not satisfied with the attitude of the government and threaten to make an issue out of it.

The same question is also being raised in regard to the operation of the Mercantile Marine, and Hon. C. C. Ballantyne has taken the same stand as Hon. Dr. Reid. Mr. Ballantyne has been just as outspoken and as determined as the Minister of Railways. He declared that there was no possible chance for success of a government system of railways or ships if they were to be run along political patronage lines.

"I have never written a letter to nor asked a question of Mr. D. B. Hanna or any official of the Canadian Government Merchant Marine as to what route a ship will ply upon," declared Mr. Ballantyne. "I have not asked him how much he has paid for asparagus, or potatoes, or butter, or coal. The government have something to do besides dipping into the petty details of management. Therefore, we say to Mr. Hanna and those who are managing the ships: All that we want you to do is to manage the ships to the very best of your ability; all that parilament and the government and the country are looking for is that at the end of the year, if that be at all possible, the figures shall be on the right side."

There may be honest doubts as to the advisability of government ownership of railways, or as to the wisdom of the government going into the shipping business on the wholesale scope proposed by Mr. Ballantyne, but it would seem to be the common-sense method, even if not strictly constitutional, to divorce the systems from the daily interference of every member of parliament.

PRINCE ALBERT FIRE UNDERWRITERS

At the annual meeting of the Prince Albert, Sask., committee of the Western Canada Fire Underwriters' Association recently, the following officers were elected: President, A. I. Wilkinson, re-elected; vice-president, P. W. Mahon; executive, E. T. Bagshaw, J. S. Fowlie and Frank Kishey.

BANK BRANCH NOTES

Imperial Bank Premises in Amherst—Bank of Montreal Announces Numerous Transfers—Royal Bank to Have New Toronto Branch

The following is a list of branches of Canadian banks which have been recently opened:—

Halifax (Young and Gottingen)	Royal Bank of Canada.
Sarnia (Christian and Confederation)	Royal Bank of Canada.
Bala, Ont.	Royal Bank of Canada.
Caimanera, Cuba	Royal Bank of Canada.
Maximo Gomez, Cuba	Royal Bank of Canada.
Silveira, Cuba	Royal Bank of Canada.
Cap Magdeleine, Que.	Bank of Toronto.
London, Ont.	Standard Bank.
New Westminster, B.C.	Bank of Nova Scotia.

A new Imperial Bank building will be erected in Amherstburg on the old telephone office premises. The new building will be modern in every respect and work will be commenced as soon as possible.

The Royal Bank has acquired the two-story building and the land at the northwest corner of Spadina Ave. and Harbord St. for $20,000. Alterations for the bank's requirements have been commenced.

Mr. Charles Moore Stork, who retired from the staff of the Canadian Bank of Commerce recently, is one of the oldest in the service of the institution. He was born at Brampton, Ontario, in 1855. Mr. Stork began his career with the bank at the Toronto office in 1872, and after being stationed at a number of branches was appointed accountant at Windsor in 1879. Four years later he became manager of that branch. In 1888 he was transferred to the management of the Belleville branch, and remained in that position until his retirement on pension in January.

Mr. Richard Thomas Mussen, who recently retired from the bank staff, was in the employ of the Canadian Bank of Commerce for about forty-three years. He began his banking career in 1877, and served in no less than eighteen branches of the bank. In 1896, Mr. Mussen attained the rank of manager at Dresden, Ontario, and also served as manager at Dunnville, Ont., and Summerside, P.E.I. In 1912 he was appointed manager at Stratford, Ont., and occupied this post until his retirement.

Personal Appointments

Mr. William Hilborn, of North Battleford, Sask., has been appointed manager of the Guelph, Ont., branch of the Bank of Commerce, to succeed Mr. J. M. Duff.

Mr. H. F. Clarke has been appointed manager of the new branch of the Standard Bank at London, Ont.

Mr. W. G. Hamilton, formerly manager of the Bank of Commerce, Carmangay, Sask., has been appointed manager of the bank's branch at Yorkton, Sask.

Mr. J. E. Long, formerly of the main branch of the Bank of Toronto, Montreal, has been appointed manager of the bank's new branch at Cap Magdeleine, Que.

Mr. H. L. Dixon, formerly accountant of the Bank of Nova Scotia, at Vancouver, B.C., has been appointed manager of the bank's new branch, New Westminster, B.C.

The Bank of Montreal announce the following appointments: Mr. R. N. Bell, manager, Belmont, Ont.; Mr. J. N. Greer, manager, Bromhead, Sask.; Mr. F. G. Stevenson, manager, Ceylon, Sask.; Mr. G. W. Hutchins, formerly manager at Macleod, Alta., manager, Estevan, Sask.; Mr. G. R. Johnston, formerly manager at Bromhead, Sask., manager, MacLeod, Alta.; Mr. L. Clark, formerly manager at Belmont, Man., manager, Magrath, Alta.; Mr. M. MacKenzie, manager, 150 Mile House, B.C.; Mr. F. W. Warren, formerly manager at Ceylon, Sask., manager, Rhein, Sask.; Mr. J .H. Gauld, formerly manager at 150 Mile House, B.C., manager, Stewart, B.C.; Mr. O. W. Haire, manager, Terrace, B.C.

EXCHANGE QUOTATIONS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter
N.Y. funds	10 pm	10¼ pm	....
Montreal funds	Par.	Par.	⅛ to ¼
Sterling—			
Demand	$4,2550	$4.2650	....
Cable transfers	4.2650	4.2750	....

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first three weeks in April:—

Canadian Pacific Railway.

	1920.	1919.	Inc. or dec.
April 7	$3,617,000	$2,921,000	+ $ 696,000
April 14	3,635,000	2,868,000	+ 767,000
April 21	3,624,000	3,037,000	+ 587,000
	$10,876,000	$8,826,000	+ $2,050,000

Grand Trunk Railway.

	1920.	1919.	Inc. or dec.
April 7	$1,469,333	$1,274,553	+ $ 194,780
April 14	1,120,792	1,263,483	— 142,691
April 21	1,205,645	1,248,310	— 42,665
	$3,795,770	$3,786,346	+ $ 9,424

Canadian National Railways.

	1920.	1919.	Inc. or dec.
April 7	$1,834,118	$1,457,144	+ $ 376,974
April 14	1,818,934	1,590,159	+ 228,775
April 21	1,805,785	1,568,067	+ 237,718
	$5,458,837	$4,615,370	+ $ 843,467

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended April 29th, compared with the corresponding week last year:—

	Week ended Apr. 29, '20.	Week ended May 1, '19.		Changes.
Montreal	$115,548,170	$114,213,095	+	$ 1,335,075
Toronto	98,458,997	78,675,667	+	19,783,330
Winnipeg	42,600,841	44,757,082	—	2,156,241
Vancouver	16,740,171	11,952,310	+	4,787,861
Ottawa	8,183,554	8,269,568	—	86,014
Calgary	7,194,550	6,594,744	+	599,806
Hamilton	7,273,565	5,060,705	+	2,212,860

REACTION AND A POSSIBLE CRISIS

INFLATION and speculation continued for almost eight years after the close of the civil war in the United States. The war ended in 1866, but it was not until the panic of 1873 that the air was cleared and a movement towards sounder financial conditions set on foot. These facts were emphasized by John Moody, the well-known financial statistician and writer of New York, in an address before the Board of Trade, Toronto, on Wednesday. In comparing present conditions, however, he pointed out that it was not safe to reason entirely from analogy, for at the present time there is a world-wide shortage of the necessities of life, whereas this was not the case after 1866. While a panic was quite possible, therefore, he concluded that a widespread and prolonged depression, such as followed 1873 should not be expected, for the demand for goods would soon restore industry to a healthy condition.

When the upward trend of prices was resumed early in 1919, after a few weeks' recession following the armistice, it was an entire surprise to the industrial and financial world. Most lines of industry are still quite unable to keep up with the demand for their products. These developments have necessitated another revision of financial opinion, and some firms are going ahead with new programs on the assumption that high prices will be with us for many years to come. Others, however, have decided to purusue the safer policy of profiting by the present situation, so far as their production capacity will permit, but refusing to invest further their capital at present inflated prices. An official of one of the largest producing and distributing firms in Canada made the statement in an interview with *The Monetary Times* that they would make no additions or extensions during the present year, which is in marked contrast to their policy for many years past.

Just how far distant the turn in events may be can only be guessed. One thing is certain, however, and that is that the present rise in values, and consequent prosperity, will be followed by a reaction which may carry us back to the levels of 1914, or even further. Mr. Moody is of the opinion that an actual panic is not necessary to bring about this change. The experience of the past has, however, been that a crisis of some kind marks the turning-point. If its severity is proportional to the extent and degree of the expansion which precedes it, the next crisis will indeed be a panic. It is also quite obvious that governments are unable to check the present rise in prices and the accompanying orgy of extravagance and speculation; even well-organized and widely-supported thrift campaigns have fallen hopelessly flat. The most service that the individual or the corporation can render is to pursue the safe and conservative policy of economy, for in preserving their own financial strength they are erecting bulwarks against a storm which will certainly come, sooner or later.

"PROTECTIVE" SENTIMENT IN THE WEST

UNEQUIVOCAL in its denunciation of the protective tariff, the Canadian west has nevertheless not hesitated to extend support to local industry by other methods. Agriculture, its basic industry, and the one which, presumably, is the best able to stand on its own feet, has been carefully nurtured by government loans at less than market rates of interest and by direct co-operation of the provincial departments of agriculture. Wholesale guarantees were extended to railway enterprise, and last year the British Columbia government established a department of industries for the encouragement of industrial enterprise in the province.

In concluding an editorial, summarizing Saskatchewan's methods of developing infant industries, the Regina "Leader" says: "The Saskatchewan method of encouraging and assisting infant industries, by the application of the co-operative principle, is as superior to the federal method of tariff protection as day is ahead of night." Referring to the wool-growing industry, by way of example, the eidtorial says: "In order to find a market for Saskatchewan wool and secure to the wool-growers the highest price obtainable, the co-operative branch of the provincial department of agriculture undertook, some years ago, the co-operative handling and marketing of wool. It encouraged the proper grading of wool, and, as a result of its efforts, the wool-growing industry has expanded enormously, and good prices have been obtained.

"In other words," says the "Leader," "the Saskatchewan government encouraged the development of these industries, managed them in their infancy, but did so by making them not only self-supporting, but profitable. It did not make all the people bear the burden of their development, as the tariff does to assist a few manufacturers. And the Saskatchewan government saw to it that the 'infants' did not remain so, but grew up strong and self-supporting. Then, when they were established, they were set up as independent co-operative commercial enterprises, with hundreds and thousands of shareholders and a bright future."

We may, then, conclude that the west recognizes the value of assistance during the "infant" stage. Whether that assistance takes the negative form of a tariff shutting out goods from abroad, or be extended by guarantee, bonus, or government operation during the early stages, does not alter the fact that the general public is taxed for the benefit of one industry. If Saskatchewan was finally able to cease supporting the industries it had established, it is, indeed, fortunate, for the protected industries of the east are more dependent upon the tariff than ever before. The western provinces have not, however, been so successful in attempts to build up lines of industry other than agriculture. British Columbia, possessing considerable natural advantages, has been more ambitious in this direction than its neighbors on the prairies. This province has been rather too anxious to force the development of manufactures at a time when its own credit cannot well be endangered by the assumption of additional obligations. In stating the attitude of the province regarding the iron and steel industry, Hon. William Sloan, minister of mines, said in the legislature recently:—

"I may say, that the government has received many applications from various quarters for substantial support in the launching of this industry. All these applications required, however, that the government enter into financial responsibilities of a very serious nature, in many instances to the full financial requirements of the enterprise. This would involve a binding obligation not lightly to be undertaken under the conditions with which the province has been faced during the past few years.

"For this reason consideration has been given the question of whether it would not be the best policy for the government itself to lead the way to the establishment of an industry for the manufacture from our iron ores of commercial iron and steel rather than finance private enterprise to do so. It is proposed, therefore, that, should no more favorable terms be submitted by private enterprise, to assemble full and complete data, having special reference to the recent important discoveries of hematite ore in the Whitewater district."

BANK STOCK ISSUES OVERDUE

FIVE years ago the chartered banks of Canada had a subscribed capital of $114,422,066, of which, $113,976,736 was paid-up. At the end of February, 1920, the amount subscribed was $119,522,300, of which $119,241,918 was paid-up. During this interval total assets increased from $1,525,052,085 to $2,932,497,389. In other words, an increase of less than five per cent. in paid-up capital is carrying an additional business of 93 per cent. This comparison overlooks, of course, the fact that reserves have been increased in the meantime, but even here only $11,000,000 additional is found. The new demands of industry have been met, it is apparent, by the issue of more paper money, and by the expansion of deposits. Bank note circulation at the end of February, 1915 totalled $97,789,392; at the end of February last it was $223,377,781, an increase of 130 per cent. Deposits during this period almost doubled.

The financing of war-time and post-war business on the capital of pre-war years was a creditable feat, considering not only the increase in the volume of business but the depreciation of the dollar as well. These factors swelled the volume of current loans in Canada from $771,635,208 in 1915 to $1,257,015,902 in 1920. The increase in other loans was still greater, the total, exclusive of loans to governments and municipalities, being $1,749,448,941 on Frebruary 29, 1920, compared with $972,779,338 on February 28, 1915. At the same time, this extension of credit was one of the basic reasons for the rise in prices, for gold reserves were not increased in proportion. Several new issues of bank shares were made last year, one of the reasons being the desirability of bringing the capital invested to a higher ratio of the amount of business.

A further issue of $2,000,000 of capital was recently announced by the Bank of Montreal. This issue is offered at $150 per share, payable in ten monthly instalments commencing on June 30, to shareholders of record as at May 20. $3,000,000 of new capital will be introduced into the bank in this way, thus enabling it to increase its business still further, or to strengthen its financial position if the demand for loans falls off. Each shareholder of record May 20 will have the privilege of subscribing for one new share for every ten already held. As the present market price of Bank of Montreal stock is about $210, this will mean a benefit of about $60 for every ten shares held, or $6 per share. In the case of any new issue of this kind, some discount must be allowed to prevent a depression in the market, and the new issue can, therefore, scarcely be called a "melon," but means that new capital, in reasonable proportion to the stock issued, is available for banking business in Canada.

Another issue just announced is that of $5,400,000 of Royal Bank stock. This will be available to shareholders of record May 31st at $150 per share, payable in monthly instalments. The Royal Bank's authorized capital is $25,000,000, of which $17,000,000 is already subscribed and paid up. The present market value is about $220 per share, an excess of $70 per share over the issue price of the new stock. As the new stock will be issued in the proportion of one share to every five already oustanding, this will mean a benefit of $14 per share already held.

The Merchants Bank is also making an issue of $2,100,000. The present paid-up capital is $8,400,000, and the new stock is offered in the proportion of one share to each four already outstanding, at $150 per share. Merchants Bank stock has been quoted recently at around $188 per share, so that present shareholders benefit to the extent of a little less than $10 per share by reason of new issue. Considerable activity has resulted in exchange dealings in the shares of these three banks, as many holders are buying or selling for the purpose of evening up their holdings, and small price advances have been made in each case.

IMPROVEMENT IN EMPLOYMENT CONDITIONS

The Employment Service of the Department of Labor reports that returns from Dominion and provincial offices of the Employment Service of Canada for week ended April 10, show an increase in placements as compared with the returns of the preceding week. The offices reported that they had referred 9,201 persons to regular positions and that 7,883 of these were placed. This represents an increase of 1,136 as compared with the returns of the previous week, when 6,747 persons received employment and an increase of 681 as compared with the returns of March 27th. Increased activity was noted in all provinces except in Saskatchewan, where a slight decrease was registered. In addition, 1,418 casual jobs were supplied as compared with 1,346 during the week ended April 3.

During the week 10,054 applicants were registered, of whom 845 were women and 9,209 were men. This represents an increase of 1,175 applicants when compared with the 8,879 applications of the preceding week. The number of vacancies notified by employers totalled 10,530, of which 1,548 were for women and 8,982 were for men. When compared with the 9,085 vacancies notified during the previous week, an increase of 1,445 is shown.

Australia and New Zealand

Every effort is being put forth to foster and increase trade between Canada and Australasia. The correspondents of this Bank include the principal banks of both Australia and New Zealand, and on the Pacific coast of both Canada and the United States it has branches in all the principal sea-ports. With many years' experience gained in transacting a foreign business, its services are at the disposal of Canadian exporters and importers.

J. P. BELL - - General Manager

PERSONAL NOTES

Mr. Wm. N. McIlwraith, of Wood, Gundy and Company, has returned to Toronto from a trip to Great Britain.

Mr. T. A. Colclough, K.C., deputy attorney-general of Saskatchewan, is leaving the department to commence practice as a barrister in Regina.

Mr. E. F. Alexander has arrived in Canada to assume his duties here as chief agent for the Continental Casualty Company of Chicago. The head office for Canada is being moved from King St. West, to 80 King St. East, Toronto.

Mr. L. C. Alexander, Toronto, for the past eight years inspector for the London and Lancashire Fire Insurance Company, in Ontario, has recently been appointed inspector for the Union Assurance Society of London for the province of Ontario.

Mr. Roy T. Leavens has been appointed inspector for Ontario, for the Glens Falls Insurance Company. Mr. Leavens was born and educated in Toronto, and has been thirteen years in the insurance business. He started with the Canadian Fire Underwriters' Association and rose to the position of chief mercantile inspector. He then spent some time in the agency busintess in Toronto, but went to Winnipeg in 1913 as travelling representative of the Western Canada Fire Underwriters' Association. In 1917, he entered the services of Osler, Hammond and Nanton, Winnipeg, as chief inspector, covering territory as far west as the Pacific coast. Sydney Crocker, 24 Toronto Street, Toronto, is the chief agent for Canada of the Glens Falls Insurance Company. Mr. Leavens will also be closely associated with Hearn and Van Norman, the Toronto agents of the company.

Major S. Temple Blackwood has been appointed Toronto manager for Laidlaw and Company, members of the New York stock exchange. Major Blackwood was, until recently, a partner in the firm of G. W. Blaikie and Company, and some years ago was with Mr. J. Gordon Macdonald. Mr. C. A. Boddy, who has been with Laidlaw and Company for several years, has been made assistant manager for the Toronto office.

Mr. R. Bruce Abel, inspector of the insurance department of H. Bell-Irving and Company, has gone into business under his own name at 220 Winch Building, Vancouver, where he will carry on a general fire insurance business. His first business undertaking was that of agent for the Union Steamship Company. Later he joined the insurance department of Evans, Coleman and Evans, and for the last four years has been inspector for the H. Bell-Irving insurance agencies.

Mr. J. M. Grieve, who was superintendent of the Sleeping, Dining and Hotel Department of Canadian National Railways at Winnipeg, has been promoted to be general superintendent with jurisdiction over sleeping, dining and parlor cars and of the news service over the entire system. His headquarters will be at Toronto. Mr. H. B. Wollen formerly assistant superintendent succeeds Mr. Grieve, at Winnipeg, and Mr. C. H. Worby succeeds Mr. Wollen. The headquarters of both Mr. Wollen and Mr. Worby will be at Winnipeg.

OBITUARIES

Mr. W. G. E. Boyd, assignee, died in Hamilton, April 23rd.

Mr. Henry Edward Peters, Thetford Mines, Que., died on April 11. The late Mr. Peters was secretary-treasurer of the Bennett-Martin Asbestos and Crome Mines, of Thetford Mines and Coleraine.

Mr. William Gordon, of Stratford, died April 13. The late Mr. Gordon was born in 1841, in the township of Woolwich, Waterloo county. He went to Stratford in 1870, in business with the late J. J. Clark. He was four times mayor of Stratford.

Mr. W. H. Moore, K.C., a prominent lawyer of Peterboro, died on April 23rd. The late Mr. Moore was chairman of the Utilities Commission and the Peterboro City Trust Commission, and during his lifetime was associated with many public offices.

Mr. Olaf E. Granberg, Westmount, Que., died on April 17. The late Mr. Granberg was born in Norway in 1851. He was vice-president and eastern manager of the Boiler Inspection and Insurance Company of Canada for many years. He was an engineer by profession.

Mr. Thomas Meek, St. Thomas, died on April 11. He settled there in 1861 and for years carried on a harness business. He was elected to the city council in 1892 and served for fourteen years, being mayor in 1905. He had been city tax collector for the past fourteen years.

Mr. John A. Moody, treasurer of Ridgetown, Ont., died at his home in St. Thomas, Ont., on April 26th. The late Mr. Moody was junior member of the firm of John M. Moody and Son, Ridgetown, for several years, and later was engaged in the brokerage business in London.

Mr. Archibald Miller, a prominent Quebec business man, died on April 23rd. The late Mr. Miller was president of the firm of Whitehead and Turner, Limited, wholesale grocers, and was for many years president of the Wholesale Grocers' Guild, and of the Le Boutellier Company, Limited.

Mr. John Henry Boyle, Toronto, died on April 9. The late Mr. Boyle was born in Sanhill, U.S.A., in 1848. For many years he has been engaged in the real estate, brokerage, and valuation business at 34 Toronto Arcade. When Mr. Boyle first came to Toronto he engaged in the steamboat business and opened Victoria Park. He also got the contract to supply the first boat service to Toronto Exhibition. He promoted a scheme to carry grain for export from Georgian Bay ports to Toronto for the trans-shipment overseas, and got a charter for the Canada National Transport Company. He interested the Nova Scotia provincial government and a number of Canadian and American capitalists but was never able to proceed with the scheme.

Hon. A. G. MacKay, minister of Municipal and Health Affairs in the Alberta government, died on April 25th. The late Mr. MacKay was born in the township of Sydenham, Grey County, in 1860. In 1883, he graduated from the University of Toronto with the degree of B.A. and two years later secured the M.A. degree. In 1891 he commenced to practice law in Owen Sound, and later was elected a member of the Ontario legislature, becoming leader of the opposition. In 1912 he went to Edmonton, Alberta, where in the legal profession, he soon won a leading place and was recognized as one of the ablest crimnal lawyers in the province. He was elected a member of the legislature for Athabaska in 1913, and entered the government in 1918 as minister of municipal affairs, to which was later added the department of health.

LOCAL OPTION FOR THE SINGLE TAX

Leaving Question to Municipalities Opens Door to Unfair Discrimination—Would Attract Large Industries

By J. Courtland Elliott

THE announcement made by Premier Drury in his tour of northern Ontario that it was probable that the farmer government would initiate legislation to permit local option in taxation with the hope that municipal single taxing would be the result will be heard with regret by all those who have been able to appreciate the follies and fallacies of the single tax where it has been in operation.

It is not necessary to reiterate that the failure of the single tax, so-called, in western Canada in the past decade has induced practically every administrator of taxation to revert to some other methods of securing revenue. It will be recalled that in the years before 1910 the tax base in the urban communities was distributed almost equally between land and improvements but within a few years land had become the sole base. In the boom days the dazzling prosperity which accompanied the inflation of land values blinded the eyes of administrators to the deficiencies of the system of municipal single taxing. Single tax journals and supporters pointed to western Canada as the land where their dreams had come true but eventually the prediction of reputable economists that while the single tax might be successful in days of exceptional prosperity it was doomed to be a lamentable failure in adversity came true. In 1914 Prof. Robert Murray Haig concluded a report upon western taxation with the words, "the system of taxation does not check or prevent speculation in land, the absence of a tax on building is not in itself an insurance that building activity will continue indefinitely . . . and it has been customary to think of western Canada as a region where single tax measures have been uniformly successful. Such is not the case."

Theory Failed in Practice

Nor is this the most stirring indictment of the municipal single tax. Practically every administrator upon whom fell the duty of putting the finances upon a sound basis condemned the single tax and some even went so far as to claim that it actually promoted speculation in land. Consequently there is a tendency now to rely upon land and improvements as bases for taxation along with income and business taxes and the single tax is growing in disfavor.

Moreover, the system of single tax proposed by Premier Drury is particularly virulent and will bring about consequences which will inevitably result in its speedy repeal when municipalities unite in condemning it.

Bait to New Industries

Regarding the matter from the point of view of those who wish to eliminate injustice in municipal competition it is certain that local option in initiating the single tax will entail results which are identical with those recently condemned at the annual convention of the Union of Canadian Municipalities in Kingston. There the policy of bonusing industries in any form by municipalities was vigorously deprecated and a resolution was unanimously carried that any province which had not already passed legislation to prevent this iniquitous process should be prayed to enact it immediately. Ontario was one of the provinces to which an appeal was to be sent. Yet communities adopting the single tax would, in fact, not only be able to grant bonuses but would also necessarily exempt from taxation large industries which should support—if the principle of faculty in taxation is to mean anything—the community where they are securing advantages.

If under the proposed system of local option some misguided communities were to insist upon the single tax with all its fiscal, political, ethical and economic defects and other communities preferred to retain the system of taxing both land and improvements which has proved so efficacious when equitably administered in the past, is there any doubt as to the communities in which industries would locate if the natural advantages were equal? Obviously the community which provided exemption from taxation of the property of industries would be able to secure the manufacturing plants and Ontario is the province where industrial expansion must occur. In this way, even if the policy of bonusing were to become illegal, the resolution of the Union of Canadian Municipalities would be defeated to some extent.

Nor is this the only condition which local option in the single tax would bring about. Offsetting this particular advantage which would accrue to the communities adopting the proposal would be all those disadvantages which constitute the hoary and well-known arguments against the adoption of the single tax which need not be reiterated here. The experience of western Canada should be enough to influence most municipalities to retain a basis of taxation which only now is removing obstacles created by the single tax in the west.

There has been no intimation as to the ulterior motive for Premier Drury's proposal. The single tax is notoriously unjust and defective and the benefits which it is claimed it will bring about are peculiarly vaporous under that method and may be attained by other more equitable methods. In spite of this the announcement of the farmer premier might lead one to the conclusion that he is being influenced by the demands of his supporters and any proposal to initiate single tax in Ontario will probably bring about the cry of class legislation which he seems particularly anxious to stifle. If on the other hand he is under the impression that he is doing something which is for the benefit of Ontario he might better turn his attention to some methods of securing precision in assessment and collection and if he is desirous of preventing speculation the unearned increment tax might well be considered. As it is, few fiscal administrators will relish the thought of the operation of the single tax in Ontario.

CANADIAN BUSINESS FAILURES

Bradstreet's report the number of business failures in Canada for the week ended April 15, 1920, as 8, compared with 12 for the previous week, 13 for the same week in 1919, 16 in 1918, 22 in 1917 and 36 in 1916.

TO CONSTRUCT TUNNEL UNDER BURRARD INLET

The Burrard Inlet Tunnel and Bridge Co. has been authorized by the Dominion parliament to construct under the first narrows of Burrard Inlet, B.C., a tunnel, and over the second narrows a bridge, and also certain lines of railway. The company is to spend 15 per cent. of its capital stock for such constructions, which will take five years to complete

CALGARY AIMS AT CIVIC INSURANCE

The city of Calgary is this year setting aside $30,000 to start an insurance fund of its own, and at the end of five years will begin to carry its own insurance on this fund. Of the $30,000 annually to be laid aside, $14,000 comes from the general fund and $16,000 from the public utilities. This will provide a fund of something over $150,000 at the end of the five-year period, and the plan is to drop all other insurance and carry the most hazardous risks, such as the exhibition buildings. The idea behind this is that all the city's property is not likely to burn down at one time; that the fund will be sufficient to cover the greatest hazards, and that if it is wiped out by a loss, the city could immediately proceed to take out private company insurance to cover other risks.

The insurance carried by the city this year will be $1,050,000, an increase of $400,000, due to higher values, and the premium paid is about $1.75 per $100.

AFRICAN BANKING CORPORATION, LIMITED
(LONDON)

Paid-up Capital and Reserve, $6,800,000

Over 60 Branches and Agencies throughout South Africa

Principal Branches located at Bulawayo, Bloemfontein, Cape Town, Durban, East London, Johannesburg, Kimberley, Port Elizabeth, Pretoria, and Salisbury.

THE NEW YORK AGENCY

negotiates documentary bills of exchange, issues drafts and cable transfers, and transacts a general banking business direct with the branches of the Bank in South Africa.

Correspondence invited from Canadian Shippers to South Africa, and facilities offered for the conduct of their business with that country. Address the New York Agency

On a National Power Policy

Necessity for Power Development Recognized in Creation of Dominion Power Board—Example of United States—Suggested Constitution for Board to Carry Out National Power Policy

(Contributed)

THE urgent necessity of co-ordination of water and fuel development in Canada was demonstrated by the creation of the Dominion Power Board in April, 1918, with the primary object of investigating this problem, and further by the subsequent formation of the permanent sub-committee of council to deal with questions of power.

The necessities of the "acute fuel area" in Canada and of substituting water for fuel power wherever possible were ably presented at the professional meeting of the Engineering Institute of Canada about a year ago and are now very generally recognized. The shortage and high cost of fuel has been forcibly brought home to most industries and to nearly every home in Canada in the last two years. Is everything possible being done about it? An unavoidable factor in the problem is that, even with the best efforts, it must take years before any marked result can be obtained.

Viewpoint in the United States

Across the border our neighbors are tending strongly towards an active national power policy. The annual report of the director of the U.S. Geological Survey, 1919, speaking of its "Division of Power Resources," states that:—

"The function of this division is to investigate the magnitude and distribution of water-power sites and fuel deposits, placing special emphasis on the relative importance of the sources from which energy is locally obtained and giving due consideration to future requirements of energy. . .

"Under the war demand for fuel conservation, the hydraulic engineers of the Geological Survey served the Fuel Administration in a field study of power problems, both statistical and engineering. . . . .

"Thus a power survey of the United States was begun, and with the termination of this co-operation with the Fuel Administration at the end of the war, the Secretary of the Interior asked of Congress two appropriations, one of $50,000 for continuing this power survey over the whole United States, and the other of $200,000, for an intensive survey of the industrial zone of the northeast, where power requirements are most congested. . . . .

"The first step is to get the facts for the country as a whole and particularly for the North Atlantic industrial district. . . . .

"This latter, the 'super-power' project, which engineers agree seems wholly practicable, is to pool the power supply for the whole industrial area between Boston and Washington, in which is concentrated one-fourth of the power-generating capacity of the country. Such a unified power system would tie together properly located steam-electric and hydro-electric plants. . . . ."

This "super-power" scheme for the "North Atlantic Industrial District" is designed (per Secretary Lane's Annual Report, 1919) "to tie together the separated power plants of ten states." The public utility electric power plants alone in this area have an output of 4,500,000 h.p. and it is understood to be not only intended to tie together existing power stations but to also feed into the area from the Pennsylvania coal fields and from the St. Lawrence River.

Suggestion for Canada

Why not an equally adequate investigation for the industrial area of eastern Canada? The fruition of a national scheme for fuel conservation and for co-related water-power and fuel power development in Canada cannot be achieved without the active financial co-operation of the Dominion government, both in investigation and operation.

The term co-operation is here used in the specific sense that any project for a national power policy should involve, not action or financing of projects by the Dominion government alone, but actual co-operation by the existing commercial and municipal power interests, the investing public, and the government.

The skeleton outline of a method by which it is suggested that it might be possible to inaugurate and carry out a national power policy for the conservation of fuel and development of water power is as follows:—

Corporation Should be Formed

The formation of a corporation with a constitution and by-laws formulated by the Dominion government and unalterable without its consent. The capital of such corporation to be equally subscribed by the Dominion government, by the existing power interests (under legislation) and by the investing public. The capital to consist of 50 per cent. in bonds to be issued to the government and 50 per cent. in stock or shares to be issued to the public (including power interests). The security for the bonds to be the assets of existing power companies acquired in carrying out a national power policy, the plant and equipment of all new fuel and water power developments constructed in carrying out such policy, and the lands, water powers, fuel lands, rights of way, etc., similarly acquired or incorporated.

The shares to provide a portion of development expense and the working capital. The Dominion government to guarantee such minimum dividend on the shares as would secure the subscription of the necessary capital and secure the shareholders against loss in the "lean" years of organization and development. Thereafter, when the undertaking reached a dividend earning basis, the surplus available for interest to be equally divided between the government and the shareholders; the excess beyond a reasonable dividend, after providing adequate reserve funds, to be applied to diminution of rates charged.

The control to be by a board on which the Dominion government (the bond-holders) and the public (the shareholders) would be equally represented, the permanent chairman to be separately chosen by the board when constituted (and acting under a temporary chairman) for his high technical attainments and commercial experience in power generation and operation, such a chairman to be an addition to the equal numbers of the board and to possess the deciding vote in the event of a tie.

Must be Inter-provincial

In carrying out a national power policy it is obvious that for this purpose provincial boundaries could not be observed, and that for the "common good" all transmission of power, and connecting up of fuel and water-power plants to a common network of transmission and distribution, would have to be regarded as "interstate commerce" under Dominion government control. Without this, and financial co-operation between the government, the power interests and the investing public, it would appear that no effective national power policy can be developed.

The great and general benefits that might accrue from such a national power policy, for conservation and better distribution of fuel, saving of transportation, development of water power, extension of manufacturing industry, etc., are within the view of every thinking man familiar with these problems and many others. The above suggestions, however, have been put forward, not for the purpose of surrounding them with platitudes, but for the purpose of promoting discussion, and, therefore, it will be left at this point with the hope that discussion will ensue.

THE TRUST COMPANY AND ITS SOLICITORS

Division of Work Among Accountants, Estate Clerks and Other Officers Makes Easier Administration of Estates

SHOWING how the trust company benefits the legal profession, a recent number of the "Executor and Trustee," issued by the Toronto General Trusts Corporation, discusses some of the legal phases of corporate administration. "Trust companies," says the article, "on account of the nature of their business—administering estates and trusts, acting as guardians, trustee for bondholders, assignee, receiver, etc.—are brought into close contact with the legal profession. The fullest confidence should always exist, therefore, between trust companies and the profession, as the best results can be obtained only when the one has a proper appreciation of the service it can render to the other. In Canada and the United States, lawyers everywhere have been quick to appreciate the advantages of the corporate trustee—the greater certainty they have than in the case of a private trustee of being retained to do the legal work in connection with estates in which a trust company is trustee or administrator, of the benefits of expert service, financial responsibility and continuous existence. A few of the services which trust companies can render to solicitors in the practice of their profession are as follows:—

New Business

"Trust companies create and develop a large amount of business for the legal profession from year to year. It is not within the bounds of professional etiquette for a solicitor to advertise for business. The extent of his advertising is to insert his card in a newspaper or legal journal. Trust companies, however, are not so bound, acting, as they do, in a lay capacity, and a large part of their publicity consists in impressing upon the public the importance of having a will made, the benefit to be gained through the creation of a trust, or the advantages of investing one's money in trustee securities. Every will probated, every trust created, every investment made in mortgages on real estate involves work for the solicitor, and the energetic efforts of trust companies in Canada in this direction, therefore, bring a large grist to the legal mill annually.

Trust Deed Provisions

"Another useful service which trust companies can render to the legal profession is to give suggestions to a solicitor when he is drafting a trust deed or testamentary document. From the very nature of their work, their practical knowledge of the execution of trusts and estates, trust company officers know something of defective and indefinite clauses which are apt to get into these deeds, despite the great care which may have been taken in their preparation. Often the 'dead hand' of testator or donor renders ineffective what might have been a beneficial and useful provision, and so the modern trust company can make useful suggestions as to the conditions under which the provisions can be carried out.

Estate Accounts

"The accounting end of estate management is another feature of trust company service which the careful solicitor is quick to appreciate. Most solicitors who have handled estates have had the experience of the private executor coming into their office with a well-mixed bundle of papers representing receipts for payments extending over a number of years, and under his arm a book purporting to contain a statement of the estate accounts which have been as easy to understand as the proverbial Chinese puzzle. He knows the trouble he has had, and the time he has spent in getting these accounts into proper form for passing before the Surrogate Court. When the executor is a trust company, however, the case is quite different—all a solicitor has to do is to ask the company for a statement of the estate accounts to enable him to take out an appointment for passing, and as many more copies of the accounts as he may require, no matter what their length may be, the trust company cheerfully furnishes him with. When he attends before the judge on the passing, he has the accounts and vouchers in the form prescribed by the Court Rules, and has by his side the trust company officer ready to give both beneficiaries and court such information as may be required. The solicitor's costs on passing are just the same as if he had gone to all the trouble of preparing the accounts himself, for, according to the Surrogate Court tariff, these costs include 'preparing petition, affidavits, accounts, and all necessary papers and services in auditing and passing of accounts.' Thus the economy in the saving of the cost, the trouble, the material and time occupied in the preparation of the accounts which solicitors thereby effect through the trust company service is considerable."

INTERNATIONAL LOAN COMPANY INCORPORATED

A bill has been passed in the Dominion legislature incorporating the International Loan Co. with a capital of $20,000,000, and head office at Winnipeg, Man. The company may acquire the whole or part of the rights and property of the International Loan Co., Ltd., incorporated by letters patent under the Manitoba Joint Stock Companies Act, and in event of such acquisition, shall perform and discharge all such duties, obligations and liabilities of that company with respect to the rights and property acquired as are not performed and discharged by that company.

The provisional directors of the company are: Geo. W. Argue, loan company manager; Geo. Hay, secretary-treasurer; B. McKenzie Gunn, barrister-at-law, and Robert Rettie, all of the city of Winnipeg; Charles Setter, of Poplar Point, Man.; John Burns, Warren, Man., and R. Hunter, Starbuck, Man.

MORE AMERICAN CAPITAL IN WEST

Cochrane, Harper and Co., of Boston, are opening an office in Edmonton, Alta., to develop their interests in the Canadian west. This firm controls the Lamson-Hubbard Co., of which S. St. John Morgan is president. In visiting Edmonton in company with Mr. Morgan a few days ago, R. M. Harper said: "With conditions as they have changed since the war there has been a shifting of the investment demand so that the money interests in the east are seeking new outlets for the investment of funds. The tax laws are so onerous in the United States that I think the enthusiasm is becoming somewhat dampened toward the development of industrial enterprises there and foreign fields are being sought. My own firm has a very vital interest in your province, for two years ago the Lamson-Hubbard Co., with which we are associated, embarked in the fur trading business on the Mackenzie River, starting with an initial investment of $200,000. In a space of two years that company has grown to one with net assets of well over $2,000,000 with an annual turnover of about a million dollars. From a field of seven scattered posts we have grown to 35 posts and a complete line of transportation with four river steamers, while we also control the big Kleskon Ranch in the Grande Prairie district.

"Our interests in Alberta have become so diversified that the company feels that it is necessary to have direct representation, so that we can keep in close touch with affairs and take advantage of any new opportunities that may arise. There is also a further and more important object. It is our desire to operate so that we will not represent solely United States capital, but that we shall be working jointly with Canadian interests and show the Canadian people that we are not in here for what we can get out of it, or to steal your resources. The profits derived from our operations in the north are being put right back in for the development of the country."

James Pike, who has been manager of various branches of the Merchants Bank in Alberta, for the past twelve years, will be manager of the new Edmonton branch.

You Employ a Specialist

—when you require medical or legal assistance. Why? Because you recognize the necessity of skill and training.

It is even more important that you employ a specialist in the management of your estate after you are gone. A strong and responsible Trust Company will bring to your estate the experience gained through years of specialization in trust matters.

You cannot afford to turn your affairs over to someone whose first experience must be gained at the expense of your property.

By naming a Trust Company, you can be sure that your cherished purposes will be faithfully carried out and your estate carefully safeguarded.

THE SECRET

Trust Companies started to do business in Canada with the formation of this Corporation in 1882. By the end of 1919, the total assets under administration by all the Canadian Trust Companies amounted to approximately Six Hundred Million Dollars, whilst the total assets of this Corporation exceeded One Hundred Millions. What is the secret of this wonderful growth ? This—people everywhere are becoming alive to the fact that, for efficiency and economy, Trust Companies make the best Executors and Trustees. CANADIAN PAPER MONEY CURRENCY

Percentage of Gold Reserve Shows Large Drop Compared with 1914—Canada's Position Much Better Than That of Some European Countries

NOW that the funding of Canada's war obligations is completed, the extent to which inflation has been resorted to can be appropriately examined. An article in a recent issue of Greenshields and Company's "Review," went into this subject at length, and concluded that the increase in the use of paper money in Canada had been moderate. The article says:—

"The pyramiding of credit on war loans, which has been responsible for a good deal of strain on the credit situation in countries as strong financially as the United Kingdom and the United States, has been almost entirely absent from the situation in Canada. The banks have loaned freely to assist their customers to subscribe to the internal war loans, but under such restrictions that it may safely be said that the advances on one loan have been retired before the next one came along. The banks, although holders of a certain amount of foreign securities obtained in connection with credits arranged for European countries, have not been under the necessity of subscribing to our internal war loans. Their resources have been quite properly availed of from time to time for the purchase of treasury bills of the Dominion government. The great bulk of these temporary advances, however, has been liquidated in each case out of the proceeds of the succeeding war loan. Such foreign securities as the banks hold are, except to a nominal amount, short-dated paper, and theoretically at least, a liquid asset of the first class.

"It may be stated with confidence, therefore, that our banking system has avoided very successfully one of the great dangers of war-time financing, namely, an indefinite tie-up of the credit resources required for the carrying on of the ordinary business of the country. War loan subscriptions, except to the moderate amount advanced in connection with the loan just floated represent actual saving by the people of the country and not merely the utilization of banking credit. We doubt very much if any country involved in the war—and this does not except the United States—has come through in as sound a position as Canada in this important respect.

"As to our paper money circulation, although we must admit to inflation through an excess issue of Dominion notes, made on the initiative of the government, the condition of affairs in this respect can give rise to no uneasiness. Relatively, our position is favorable, and an adjustment to the pre-war status, a pressing problem to Europe with its mass of irredeemable paper money, can safely be classed among the minor problems here. The facts, which are not as well known as they might be, are briefly as follows:—

Circulation Now and in 1914

"In June, 1914, the paper money circulation of the Dominion consisted of $114,182,100 Dominion of Canada notes, and $96,588,029 notes of the chartered banks. From the latter we have deducted an amount equal to the Dominion notes held in the Central Gold Reserve as cover, dollar for dollar, for bank notes outstanding, in order to arrive at the net amount of paper money outstanding. The gold held in the Treasury at Ottawa against redemption of Dominion notes and the gold and subsidiary coin held by the banks in their tills and in the Central Gold Reserve were:—

	Notes.	Gold.	P.c. of gold.
Dominion government.	$114,182,100	$92,663,575	81.5%
Chartered banks (net)	96,588,029	46,608,956	48.3%
Total	$210,770,129	$139,272,531	66.1%

"As part of the war measures adopted in 1914-15, the amount of Dominion notes that the government could issue with only 25 per cent. cover in gold, instead of dollar for dollar, was increased from $30,000,000 to $50,000,000 and authority was granted for the issue of Dominion notes against approved securities. The result was a very considerable increase in the outstanding issue of Dominion notes. At the same time the circulation of the chartered banks had expanded in response to the demands of business. The actual amount of bank notes outstanding at the end of December, 1918, was $224,501,117, but as the banks had on deposit in the Central Gold Reserve $122,400,000 Dominion notes (in addition to $8,500,000 gold) as security for excess circulation, their net liability in respect to note issues was that much the less. On the same basis of comparison as in the first table, Canada's position at the end of 1918 with respect to the net issue of paper money and the gold cover against it was:—

	Notes.	Gold.	P.c. of gold.
Dominion government.	$327,391,480	$115,935,670	35.4%
Chartered banks (net)	102,101,117	87,815,616	86.0%
Total	$429,492,597	$203,751,286	47.4%

Inflation in Moderate Degree

"In respect to Dominion notes, therefore, this quite clearly represents a considerable degree of inflation. With gold holdings only 23 millions larger than in June, 1914, the amount of Dominion notes outstanding had increased 213 millions. The percentage of gold cover declined from 81.5 per cent. to 35.4 per cent. But allowing for the fact that the Dominion notes in the Central Gold Reserve cancelled in effect so much of the bank paper outstanding, the net circulation of the banks had increased less than six millions, while their gold holdings had increased 41 millions. In the aggregate the net amount of paper money outstanding had a gold backing of 47.4 per cent.

"If it is accepted that a gold reserve of 35 to 40 per cent. is sufficient to maintain a paper note circulation at parity—the requirement of the Federal Reserve System in the United States is 40 per cent.—this showing would of itself be satisfactory. By comparison with the situation in Europe it is much more than that. The paper money of France is five times as great as in 1914, with an actual decrease in gold holdings; in Germany paper issues are fifteen times greater, with the increase in gold—largely at Austria's expense—about 70 per cent.

"Russia's extreme case, with note issues more than 100 times greater than in 1914 and a decrease in the metallic reserve, may be disregarded for comparative purposes. But in the United Kingdom, which was the main reliance of the Entente in supporting the financial burdens of the war, a currency note issue of $1,500,000,000 has had latterly a gold backing of less than 9 per cent., while the percentage of gold to total paper issues fell from 134.6 per cent. in June, 1914, to 25.6 per cent. in December, 1918.

"In fourteen representative countries, including prosperous neutrals as well as belligerents and excluding Russia, the ratio of gold reserves to paper money decreased in the same period from 56 per cent. to 13.3 per cent, against a decrease from 66.1 per cent. to 47.4 per cent. in Canada. By September, 1919, the ratio of gold to notes here had further recovered to 53.1 per cent.

"Moody, the American statistician, has brought together from an authoritative source certain data as to the paper money situation in leading countries which we present below in revised form with our own figures on Canada and the United States.

	June, 1914,		
	Notes.	Gold.	P.c. Gold.
France	$1,177,693,000	$ 789,832,900	67.0
United States	2,608,517,000	1,789,655,000	68.6

Conditions Sound

"Such inflation as there is in our currency possibly plays a part in the high cost of living at home and in the depreciation in the Canadian dollar at New York. It is doubtful whether the part can be given much importance. If our dollar is at a discount in New York, it is at a premium in London and Paris. The excess issue of Dominion notes bears chiefly on the banks; it amounts in part to so much of a forced loan. Depreciation in the value of our dollar at New York has been largely, if not altogether, the result of a voluntary policy of accepting business from European countries on a credit instead of a cash basis. High commodity prices at home have been due to a demand in excess of the supply. As a large exporter on balance the country as a whole has benefited from high prices, whatever the hardships imposed on individual groups in the community.

"With a gold backing of over 47 per cent. against our paper money, and the net balance of trade in our favor, obviously our position is radically different from that of even the strongest of the entente countries in Europe. French exchange, at a discount of 60 per cent. in New York, for example, has to reckon with a gold reserve of less than 12 per cent. against its paper currency at home, and with a heavy balance against the country in its trade abroad.

"We may 'grow up' to our increased issue of paper money—it was largely in that way that the problem of an inflated currency was solved in the United States after the Civil War. In part at least the increase in circulation in the war years was a legitimate result of commercial activity. Or at a favorable opportunity the government may arrange for the funding of the obligations represented in the present excess issue of Dominion notes. As matters stand, however, the position is sound enough to afford good ground for satisfaction that we have come through the war with our banks unencumbered by a mass of war paper, free to turn their resources to the development of trade, and with no pressing problem growing out of a diluted currency."

MORE FLOUR PRODUCED IN CANADA

According to a statement issued by the Canadian Wheat Board last week, the amount of wheat ground into flour in Canadian mills has been, during the five months, September to January, inclusive, for the past three years as follows: Crop year, 1917-18, 8,670,842 barrels; crop year, 1918-19, 7,729,447; crop year, 1919-20, 8,770,799. In the month of February, 1920, the grind was 938,430 barrels; in 1919, 760,285 barrels, and in 1918, 1,550,463 barrels, making a six months' total for the three years as follows: 1917-18, 10,221,305 barrels; 1918-19, 8,489,732; 1919-20, 9,709,229.

From September 1st, 1919, to February 1st, 1920, there was purchased from the Canadian mills for export 4,178,779 barrels. The exports from Canada in the two previous cereal years as shown by the customs returns for the corresponding periods are as follows: Crop year, 1917-18, 5,315,842 barrels; 1918-19, 4,128,804 barrels.

Figures are not available for the total flour manufactured in Canada in the years previous to 1917-18.

GRAIN STOCKS REMAINING IN CANADA

Quanttites of Wheat, Oats, Barley and Flax Less Than Last Year—91 Per Cent. of Wheat Crop Was of Merchantable Quality

TOTAL quantities of wheat, oats, barley and flaxseed in Canada at the end of March, the stocks of all kinds of agricultural products remaining in farmers' hands at the same date, and the proportion of the crops of 1919 that proved to be of merchantable quality, are estimated by the Dominion Bureau of Statistics in a statement just issued.

Returns collected from elevators, flour mills, railway companies and crop correspondents show that on March 31, 1920, the quantity in Canada of wheat and wheat flour expressed as wheat was about 77,324,000 bushels, as compared with 118,543,000 bushels last year, about 77 million bushels in 1918 and 126 million bushels in 1917. The total for 1920 comprises 35,989,000 bushels in elevators and flour mills, 34,837,000 bushels in farmers' hands and 6,498,000 bushels in transit by rail. Of oats, including oat products expressed as grain, the total quantity returned as in Canada on March 31, 1920, is 146,074,000 bushels, as compared with 164,747,000 bushels last year and 155,582,000 bushels in 1918. The total for 1920 comprises 16,775,500 bushels in elevators and flour mills, 123,090,000 bushels in farmers' hands and 6,209,000 bushels in transit by rail. The total quantity of barley in Canada on March 31, 1920, is returned as 15,947,600 bushels, as compared with 30,574,000 bushels last year and 16 million bushels in 1918. The figures for 1920 comprise 4,125,000 bushels in elevators and flour mills, 11,024,000 bushels in farmers' hands and 798,400 bushels in transit by rail. Of flaxseed the total quantity in Canada on March 31, 1920, is returned as 2,094,000 bushels, as compared with 2,271,000 bushels last year and 2,420,000 bushels in 1918. The total for 1920 comprises 589,000 bushels in elevators and mills, 1,400,500 bushels in farmers' hands and 104,000 bushels in transit by rail. As compared with last year the quantities in stock at the end of March are considerably less in the case of wheat, oats and barley. For flax the quantity is about 177,000 bushels less.

Stocks in Farmers' Hands

The reports of crop correspondents show that of the total wheat production of 1919, 18 per cent., or 34,837,000 bushels remained in farmers' hands on March 31, 1920. Last year the proportion was 17 per cent., representing 32,315,000 bushels, and in 1918 it was 14 per cent., representing nearly 32 million bushels. Of the other field crops the proportions and quantities estimated to be in farmers' hands on March 31, 1920, are as follows: Oats, 31 per cent., or 123,090,000 bushels; barley, 20 per cent., or 11,024,000 bushels; rye, 19 per cent., or 1,936,400 bushels; buckwheat, 18 per cent., or 1,951,000 bushels; corn for husking, 14 per cent., or 2,353,000 bushels; flaxseed, 26 per cent., or 1,400,500; potatoes, 25 per cent., or 31,646,000 bushels; turnips, etc., 10 per cent., or 11,317,000 bushels; hay and clover, 20 per cent., or 3,217,000 tons. The stock of potatoes—viz., 31,646,000 bushels, compares with 32,836,000 bushels last year and 24,130,500 bushels in 1918.

Merchantable Quality of Crops of 1919

The returns from crop correspondents show that of the total wheat crop of 1919—viz., 193,260,400 bushels, 94 per cent., or 182,430,000 bushels were of merchantable quality. Last year the proportion was estimated at 93 per cent., and in 1918 it was 95 per cent. The proportions per cent. of other crops of 1919, estimated to be of merchantable quality, were as follows, the corresponding percentages for 1918 being given in brackets: Oats, 90 (90); barley, 89 (92); rye, 94 (92); buckwheat, 83 (75); corn for husking, 80 (67); flaxseed, 93 (90); potatoes, 77 (81); turnips, etc., 83 (86); hay and clover, 90 (89).

The city of Welland, Ont., is purchasing a La France fire-fighting apparatus costing $25,000.

GROUP INSURANCE WELCOMED IN CANADA

Contracts Already Issued Indicate Success—Ten Companies Writing Business—B. C. Electric, International Nickel, Bank of Hamilton and Goodyear Tire and Rubber are Among Large Employers Taking Contracts

SINCE the first permit to write group insurance in Canada was issued, about November 1st, 1919, to the Ætna Life, nine other companies have also entered this field. Five of these are Canadian companies, as follows: Canada Life Assurance Co., Great West Life Assurance Co., London Life Insurance Co., Manufacturers' Life Insurance Co. and the Sun Life Assurance Co. The five American companies are: Ætna Life Insurance Co., Equitable Life Assurance Society, Metropolitan Life Insurance Co., Prudential Insurance Co. and the Travelers Insurance Co. One Canadian company is also writing group business under provincial license in the west.

The American companies, having the benefit of their experience in this line in the United States, and having their policies, rates and selling campaigns matured, are working this field aggressively in Canada, and have secured the bulk of the business so far written. The Canadian companies had to work out these details, but, after some hesitation as to rates and the kinds of policies to sell, are now competing for their share of the business. Preliminary figures issued by the Department of Insurance show that up to the end of 1919 group insurance had been put in force in Canada as follows:—

	Sun.	Ætna.	Equitable.	Metropolitan.	Travelers.
	$	$	$	$	$
Net premium income	6,352	2,532	123	8,975	......
No. policies ...	5	24	1	39	17
Gross amount..	650,700	4,412,900	137,000	4,609,550	1,597,900
Net amount ...	650,700	4,412,900	137,000	4,609,550	1,597,900
No. in force....	5	24	1	39	17
Net amount ..	650,700	4,412,900	137,000	4,609,550	1,590,400

The Ætna's Contracts

Up to the end of March the Ætna Life had sold ninety-two contracts, the purchasers being located as far east as Yarmouth, N.S., to as far west as Winnipeg, and from towns as small as Elora and Rockwood, Ont., to the large cities. The Ætna's list is as follows:—

Grasselli Chemical Co., Hamilton, Ont., Toronto, Ont., and Montreal, Que.; American Radiator Co. of Canada, Ltd., Toronto, Ont.; the International Nickel Co., Toronto, Ont.; Tees and Persse, Ltd., Winnipeg, Man.; International Business Machines Co., Ltd., Toronto, Ont.; Home Grain Co., Ltd., Winnipeg, Man.; Boulter, Waugh, Ltd., Montreal, Que.; W. R. Milton, Winnipeg, Man.; the G. McLean Co., Winnipeg, Man.; Saskatchewan Elevator Co., Ltd., Winnipeg, Man.; Eugene F. Phillips Electrical Works, Montreal, Que.; Preston Furniture Co., Preston, Ont.; Dominion Sheet Metal Corporation, Ltd., Hamilton, Ont.; Hamilton B. Wills, Toronto, Ont.; Thomas Waterhouse and Co., Ingersoll, Ont.; Smallman and Ingram, Ltd., London, Ont.; Wm. H. Leishman and Co., Ltd., Toronto, Ont.; Saunders, Lorie and Co., Ltd., Toronto, Ont.; Acme Glove Works, Ltd., Montreal Que.; Cummings and Cummings, Montreal, Que.; Winnipeg Piano Co., Ltd., Winnipeg, Man.; Beaver Lumber Co., Ltd., Winnipeg, Man.; British American Elevator Co., Ltd., Winnipeg, Man.; L. Gnaedinger, Son and Co., Montreal, Que.; R. B. McLean Grain Co., Ltd., Winnipeg, Man.; the New Brunswick Telephone Co., St. John, N.B.; Richards-Wilcox Canadian Co., London, Ont.; Northern Lumber Co., Ltd., and Allied Companies, Winnipeg, Man.; the Sherlock-Manning Piano and Organ Co., London, Ont.; National Elevator Co., Ltd., Winnipeg, Man.; Murray-Kay Co., Toronto, Ont.; Oscar Rumpel, Kitchener, Ont.; H. Vineberg and Co., Montreal, Que.; Security Elevator Co., Winnipeg, Man.; W. A. Milligan Co., Toronto, Ont.; Eby-Blain, Ltd., Toronto, Ont.; Duncan Lithographing Co., Hamilton, Ont.; the Scott Fruit Co., Winnipeg, Man.; the Sheet Metal Products Co., Toronto, Ont.; D. Ackland and Son, Winnipeg, Man.; Crowe's Iron Works, Ltd., Guelph, Ont.; Grand Trunk Pacific Elevator Co., Winnipeg, Man.; Taylor, Forbes Co., Guelph, Ont.; the Howell Lithographic Co., Hamilton, Ont.; D. C. Macdonald and Brothers, Guelph, Ont.; George Taylor Hardware Co., New Liskeard, Ont.; Davis and Henderson, Ltd., Toronto, Ont.; the Brantford Cordage Co., Brantford, Ont.; the Canadian Shovel and Tool Co., Hamilton, Ont.; the Bennett and Wright Co., Toronto, Ont.; T. E. Bissell Co., Ltd., Elora, Ont.; the Canada Metal Co., Toronto, Ont.; T. Sisman Shoe Co., Aurora, Ont.; Roofers Supply Co., Toronto, Ont.; the Slingsby Manufacturing Co., Ltd., Brantford, Ont.; Phillips Manufacturing Co., Toronto, Ont.; the Gibbard Furniture Co., Napanee, Ont.; the Dominion Steel Products Co., Brantford, Ont.; T. Kinnear and Co., Toronto, Ont.; W. G. Patrick and Co., Toronto, Ont.; Harris and Co., Ltd., Rockwood, Ont.; the R. McDougall Co., Galt, Ont.; American Watch Case Co., Toronto, Ont.; E. L. Ruddy Co., Toronto, Ont.; Gilson Manufacturing Co., York Road, Ont.; D. McCall Co., Toronto, Ont.; John Sloan and Co., Toronto, Ont.; C. H. Smith Co., Windsor, Ont.; Bank of Hamilton, Hamilton, Ont.; Cosmos Cotton Co., Yarmouth, N.S.; Metal Shingle and Siding Co., Preston, Ont.; Clare Brothers and Co., Preston, Ont.; Bowes Co., Ltd., Toronto, Ont.; Meakins and Sons, Ltd., Hamilton, Ont.; R. G. Long and Co., Toronto, Ont.; Cowan and Co., of Galt, Ltd., Galt, Ont.; William Davies Co., Ltd., Toronto, Ont.; Sterling Clothing Co., Montreal, Que.; Harry Rother, Montreal, Que.; Samuel Hart and Co., Montreal, Que.; Samuel Wener and Co., Montreal, Que.; McLauchlan and Sons, Ltd., Owen Sound, Ont.; Hamilton Carhartt Cotton Mills, Toronto, Ont.; Goodyear Tire and Rubber Co. of Canada, Toronto, Ont.; Imperial Cotton Co., Hamilton, Ont.; Northern Elevator Co., Ltd., Winnipeg, Man.; Ladies' Wear, Ltd., Toronto, Ont.; the Winnipeg Supply and Fuel Co., Winnipeg, Man.; J. W. Hewetson Co., Ltd., Brampton, Ont.; Pugh Specialty, Ltd., Toronto, Ont.; the W. J. Keens Co., Ltd., Toronto, Ont.; A. Welch and Son, Ltd., Toronto, Ont.

During the month of March the Prudential Insurance Co. wrote group business for Lachance and Tanguay, Quebec, 109 employees, for an amount of $108,000; for the Colonial Weaving Co., Ltd., Peterboro, Ont., 81 employees, $49,000; for the Hercules Garment Co., Montreal, 147 employees, $76,000; and for D. E. Black and Co., Ltd., Calgary, 62 employees, $114,000.

Other Group Business

The employees of the Manitoba Bridge and Iron Works, one of the largest concerns in Winnipeg, and of the John McPherson Co., Ltd., Hamilton, Ont., have been insured by contracts placed with the Great West Life Assurance Co.

One of the largest contracts written has been secured by the Sun Life. This is on the employees of the British Columbia Electric Railway, as announced by George Kidd, general manager of the British Columbia Electric. Every male employee over eighteen, who has been one year in the company's service, is insured for $1,000 under this contract. Another large contract written in British Columbia was also secured by the Sun Life on the 1,800 employees of the Consolidated Mining and Smelting Co. of Canada at Trail, B.C. A minimum of $500 is placed on every employee, increasing $100 for every additional six months' service up to a maximum of $1,500.

Among the contracts written by the Metropolitan Life is one on the 150 employees of the John Palmer Co., Ltd., Fredericton, N.B., for a total of over $125,000. All employees who have been for six months in the employ of the company participate in the insurance, $500 being the minimum in the case of the unmarried and $1,000 in the case of the married workers. The amount increases with each year of continual service until the maximum of $2,000 is reached.

The Dominion of Canada Guarantee and Accident Co., itself one of the largest companies writing casualty lines, has recognized the merits of the new form of life insurance by insuring its employees, about sixty in number, by a group policy of the Manufacturers' Life Insurance Co.

Chariman, Finance Committee,
Famous Players-Lasky Corporation of N.Y.

N. L. NATHANSON, Managing Director
Toronto, Ont.

We summarize as follows from a letter from Adolph Zukor, President of the Corporation :—

1. Famous Players Canadian Corporation is being organized to build, operate as well as acquire by purchase and lease, a chain of motion picture theatres of large seating capacity from Coast to Coast. In these theatres the Corporation will display the highest class motion pictures available, including first-run films produced by Famous Players-Lasky Corporation of New York, and any of its subsidiaries.

2. Corporation has twenty-year franchise from Famous Players-Lasky Corporation of New York, who are the largest producers of motion pictures in the World, supplying 75% of theatres in Canada and United States.

3. Corporation leases or controls sixteen motion picture theatres with a total seating capacity of 15,000, mostly located in Ontario and Western Canada. Entire proceeds of this issue will be available for construction of additional theatres, which should give the Corporation operating theatres with seating capacity of 30,000 by latter part of 1920, and 45,000 by Spring of 1921.

4. Assets consisting of existing Theatres leased or controlled, etc., have a going value of not less than $1,250,000. To this must be added cash proceeds of $4,000,000 First Preferred Shares, making a total of assets of about $5,000,000 as against $4,000,000 First Preferred Shares outstanding.

5. Earnings from existing theatres are at the rate of $200,000 per annum.

With negotiations and construction under way completed, it is estimated earnings for fiscal year commencing September 1st, 1920, will be in excess of $650,000.

Full benefit of expenditure of proceeds of $4,000,000 First Preferred Shares will accrue to Corporation for year commencing September, 1921, for which period earnings after depreciation should be not less than $1,200,000, which after payment of Preferred dividends should show earnings in excess of 10% on Common Shares.

6. Expert and technical management will be supplied by Famous Players-Lasky organization, which operates profitably over 100 motion picture theatres in the United States, employs over $30,000,000 in its business and pays 8% dividends on this capitalization.

Application will be made in due course to list both First Preferred and Common Shares on the Montreal and Toronto Stock Exchanges.

The larger portion of this issue having been sold, we offer the unsold balance at a price of—

100 and accrued dividend, yielding 8%

Carrying a Bonus of 25% in Common Shares

(One Common Share with every four Preferred Shares)

Payable: 25% of the par value on application.
25% of the par value on June 1st, 1920.
25% of the par value on July 1st, 1920.
25% of the par value on August 1st, 1920.

Common Stock Bonus will be adjusted to even amount by purchase or sale of fractional share at the rate of $30 per share.

The right is reserved to allot none, or a portion only, of the amount applied for. If only a portion of the amount applied for be allotted, the balance of the deposit will be applied towards payment of subsequent instalments. Payments may be anticipated in whole or in part at any time. Interest will be allowed on payments at the rate of 8% per annum. Interest will be adjusted upon final payment.

TORONTO ADVISORY BOARD OF HURON AND ERIE

The Huron and Erie Mortgage Corporation and the Canada Trust Co., have appointed a Toronto advisory board, on which five Toronto citizens will be members. These two companies recently opened a Toronto branch under the management of J. M. McWhinney. The board is composed of the following:—

Hume Blake, chairman, director Union Bank of Canada, 24 King St. West; Thomas Bradshaw, treasurer of the city of Toronto; R. S. Gourlay, president Gourlay, Winter and Leeming, Ltd., member Toronto Harbor Commission; Frank A. Rolph, managing director Rolph, Clark, Stone, Ltd., director Imperial Bank; B. B. Cronyn, vice-president the W. R. Brock Co., Ltd., director Union Bank of Canada.

NEW FINANCING ORGANIZATION FOR CANADA

The Charles E. Morse Co., of Boston, Mass., is opening a branch in Canada, a separate charter having been secured under the name of the Canadian Charles E. Morse Co. This firm makes a specialty of securing extra capital for industries, President Morse was in Montreal a few days ago and arranged to open an office at 171 St. James St. about May 1.

H. Bragg, who founded the "Canadian Municipal Journal" 16 years ago, will be assistant to the general manager of the Canadian company. Mr. Bragg has been in close touch with Canadian municipalities for many years, and was appointed by the federal government to take charge of the municipal department of the Repatriation Committee.

QUEBEC HARBOR COMMISSION APPOINTED

Sir David Watson, as chairman, General Tremblay and A. S. Gravelle will be the members of the Quebec Harbor Commission, says a despatch from Ottawa. Cancellation of the appointments of Hon. D. I. Lesperance, A. S. Gravelle and D. H. Pennington, members of the Quebec Harbor Commission, is provided for in an order-in-council, which has been passed. Senator Lesperance was chairman of the commission when he was appointed to the Senate some years ago. At that time he was desirous of relinquishing the chairmanship, but was prevailed upon to continue in the position. He has served in the meantime without salary. About a month ago, however, he submitted his resignation, with the special request that it be accepted. The chairman's resignation made a reorganization of the commission necessary, and it was thought better to disband the whole commission for this purpose. It will be reconstituted immediately.

ALBERTA ASSISTANCE TO MUNICIPALITIES

Changes in the Acts to ameliorate the financial conditions of municipalities and to provide $1,000,000 assistance to the E.D. and B.C. Railway were made by the Alberta legislature sitting in committee of the whole on April 9. After George Hoadley (opposition), Okotoks, had pointed out that if the government passed the section of the Amelioration Act, which would loan $6,000 to Macleod and $11,000 to Athabasca to make good default of interest on bonds, that the Lethbridge Northern irrigation bond sellers would have a perfect right to point to this as an example of what the government might be expected to do in case of a default on irrigation bonds. Hon. A. G. MacKay, minister of municipalities, struck the Macleod and Athabasca loan clauses out of the bill. This action was not taken, however, until the house had debated the whole subject of the responsibility, legal, financial and moral of the province to the various towns, cities and municipalities within its borders. The bill was finally passed on for third reading with the direct loan clause struck out.

March Imports Double Last Year's Figure

Year's Increase in Imports About $150,000,000—Growth of Export Figures Not Quite So Large — Value of Agricultural Food Products, Animal Products and Wood and Paper Sent Out of Dominion, Greatly Enlarged

TRADE of Canada for the twelve months ended March 31st, 1920, shows an increase of nearly $166,000,000, as compared with the figure at the end of the previous year. Imports during the twelve months were $1,064,516,177, against $916,429,335 in 1919. Exports showed a smaller increase, the figure being $17,893,424. For the month Canada's trade also made some big advances, increasing from $2,110,548,504 at the end of February to $2,351,174,886 at the end of March.

The export figures show a great increase in the value of agricultural food products, animal and animal products, and wood and paper products sent out of the Dominion in 1919-20, as compared with 1918-19. During the year just ended the value of domestic agricultural products, mainly food, was $121,286,043 greater than in the previous year. Animal and animal products were exported from the country last year to the value of $314,074,983, which was more than $69,000,000 over the preceding year. There was an increase of more than $59,000,000 in the total value of domestic wood and paper products.

Under imports, the figures show that dutiable goods came into this country during the year just ended to the value of $693,643,211. The duty collected on these goods amounted to $187,520,613, an increase of more than $29,000,000 over the previous year. Free goods which entered the country were some $19,000,000 less than in the 1918-19 period.

The following table for the month of March and for the twelve months ending March 31st, 1920, with comparisons, shows Canada's trade by classes.

IMPORTS ENTERED FOR HOME CONSUMPTION

News of Industrial Development in Canada

British Chemicals' Trenton Plant to be Operated by Toronto and Montreal Syndicate—Fraser Companies' Bill Passed New Brunswick Legislature—Atlantic Sugar Planning Extension to St. John Refinery at Cost of $500,000

ATTENTION in the iron and steel industry is now being turned to the proposed merger of steel plants in the British Empire. Estimates have been in circulation as to the capitalization of the consolidation, one going as high as $500,000,000. Should this be the case, this would make the deal by far the greatest that has ever been planned as affecting Canada, and would indicate that it would be along the lines of the United States Steel Corporation. It is practically known that the concern will include, in additoin to the steel and coal companies, complete transportation concerns and shipping undertakings.

The Cobalt smelter at Welland, Ont., has recently been purchased by the Ontario Smelters and Refiners, Ltd. This plant has operated since 1912 mostly on the Cobalt residues from the Nipissing Co.'s high-grade mill. It is the only smelter in Canada that has produced the several Cobalts and nickel salts. There is a ready demand for these for export and shipments have been made to the United States, Great Britain, France, Sweden, China and Japan. It is the intention of the Ontario Smelters and Refiners Co., to treat all grades of ore carrying Cobalt in commercial quantities. Their process gives a very complete recovery, not only of the silver and Cobalt, but also the nickel, arsenic, copper and antimony. They have a large number of mechanics at work changing the plant to accommodate same to the needs of their process and expect to start smelting operations early in May.

Work will be started immediately on the large plant at Guelph, Ont., to be erected by the Commerce Motor Truck, Ltd., the $1,500,000 subsidiary of the Commerce Motor Car Co., of Detroit, Mich. In conjunction with this report accompanies the announcement that the company will accept one order alone for Commerce trucks amounting to $1,000,000, which will be turned out at the Canadian plant for their distributor at London, England. The first year's capacity to take care of Canadian and export business will be based on a minimum of 5,000 and a maximum of 6,000 Commerce trucks. The plant, it is expected, will be in operation in October.

Chemical Plant to Work Again

A strong group of Toronto and Montreal industrial interests has secured the huge plant of the British Chemicals, Ltd., formerly operated by the Imperial Munitions Board at Trenton, Ont. The plant covers an area of 225 acres of land, upon which were erected more than eighty buildings of various characters. The closure of the deal means that an extensive line of chemicals, such as aspirin, phenacetine and other products, for which there is at present an abnormal demand, both in Canada and abroad, will be manufactured in Canada for the Canadian market and for export. Prior to the war these products all came from Germany; now Canada can supply all her own needs from this one plant alone.

The Brunner-Mond Co., one of the largest industries in western Ontario, producers of soda ash, have under advisment the enlargement of the Amherstburg plant. The Brunner-Mond is a branch of the Solway Process Co. of America, and built a $4,000,000 plant at Amherstburg, having completed the same about a year ago. The completion of the installation of their machinery, etc., a lay-off was experienced by many of its employees, while the question of tariff on their product was under consideration at Ottawa. The company at that time without protection would have been unable to profitably turn a wheel, but the government saw fit to put a protective duty against the then prevailing surplus of United States plants and operation was begun during 1919.

Pulp and Paper

A million and a half acres of pulp wood forests in Southern Labrador immediately north of Cape St. Charles in Newfoundland territory is being acquired by a United States securities firm to supply the British trade. Details of the deal are not yet available, but it is understood that full survey of the area has been made by means of photographs from an airplane and the corporation has practically completed its arrangements.

The Fraser Co.'s, bill has been passed by the Corporations Committee of the New Brunswick legislature, a satisfactory agreement as to the handling of the lumber on the Tobique River at the proposed dam having been reached.

When the Fraser Paper Co.'s bill was before the Corporations Committee, it was intimated that there would be some arrangement under which supply of pulp wood for the new pulp and paper mills at Tobique Narrows would come very largely from the New Brunswick Railways lands. Major-General McLean, M.P., for Royal, was in conference with A. Fraser, of Edmunston, last week, and while no information is given out, it is understood the New Brunswick Railway Co.'s, timber limits are under discussion.

Miscellaneous Notes of Industry

The Kaufman Rubber Co., manufacturers of rubber footwear, have excavations well under way for a large addition to their factory, at the corner of King and Francis streets, Kitchener, Ont.

C. H. Doeer Co., Ltd., of Kitchener, manufacturers of biscuits and confectionery, are erecting a large addition to their factory. The Sterling Veneer Co., of Grand Rapids, are also opening an office and warehouse in Kitchener.

The Atlantic Sugar Refinery will in the very near future, put into execution at St. John, N.B., plans which are now being prepared and which call for an outlay of $500,000. The intention is to double the refining capacity, which, of course, means another block of buildings and expensive plans. Although at times during the past few years some little difficulty has been experienced in securing an adequate and constant supply of raw sugar, it is felt that with the gradual improvement in ocean tonnage, this difficulty will be overcome.

A very large factory extension is now under way for the Canadian Cotton Co., Ltd., of Hamilton, Ont. The new building will be seven storeys high, of reinforced concrete and will cost $375,000.

The property on the north-east corner of King and Tecumseh streets, Toronto, Ont., has been sold by W. H. Smith to the Otto Higel Piano Action Co., who now own practically all the King Street frontage between Bathurst and Tecumseh streets. It is believed that the property, which is 100 feet by 100 ft, will be used eventually for factory expansion.

The Stratford Flax Co. intends building a new mill this summer and material is already being drawn to the site at the corner of Romeo and Douro streets, Stratford, Ont., opposite the Farquharson-Gifford factory. The main building will be of concrete, two stories, 75 by 50 feet, and in addition there will be two steel-covered storehouses, one 100 by 40 feet and one 30 by 40 feet. Mr. Walter Miller said that the company expects to have the new buildings ready for this year's crop and their construction will begin as soon as the weather is suitable.

The Laura Secord Candy Co. has purchased the Dominion Cloak Co.'s building on the southwest corner of Bathurst and Wellington Streets, Toronto, which they will convert into a chocolate factory. The price paid was $88,000 cash,

ATTRACTIVE AGENCY CONTRACTS

British Empire Fire Underwriters

82-88 King Street East, Toronto

negotiations for the sale being carried on through the Chartered Trust and Executor Co.

A letter from P. V. Byrnes, president of the United Gas and Fuel Co., to the Hamilton Board of Control informed that body that his company has closed contracts for the enlargement of its water gas plant, through which it would be enabled to double its output next winter. It is now producing 2,000,000 feet per day, and will have 4,000,000 feet to dispose of next winter.

The agreement between the federal government and the Victoria Shipowners, Ltd., for the loaning of money to build wooden barquentines in the Cholburg shipyard Victoria, B. C., has been signed. Since the raising of the necessary capital by the Victoria Shipowners, Ltd., through an appeal to the public, matters have been at a standstill until the agreement was signed. Four vessels costing $250,000 each will be built.

The Longslow-Fowler Co., of Rochester, N.Y., is establishing a branch of its factory at Cobourg, Ont., and will manufacture furniture and wood products. By the terms of a by-law approved by ratepayers, the town loans the firm $50,000, $38,500 of which is to be repaid in twenty equal consecutive annual installments, with interest not less than six per cent. The plant is to occupy the site formerly occupied by the Crossen Car Works.

A site on the southeast corner of Richmond and Duncan Streets, Toronto, has been bought by the Empire Clothing Co., who intend erecting a seven-storey factory costing about $250,000. The price paid for the property, which has a frontage of 107 feet on Richmond with a depth of 90 feet on Duncan, was around $60,000.

NEW INCORPORATIONS

Provincial Paper Mills—Porcupine Mines, Ltd.—Angus McDonald Mines, Ltd.

The following is a list of companies recently incorporated, with the head office and the authorized capital:—

WANT ST. LAWRENCE RIVER DEEPENED

The Grand River Valley Board of Trade, at a meeting held in Galt, Ont., on April 15, passed a resolution calling upon the Dominion government to undertake, jointly with the government of the United States, at the earliest possible moment the construction of canals and locks in the St. Lawrence River to correspond with the new Welland Canal, so that ocean freight carriers may navigate the great lakes, and to develop coincidentally therewith, under public ownership, the latent water powers of the St. Lawrence Rapids for the benefit of the people. It was also decided that representatives of boards of trade and municipalities interested should be sent to the sitting of the International Joint Commission at Hamilton on June 26th. The resolution was moved by J. P. Jaffray, Galt, and A. Hollinrake, Brantford, following a clear presentation of the Great Lakes-St. Lawrence route to the sea by Major A. C. Lewis, of Toronto, secretary-treasurer of the Canadian Deep Waterways and Power Association.

They Put On More Insurance!

Mutual Life Policyholders last year increased the amount of their protection taking out additional policies to the amount of more than ten million dollars. They were alert business men who realized the necessity for increasing their life insurance because of the increase in the value of the necessities of life. In proportion as money loses its purchasing power we require more and more of it to maintain the same protection. Have YOU increased YOUR insurance since prices went up? The smaller the value of the dollar the more dollars we need As a company, the Mutual does not advocate an excessive amount of insurance. At the same time every reasonable effort should be made to increase the insurance in times of inflated prices. Follow the example of 3139 Mutualists who increased their insurance last year. Put on more insurance!

News of Municipal Finance

Tax Rates of Nearly All Canadian Municipalities Raised—Some Exceptions, However—Quebec's Budget Over Two Mills—Raise Business Tax to Increase Revenue—Red Deer Finances in Good Condition—Calgary Utilities Have Surplus — Bondholders Committee Discusses Prince Albert Estimates

PRACTICALLY all Canadian municipalities have increased, or contemplate increasing, their tax rates this year. In most cases already reported, advances of from 1 to 12 mills are shown, while in two cases a decrease of about 1 mill is reported. In the province of Ontario, the highest rate yet struck this year, is that of Amherstburg, with 50 mills. Haileybury has a rate of 46 for public school supporters and 52½ for separate school supporters. Besides an increase in the tax rate, in a large number of cases the assessment has also been raised. The financial burdens of cities and towns of the Dominion are exceptionally heavy this year, and in order to meet the increased expenditures, revenue must be increased.

The following table, prepared by *The Monetary Times*, gives a comparison of tax rates for 1919 and 1920. Although the figures from all cities are not given, those represented are typical of Canadian municipalities:—

	1920 mill rate.	1919 mill rate.
Meaford, Ont.	40	36
Sarnia, Ont.	40	31
Esquimalt, B.C.	17	18
Kitchener, Ont.	30½	29.75
Peterboro, Ont.	35	31
North Vancouver, B.C.	30	20.6
London, Ont.	40	32½
Kingston, Ont.	35½	28.39
*Sherbrooke, Que.	16½	13½
St. Catharines, Ont.	36	31.75
Stratford, Ont.	39½	36.3
Toronto, Ont.	30½	28½
Windsor, Ont.	34	26
Lethbridge, Alta. (P.S.)	41.16	37.81
Lethbridge, Alta. (S.S.)	47.098	43.748
Woodstock, Ont.	37.70	31.2
New Westminster, B.C.	36	32
Welland, Ont.	33	27.8
Oak Bay, B.C.	25	17.4
Victoria, B.C.	26	26.85
Vancouver, B.C.	31⅔	26⅔

---

*General rate only. School rate not included.

Welland, Ont.—The tax rate has been struck at 33 mills, an increase of four mills over last year.

Oak Bay, B.C.—The tax rate has been fixed at 25 mills for 1920, as against 18.9 mills last year.

Saskatoon, Sask.—The Local Government Board has approved of the city's application for permission to purchase $20,000 city of Saskatoon 5 per cent. debentures, due November 1, 1920, at 99.51 and interest.

Amherstburg, Ont.—The tax rate this year will be 50 mills, the highest of any municipality in Ontario. The large increase over last year's rate is due, municipal officials state, to river front property being assessed far below its real value.

Winnipeg, Man.—According to a report by James G. Hay, on behalf of the Board of Valuation and Revision, total assessable property in the city is $236,970,410. Land is valued at $144,332,700, and buildings at $92,637,710. Exemptions total $40,971,930.

Victoria, B.C.—The city's tax rate has been struck at 26 mills this year, or .85 less than last year. It was expected that the rate would be 30 mills, but after estimates were cut to the lowest, and a debenture transfer put through involving more than $100,000, the rate was struck as above.

Stratford, Ont.—The net operating profit for the year of the electric light department of the Public Utilities Commission was $12,182, and the commission overpaid the hydro commission the sum of $1,051 and will be credited with that amount and $936 interest on sinking fund at the rate of 4 per cent.

Moose Jaw, Sask.—City Commissioner Mackie has submitted a list of proposed capital expenditures for 1920, which, if carried out, would create further civic debts totalling $266,143, cost 0.8 of a mill to carry, and reduce the city's borrowing powers $90,000. In his report the commissioner pointed out the necessity for the various expenditures, some of which are absolutely urgent for this year.

Quebec, Que.—The city has passed the budget for the year 1920-21, amounting to $2,178,957, an increase of $200,000 over the appropriations for the present year. To provide for this extra amount the business tax will be increased from 12½ to 15 per cent. It was announced that the city had paid $241,641 in exchange alone, when redeeming its loan of $2,125,000 on the New York market recently.

Vancouver, B.C.—The city's tax rate this year will be 31⅔ mills, with half of the value of improvements exempted. Ratepayers who pay their taxes on time will secure a 10 per cent. discount, the net levy being 28.50 mills. Last year's gross rate was 26⅔ mills, and the net rate 24 mills. Vancouver's gross assessment as given in the tax rate by-law is approximately $207,600,000. The exemption of half the value of improvements brings the taxable assessment down to $170,800,000.

Toronto, Ont.—The Board of Control has passed without a single cut local improvements totalling $3,771,917. Capital expenditures approved by the council, apart from local improvements, amount to $7,205,000.

The city council has voted to stand by the bargain made with Baldwins, Ltd., and grant exemption from taxation for 1920 and 1921 to the British industry that is taking over and enlarging the plant of the Imperial Munitions Board in Ashbridge's Bay. Those supporting the exemption pointed out that it was a basic industry that would attract other industries to Toronto; that it would add 50,000 to the population of the city; that the prosperity of Toronto would be greatly increased, and that the buildings now being occupied would, in all probability, have been removed if the Baldwin concern had not been induced to take over the property. The amount of taxes that would be exempted totals $40,000.

Red Deer, Alta.—At the end of the first discount period, tax collections amounted to $60,242. The total tax levy for 1920 amounts to $113,625, and the estimated discounts and rebates will amount to $8,000, leaving $105,625 to be collected. The amount collected so far this year is consequently nearly 60 per cent. of the total levy for the year and the cash in the bank will pay all running expenses of the city, hospital and schools and all debentures coming due until August, and by August much more will be collected, so it will not be necessary to borrow much from the bank this year, if any. Since 1914 the debenture debt has been reduced by over $56,000. All debentures and treasury bills, due and presented to date have been paid in full. The demands of the public and separate schools have been paid to date. Each month the public school is given a cheque for the amount of their monthly requirements and city accounts are paid promptly when due. From this report it does not seem that Red Deer is experiencing financial difficulties like other Alberta municipalities.

Calgary, Alta.—The statement to the effect that the city ended the year 1919 with a cash surplus of $47,543, requires some further explanations to avoid misconceptions, according to City Treasurer Mercer. This surplus is the difference between the actual expenditures of the city for all purposes during 1919, and not the actual cash revenue total, but the total levy for the year. Thus, the total ex-

DEBENTURES FOR SALE

CITY OF SASKATOON, SASK.

DEBENTURE ISSUE, $988,900

Sealed tenders, endorsed "Tender for City of Saskatoon Debentures," addressed to the undersigned, will be received on or before 12 o'clock noon, Monday, the 10th day of May, 1920, for the purchase of a part or the whole of an issue of $988,900 debentures issued for various purposes under several by-laws.

A summary of the issue is as follows:—

No. 1—Thirty-year debentures, bearing interest at the rate of 6 per cent.	$ 87.700
No. 2—Thirty-year debentures, bearing interest at the rate of 6 per cent.	620,000
No. 3—Twenty-year debentures, bearing interest at the rate of 6 per cent.	263,200
No. 4—Thirty-year debentures, dated July 1st, 1915, bearing interest at 5 per cent.	18,000
Total	$988,900

The debentures are an obligation of the City at large, are issued in coupon form, with provision for registration of principal, and are of the denomination of $1,000. Interest payable half-yearly on the 1st day of May and the 1st day of November, with the exception of the 30-year debentures, dated July 1st, 1915, amounting to $18,000, under By-law 616, the interest on which will be payable 1st January and 1st July. Full details as to the purposes for which the bonds are issued, together with financial statement of the City, will be furnished on application.

Tenders are requested on the basis of the following alternatives:—

A—If delivery of debentures be made in two instalments, i.e., 50 per cent. as soon as the purchasers' solicitors have passed a favorable opinion on the legality of the issue, and the remaining 50 per cent. six months later. Principal and interest payable in Canada and the United States.

B—If delivery of debentures be made in two instalments, i.e., 50 per cent. as soon as the purchasers' solicitors have passed a favorable opinion on the legality of the issue, and the remaining 50 per cent. six months later. Principal and interest payable in Canada only.

C—If delivery of the whole of the debentures is made as soon as the purchasers' solicitors have approved of the issue, principal and interest payable in Canada and the United States.

D—If delivery of the whole of the debentures is made as soon as the purchasers' solicitors have approved of the issue, principal and interest payable in Canada only.

If upon the receipt of tenders the City Council decides not to accept a tender on the $620,000 thirty-year 6 per cent. debentures (item No. 2), and if the Council agrees not to make an issue of these debentures during 1920, those submitting tenders are requested to state what effect, if any, this decision will have upon the tender submitted on the balance of the debentures.

Every tender must be accompanied by a certified cheque, payable to the City of Saskatoon, for one per cent. of the total amount of the tender, as an evidence of good faith, and all tenders must contain complete information and requirements as set out in the Form of Tender.

The highest or any tender not necessarily accepted.

C. J. YORATH,
City Commissioner.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

penditures were $3,618,412 and the total estimated receipts from taxes, licenses, fees, etc., were $3,665,956, the difference between the two being the surplus, $47,543. All taxes levied for 1919 were not collected. The total current taxes to be collected from all sources during 1919 amounted to $3,515,064, of which $2,739,572 was general, $185,507 was business, $421,439 was local improvement, $110,576 was water frontage; and $57,768 provincial government tax. The actual cash collection from all these sources was $2,443,992. As far as current taxes and revenue were concerned, there was a difference of $1,071,072. The treasurer emphasizes the fact that the city was not short that much in cash collections, for, in addition to the current taxes for 1919 collected, total arrears of $786,473 also were collected. This gives a total of $3,212,465 actually collected in cash by the city, in comparison with $3,515,064 to be collected, disclosing an actual cash shortage of $302,599.

All public utilities ended the year 1919 with a surplus, according to the treasurer, the amounts being as follows:—

Electric light and power department, surplus for 1919, $24,219, as compared to a surplus of $9,080 in 1918; street railway department, surplus for 1919, $42,232, as compared to a surplus of $74,656 for 1918. Waterworks department, surplus on revenue account for 1919, $9,742, as compared to deficit of $397,118, at end of 1918 leaving net deficit of water works system to date of $387,376.

Prince Albert, Sask.—The city was in receipt last week, of a letter from the Toronto committee of debenture holders, with reference to this year's estimates, the committee having the right to review the estimates each year, and make suggestions or objections to them, according to an agreement reached last year. The letter asks for particulars about the rates for public utilities and the estimated surplus. It also points out that the estimates total $333,000, which is considerably more than the amount of $250,000 suggested at the conference in Regina.

The committee in the letter takes objection to expenditures under several headings, including that for the school board and the police force. In conclusion, the letter said: "The committee are not offering their estimates merely for the sake of doing so, but with the idea of co-operating with you in trying to work out a solution of your trouble. One thing that is necessary for the city to bear in mind—viz., that their borrowing power for many years is gone and they only have their sinking fund and their tax rate to fall back on, and it is, therefore, very important that full advantage should be taken of these two items to take care of any possible requirements that may arise."

The city is furnishing the bondholders' committee with the various explanations asked for, which it is anticipated will satisfy them.

Ottawa, Ont.—Estimated controllable expenditure for 1920 is $1,537,021, as against $1,196,104 for 1919. From this year's total is deducted $223,495 for miscellaneous revenue and 1919 surplus, leaving a total to be raised by taxation of $1,313,526, as compared with $1,053,696 last year. Total uncontrolable expenditure for this year amounts to $1,781,226, against $1,560,273 in 1919. The tax rate for 1920 will be 27.50 for public school supporters, as against 23.85 last year, and 32.50 for separate school supporters, compared with 27.50 in 1919.

Government and Municipal Bond Market

Victory Bond Prices Reduced—New Brunswick and Halifax in the Market for Big Loans—Saskatchewan Disposes of $1,000,000 Issue—Provincial Treasurer of Alberta in Montreal this Week in Connection with New Financing

FOR the third time since the market committee took control of the Victory bond market, prices have been changed, but this time reductions have been made instead of advances. Such changes were inevitable, and in order to bring the prices into conformity with the changed conditions of the Canadian bond market, reductions had to be made. The following table compares the old and the new selling price, and gives the present yield:—

Maturity.	New price.	Former price.	Present yield.
1922	99¼	100	5.70
1923	99¼	99¾	5.75
1927	100	100½	5.50
1933	100½	101½	5.45
1937	102	103	5.32
1924	98½	99	5.85
1934	97	97	5.80

The price at which the dealers will buy is, of course, one point less in each case.

That there is a ready market in the United States for Canadian bonds is evident by the way in which the issues of Ontario and Manitoba securities, purchased last week, have been absorbed. The underwriting syndicates in both cases inform *The Monetary Times* that the bonds have been completely disposed of at a price to yield a little better than 7 per cent.

Two new issues of importance are announced this week—viz., New Brunswick, $2,800,000 and Halifax, about $1,000,000. It is expected that both of these will be disposed of across the line.

The province of Alberta requires $7,000,000, of which $4,000,000 is for telephone construction and $3,000,000 for public buildings and other capital expenditures. The Hon. C. R. Mitchell, provincial treasurer, was in Montreal this week, *The Monetary Times* understands, for the purpose of making a loan, but the result of his visit is not yet known.

Coming Offerings

The following is a list of debenture offerings, of which mention is made in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
New Brunswick	$2,800,000	6	10-years	May 1
York Tp., Ont.	40,000	6	20-instal.	May 3
Halifax, N.S.	1,000,000	5½ & 6	Various	May 6
Saskatoon, Sask. ...	988,900	Various	Various	May 10
Minitonas R.M., Man.	50,000	6	30-instal.	May 11
Gilbert Plains, Man.	22,000	5½	30-years	May 18
Westbourne R.M., Man.	40,000	6	30-instal.	May 31

York Township, Ont.—Tenders will be received until May 3, 1920, for the purchase of $40,000 6 per cent. 20-instalment school debentures.

Halifax, N.S.—Tenders will be received until May 6, 1920, for the purchase of approximately $500,000 6 per cent. 10-year bonds, and $500,000 5½ per cent. 33-year bonds.

Minitonas R.M., Man.—Tenders will be received until May 11, 1920, for the purchase of $50,000 6 per cent. 30-instalment road debentures. John H. Cannon, clerk.

Westbourne R.M., Man.—Tenders will be received until May 31, 1920, for the purchase of $40,000 6 per cent. 30-instalment debentures. The bonds are guaranteed by the province.

New Brunswick.—The province is receiving tenders up till noon, May 1, 1920, for the purchase of $2,800,000 6 per cent. 10-year debentures, payable in Canada or New York. The issue is divided into two parts, one of $1,800,000 for permanent roads and bridges, and the other $1,000,000 for construction of St. John and Quebec Railway.

More Than Thirty Million Dollars

in interest will be paid to holders of Victory Bonds on May 1st. We suggest that the recipients put this money to good advantage by promptly reinvesting it in further Victory Loan Bonds, or in other high grade Government and Municipal Bonds. We offer a selection of these bonds, with a wide choice of maturities, and possessing the same facilities for prompt and convenient interest collection as do Victory Bonds. The yield ranges from 5.80% to 7%.

Motion Pictures and Profit

People in the United States and Canada paid $675,000,000 to see the "movies" in 1918.

They paid $800,000,000 to see them in 1919.

The growth of the Motion Picture Industry has been little short of phenomenal. Large, well-managed Motion Picture Theatres have proved most profitable enterprises.

We are offering the 8% Cumulative Preferred Shares of the Famous Players Canadian Corporation, launched to control not only a coast-to-coast chain of 31 large Motion Picture Theatres in Canada, but the first releases of all "Paramount Artcraft" films. It is one of the most promising enterprises we have yet financed.

Debenture Notes

Brantford Tp., Ont.—The council has decided to construct a new school at Cainsville, at the cost of $45,000.

Niagara Falls, Ont.—Ratepayers have carried a by-law authorizing the raising of $250,000 for a trunk sewer.

Brantford, Ont.—A local contracting firm has offered to accept civic debentures in payment for the construction of St. Paul's Ave., subway, which will cost $40,000.

Woodlands R.M., Man.—On May 8 next, ratepayers will be asked to vote on the raising of $7,000 by 6 per cent. 20-year debentures, for the purpose of constructing a two-roomed school house.

Ottawa, Ont.—The private bills committee of the Ontario legislature has given the city authority to issue debentures to the amount of $2,750,000, without a vote of the people, for the new city hospital.

Quebec.—It is understood that four important tenders have been received by the province for its $5,000,000 6 per cent. 5-year bonds, but the award has been postponed for a few days. It is intended to float the loan within the province.

Montreal, Que.—The aldermanic caucus has passed by-laws for a loan of $3,000,000 for working capital, and a loan of $500,000 in connection with the aqueduct works, and has also appropriated $600,000 for new fire equipment, sprinklers and flushers, and materials and supplies.

London, Ont.—The private bills committee has given the city power to borrow $140,000 for a new bridge over the Thames River, and $100,000 for storm sewers. A clause permitting the city to borrow $105,000 for the London and Port Stanley Railway, has also been approved.

Toronto, Ont.—The council, on the recommendation of the Board of Control, will make application to the Ontario legislature at its present session to issue debentures to the amount of $1,378,167, to defray the cost of works recommended by heads of the various departments and included in this year's estimates.

Hawkesbury, Ont.—The town's issue of $95,000 6 per cent. 20-instalment debentures, *The Monetary Times* understands, has not been sold. No tenders were received, but two bond houses offered to take a month's option at 94 and 95. No advice is given as to the names of those who made the offer.

Lethbridge, Alta.—Ratepayers will soon be called upon to vote on a by-law, providing the board of public utilities gives its sanction, for the raising of about $216,000. This sum, incurred during a period of years antedating the life of the present council, has been expended in amounts not large enough to be covered by a single debenture and there is no debenture to cover the same at the present time. The intention of the council is to obtain debentures for the same and apply the amount to the sinking fund.

British Columbia.—Loan bills passed by the legislature at the last session, aggregate nearly $19,000,000. The first bill was to repay the bank $4,800,000 on Pacific and Great Eastern work; the second, to borrow $4,000,000 for the completion of the Pacific Great Eastern to Prince George; the third, to borrow $2,000,000 for the purposes of the land settlement board; the fourth, to borrow $3,000,000 for the removal of the university; and the fifth, to borrow $5,000,000 for roads.

Saskatoon, Sask.—In connection with calling for tenders for sale of debentures as authorized by the council, application has been made to the Local Government Board for permission to increase the rate of interest on these debentures to 6 per cent., with the exception of $18,000 under by-law No. 616, which bear 5 per cent. Advice has been received from the secretary of the board that the city's application will be favorably considered on receipt of a by-law or resolution to the council.

Welland, Ont.—The council will issue debentures to the amount of $100,000 to cover the cost of erecting a new school.

Winnipeg, Man.—Local improvements now totalling some $560,000 with allowance for additional improvements, have been urged by the ward representatives as essential. Capital expenditure requirements for 1920, as submitted to the finance committee, total $1,406,062. City treasurer Thompson urges extreme caution in borrowing, owing to the unsettled condition of the money market, and advises that loans be cut down to the least possible amount this year.

Bond Sales

Sarnia, Ont.—The report is received from Sarnia that the $50,000 debenture issue, authorized by the city at the request of the Hydro-Electric Commission, has been sold.

Orillia, Ont.—The town council has given a month's option to Messrs. Wood, Gundy and Co., for the sale of $90,000 5 per cent. 20-year waterworks debentures at 90.20.

Saskatchewan.—The province has sold to a syndicate, comprising A. E. Ames and Co. and the Dominion Securities Corporation, of Toronto, and Halsey, Stuart and Co., of Chicago, an issue of $1,000,000 6 per cent. 4-year bonds at 102.20. The syndicate has also obtained a ten-day option on another $1,000,000 at the same price. At this price the province pays about 5⅜ per cent. for its money. The bonds will be offered in the United States.

Sherbrooke, Que.—The city has disposed of to Credit Canadien, Inc., 6 per cent. 15-year serial bonds to the amount of $577,000, at a price of 98.53. In all, the city have somewhat over $1,000,000 in bonds to sell, but the above mentioned block was the only one disposed of and the proceeds will be used for waterworks, electricity plants, etc. Tenders received were:—

Credit Canadien, Inc.	98.53
Provincial Securities, Ltd.	98.07
Versailles, Vidricaire and Boulais	97.25
Wood, Gundy and Co.	96.25
Dominion Securities Corp.	96.23

SPRING OUTLOOK ON WEST COAST

Greater Agricultural Production Expected—Salmon Run Promising—Several New Developments in Shipping Facilities and in Manufacture

(Special to *The Monetary Times.*)

Vancouver, April 29, 1920.

BUSINESS conditions in Vancouver this spring are good. The feeling prevails that business is on a sounder basis than for some time. The biggest industrial effort in British Columbia at present is the agricultural one. Fruit trees and bushes are in bloom, garden rhubarb is plentiful, garden vegetables are above ground, potatoes in places about Vancouver are in blossom and new home-grown potatoes are expected on the market before the end of May; Chinese truck growers on the Fraser delta have put in an unusually large crop. Local potatoes are selling, wholesale, for from $110 to $125 a ton. The agricultural production of the province last year reached sixty million. Lumbering is busy and high prices prevail, business in British Columbia totalling seventy million last year.

This year finds the biggest spring run of salmon up the Fraser for years. Anxiety is felt by cannery owners as to the final outcome of Dominion government fishing regulations. The consensus of opinion is that these regulations are not for the good of the British Columbia fishing industry.

The tourist industry is greater in Vancouver, this spring than it has ever been between seasons. Twenty-two conventions are to meet in Vancouver during 1920. Summer camping sites for motorists are being prepared. $5,000,000 of income was estmated from tourist industry last year, and this amount will be trebled, at least, during 1920.

Building is fairly brisk in Vancouver City and wholesale and retail trade is active. Two large additional docks are being built which will provide much needed dockage facilities. The British Columbia Electric Railway is lengthening its lines and doubling trackage in the suburbs. New industries are coming in, new factories are being built and old ones enlarged. Real estate and demand for houses is quite active and rents are getting back to a more equitable basis.

CORPORATION SECURITIES MARKET

Two New Bond Issues Announced—Granby Consolidated Convertibles Offered in New York—New Stock for Royal and Merchants Banks

ACTIVITY in outstanding bonds on the Canadian stock exchanges centred chiefly around Dominion Iron and Steel and Steel of Canada. Trading in other issues was not very heavy. Most issues showed strength at the close on April 28th, making fractional gains, as compared with the previous week.

Included in the new issues this week is that by Messrs. Nesbitt, Thomson and Co., Ltd., who are offering $600,000 McCormick Manufacturing Co., Ltd., 6½ per cent. 20-year first mortgage sinking fund gold bonds, dated March 1st, 1920, and due March 1st, 1940, privately at 97¼ and interest, to yield 6¾ per cent. Public offering will be made shortly. The McCormick Manufacturing Co., Ltd., of London, Ont., was established in 1858 and has been in profitable operation since. The company's present plant is of specially modern and up-to-date construction, and contains over eight acres of floor space. The company is capitalized at $2,000,000, common stock, of which $1,200,000 has been issued, and $600,000 first mortgage bonds (present issue).

The unsold balance of $2,000,000 8 per cent. cumulative participating preference stock of Chemical Products, Ltd. (par value, $100 per share), will be offered in about two weeks by Messrs. Graham, Sanson and Co. Chemical Products, Ltd., operates its main plant at Toronto, Ont., on the property formerly owned by the British Chemicals, Ltd., operated by the Imperial Munitions Board. The small auxiliary plants will be located elsewhere for the purpose of supplying the necessary raw material for re-manufacturing from the various sources of supply, and thus places the business in an independent position from a chemical manufacturing standpoint. The company is capitalized at $2,000,000 preferred stock (this issue) and 100,000 shares of common stock (no par value).

Famous Players Offering

Public offering is now being made of the $4,000,000 8 per cent. cumulative preferred shares of Famous Players Canadian Corporation by the Royal Securities Corporation, and a copy of the prospectus is contained elsewhere in this issue. The issue prospectus indicates operating theatres to the number of sixteen, mostly located in Ontario and Western Canada, earnings for which for the current year are estimated at $200,000. It is understood that this figure is being largely exceeded; in fact, earnings of $350,000 for the present year, an amount more than sufficient to pay dividend requirements on the first preferred shares, without benefit of increased earnings from now construction, are forecasted on good authority.

Concurrent with this announcement by the Royal Securities Corporation comes the declaration of the initial dividend of 2 per cent. for the current quarter on the 8 per cent. first preferred shares. Dividend is payable on May 1st, 1920, to shareholders of record April 26th.

New Bank Stock Issues

The Royal Bank of Canada has announced its intention to issue $3,400,000 new capital stock to shareholders after May 1st. The new stock will be issued to the shareholders on the basis of $150 a share. Paid-up capital of the Royal Bank is at present $17,000,000, and the new allotment will be made to the shareholders in the proportion of one share of new stock for every five shares of old stock. It is chiefly for the development of the home business that the directors have deemed it advisable to make the new issue. Particulars regarding the time and method of payment for the new shares will be announced on May 31st, when the allotment will be made, but it is expected that the first payment of 10 per cent. will become due on June 30th and the balance at the rate of 10 per cent. monthly thereafter. In the meantime, shareholders who may so desire will have the opportunity of adjusting the number of shares held by them in order to obtain the full benefit of the new issue.

Announcement is also made by the Merchants Bank of Canada that a new stock issue would be made to the extent of $2,100,000, which will bring the stock of the bank up to $10,500,000. This new stock will be issued to shareholders at the rate of $150 a share, the issue being allotted at the rate of one new share for every four already held. Like the Royal Bank, the issue is made for the purpose of meeting the growing business demands of the bank.

Abitibi Shareholders Ratify Issue

At a special meeting of the Abitibi Power and Paper Co. on April 26th, in Montreal, the plan to split the shares and reorganize the company was ratified by the shareholders. With the final ratification by the shareholders of the splitting of the present common stock, the reorganization of the company will be completed. The shareholders, however, will not be advised until a later date, on which their new stock will be transferred into their names in lieu of their present holdings.

The by-law, which was adopted, authorized the issue of 250,000 shares of no-par-value common stock in place of the 50,000 shares of $100 par value stock presently outstanding. It is expected that the old stock will continue to be traded in on the stock exchange until the division of the shares has actually been made on the date to be announced later.

Granby Consolidated Mining Bonds

Shareholders of the Granby Consolidated Mining, Smelting and Power Co., at a meeting some time early in March, approved of the proposal of the directors to issue bonds to the amount of $2,500,000 and to increase the capital stock from $20,000,000 to $25,000,000. It was decided that the new issue of stock would be held in the treasury, and shareholders would be given the opportunity of subscribing for the new 8 per cent. 5-year bonds at par. An underwriting syndicate was also formed at the time to dispose of the bonds which were not subscribed for by the shareholders, and this syndicate is now offering the unsold balance of the issue in New York at par to yield 8 per cent.

The bonds are convertible into stock at $55 per share, or two shares for $110, par value of bonds, and the proceeds of the sale will be used for the purpose of extinguishing current liabilities incurred when the company was provided with its own coal and coke facilities.
